I get some pretty tasty storms here in Chicagoland, too. And some wrath-of-God electricals. Last year, I had my ICE active splitter taken out by a lightning strike about 3 miles from here--the second time in as many years.

Now, I've got surge surpressors and arrestors on everything in the building, but during some storms, they even recommend we take the building offline until the storm has passed.

Generators sell briskly here.

Where dwellest thou?

I grew up in Massachusetts; we had lotsa t-storms there in summer. They rarely, but occasionally, became tornadic (there is a localized tornado maximum in Central Mass), and would also rarely have hail up to about marble size. The main characteristics were wind, and a thoroughly unbelievable frequency of lightning. The storms would often bring a staccato roar that would not let up for upwards of an hour at a time. One fabulous evening, after accompanying my friend on his paper route, we bought ourselves pizzas and went to eat them on the front steps of City Hall in Gardner, Mass, in the balmy evening air. Just as we got under the overhang, the atmosphere opened up and the rain came down in ceaseless torrents. Then the lightning - about every two seconds for 45 minutes straight, earsplitting racket emanated from this stately storm that made communications nearly impossible. It did, however, allow us to tell whose pizza was whose in the dark. It was hard riding home on my bike that night :-)

I went to school in Lubbock, TX - for meteorology - and there discovered tornado chasing. The storns there were not particularly electrical compared to New England (there was still some electricity, of course) - but they were of a different nature, I think, large isolated supercells that spun themselves into twisters with fair regularity. True bliss. I got walloped by hard golf-ball hail, smashed by baseball-sized slushy nuggets, we got spun up in an F-1 tornado (in a car, courtesy of a fun but somewhat foolhardy driver whose current reports can be seen occasionally on Weather Channel), and

once - two other fellows and I were lightning-struck near Archer City, Texas, while preparing to film. One of the strangest experiences of my life.

Here in California, storms are both weak and infrequent. Bummer.

Dear RHF,

Thank you for posting this information. It cannot be stressed enough in this day of "solid-state" and "integrated" circuits. While it wasn't as necessary to unplug older tube equipment, I always did so, and, nowadays, of course, I still unplug every electronic item I own (including microwave ovens, clothes washer and dryer, etc. in addition to all my radios/TVs/hi-fi equipment) whenever I am done using it.

What seems like a "pain" at first becomes second-nature after a short while and, believe me, the first time you get a "near-miss" lightning strike (or any other kind of "surge" down the line), and you hear some neighbor's "sad story," you will be glad you unplugged everything (and SAD if you didn't!). Surge protectors are good insurance (and I use them as well as UPSes; I even have a "whole-house" surge protector on my main circuit board) but they do not afford the same protection as unplugging.

This small effort can save one hundreds (or even thousands) of dollars as well as afford great peace-of-mind.

Thanks again!

Best,

Joe

1721. Radio New Zealand Extends Podcasting Service

Newsgroup: rec.radio.shortwave
Date: 2006-06-13 22:20:34 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <4f8s16F1icl44U1@individual.net>
Source record: 78554

12 June 2006
Press Release: Radio New Zealand Limited

Radio New Zealand is to significantly extend the range of National Radio programmes available via podcasting following a very successful three month trial of the new service.

From Monday 12th June listeners will be able to download their favourite interviews and programme segments from Nine to Noon and Afternoons with Jim Mora directly from the Radio New Zealand website www.radionz.co.nz .

Sunday Morning with Chris Laidlaw featuring Insight and Mediawatch and The Arts of Sunday will also be added to the list of daily and weekly podcasts which already includes Saturday Morning with Kim Hill, This Way Up, Our Changing World and Concert FM's Upbeat programme.

Announcing the extension of the service Radio New Zealand Chief Executive, Peter Cavanagh, said the response to the podcasting trial had been nothing short of phenomenal.

"Radio New Zealand is leading the way in using new web-based technology to allow its listeners to hear their favourite programmes whenever and wherever they want.

"Over the past three months we estimate that there have been 400,000 programme downloads from the Radio New Zealand website - and the popularity of the new podcasting service is growing at more than 10% per week.

"The rapid growth in sales of iPods and MP3 players means that more and more people are choosing to download their favourite radio programmes and listen to them when they want to hear them - rather than being restricted to listening live when we choose to broadcast them.

"Radio New Zealand's audio-on-demand and podcasting services have proved particularly popular with New Zealanders living abroad who can now stay in touch with news and issues from home by listening to their favourite shows on the web. "

Radio New Zealand's website records more than half-a-million page impressions each month, with about 60% of the traffic coming from overseas audiences.

www.radionz.co.nz

And this from
http://m-net.net.nz/index.php?option=com_content&task=view&id=328&Itemid=75

Radio NZ launches daily podcasts
Campbell Gardiner
Tuesday, 13 June 2006

Following a three month trial national broadcaster Radio New Zealand has launched podcasts of some its daily programmes, including Nine to Noon, Afternoons with Jim Mora and Nights with Bryan Crump. This is in addition to weekly podcasts already offered by Radio New Zealand.

The podcasts are supported by an anycast cluster of New Zealand-based servers and a US-based server.

New media manager Richard Hulse says there have been 400,000 podcast downloads since February and downloads are growing at 10 per cent each week.

He says ISPs who don't peer with it in New Zealand may see an increase in traffic on their international circuits. "For users it will be the same quality as everyone else but download speeds may be limited by their ISP's international connectivity."

The programmes vary in length and Radio New Zealand has segmented these so users can download select pieces or the whole programme.

Radio New Zealand chief executive Peter Cavanagh says growth in sales of iPods and MP3 players is driving use of podcasts and it is "leading the way". "More and more people are choosing to download their favourite radio programmes and listen to them when they want to hear them - rather than being restricted to listening live when we choose to broadcast them."

not likely

you claim we are ina Neo Nazi dictatorship and yet you can still post
the crap you do about the aleged dicator

if this werew neo Nazi dictaorship you would have disapeared a long
time ago
indeed your constant refuseual to accept the rule of law aplying in the
this is over the top
your claims that GW 's supportors think he is a saint is anothe r I
uspport the president by and large although I have issues withsome it
but then their has never been a president i havn't had issues and never
will be I expect (unless some variant of Jack Ryan were to happen to me
and I became president, truely something of a nightmare there)

I generally don't unplug or switch off anything, but when I hear corona discharge on my radios as some t-storms cause, I get goose bumps and start unplugging and switching off things like a mad man. Larger Higher antennas seem to collect a charge more. A couple of my antennas aren't DC ground I and can spark the coax to ground with some storms. Freaky.

Hey, new way to charge up a capacitor.

one of the disadvantages of the internet is that any asshole can post an opinion on the E1 even though he has no qualifications for making such assertions.
In addition to people who are intelligent like Guy Atkins, there is another source who people should not argue with in this case.
Dave Z and Larry Magne both assert the E1 is outstanding !

The E1 should be a nice radio to play with. I'm interested on how it
performs on SW with the whip antenna.

You think the AMBCB will be OK with the whip or do you have plans for an
external antenna like a small tuned loop?

That AR8200 scanner should keep you busy for a while.

The E1 specifications and operating features make it out to be a good
receiver. I remember having a favorable impression of it when
information became available about the unit.

A refurb at $399.95 sounds like a good deal.

Brian Hill is getting one soon so I'm sure we will hear about it from
him.

People that are just Trolling for an argument are best Plonked. Some
people are just not worth reading.

Unless you people killfiled me, I ran a FFT on file and posted the
following:

It is a tone at 15Khz. There are some artifacts at lower frequencies,
the strongest at 3024hz.

I can upload the spectrum, but this is really old news at this point.

If you don't mind another adjustment build a tunable loop a couple feet
in diameter with another coupling loop inside it with coax to the
antenna jack.

How come they dont have cell phone ring tones that sound like real phone bells? Cell phone ring phones sound like a chicken being strangled.

Two thoughts:

1. First of all, not all diseases of the ear will take the high tones -so since I am a teacher with a low pitch hearing loss -- guess I'm in luck!!! There are several diseases that will take the low tones - Meniere's Disease is one of those. Also, if you are wearing a hearing aid, it will be adjusted for the tones that are missing. Thereby, foiling the little darlings plans. However, it is good to know that creativity and ingenuity are alive and well in the youth of today -- now if they could just focus that drive - maybe one of them could come up with a cure for cancer.!!!

2. Second, is there somewhere on the web that you can get a copy of these ring tones to listen to. It would be an interesting experiment in class? Thanks.

Superman leapt from comic books to radio serials in the 1940s, and on to
the television screen by the 1950s. At the beginning of each episode a
breathless announcer proclaimed that the caped superhero would once
again defend "Truth, Justice and the American Way." Who would have
thought that this great American hero was a Canadian creation?

RHF - why do we need such a long disseration on this subject ? Just
unplug the f'ing AC power cord - well, da ! Your postings are becoming
a real waste of time !

GSW,

Only -IF- You choose to read them . . . Think About It !

It's "On-Topic" and in a Half a Day it generated 30+ Replies.

Plus I did not have to Insulat anyone by saying they were
Stupid for having a Plactic Cased Radio and Dumb for
Paying that much for one.

gsw - it's nice to be nice ~ RHF

When I worked downstate, Blue Mound was in my ADI. That area took
some magnificent storms while I was there.

According to colleagues who still live there, it still does.

....anyone who would plunk down $400 plus change
for a 'refurbished' (Chinese made) Eton E1 needs to
have their respective head examined. This radio is NOT the
successor to the Sony 2010 boys and girls.

....and besides, why on earth would anyone spend this
much cabbage on a short-wave radio when, for the most
part, short-wave broadcasting is chock-full of complete
paranoid whackjobs like Alex Jones, Racist separatists
like 'Pastor' Pete Peters and complete whackjobs like
Brother RG Stair ??

No thanks folks. :) I'm not gonna spend $400 to buy
a short-wave when every-other-program on the dial
is either some PAYtriot scam artist trying to sell you
outrageously priced 'numismatic' gold coins of dubious
pedigree, carnival sideshow barkers who claim that their
"South Pole Magnetic Charged Water" (..just $29.95 a gallon)
will cure you of everything from baldness to stinky
feet...and of course Rev Billy Bob of the 1st Church of The
Creator in West Bumfrigg, Idaho who says that Jeezus H Christ
was a blond haired/blue eyed Aryan who fathered racially
pure white children via M. Magedeline in France......

1795. Ambitious new "History of Wireless" published

Newsgroup: rec.radio.shortwave
Date: 2006-06-14 05:44:39 UTC
From: Mike Terry <miketerry73@btinternet.com>
Message-ID: <4f9m27F1ham4tU1@individual.net>
Source record: 78678

History of Wireless
by Tapan K. Sarkar, Robert Mailloux, Arthur A. Oliner, Magdalena Salazar-Palma and Dipak L. Sengupta
Published 2006 for the IEEE Press by John Wiley & Sons, Inc.
ISBN 0471718149
680 pages - US$59.95

From the back cover: "Premised on the idea that one cannot know a science without knowing its history, History of Wireless offers a lively new treatment that introduces previously unacknowledged pioneers and developments, setting a new standard for understanding the evolution of this important technology.

"Starting with the background - magnetism, electricity, light and Maxwell's Electromagnetic Theory - this book offers new insights into the initial theory and experimental exploration of wireless. In addition to the well-known contributions of Maxwell, Hertz and Marconi, it examines work done by Heaviside, Tesla and passionate amateurs such as the Kentucky melon farmer Nathan Stubblefield and the unsung hero Antonio Meucci. Looking at the story from mathematical, physics, technical and other perspectives, the clearly written text describes the development of wireless within a vivid scientific milieu.

"History of Wireless also goes into other key areas, including:

The work of J. C. Bose and J. A. Fleming
German, Japanese and Soviet contributions to physics and applications of electromagnetic oscillations and waves
Wireless telegraphic and telephonic development and attempts to achieve transatlantic wireless communications
Wireless telegraphy in South Africa in the early twentieth century
Antenna development in Japan: past and present
Soviet quasi-optics at near-mm and sub-mm wavelengths
The evolution of electromagnetic waveguides
The history of phased array antennas

"...Written in a clear tone with a broad scientific audience in mind, this exciting and thorough treatment is sure to become a classic in the field."

[Thanks to RF Cafe for the pointer.]

MM,

Thinking Positive About "My" Eton E1 Radio !
-and- Simply Enjoying the Listening Experience :o)
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/3017

Many people 'bashed' the original production of the
Grundig Satellit 800 Millennium Radios for poor quality
-and- Had Valid Issues {Criticism} with the early build
and technical flaws of the Radio.

Today many more consider the Grundig Satellit 800
Millennium Radios to be a very good Shortwave
Program Listening Radios that are enjoyable to
Listen to.

The Eton E1 AM / FM Shortwave Radios with 'optional'
XM Satellite Radio is 'not perfect' -but- it does fill a
nitch at the High-End of the 'portable' AM / FM Shortwave
Radio market and does offer some interesting features
for the Shortwave Listeners.

It is my humble opinion - that like the Grundig Satellit
800 Millennium Radio "In-Time" the Eton E1 Radio will
earn the respect of Shortwave Listeners (SWLs) for
being good at what it does - in the package of a 'portable'
AM / FM Shortwave Radio.

REVIEWS AND INFO ABOUT :
The Eton E1 AM / FM Shortwave Receiver
with 'opinional' XM Satellite Radio :

* Monitoring Times "First Look" Report / Review
of the Eton E1 AM / FM Shortwave Receiver
with 'opinional' XM Satellite Radio

GA - It is always a 'wonderment' to read your
DXpedition Reports from Grayland ~ RHF

WRT - PNG and "Malaria" vice WNV here in the USA :
All Politics is Local and the Local News is often what
Sells the News Papers and TV & Radio Air Time.
- - - What 'interests' the Readers, Viewers and Listeners
-vice- what informs them about the world that they live in...

While a 25% 'incident' of Malaria is bad in PNG :
There are now whole Countries in Africa where
the HIV Infection Rate is in the 40% Range;
with the potential for the population of Africa
decreasing over the next 30-Years or longer.

Interesting update on that radio, although a quality issue like a wobbly optical encoder is worrisome on a radio in that price range. But more to the point just exactly what is a "Pro Opinion" and why should it be given any more credibility than than the collective opinions of users on on eham, radiointel, Yahoo or this forum. Also, because Eton appears to be the single largest advertiser in PBWR occupying several pages in the version I read, should reviews of their radios be taken as truly independent?

I would take the well written opinons in PBWR to be just that and nothing more. They are another source of information about radios but not THE source.

That said I am impressed by the E1 and am seriously considering buying one. But my decision will be influenced more by the opinions seen on fora than one review in PBWR.

Mikie, Mikie, Mikie - who cares what these guys think, the E1 is not worth the money, per MY review:

NOTE: Watch out - the batteries blow up, when used with the AC adaptor !

So, what is the point of plopping down $500 for this radio - there is not much of interest on shortwave anymore, one can buy a $25 Radio Shack digital PLL AM/FM radio for AM DXing (THE E1 DOESN'T EVEN HAVE AN INTERNAL FERRITE-BAR ANTENNA, OR COME WITH A SATELLITE ANTENNA !), and one can buy a satellite radio for $50, now. Also, after getting $500 in-the-hole, one gets to shell out a monthly fee for satellite radio, plus an activation fee - a bigger ripoff than cable T.V. ! Evidentually, there are major technical problems with the actual satellites, so its future is in question !

So, what is the bottom-line ? Well let's see, $500 for the radio, probably another $100 - $200 for the AM and satellite external antennas, $9 - $12 monthly fee, and the activation fee. Is this another blunder by Grundig/Eton/Tecsun, or a total ripoff - I suspect a bit of both !

This baby, I believe, is assembled in India, while the rest of the Grundig/Eton/Tecsun junk is made in China. I wonder, if the E1 is as cheap as, the Grundig S350 ?

This is a copy of a post from gearlog.com (the BBC and "Voice of the Andes" are now gone from SW, too):

Shortwave Eton E1
Posted by: Larry N.
Monday, October 31, 2005 8:03 PM

David,
I am shocked your would recommend this new radio from Eton.
Honest?, DO YOU KNOW WHAT IS WRONG WITH IT?
It does not have Digital Radio Mondale! Who in 2005/2006 would spend

$500.00 for a top of the line portable without it? In few years the shortwave part of this radio will be useless. DW is leaving analog shortwave by June 2006. Radio New Zealand by the end of December 2006.

I would hope you would admit your mistake and if not withdrawing your recommendation at least make note of the lack of Digital Radio Mondale and why that is important!

73
Larry

AND Mikie, I just read that the major stockholder in XM Satellite Radio sold off its shares - it may go under ! A pretty receiver (aren't all the Grundig/Eton/Tecsun junk), that will make a nice FM radio.

Well RHF, if you, "HAVE to think positive about your E1", then you have started to question your own judgement, and are having to convince yourself that you made a good decision to buy this over-priced already out-dated receiver (we all know you didn't). You guys are on the defensive, reading all the reviews, which is something you should have done in the first place ! Keep trying to convince yourselves !

HA HA HA !!!

I'm out there and lovin' it !!!

1808. Markie the faggot!

Good point, John. I haven't read any reviews that denied that the E1 is a fine portable. What I have read are reviews that find a flaw here or there. For example, some have said that the E1 is not as sensitive on SW as some of the Sony portables, while others have said that the E1 cannot accommodate as much of an antenna as the S800s. These reviews then go on to assert that the E1 is nevertheless a fine radio. Overpriced, perhaps, but so are many other portables. However, the reaction to some E1 boosters to these reviews is bizarre. I'm afraid that the E1 is taking the place of the S800 as "the portable about which one is only allowed to speak praise". I even encountered one guy who refused to believe that the E1 had no internal ferrite antenna. He insisted that there was an excellent ferrite loop, but Eton had "reasons" for wanting to deny that it was there. This is sheer craziness.

You'll never get 100% consensus on any radio. That being the case, people should be free to voice their opinions without getting trounced on. And if you like the E1, you should just enjoy it and not feel defensive. More power to you, I say.

Steve

Yes, grail radios do seem to become sacrosanct among some owners. The
Sony 2010 reached a similar status for quite a while. As a former
owner (5 years) I can tell you it was a good portable radio, and it
probably set the benchmark for a complete package of high-tech features
that were built to a high standard of quality. It had some
shortcomings, but on balance it was a fine package. The same general
conclusion may very well hold true for the E1.

I think I got plans for just such a loop here somewhere? I think it also
included a preamp and preselector cicuit? Kinda like a Kiwa type loop. Ever
since I moved stuff is still in boxes and scatered everywhere.

We drove through Marysville in April on the way up to Feather Falls.
Nice little town - the kind of place I'd like to live, if it wasn't in
California (which I am totally getting sick of, at least the big city).
I'm down here in San Lorenzo, near Hayward - boring, traffic-jammed,
doofus urbia-suburbia. Yecch.

i can definitely hear the 15 khz. it almost perceive it as a hiss or
something rather than a tone. it's hard to describe. it's clearly on the
edge of my audible zone.

i have spent dozens of hours with signal generators and spectrum analyzers.
i can hear 18 khz in some cases, at least when i was 25 years old. remember
that the level or amplitude of the tone is everything. Fletcher-Munson
curves.

to my ears, it sounded like a dirty tone. so perhaps the sine wave
generator was outputting something similar to square waves. or the
compression to mp3 caused mid artifacts.

Hi, Lisa,

Check out Universal Radio. I bought bought some RCA-PL259 converters
that I use to connect my MFJ 959C Tuner/Preamp to my Ten-Tec RX-320.
Hope this helps.

Regards,

Ed

agreed. i read some studies of hearing loss in pro sound engineers. they
mix at very high levels which causes loss eventually. anyway, the midrange
is the most prominent range to be affected. unfortunately the midrange is
also the most important for human communication (300 hz to 3000 hz).

i agree. most cell phones sound very cheesy. the tiny buzzer or speaker
outputs a crappy sound too. they need high end speakers.

do they use piezoelectric?

The 803A is a good place to learn on, Lisa. There are enough
of them around for an inexpensive price that it's worth it to
give it a try. Besides, if it works, you've got a decent
radio.

I, myself, never tried to tinker with my DX-440 (the Radio
Shack equivalent). However, I've read numerous times
that it's a tinkerer's dream.

i think the easiest way to make these is with good software. i suspect cheap software tone generators output stuff with artifacts. it's easy to mess up digital generation of waveforms.

i bought an audio generator for $7 at a hamfest. i feel stupid for selling it, because i could use it for a ULF transmitter.

you mean Tubular Bells. the master track contains a hidden CW signal from a
ULF transmitter. it was leaking into the recorders.

anyone have a copy of Tubular Bells? i want a WAV copy instead of an MP3,
so i can run it through a spectrum analyzer.

sorry was typo

should read "good" built in speaker and audio section

this is so I can listen from say across a small room or
inside cabin

indeed the reason i think the curret wae has gotten quite so out of
hand is that at least one of the targets (myself) has responded but not
in the manner they wanted or expected so they are engaged on a road of
trying to escalate till they get the response they want/need
>
> not sure what else I can say here, but no matter.

sooner or later something will break perhaps what is left of their
minds prehaps something else

I know I have beaten Robeson and I can go teo to teo with Wismen as
long as I feel like

part of the problem for them is a I guess once they got a response to
posting addresses and phone number Wiosmen has been posting my father
in law number for several week without him geting a single harrasing
call meaning most folks truly don't care who I sleep with enough to
bother him

Of course I have always sais the shrillier the arguement the weaker the
case

and these guys are sure getting shrill

and presented with the choice of being only unable to use USENET myself
or making all the "good" folks jion in being unable to usenet well

misery loves company

hey, you are on a boat or yacht? years ago, my granddad had a yacht. he used VHF, LORAN, Yaesu 757, etc. $2000 invested in the Yaesu, and only $100 damage to the PL259 and dial.

they do make marine radios for VHF which are water proofed. there might be some shortwave and HF equivalents, but they are probably expensive.

at $100, just get a cheap shortwave. you can always replace it and it's less than the cost of a professional marine rig.

Gravity

1844. software defined radios

Newsgroup: rec.radio.shortwave
Date: 2006-06-14 17:00:36 UTC
From: gravity <gravityzrainbow@yahoo.com>

Source record: 78727

anyone use SDRs?

i am looking at the Ciaoradio. it is 349 Euros, and i think it comes with the software. i may invest in the software alone at first.

i would like an RFspace SDR, because it can record 160 khz band to hard drive. both that and the Gnuradio hardware are too expensive.

i am using my sound card for DC to 22 khz reception.

my Sony ICF2001 is doing poorly. i suspect there is corrosion in the potentiometers. and i may have blown out the front end somehow. i hear you can mess up a front end and the radio will still work, but you can't hear much of anything.

my choices now are:

1. repair the Yaesu transceiver
2. use the Yaesu FRG7 receiver
3. get a Sangean or Ciaoradio
4. focus on ELF with an Maudio card

i'd love to have an SDR, but i still want to decode RTTY and do other things. so a gen purpose receiver may be easiest.

Gravity

1845. SDR (part II)

software defined radios are the future. imagine having plug in modules that you can buy. you can cover DC to 30 Mhz with the core radio. then you add transmitters and VHF.

you could decode digital modes, and there would be a programming language so that you can decode new modes e.g. military ELF. you could receive QRSS, WOLF, and exotic modes.

the closest thing i know of is the Gnuradio setup, although i'm sure the military has similar equipment.

well, it works with some. after a while though, it ceases to be effective
(the tolerance level goes up so to speak).

I'd say your in-law has been rather lucky. I have experienced first hand what happens when a phone number gets broadcast across 11 meters (200 hangup calls in less than an hour). the person that caused that situation lost both his phone service and his freedom (for about 9 months)

too bad all the trolls drove out all the greybeards. it really would have been nice to have some actual technical discussions with real teeth and real meat in the subjects. anymore, its just the trolls and the never ending battle to keep them under the bridge.

actually, the core radio (properly designed) can do far more than 0-30 Mhz
(try more along the lines of 0-500 Mhz)

Well, I worked at Ft. Meade for 10 years, as a software engineer, and
it is full of dysfunctional people. Pretty boring place to work - it
is not what people think. Now
those fuckers have everyones phone records (except Qwest), and they are
going back-door through the DOJ, to get ahold of our Internet records.

He was likely the HARDCORE NUTCASE I saw
at Dayton last month wearing the mini-quad on
his hardhat along with purple (!!) bicycle
pants and combat boots and a Kenwood shirt.

Jeeze! Between all the obese hams zipping around
in electric scooters and the knucklehead ham geeks
who dress WORSE than black-assed coon rappers
I'd say ham radio and it's 'poor sister' hobby of SWL
both will dwindle to a fraction of today by 2015.

The only real achomisment in this case was to convince my Father in law
that prehaps the precations I have taken for years are not so paranoid

oh yes saying anything one minute according to them I am Nazi (despite
being Jewish) the next memeber of the KK then I am into sex with black
people (without explaining how My alegedly she male wife is polish not
a lot of black folks of polish decent)

yep they break out which realy drive the nuts crazy when it happens

Personaly my gaol is to be around for the finish final finish of the
Code test and then if the content is the same as we see now i'll be
outsa here

so folks if you realy me gone write the fcc and your congress people to
urge the FCC to finish the R&O

1854. Grimeton Radio/SAQ transmission July 2nd 2006

RHF - Actually, I smile everytime I hear one of you suckers have pissed away $500+, for this already out-dated receiver ! And what did it get you ? Nothing ! Got to have, "the latest and greatest" - thinking with the wrong head ! You know the truth; that is why you always respond with personal attacks.

RHF - Actually, I smile everytime I hear one of you suckers have pissed away $500+, for this already out-dated receiver ! And what did it get you ? Nothing ! Got to have, "the latest and greatest" - thinking with the wrong head ! You know the truth; that is why you always respond with personal attacks.

Mariners,

Effective June 20, 2006 at 2242 UTC the Honolulu radiofax broadcast schedule will be significantly modified to accommodate new 24, 48 and 72 hour wind/wave and surface charts and other enhancements, as well as the addition of existing charts produced by the Ocean Prediction Center and Tropical Prediction Center. The new broadcast schedule will be broadcast on-air beginning June 06, 2006. On June 20, 2006 the broadcast time of the on-air broadcast schedule will be shifted from 1045 and 2018 UTC to 0100 and 1300 UTC. See the following link for details:

http://weather.noaa.gov/pub/fax/hfhi.txt

Thanks for the link, Ace. I should have included it while I was
checking the catalog on dead tree.

1865. Re: pro opinion on the Eton E1

Newsgroup: rec.radio.shortwave
Date: 2006-06-14 19:01:45 UTC
From: Joe Analssandrini <analssandrinij@yahoo.com>
Message-ID: <1150311704.919064.155520@c74g2000cwc.googlegroups.com>
Source record: 78598

Dear Mike,

You are quite correct in your assertions. I myself have been impressed by the specifications of the Eton E1. However, I have not bought one and do not plan to buy one in the near future for the following reasons:

It has no MW Ferrite antenna. This, I understand, is due to digital "hash" that cannot be corrected and would be picked up by such an antenna.

It has no handle nor is there any easy or convenient way of adding one to the radio.

Those two points are significant to me but relatively minor. The major problem I have is:

It does not feature DRM, DAB (Canadian or European), or IBOC. (I personally have no interest in any form of "pay" radio. In my opinion it is only a matter of time before advertisements become common on virtually all "satellite" radio channels and the listener will STILL be paying month after month for this "service!" After all, look at the cable-TV model where this has already happened.)

But I digress. In other words, in my opinion, the Eton E1 actually breaks no new ground. Its specifications, extremely good, nevertheless appear to show that the radio will peform just about the same as the Grundig Satellit 800. (And regardless of what anyone tells you, the Satellit 800, again extremely good, is not at all in the same league as, say, the Drake R8B, the JRC NRD545, or the AOR AR7030 Plus. This, by inference, would also apply to the E1 which does, however, offer far better performance VALUE for money than do the tabletops mentioned.)

I am waiting to see if Degen introduces their rumored new model the DE-1108 and if it does feature the newer modes of reception as well as offering superb performance.

However, I do understand, from owners, that the E1 is a good and satisfying set and that, if one does not already own a radio of this caliber, the E1, with all its "faults," is a good one to buy. After all, there has never been nor is there ever likely to be a "perfect" shortwave radio. And Eton has always been a very customer-centric company, offering superb service before and after the sale.

Should Degen's proposed new radio not live up to expectations, there may be a new Eton E1 in my future, after all.

Best,

Joe

P.S. Some people here have "complained" that Eton advertises heavily in PASSPORT TO WORLD BAND RADIO and this somehow makes pASSPORT's reviews "suspect." One need only READ many of the reviews of Eton/Grundig radios in PASSPORT to see that this "suspicion" is absolutely groundless. PASSPORT "calls 'em as they see 'em." PASSPORT is DEFINITELY the best SW review source we have and should be supported by all of us here, at least in my opinion. No one else tests SW radios in their own laboratories and prints their findings (and, as readers know, they often differ from manufacturers' own published specifications). And if Eton is a big advertiser, I say MORE POWER TO THEM! What OTHER company supports the shortwave listener the way Eton does?

1867. Disconnecting and Grounding the Antenna feed-in-lines when not In-Use

Newsgroup: rec.radio.shortwave
Date: 2006-06-14 19:11:21 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1150312281.491773.217830@y41g2000cwy.googlegroups.com>
Source record: 78600

Richards,

Disconnecting and Grounding the Antenna feed-in-lines when not In-Use
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/10169

IIRC - Someone here described diconnecting the Antenna
feed-in-lines at the point where they were entering the
House and then Walking them out about 25 Feet (or was
it Yards} away from the House. This would still leave the
feed-in-lines from the side of the House to the Radios
connected ? ? ?

USE GROUND BUS GROUNDING-OUT {SHORTING} :
If you have a Ground Bus and are disconnecting the
Antenna feed-in-lines from you Radio. You could mount
some SO-239 Jacks on the Bus and Screw the PL-259
Plugs on to them when the Equipment is not in-use.

PRE-SELECTOR GROUNDING-OUT :
As a minimum using an Pre-Selector or Antenna Tuner
with a Ground {Grounded} Switch Position will help
a little. When the Radio is not in-use switch the
Selector to "Ground". Go the Extra-step and diconnect
the Coax Cable between the Pre-Selector or Antenna
Tuner and the Radio.

REMOTE ANTENNA DICONNECT AND GROUNDING :
A very good Two-Position Antenna Switch mounted at
the base of an Antenna with One-Position Shorted and
Grounded and the Other-Position connected to a Buried
feed-in-line can also be a means of Disconnecting the
Antenna from the House and the Radios.
-Note- Still Disconnect the Coax Cable from the Radios
when not in-use.

do what is best for you and make it something
that you will consistently do - iane ~ RHF

Source record: 78601

Hello.

I should like to recommend the Sony ICF-SW7600GR to you. I take one of mine with me on all my travels and have found it to be a robust and excellent radio for use both at home and on trips. Its sound quality and volume is more than adequate for your purposes, and its sensitivity, selectivity (especially with its synchronous detection circuit), and overall performance is about "as good as it gets" in a small portable SW receiver. It is easy on batteries (I use NiMH rechargeables) and it can handle an external SW (only) antenna should you require one. It works unusally well on the MW (standard AM) band and on the FM band. And it has a good line output, in addition to an earphone output, for use with a stereo system if desired.

Amazon offers it and often has it at a sale price. (Right now they are selling it for $139.95 including shipping.)

I bought my first ICF-SW7600G (the predecessor model) in 1998 (I own two of them). I bought my first ICF-SW7600GR in 2001 (I now own five of them!). All have performed in a superb manner (and all have performed identically - a sign of good quality control) and have held up very well.

I think you'd be pleased with this radio.

Best,

Joe

Small loops that are tuned do not need amplification but of course need
to be adjusted as you change frequencies complicating operation.

Small loops that are untuned need amplification.

Large untuned loops do not need amplification.

The other radios you mention do not have built in antennas of any sort.

The E1 is designed as a portable radio.

I think analog front end and RF DSP demo is the way to go. I wish the
market would work more on such a product. I don't consider DSP in the
analog to be the solution. I'd like to see a FFT panoramic display in
the radio, or at least a port to feed it to a PC.

Were youput on the Earth to save us from ouselves or what?

The E1XM is a fine looking unit, has very nice tactile attributes and ergonomics, and performs better than 99.99% of the stuff that's out there. Better even than it's semiprogenitor the SW8, which cost more, had more bobos, and which still has a substantial cult following.

Don't knock success too often; makes you appear bitter.

> seen on fora than one review in PBWR.

The Pro opinion stems from the fact that they have test equipment and
the experience to make the measurements comparing the performance
against other radios.

You get the unvarnished good and bad from PBWR AND a relative feature
comparison to other radios in its class.

The opinions in PBWR are generated from a panel of people not just one
person so reading it gives you a broader perspective then you get from
a persons personal review. An example is that a noise blanker may not
work on the type of noise around one persons residence where the other
people on the panel had no problems. This will be reported in the
review.

I think PBWR is a great place to start for reviews of a radio comparing
it to others in it class and to then follow it up with reviews on the

Internet that you mentioned.

Obviously you need to weed out the nut case opinions. Some people just do not make sense like using the incorrect bandwidth for a mode and then reporting the sound is muddy as an example of a worthless opinion. If you read an opinion that states you need to spend days with a radio to learn how to use it to get the most out of it should be a good warning sign that it is not a good review as there are a small set of interacting controls and it only takes a minute to go through all the permutations of adjustments.

Hank G.,

Antenna Disconnect - Using Double-Pole Knife Switches
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/10173

If you are going to use Double-Pole Knife Switches :

1 - Mount the Double-Pole Knife Switches inside a
Metal Panel Box with a Lid and have your in-and-out
Antenna feed-in-lines going into that Box.

2 - Ensuse that the Metal Panel Box is well connected
to the Shack's Grounding System.

* Open-the-Lid to Set-the-Switch.

* Keep the Lid "Closed" at all times; other than
Setting the Switch.

CAUTION - If Transmitting - Insure that you have Turned-Off
the Transmitter Completely {NO-Power} before Opening the
Box and Setting the Switch [.] { Yes - RF Burns - Ouch ! }

there is safety and there is being safe - iane ~ RHF

Telamon,

I am glad you wrote it and I am now considering your very words.

* Small loops that are tuned do not need amplification
but of course need to be adjusted as you change
frequencies complicating operation.

* Small loops that are untuned need amplification.

* Large untuned loops do not need amplification.

Small loops that are tuned do not need amplification but of course need

to be adjusted as you change frequencies complicating operation.

Small loops that are untuned need amplification.

Large untuned loops do not need amplification.

gravity wrote:
> i'd love to have an SDR, but i still want to decode RTTY and do other
> things. so a gen purpose receiver may be easiest.

SDR can be nice, but you'd better look closely to see just what you're getting. Some SDRs (http://www.ettus.com/) are practically nothing more than a broadband filter, a pre-amp, and a high speed 12 bit A/D converter. What's wrong with that? Well, if you do the math, 12 bits will give you about 72 dB of dynamic range.

A few SDR designs are really radios with 16 bit sound cards attached. Those can have much better dynamic ranges. If you're serious about HF listening, I recommend you seek something with a dynamic range in the high 90 dB to 100+ dB range.

These days, I'd still recommend you purchase a separate radio and make sure it has a line out port for your sound card. That way you can update your computer and your radio as you see fit. SDR is really cool for experimenters, but I wouldn't recommend it for most of the SWL crowd --YET.

Well it's like Xmas around the old Hill House or Hell House depending on the time of the month, If ya know what I mean? Wink wink Say no more. Anyway on initial inspection my so called refurbished E1 looks brand spanking new in original packing with all docs and CD manual as well. Smells brand new and even has protective tape over the dial. If I wasn't told it was refurbished, I'd never have known. Brand new box too! I've been playin with it for about hr or so and it sounds great and everything seems to be working. No knob wobble on this one. More to come! Stay tuned.

P.S. GoatSmith!, I await your almost inevitable sarcasm. Fire away Mr. a hole!!!

Yea, "it's fine looking", just like all the Grundig/Eton receivers,
but that's it. I really wonder, if the E1's performance, over a $150
Sony 7600GR, would be worth justifying an additional $350 - I'm sure
not ! You all are not getting nearly your moneys worth !
Yes, I was put here to keep all you "ham shackers", from pissing it all
down the toilet ! But we must have the, "latest and greatest", even
though it will be useless in a few years ! Not my problem ! Remember,
you need to have some extra cash to buy those Star Wars uniforms for
the next convention !

"'Blah blah moo moooo,' said Michael O'Hanlon, military analyst with the
Brookings Institution."

If you google for Brookings Institution, Google provides this in the "hit":
Description: An independent research and policy institute with a
left-liberal inclination...

And in true liberal style, note that their "research and policy institute"
is in the .edu TLD.

Isn't NBC News the entity that blew up the truck to provide false evidence
that the truck was defective?

Do you have anything, uh, at least marginally credible?

Ok, thanks ! So, you are the proud owner of a brand spanking new
(almost) Eton E1 radio ! I'll make sure I, "stay tuned", Brian. You
see, with just like buying a used car, the sleazy salemen spray that
"new car" smell, just like they did in your box.

As much as I hate plurals formed with apostrophes, you're wrong.

From what I remember, that's not universally incorrect.

Oh, and I'm taking your apostrophe quiz, and it appears there's an error
in the "correct" choice: (B) uses "its" as the contraction for "it is".
So the answer to 17 should be "None of the above". (I scored 100% also.)

Incidental note: I've never understood how people who use "it's" as a
possessive never even think to use "hi's" (though some use "her's" and
"their's").

Hi Brian, enjoying your new (refurbished) Eaton E1 ? Maybe, you could
have RHF over to circle-jerk your new (refurbished) Eaton E1 ! Why
didn't you just piss away and extra $100 and get a NIB Eaton E1 ?

A well educated friend told me that the Aramaic word
for "God" is "Allah". It would be nice to know if
he was wrong about that.

Aren't Yahweh, Jehovah, and Allah all the same God-head?

Thanks, I'm checking it out now. One guy out of hundreds, says it's not
worth it. I need to think about it... ;)
Actually what I have to think about is whether or not I am going to get my
$462 back from a deal gone bad on eBay. I've been biting my tongue so far
but my patience is wearing thin...

The generator has a great many artifacts... the highest I can reliably hear
from it is about 12500Hz. Above that, the artifacts get louder than the
primary frequency. At 15900, what I hear is something around 700 Hz coming
from my headphones.

Well every man has to decide for himself but I've owned more radios than
most guys and I think it's a fine portable. I borrowed one and tried it out
before I bought this one but from all I've read , I probably would have
bought it anyway. Did you get ripped off on Ebay? If you paid with pay pal
just go to your account and cancel it. just say he didn't deliver and
they'll give you your $s

Yea I remember it like it was yesterday. I was around 11 or 12 in that pic.
I don't think I've ever owned a 99 but I had a 100 and a 85 some years ago.

Modernizing ham radio:

No more CW, easier to pass written exams. We Should change the names: Tech, General & Extra too. No sense hanging with the dinosaurs when there's no need to be proficient at anything anymore:

Appliance Operator 1st Class, Appliance Operator 2nd Class

Appliance Operator 3rd Class, No Class

Now Ten twenty-seven to channel one nine to get a preview of the new classes. I'm ten seven. Any one got a ten thirty-six hello.

Sorry for the CB lingo, I'm just getting practiced up so I can understand people when the CW test goes away.

You really want modernization?

Sure I want modernization. I dont have to put up with any of it. I havent been on the air for at least ten years. I renewed the license, then put it away.
The ham bands are gonna go away, and soon. They are gonna go the same way that respect for your fellow amateur went, cooperation went, etc. The FCC has a vested interest in shutting the ham bands down, since their funding got cut years ago. BPL looked like a winning plan to shut it all down so they could sell it off, but that flopped, since it also interfered with other emergency services, like police and fire. so, the easiest way to shut it down for good is to just hand it over to the cb crowd. They will make a complete mess out of it, and they wont waste any time doing it, either.

Then the FCC can improve their funding, considerably. Just think, the fines from the violations alone will come to millions. Did you really think that the FCC was looking for "new innovations and inventions" coming out of ham radio ? This is the digital age, guy.
In the meantime, enjoy these tirades from folks about the "fat-amateur". Me, I pump iron every day, and could probably knock most of them on their keester without even breaking a sweat, and im twice their age. The irony of them opening their mouths has not escaped me, these new, modern "sensitive" guys that are doing 99% of the ranting on this subject. It begs the question: Just which pair of their mother's panties are they wearing today ?
Ham Radio started to suck about ten years ago, and it is going to continue the downhill slide. Get tused to it.

And before you start in on me, lemme tell ya fella, i was a cw operator, and i also built most of my own stuff. It just ain't worth it any more. Period.

I doubt that the CBer would take over on all bands. One of the attractions
of CB is the cost of equipment. The FCC will probably sell off the unused
bandwidths to private organizations such as cell companies and repeaters for
the service industry to name a few. They can then be done with all the
headaches with ham/cb enforcement and concentrate on other, more lucrative
areas, such as Janet Jackson's half time nipple exposure.

1999. Re: Good portable shortwave with gos speaker for world travel?

Newsgroup: rec.radio.shortwave
Date: 2006-06-15 01:04:50 UTC

Message-ID: <1150333490.246924.82260@f6g2000cwb.googlegroups.com>
Source record: 78932

Hello.

Please note that my ICF-SW7600GRs are used for casual listening around the house and for listening when traveling. I often listen to Radio Nederland (9845, 6165 kHz), Radio Bulgaria (11700), Radio Exterior de Espana (15385), Voice of Russia (9665), Deutsche Welle (15205) and other strong-signal stations on this radio. (I do try for some exotic Asian and Pacific stations when I'm visiting in California - stations which are not generally audible here in NJ - but I have only very limited time to listen when we're on vacation in CA.)

However, most of the time when I'm at home, I listen via my AOR AR7030 Plus or my Grundig Satellit 800, both of which can greatly outperform the Sony. (But the Sony is portable and those other two are not. Plus the Sony cost only a small fraction of what those other two cost.) The Sony is excellent for listening to the news on stronger SW stations and also on MW. This is the radio I use in my bedroom and in my kitchen. I often take one of them out to my back yard and listen to classical music broadcasts on FM.

If you are on the east coast of the US, you may be able to hear Radio Australia (17785, 17715 early in the evening, but 15515 comes in far more reliably on the Sony after 0200 UTC) and/or Radio New Zealand International (15720) especially if you can stay up very late (past midnight, but sometimes even earlier). You can easily hear Radio Australia in the mornings (on 9580 kHz).

I even sometimes listen to the BBC but I am losing patience with that station. (12095 in the afternoon, 15390 @ 2100 UTC - their "Caribbean" service, or 9410 after 0400 UTC - midnight here).

If you don't mind listening to announcers speaking in another language, there's lots of exotic African, Asian, and Middle-Eastern musical programs all over the dial, day and night. You just have to hunt for them (and you can let the Sony do that for you!).

Believe me, there is no shortage of interesting ststions to monitor via the shortwaves and the Sony ICF-SW7600GR offers an excellent and inexpensive means of doing so.

I wish you the very best of luck.

Joe

Source record: 78938

Dear Telamon,

I'm not sure I follow you. The E1 IS a portable and it is a portable without a built-in ferrite antenna for MW. This makes little sense to me. (Why couldn't they have fixed the digital "hash" which would evidently plague such an antenna in this radio?) The Grundig Satellit 800 DOES have a ferrite MW antenna. (Naturally the tabletop radios I mentioned do not have one, those radios being designed for use with significant external antennas on all bands).

If you read PASSPORT's latest "Receiver News" on their website, you will see (in their June 6 post) that "the E1 is being seriously treated by certain cognoscenti as a viable alternative, rather than complement, to pricey tabletop supersets. (Lawrence Magne)."

I feel that, based on my experience with the Grundig Satellit 800 (which has similar specifications), the E1 has certain shortcomings which, though perhaps minor to most, are somewhat important to me. I would like to have a good portable SW receiver in the mid-size (about 12" wide) range. Right now I have my doubts about the E1 (of course I could be totally wrong) and am waiting to see if Degen does, in fact, offer a competitive radio with more advanced reception features.

But, if they do not, I may at some future time buy an E1. We'll see.

By the way, your comments on PASSPORT are right on the money. I wish we could convince the "nay-sayers" on this group, many of whom seem to want to gripe for gripe's sake (my opinion). That book as well as the WRTH are darn-near essential for the best enjoyment of this hobby (my opinion, again).

Best,

Joe

Fortunately or unfortunately the purchase of a WRTH or PWBR has not really been necessary for the best enjoyment of the hobby for a number of years.

More up to date info has been available on the Web for quite some time.

Hey Joe!
I always thought one of the first clues to whether or not a radio was portable was ..... A handle.
As far as the 800 goes, I don't know if you were aware of this or not but if you look inside the 800 you'll see that there is a place for the antenna to mount 90 degrees from the position it's in now. From what I understand, the rod was originally placed parallel to the back of the radio but the display played havoc with the antenna so they rotated it and moved it to the opposite end. The E1 wouldn't allow for the ferrite rod to go perpendicular to the back (unless it was a tiny one)
As for shortcomings.... I believe All radio manufacturers got together and decided that NO ONE is allowed to make the "perfect" radio. LOL
Naysayers? They go into the blocked senders list after they become a nuisance...

"Joe Analssandrini" <analssandrinij@yahoo.com> wrote in message news:1150335009.905234.294690@u72g2000cwu.googlegroups.com...

Oh yea, Where's that alleged DE-1108?
I've got a wad of cash sitting nearby just waiting for it to materialize :)
Better have a handle, damn-it...

"Joe Analssandrini" <analssandrinij@yahoo.com> wrote in message

Like some other folks, I'm partial to the Sony 7600G. As to weather/dirt this is easily addressed by taking a few extra 1-gallon size Zip-Loc (or equivalent non-brand name) freezer bags. Insert radio, seal bag and you now have a weather/dirt resistant radio. Of course, this is mostly for when the radio is not in use unless you do not need the whip antenna.

The 7600GR would be my suggestion as well, but didn't somebody post
that Sony is leaving the shortwave market? I have the older version,
and it has seen plenty of travel.

Sony's are mass market hit and miss QC overrated plastic crap shoots.

Eton is a shortwave niche manufacturer who cares. The Sony lacks IF
shift, multiple bandwidths, meaningful tone controls, a decent audio
amplifier, and most of all... CLASS.

Are you tellin'us all the zombie troof?

PS, I love ham radio all over again (missing for 30 years)
I'm building an Elecraft K-2, having a great time. Monitoring the bands
on a Grundig...sounds good to me. Not the same as 30 years ago, but
then again, Frank Zappa is dead, too.

Size and portability put increasing demands on the design. Going from table top with unlimited power to a portable that draws from batteries and smaller size puts more constraints on what you can do with the design. Smaller generally means fewer features and not as great a dynamic range as an example. However these factors can be overcome by spending more money on the design.

You usually put a radio in a class and compare it to other radios in its class. The E1 cost more than other portables but not as much as the table top radios and it straddles these categories. I just think it is an unfair comparison between it and the table top radios as much as it is to compare it to smaller less costly radios.

Comparing the E1 to the Satellite 800 or Sony ICF-SW777 are fair comparisons. They are all portables and in a same price range.

Oh Brian, So that's your secret - buying used receivers, then spraying them with new plastic smell ! I guess that smell, to ham shackers, is like women's perfume, to normal men. Is taking the back off a receiver, like snapping off a woman's bra, to you ? I bet you can't do it with one hand ! So, once a month, it gets to be Hell around your house - I was a bit confused by your explanation, that we were all supoosed to "get" (HeHe) - could you explain it in more detail ?

I Had A Dream ! Behold the Eton E2 + DRM + IBOC (Grundig Satellite) World Band Radio Receiver. A "Vision" The Eton E2 + DRM + IBOC will be the Newest Full Size {Table Top} Eton (Grundig) Radio with new features like: * Digital Radio Mondiale (DRM) Shortwave Broadcast Technology * Digital IBOC AM and FM Broadcast Radio * Digital Satellite Radio - XM and Sirius * Plus 'tradional' AM, FM Stereo, SSB and CW Analog Technologies and Data Transmission * Enhanced Audio Sound via a Front Two-Way Speaker ...(more)

Since, I caused all the public Yahoo Grundig Groups to go, "membership required", I am unable to read any more - but, why wasn't this done for the Eaton E1 ? Maybe, this will give Eaton a chance to fix the wobbly knobs, include internal ferrite-bar antennas, and maybe throw in satellite antennas, on their $500+ receivers !

http://news.yahoo.com/s/nm/20060614/od_uk_nm/oukoe_uk_life_sweat

Phoenix sweats most but Miami suffers more Wed Jun 14, 4:27 PM ET

NEW YORK (Reuters) - Phoenix on Wednesday was named the sweatiest city in the United States, but Miami topped the list as the most uncomfortable American city due to its mix of humidity and heat.

The fifth annual sweat survey sponsored by Procter & Gamble Co. handed the dubious distinction to the Arizona capital for the third time. El Paso, Texas, earned the title in 2004 and San Antonio, Texas, in 2002.

The study of 100 cities estimates the amount of sweat a person of average weight and height would produce walking around for an hour in the average high temperatures of a particular city during June, July and August.

The latest survey found that the average Phoenix resident produced 26 ounces (0.77 litre) of sweat per hour during a typical summer day last year when the desert city's high temperature averaged 93.3 F (34 C).

It means that in under three hours, Phoenix residents collectively produced enough sweat to fill an Olympic-sized swimming pool, said Jay Gooch, sweat expert at Old Spice, a Procter & Gamble Co. antiperspirant brand.

But Gooch said Phoenix's humidity was only 22 percent, making it much more comfortable than Miami, with average temperatures last year of 83.9 F (29 C) and humidity of 76 percent, according to government figures.

"In Phoenix you sweat much more than in Miami, but it evaporates quickly as it is such dry air so you don't notice as much. In Miami the sweat stays on your skin," said Gooch.

BWHAHAHAHAHAHAHA And smelly Erica Oyen really needs those 5 showers a day!

Brian,

Now you can see and hear for yourself whatever it is that the skinflute player, gosmithwhisper is babbling about.

It is quite obvious he is envious of people who can and will spend $500 or in your case $400 for a portable radio.

I enjoy mine immensley, when connected to a good speaker, it sounds fantastic.

Not the first glimmer of a problem here. The skinflute player must want recogbition real bad, he is actually answering himself throughout the thread.

God, even my $40 1960's Knight Kit Star Roamer was steel and had plastic on metal knobs, that were held firmly in place ! The E1s, with flimsy rod antennas that flop, and plastic knobs, Jesus !

So, what did you get for $500 ?

RadioIntel.com:

Many enthusiasts are waiting to hear whether or not The E1 "blows away" the Satellit 800, or vice versa, or if it diminishes the "legend" status of the Sony 2010. Some early owners have already made such claims. The reality is a bit more mundane than that. The fact is that these are all excellent radios, so the possibility that one could "blow the other one away" is unlikely. Indeed, modern radios have so far pushed the envelope of what is possible that only incremental improvements are likely. Such is the case here. So if you're looking for me to say the E1 trashes all the competition you are going to be disappointed.

Yea Harold, he's defiantly a strange bird. I agree it's really a nice radio. I took it out in the yard last night and hooked it up to a wire I got set up for listening out in the yard when I lay in the hammock. I was picking up all kinds of good stuff.

You might be right, but I think the strongest trend in radio production over the last twenty years or so has not been in increasing the performance or number of features, but in decreasing the complexity and cost.

SW radios with very good performance are now available at a modest cost. The 100,000th software defined radio might have a competitive performance to price ratio for many buyers. But are there 99,999 people who'd buy at the much higher initial prices?

>

Decode but not decrypt. And is there much in the clear which would be intersting to the typical SWL who currently hears whatever he wants with a DE1103 or a DX440 or a S40? Utility listening is now as easy as it's ever been, but it doesn't seem there's a large number of people who do it.

>

And I'm sure the military pays big bucks for such radios. It takes mass production to make sophicated technology affordable. Just imagine how much your computer would have cost if there had been only enough demand for 10,000 of them. I doubt I'd have as good a computer as I have if the factories weren't popping the parts out a million at a time.

But, as I said, you might be right. All it will take is enough potential buyers to tip the interest of the radio manufacturers.

There are very fundamental problems with pure software radios. Think
about the dynamic range limitation due to the ADC. A hybrid approach
(analog front end then softwar) is better.

The reason engineers are interested in digital over analog is noise. The
whole thing that sets apart a good radio from a bad one is how it overcomes
noise, from both the radio itself and natural sources. Analog radios by
design create their own noise and it cost a lot of $s to make a radio with a
good S/N ratio and with all the bells and whistles to be a real DX machine.
With digital it's cheaper and easier to get where you want to go.

> So I could make a short wave radio out of a laptop
> using this software?

You can make an Extremely Low Frequency radio out of a computer, tunable across the bandwidth of its sound system. You could tune up to about 1/2 the sampling frequency of the sound systems analog-to-digital converter. Typical sample rates are 48kHz but high end systems go up to 192 kHz so the tuning range would be up to 24 kHz and 96 kHz respectively, provided the computer can execute the SDR DSP software fast enough. If you connected an antenna to the microphone input, you might hear something. To tune higher frequencies, you can use a conventional superhet receiver as a tunable downconverter, connecting its last IF (if higher than the computer's audio input range) to a fixed downconverter, e.g., from 455 kHz to 12 kHz.

Some radios, like the DX-394, can be readily modified to integrate the fixed downconverter or attach it externally. And there are exceptional radios that already include a 12 kHz IF output ready to be plugged into the computer.

I have had great fun using the DX-394 with Dream and SDRadio software demodulators. The performance on SW-AM broadcasts and SSB is truly remarkable because of the steep-skirted IF filter and synchronous AM demodulation.

Yes, good dynamic range and designing the radio to be totally digital
costs more money but is doable. Costs keep coming down so one day we
will see it.

...the Left is looking for a new champion to &#65533;contain&#65533; the United States, and, if possible, impose such a major defeat on America that a crisis of legitimacy will pave the way for revolution. It was, after all, Russia&#65533;s debacle in World War I that brought down the Romanov dynasty. And aging New Leftists still revel in how much the anti-war movement during Vietnam changed America, even if the desire to &#65533;turn the guns around&#65533; and &#65533;bring the war home&#65533; did not pan out. The attempt to recreate the 1970s mood of national decline by reviving a mass post-9/11 anti-war movement has fallen flat because Islamic fanaticism is a tough sell, even when dressed up in the rhetoric about Third World resistance to Western aggression. Islam has some charm, in that it has long been the main enemy of Christendom, but leftists are rooted in the atheistic materialism of Marx which rejects all religions.

2106. [ot] Al-Qaida-ism and Communism

Newsgroup: rec.radio.shortwave
Date: 2006-06-15 23:13:07 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <1293qjgsd4of1c6@corp.supernews.com>
Source record: 78839

Communism had Karl Marx. Al-Qaidaism has Sayyid Qutb. "Who is he?" most people would ask. The ideology that nurtured modern Islamic extremism, and spawned every violent movement from Hezbollah to al-Qaida, was born in 1952 when Qutb, an Egyptian writer, returned from studying American literature at the University of Northern Colorado in Greeley, Montana.

The tipping point from detached observer to extremist ideologue took place at a Church dance in Greeley when, as Qutb recalled in "The America I Saw," the pastor dimmed the lights and put on the come-hither number "Baby, It's Cold Outside," a hit tune from the MGM movie "Neptune's Daughter" -- a guy, girl and bathing suit lemon -- with Esther Williams and Ricardo Montalban.
...
As Doug Saunders wisecracked in Canada's Globe and Mail, "if he had stuck around a couple of years to hear the racier Louis Armstrong-Ella Fitzgerald version of the same song, jihad might have begun much sooner."
...
Neither Manichean rhetoric nor Michael Moore's paranoia captures it. Qutb's hatred of the United States was similar to the ingredients that bred self-hating Americans. He viewed the world, as he saw it in 1950, as decadent, corrupt, oppressive and generating endless violence and war because of capitalist greed that was destroying Allah's creations. Many of the same strands were spun to justify the 1917 Bolshevik revolution.
...
Historians have compared Qutb's pamphlet "Milestones" to Lenin's "What Is To Be Done?". It deals with tactics and strategy that lead to the dismantling of the nation-state, and regrouping the ummah under the laws of Sharia, which were those proscribed by Allah himself. Qutb was to Osama bin Laden what Marx was to Lenin, or justification for dictatorship of the proletariat.

China Eager to use SCO to Suppress Muslims
http://intelligence-summit.blogspot.com/2006/06/china-applies-pressure-to-uyghur.html

---

You won't hear any awkward questions about democracy or human rights at the SCO -- not a peep about oppressed Uighurs, Tibetans and Chechens, or about last year's crackdown in Andijan, Uzbekistan.

As Beijing and Moscow see it, keeping authoritarians in power in Central Asia (and elsewhere) not only ensures stability along the two powers' periphery, it also helps silence those annoying calls for greater political and social freedom at home.

Then there's the security angle.
...
Beijing would like to use the SCO's "anti-separatist" provision, particularly with the backing of Russia, to dissuade Taiwan from declaring independence -- and deter U.S. intervention.
...
Moscow and Beijing are using the SCO to advance their influence across the Eurasian heartland, and to create a "new international political and economic order" to their liking -- with little room for free markets and even less for free thought.
...
http://www.cnsnews.com/ViewCommentary.asp?Page=/Commentary/archive/200606/COM20060614d.html

---

Chinese Hosts

Iranian president Mahmoud Ahmadinejad and Uzbekistan's Islam Karimov

Early this month, Zhongguo Xinwen She, the People's Republic of China's official news service for overseas Chinese, expressed its perceptions of American concerns as it noted: "The United States is worried that the "sprit of Shanghai" will "eventually evolve into a kind of model for state-to-state relations that will prevail around the world and challenge the "theory of outdated sovereignty" and "theory of supremacy of democracy" that are being initiated by the United States in its "changing diplomacy."
...
In a May 30th speech in Moscow to parliament leaders of SCO countries, National People's Congress Standing Committee Chairman Wu Bangguo noted that the purpose of the organization is to establish a "just and rational new international political and economic order." This new order is based on the deterioration of America's relative power.

...
Tehran's position as an observer nation not to mention Ahmadinejad's
invitation to the meeting and the mere fact that Iran is being considered
as a full member in the organization speaks volumes about the character and
intentions of this increasingly powerful alliance.
...
"It strikes me as passing strange that one would want to bring into an
organization that says it's against terrorism, one of the nations that's the
leading terrorist nation in the world: Iran. On the other hand, there are
other organizations that do that. The United Nations has committees But I
just can't imagine -- here you have Iran that, by everyone's testimony, is
the leading terrorist nation in the world; it's supporting Hamas, it's
supporting Hezbollah, it has a long record of being engaged in terrorist
activities. And to think that they should be brought into an organization
with the hope that it would contribute to an anti-terrorist activity strikes
me as unusual."
...
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=22920

Not unusual at all.

Communist China major source of pollutants in the western U.S.

The mountains of eastern California are dealing with a surge in coal-based air pollution. "The soot and toxic chemicals pervading the mountaintop detectors do not originate from Los Angeles automobiles or power plants serving California's urban areas. Rather, these pollutants are exported to the western United States by Chinese coal-fired power plants."

I took the online practice test and passed without studying. I do not possess any license, as I have no desire to become a ham. And yes I know what OFF/ON means. I probably know more about theory than most of the trolls on this group. I certainly post on topic more often than most of you. But I can post on topic once a month and accomplish that.

I finally got unlazy enough to shift some of that junk around so I could get at my G.E.model 7-2880B Long Range High Sensitivity Radio.(it says Long Range High Sensitivity on the dial of the radio) Is it the precursor to the G.E.Superadios? I bought the radio brand new back in the 1980's.Not many years later,the on/off push button switch on top quit working.I took off the back of the radio cabinet and I removed the push button switch and I slung it as far out in those weeds as I could sling it.I drilled a hole in the back of the cabinet and I replaced the push button with a cheap toggle switch I had laying around in my auto parts box.My ''fixes'' always work.

> What became of your idle boast to have Markie TOS'd? Huh? Or is that yet
> more bull hockey from Glendale?
these words and the insistance of a poster in another thread that some
how I my posting has rsien to some legal (did he realy mean ilgeal)
level of being spam I point out Wismen has aleegedly tried to have me
ToS , this is likely a lie OTOH Daveheil claims he has tried and
alegedly doid Han (something or other the arrl director) and Robeson
and land shark and prehaps others unknown to me as well have made
efforts to me ToSed (without BTW acting aginst Wismen which shows you
how bad off they are although I believe Dave has tried to ToS Wismen
with little sucess) and yet I am still here posting quite openly from
Hughes net under my call letter without the slightest disruption other
claim that they have been "bomarded" by more than 5000 get help post
ing the last month (I have not been counting so I will prisionaly
accept the number) as a contrast I receive (and without any
relationship to the NG more than 1000 spam emails a day trying to sell
me Viagara or beast enalregements or golf clubs or god knows what is
next,I supect many of us receive simliar levels of true spam

Yes Robeson has quit the feild and as such I really mention him Wismen
remains and has posted (based on the fact I respond about 80 perecent
of his posts) roughly 600 months in the same time span, and they
contain some of the vilest materail it is has been my sorry duty to
see, and that behavoir is ACCEPTABLE to those complaining

Id rather not need to post get help so much Id rather wismen got help,
but even Dave Hiel no freind of mine to be sure reconizesthat Wismen
has become sexualy obessed with me, if having the misforutne to become
the target of someone sixk sexaul obession is reason for most poster to
jion in trying to force the vitum offline USENET is dead a free mdium
for the exchange of ideas

I did a google search for, G.E.7-880B radio

One of the sites (radioatticarchives) calls it a G.E.Champion radio.The eBay site calls it a Superadio.Over the last year or so,I have done some searches on the internet trying to find a picture/photo of a G.E.7-880B radio like the one I have here.No luck yet though,it is still a big deep mystery to me.(not worried it though) Maybe it is a ''Superadio''

SED,

On the Radio Today was a News Story about how the Chinese Government
(PRC) is now using an "RV" type vehicle to go from village to town.
China (PRC) is using it as a Mobile Execution Chamber to administer
Lethal Injections to "Death Sentence" Prisoners. Shooting them was
getting too costly and too damaging to the Vital Organ$ required for
the Organ Harve$t Market. The 'right' Organ$ can bring a very High
Price in the International Market of Organ$.

healthy organ$ are worth their weight in diamonds ~ RHF

Cuhulin,

Your initial post identified the Radio as GE Model # 7-2880B
-NOW- You are typing GE Model # 7-880B

While I know about the GE Model # 7-2880B (Superadio "I")
http://www.google.com/search?hl=en&lr=&q=ge+radio+model+2880
http://www.google.com/search?hl=en&q=ge+radio+model+7-2880
http://www.google.com/search?hl=en&lr=&q=ge+radio+model+7-2880B
http://search.yahoo.com/search?fr=slv2-adbe&p=ge+radio+model+7-2880

IMAGE GE SUPERADIO "I" Model # -7-2880
http://radioatticarchives.com/images/g/GE_7-2880B_Champeon.jpg
Note - Photo courtesy of Bruse Champeon
http://cgi.ebay.com/_W0QQitemZ9740085519
http://cgi.ebay.com/_W0QQitemZ9740994363
http://cgi.ebay.com/_W0QQitemZ9742462398

All the various GE Superadio Photo's that I had
Up-Loaded to these two YAHOO! Groups are gone.
http://ph.groups.yahoo.com/group/longrange/photos
http://ph.groups.yahoo.com/group/SuperadioIII/photos

I do not know anything about a GE Model # 7-880B . . .

So... Which Model # is it ? ? ? ~ RHF

Wayyyyy back in the olden times, (around the 1920's or 1930's or so) Mississippi used to have a traveling electric chair truck.(I am not joking either,I have read a newspaper article (with a picture of it) about it before.The truck (with the electric chair mounted on the flatbed of the truck) would travel from County to County and the electric chair would be connected with some wires to the overhead wires on the power poles and the death row prisoners would be strapped into the electric chair and somebody would throw that big switch.I imagine it was real ''crowd pleasing''.

Yup, me too. I listen to "A Way With Words," a radio program on KPBS
(available streaming at kpbs.org) whose host is language writer Richard
Lederer ("Anguished English," "Get Thee To A Punnery," etc). Richard said
that "it's" for "its" (possessive) was considered correct until near the end
of the 19th century. I didn't know that.

Courtesy of Bruce Champeon pic,,,, mine doesn't have that plastic thingy around the telescopic antenna,I just now took another look at it.

Question? Just what is my General Electric Long Range High Sensitivity AM FM Model NO. 7-2880B radio?

It has almost all of the chrome looking paint eaten off of it.I used to take it to work with me at the auto/truck/lawn mower battery factory in Florence,Mississippi and listen to talk radio shows.
Joyce Creel (at the battery factory accidently knocked it over and bent the antenna of my radio when she was unplugging the radio (even her mom at the battery factory disavowed Joyce was her daughter,,, this is true) because she liked to listen to that rap crap crap crap crap on her big boom box radio.I once stuck a lot of battery decals all over Joyce's radio.

SED,

I guess it all comes down to these ending Three Questions
about the War-on-Terror and USA-and-Canadian Relations :
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=22809

1- With terrorist havens like Canada rife with external and homegrown
terrorist threats on the other side of our northern border, and the
Canucks serving as such willing hosts and unwilling partners with the
US in fighting terrorism, who needs enemies?

2 - When President Bush announced just days after 9/11 that the US
would no longer tolerate countries that harbored terrorists, could any
American have imagined that the new Bush Doctrine would hit so close to
home, sandwiched in between Alaska and the Lower 48?

3 - How soon will it be before the US is no longer able to dodge the
terrorist bullets coming rapid-fire from the barrel of the Canadian gun
pointed at our northern border, and how high will the toll be from the
deadly game of Canadian roulette?

oh canada ? ~ RHF

You clearly haven't thought this through very well. The number of bits in the ADC determines the best case noise in the system. Let's say you are building some fancy software defined radio that can receive multiple signals at one time. This is done by digitizing the broadband RF signal. However, the AGC will pick a level such that the strongest signal can be digitized. [Technically, it is worse that this at the peak of the sum of all waveforms present determines this level.] Now suppose one of the signals you want is 9db weaker than the strongest signal. Then the effective bits on this signal will be 3 bits less in power, hence the signal is noiser.

Now with an analog front end, you only receive one signal at a time. So if you set up the radio for the weak signal, the AGC will be such that it is now full strength (at least in an analog sense).

A hybrid radio (analog front end with filtering and maybe one IF, then digital demod) can have the best of both worlds, though it can't receive as many simultaneous signals.

To delve into this further, DSP has noise too. Depending on how the filters are implemented, you can have limit cycle noise that never goes away. Truncation in the DSP is a noise source. Nothing comes for free. Ultimately, you need to make this signal analog again, so there is noise associated with the DAC and post filtering.

Now think a bit of how radio really works. There is a baseband signal, and a signal on a carrier. Nearly all the diversity of communication techniques takes place in the baseband. [I got my MSEE in communications and never had to deal with the signal on the carrier, i.e. I just did the baseband, where all the fun is anyway.] Now if you put DSP in the demod, you can have virtually any kind of radio. There shouldn't be any signal that you couldn't demodulate with DSP, and often the DSP demod is superior to analog. [One one project, we did a DSP FSK demod that used arcsin computation by a coordic algorithm, then determining the frequency by computing the slope of a line through a set of these arcsin values using linear regression. Way overkill, but all the software was already present for the QAM signal that was the real product target.]

Iraq is now officially a failure. They are granting amensty to Iraqis
whose only crime was killing Americans. Fuck George Bush and anyone who
supports him. I'm willing to cut and run if the insurgents are going to
get a "get out of jail free" crime.

"It is shocking that (Maliki) is reportedly considering granting
amnesty to insurgents who have killed U.S. troops," said Senate
Democratic leader Harry Reid of Nevada in a statement, "The mere idea
that this proposal may go forward is an insult to the brave men and
women who have died in the name of Iraqi freedom."

Cuhulin,

GE Superadio "I" and "II" Whip Antenna Question ?
http://groups.yahoo.com/group/longrange/message/407
http://groups.yahoo.com/group/SuperadioIII/message/1717

Most likely you have a replacement Whip Antenna the
'original' Whip Antenna had a Black Plastic sleeve over
part of the Whip Antenna.

IIRC - Both the GE Superadio "I" Model # 7-2880 and the
GE Superadio "II" Model # 7-2885 had a Black Plastic
sleeve over part of the Whip Antenna.

The Six (6) Photo-Images of this GE AM FM Superadio "I"
{ Super Radio # 1 } Model 7-2880B give a good idea of what
the Radio and the Whip Antenna 'originally' looked like.
http://cgi.ebay.com/_W0QQitemZ9740085519

FWIW - The GE Superadio "III" Model # 7-2887 simply has
a Longer Chrome Whip Antenna.

hope this helps ~ RHF

Be sure to tune in tonight 10pm EST for "The Right Perspective," over the Internet
at www.therightperspective.com and shortwave WWCR 3.215 Mhz.

Tonight, hosts Frank and John will discuss how the Left is exactly like the Far Right when it comes to certain topics. Also on the agenda tonight is Bush's trip to Iraq, Poland and the Times' attack on it as bigotry, the double standard when it comes to leftwing bigotry, a new book on the crimes of communism and the blindness of the "intellectualls" !

"Hello, Afrika!" will feature Mnr. Nico Coettezze, who will continue discussing the prophecies of the Boere Seer "Oom Klassie" Seiner Von Renseburg and what this portends to the future of DieBoereVolk.

And of course, you are a part of the show, too! Call into the show with your comments and views at 718-761-9996.

Hear what the other conservative talk radio hosts will be saying next week tonight at 10pm EST by clicking here for live stream:
http://www.live365.com/stations/trplive

Traditionally, they'd sell you a back issue, and if they no longer had
copies of that issue, they'd sell you a photocopy of the specific
article. It used to be a relatively nominal fee for either.

I don't know if they've dropped the policy, or if they've
adapted it to recent technology, but that's the place to ask.

Of course, they also sell archives of back issues on CDROM.

Michael

Sorry, that was just a figure-of-speech. Is there some sort of SW god,
you all pray to ? Do you all fall into a major depression, every time
an international SW station goes off the air, permanently, such as,
"Voice of the Andes" ? Do you all get together for some sort of burial
ritual ? Help me out here !

Do a search for, bush Hainan Island

Was it China which ordered bush (vincente fox gives bush orders and bush goose steps to them,same as bush goose stepping to the bilderbergers and other commie fascist new world order goons,,,, we are all seeing that happening every day) to order our U.S.Navy Airplane to land on Hainan Island,China?

A Chinese plane crashed into a U.S.Navy Airplane,in International Waters,I think it was ''set up'' to happen.An Office of the Department of the U.S.Navy says the U.S.Navy Airplane was in International Waters,I checked it out online years ago.

Somebody holding a gun to your head and forcing you to read these
messages?

Once upon a time, HF broadcast was where the smart people went to get
a broader perspective on things. That cosmopolitan attitude used to
be reflected here. Now, as the minutemen and bigots take over HF
broadcasting, the crazies have also usurped this forum.

GSW,

Why "Thank You" For Helping Me To 'Promote' {Pimp}
My Dream ! :o) - The Eton-Elite-E2-DRM-IBOC-Radio Group
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

I Had A Dream ! ! ! - { Hello Eton Corp. Are You Listening ? }

Behold the Eton E2 + DRM + IBOC World Band Radio Receiver.
(Formerly the Grundig Satellit 800 Millennium)
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

A "Vision" { It's That "Vision" Word ! - Spelled "V I S I O N" }
The Eton E2 + DRM + IBOC will be the Newest Full Size
{Table Top} Eton (Grundig) Radio with new features like:
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

* Digital Radio Mondiale (DRM) Shortwave Broadcast Technology
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

* Digital IBOC AM and FM Broadcast Radio
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

* Digital Satellite Radio - XM and Sirius
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

* Plus 'tradional' AM, FM Stereo, SSB and
CW Analog Technologies plus Data Transmission
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

* Enhanced Audio Sound via a Large Front Two-Way Speaker
and Dual (L&R) Smaller Side Speakers (2:1 Channels)
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

So the "Question" is . . .
What will come after the Grundig Satellit 800 Millennium ? ? ?
- - - Will it be named the Eton Elite E2 + DRM + IBOC ! ! !
- - - Will it be named a Grundig Satellit or Eton Elite ? ? ? ?
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/

-Note- NOT - Sponsored or Affiliated with Grundig-USA
(ETON Corp.) or the GrundigRadio.Com WebSite
ETON => http://www.etoncorp.com/
{ http://www.grundigradio.com/ }

Do You Need Shortwave Listener SWL Antenna Information
* * * * * Then Check-Out this YAHOO! eGroup * * * * *

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/
- - - Shortwave Listener " S W L" Antenna Group - - -
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/
Click to JOIN the Shortwave-SWL-Antenna Group
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/

SO . . . THE QUESTION IS :
WHAT WOULD YOU LIKE THE REPLACEMENT FOR THE
GRUNDIG SATELLIT 800 MILLENNIUM TO BE ? ? ? ? ? ?
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/
- - - Eton "E2" ? Sounds Good To Me ! :o)

yes - i am shamelessly whoring my yahoo! groups ~ RHF

nope the USA for example (and the rest of the west) should acted
premtively when Hilter began his violations of the Treaty he signed

just like Clinton should acted when Saddam broke the ceasefire terms he
signed with the US

from that monet on the USA had full casua bellum against Iarq just like
we have if we choose full legal right to bomb Iran back tot he stone
age if think itis best

wether or not Ivading Iraq was in our interest is a valid pint to dabte
not the legality of it

Feather Falls is a gorgeous sight, but only part of the wonderful
natural area near Oroville, CA. Other waterfalls, Table Mountain
botanical area, and the gentle northern Sierra Nevada mountians are all
great places to explore. Well worth some long weekends.

Well, no he didn't. If you read his (GHWB's) book, he was smart enough to not invade Iraq because he realized and stated that *there was NO exit strategy*.

Those that say we should *stay* in Iraq are right: if we leave, it will deteriorate into civil war and yet more instability in the Middle East.

Those that say we should *leave* Iraq are right: if we stay, we just keep spending more hundreds of Billions (better spent at home) and having more of our kids killed off (2500 and counting) and / or mutilated.

So, it's quite an interesting corner the shrub has painted us into. Damned if we stay and damned if we leave. Too bad he missed the part in poppy's book about "NO exit strategy".

By today's standards, what GHW Bush did was cut and run. I agree it was
a good plan. It saved countless American lives, not to mention dollars.
The US contribution to the first gulf war was $9 billion, which is less
that a month of George W Bush's fiasco.

Oh, and bringing up Monica Lewinski in a discussion of Iraq War II is a sign of clear thinking by a neocon.

Seriously, fuck these assholes. These neocon chicken shits are so damned scared. They see terrorists around every corner. They bend over and let Bush and Cheney shove it up their rectums all day long, be it by sneak and peak searches of their homes, illegal NSA wiretaps, and of course stealing $10 billion a month to provide no-bid contracts to the friends of Bush and Cheney.

The neocons are not even wothy of being called Americans. They are a subspecies of human being, constantly cowering in the corner. I rather take my chances with a terrorist than live in a police state.

David posts 99.999% political crazy crap all the time complains about
off topic posts. Give me a break!

I don't hear any "bigotry" or "crazies" or "minutemen" listening to
International SW broadcasters instead I am entertained and informed.

The smart people are still here engaged in on topic discussion. Get with
the program instead of the political crap. If you have to spout your
political opinion then do it and move on. Don't argue with people of
opposite views. The crazy people are the ones that argue and expect that
other people hold their views. Get a clue, it's not going to happen even
if you make a billion posts

Dear Jim,

Yes I knew about that "original" ferrite antenna mounting. I think that all they would have had to have done would have been to put some metal shielding between the original long ferrite antenna and the display. But of course it's much less expensive to just put in a dinky little (and cheaper) ferrite antenna (mounted the "wrong" [shorter] way) and to save money on the metal shielding. Who cares if this "hurts" the MW performance of the radio? Who will ever notice? (Yeah, right!)

Fortunately, I believe that most of us use external antennas both for SW and MW. This takes care of the problem, but it still would have been nice to have had a really long ferrite MW antenna in the radio.

Evidently, in the E1, the "hash" problem is so bad that they can't put in any MW ferrite antenna at all. And at a mere $500.00 retail, I guess this just doesn't give them the budget to fix the problem! (Oh, brother!)

Best,

Joe

The RingTone - Your Teacher Can't Hear !
http://www.freemosquitoringtone.com/
{ Humm... Buzz!!! - Was that a Mosquito??? }

WOW ! - This RingTone is the hottest thing to hit the streets this summer! It was first introduced as a way to get rid of teenagers by making a loud sound that only kids and teenagers would hear. It was supposed to keep the teens off properties by blasting this high frequency sound in parking lots. Now the teens are getting their revenge by downloading it as a ringtone and playing it when they shouldn't be - and adults can't hear it!!! It's been showing up in classrooms all over the world. Check it out - the story just broke in the New York Times and on Digg - even Headline News was talking about the ring tone. Download the ring tone now and test it on your parents!

> amplifier, and most of all... CLASS.

So, you pay for CLASS ? You must have an Eaton E10, with the damn
IF-shift. Do you know why your radio has that switch ? Your cheap E10
is a single-conversion unit, that needs that switch to help avoid
images. You could have spent much less and purchased a Degen 1103,
with dual-conversion and SSB, both which the E10 lacks. The Sony
7600GR's quality is rated much higher, than the cheap Chinese-made
Eton/Grundig plastic boxes - just look at the piece of shit S350 ! In
an interview, Grundig/Eton admitted to jacking up their prices for SW
receivers, because people do not know what is really involved in SW.
Oh, and you call that CLASS ? A reviewer on Amazon, who bought the real
piece of cheap shit "Porsche" model Grundig radio, called Grundig and
they admitted their quality and company are "going down the toilet".
There hasn't been a really decent quality receiver since the DX-440.
You think Eton "cares" - what a joke !

> terrorist threats on the other side of our northern border,

1) This coming from the country who, with open arms, allowed 19 Saudi
terrorists - many on so called FBI "watch lists" - to freely enter North
America, train, and carry out their 9/11 acts in which many Canadians
perished.

The country that reissued a visa to one of the deceased terrorists 6
months after 9/11.

The country who harbours Mr. Posada.

The country who gleefully has welcomed the Talbian mouthpiece Sayed
Rahmatullah Hashemi into their fold where he now enjoys studentship at
Yale where one of his courses was "Terrorism-Past, Present...and Future"

As is the 9/11 deaths of Canadians werent enough, two more
American-coddled terrorists
are under investigaion with providing the Canadian 17 with logistics
money and weapons.

The country that splays wide open its southern border then whines at the
North to carry passports.

> and the
> Canucks serving as such willing hosts and unwilling partners with the

> pointed at our northern border"

No doubt about this one. I agree. The terrorist-lovers do have their
terrorist-gun pointed at the Northern border.

You better start pulling your weight on the war against Al Qaeda.

If one more Canadian dies because of your terrorist-harbouring ways,
there will be consequences.

We have ben very tolerant of your administrations failures and foibles.

That patience is wearing out.

> oh canada ? ~ RHF

Get on your knees when you say that, terrorist-lover.

"Thanks, Canada":

Nobody around here sells Degens. I'll probably buy one some day, just
the same.

The E1XM is made in India, in a defense plant.

Sony makes crap. It's junk. The 2010's front-end goes deaf if you
look at it wrong. The sidebands are completely unmatched in the
7600G. They haven't made a decent radio since the 7601.

Why do you keep saying ''Grundig''?

Why are you so obsessed?

Leaving? DxAss, you don't get it. The chicken shit necons are scared of
a terrorist attack in the US. I go about my day with no such fears, and
I have about 4 mosques in a 10 miles radius around me. The auto repair
shop I use is run by an Afghani. Etc., etc.

Have fun drinking the Bush/Cheney kool aid.

Sorry Miso. I made a mistake. No one in the Clinton whitehouse knew how
to start or properly finish a job. Monica failed to swallow the evidence.

How many democrats does it take to change a lightbulb?

None, they complain about it being dark and wait for a
republican to do it.

It isn't illegal for a President to protect Americans.

I wish Bill Clinton had wanted to protect America, then maybe we would still have a World Trade Center.

Watching Slick Willie on TV lie to a Judge, and then get reamed for it, Priceless.

Harsh PLA commentary:

U.S. fought '240 wars' to dominate 'unipolar world'

China's official military newspaper last week criticized the United States for waging hundreds of wars and playing up international crises. An unusually harsh official commentary in the PLA Daily, the military newspaper, also stated that the United States is in the "process of building a unipolar world," political code for U.S. global hegemonism. The June 9 report stated that the United States took part in more than 240 wars and foreign military operations since its founding.

Now you know what newspapers Dr. DaviD RicKets reads.

meanwhile...

China floats sovereignty claim over 40 islands, 1.5 million sq. km of sea and all oil in between

The aggressive nature of Beijing's international outlook asserted itself last Sunday (June 11) in the guise of a front-page story in the Chinese-run Hong Kong newspaper, Wen Wei Po. The paper, one of Beijing's favorite channels for leaking sensitive " and often self-serving " information, quoted an unnamed member of a senior Beijing think tank as saying the country's military and civilian departments must do more to re-assert sovereignty over as much as 1.5 million square kilometers of sea space.

The Liberal Communist

A must read
http://www.inthesetimes.com/site/main/article/2574/

Read on...

The Fall and Rise and Fall of a China Media Mogul, Rupert Murdoch
[a recovering Liberal Communist]

...shortly after buying the Hong Kong-based Star TV satellite network, Rupert announced in 1993 that such ventures would pose "an unambiguous threat to totalitarian regimes everywhere."

How, we wondered, would challenging China's leaders help his business? Furious Chinese officials responded with demands that Rupert drop BBC World Service Television from his Star TV package of channels. Rupert complied...

Rupert went on to set the standard for sweet-talk. In 1999, he called the Nobel Prize-winning Dalai Lama "a very old political monk shuffling around in Gucci shoes." He ordered his publishing arm, HarperCollins, to drop a book contract with former Hong Kong governor and critic of Beijing, Chris Patten. News Corp. even runs CCTV's news and propaganda on its U.S. satellite network, DirecTV, and moved a Los Angeles TV producer to Beijing to spruce up the content. In the entrance to his swank offices in Oriental Plaza, just off Tiananmen Square, Rupert hung a photo of himself sharing a chuckle with Communist Party chief Jiang Zemin, and another showing his son and heir-apparent, James, meeting with the country's most feared censor, propaganda minister Ding Guangen.
...
But then Rupert tried to leverage his good relations into revenue, and he over-reached. First, he attempted a back-door takeover of a satellite television channel in Qinghai province. Had the deal gone through, News Corp. would have provided the channel's content (as of now, such News Corp. content as the Mandarin-language Starry Skies channel is limited in China to five-star hotels and approved luxury apartment buildings) . A key business partner was Ding Yucheng, son of the former propaganda minister and a proven opener of back doors. Unfortunately, President Hu Jintao then sent his own people to run the ministry that oversees broadcasting, and last year they forced Rupert to unwind the deal.

Then, Rupert's top China executives got caught selling programs illegally. News Corp. salesmen peddled a bundle of four channels, including National Geographic, to cable networks in the hinterland even though everyone knows that's not allowed. Since News Corp. couldn't book the illicit revenue, it

set up a shell company to launder the proceeds, which generally arrived in cash. After the government learned of the scheme from a whistle-blower, officials raided News Corp's offices and carted away computers and documents. Shortly after that, Rupert declared in New York that his company had hit a "brick wall in China."

---

Billionaire Investor George Soros Interested in Chinese Car Company

Wuhu, China • Media reports have it that Hungarian-born billionaire investor George Soros is about to invest $200 million into Chery, the ambitious Chinese car manufacturer with world export plans.

Automotive News cited unidentified sources in reporting on the potential Soros investment.

Chery shot to international fame when Malcolm Bricklin of Subaru and Yugo fame announced big plans for his new company, Visionary Vehicles, to start importing Chery vehicles into the United States in 2007. More recently, the U.S. market introduction was delayed until 2008.

Bricklin retained investment bank Atlantic-Pacific Capital to raise $200 million to develop a range of Chery vehicles suitable for U.S. sale, and now it appears that perhaps the Soros family will foot that bill.

What this means to you? Is this a case of Chery picking? If true, this must mean Soros sees a way to get in on the ground floor of something big.

http://www.edmunds.com/insideline/do/News/articleId=115775

Seedy reality of Communist China's car industry

According to industry expert Michelle Krebs' recent column at Edmunds.com, it was rumored that the Communist regime is even considering legislation to force foreign automakers to supply their previously protected designs and research to their Chinese counterparts as well.

"And then there's China, where international standards for intellectual property rights are not only flagrantly disregarded, but now appear to be sanctioned by the Chinese government. Word out of Beijing is that the government is considering a policy that could force foreign automakers, if they want to expand in China, to hand over auto designs and tooling to their Chinese partners," states Krebs

Similar to the entertainment and fashion industries, piracy of intellectual property is also a problem in the auto industry. Currently, General Motors is in a bitter lawsuit against Malcolm Bricklin's partner, Chery. GM claims Chery's top-selling vehicle, the QQ, is a direct copy of its Chevrolet Spark.

Even Bricklin sidestepped a question in an interview with Paul and Anita Lienhart in 2005 when they probed about the issues involved in working with a company which ultimately answers to the Chinese Communist regime. They asked: "Is it a good thing that the provincial government owns Chery?"

Bricklin responded, "This is the most wonderful thing that ever happened in my life. I'm going to sell a quarter of a million cars. I don't give a damn what everybody else thinks."

http://www.theepochtimes.com/news/6-6-15/42784.html

Neither does Liberal Communists George Soros and Bill Gates.

I am sure that the U.A.W. Union is seriously reconsidering support to Das Democratische [Socialist] Party to which George Soros has contributed $10 million. http://www.discoverthenetwork.com/individualProfile.asp?indid=977

If you mean President Clinton there are a few things to consider.
Among them the fact that the Party-Above-Country GOP was keeping him
from doing his job with a series of harrassing litigations, and more
importantly, no longer President as of January of 2001.

The Clinton Gore National Security team tried to warn the Bushies but
were rudely dismissed.

Unlike the US of Disarray, our organizations co-operate with each other
to catch terrorists on our soil. Over 3000 9/11 dead stand as mute
testament to how well your organizations co-operate.

You need to work on your geography. I am sure that you meant to say the
terrorists in Alaska, Hawaii and the lower 48 states. After all, there
seems to be no shortage of American home-grown terrorists.

> fixed downconverter, e.g., from 455 kHz to 12 kHz.

Err, Ummm, well, yeah, in THEORY you could. In practice you'll need to decouple your computer from the antenna pretty well. This means you'll need a very high Q antenna with a very low noise amplifier to isolate it, and a very well isolated DC supply to power the amplifier. If those things exist, you can build your very own VLF receiver from a sound card. In fact, if your sound card can manage a sample rate of at least 120 kSamples/second then you could use it to tune in WWVB at 60 kHz or perhaps the German equivalent at 77 kHz if you can manage to sample at twice that rate.

Other than WWVB, I don't think much is still down there. The earth's ionosphere resonates at about 7 Hz if memory serves, so that might be a lower limit to what you might want to try monitoring. The Omega system was decommissioned years ago, though I've heard rumors that some parts of it might still be in service in some corners of the world. Finally, if there are any old FDM coaxial systems nearby, you might detect some leakage from their traffic (I doubt there are any who still use this method to trunk VF traffic together, but if there are a few, you might still hear it)

And yes, a very few radios have a third IF at 50 kHz which you could use such a sound card with. That experiment has potential.

73,

Jake Brodsky

What planet are you from? China's been a significant threat (at least
potential threat) for over 50 years. Not only do they have nukes, and have
had them for half a century, they also have the capability of amassing a
standing army larger than our entire population.

Yeah, everything looks easy in theory. Computers are serious noise machines.

You've probably seen this website:
http://www.vlf.it/

Think of painting a room. Isn't 90% of the work the preparation? Well, in signal analysis, conditioning the signal is a serious chunk of the work. Once you have something clean, then digital analysis can be done.

If you do build any of those designs on vlf.it, you may want to investigate better (lower noise) op amps.

It is wonderful how you can take something so complex as geopolitics and reduce it down to several run on sentences and an apparent banishment of the possessive.

Here's a tip. If you wish to make a point and not look like an idiot, or at least less of an idiot, try learning the English language. Your bad grammar makes you seem as a buffoon. You also cannot make statements like "side with the terrorists" without a little thing called a source or reference.

For example, it was Richard Milhouse Nixon, a Republican, who "cut and run" from Vietnam with his Vietnamization policy. And it was George Herbert Walker Bush, another Republican, who "cut and run" from Gulf War #1 when he prohibited coalition forces from advancing into Iraq and toppling Saddam. This allowed Saddam to kill many Kurds with poison gas and to gun down many Shiites in the Basra area.

The microphone imput of a typical soundcard makes a very bad quallty
reciever.
I did recieve Swedisch SAQ transmitter on 17,2 KHz on a normal soundcard
using the LINE input and a good balanced microphone input of a normal audio
mixer (Behringer).
I used an aperiodic balanced loop antenna at the microphone imput of the
mixer.
You have to be very careful to keep the signal levels low to keep
intermodulation to a minimum.

I even recieved whistlers and the like!

MRe

Voice of Oromia Independence launches
weekly broadcast today

This is just published in the Media
Network Weblog, but in view of its
timeliness I am also posting it here so
some of you may be able to catch the
inaugural broadcast:

Media Network has been advised that,
starting today, a new radio station
called the Voice of Oromia Independence
is beaming a weekly programme to
Ethiopia on Saturdays at 1500-1530 UTC
on 15650 kHz. Broadcasts will be via
a T-Systems facility in Germany. The
group producing the programme says it
is not affiliated with any of the existing
Ethiopian/Oromo programmes on
shortwave, but we don't have any more
information yet.

I heard back from Eton. They said that they will have replacement battery covers available in six to twelve weeks and to try back then. That is just fine with me. I will hang on to the radio until then. I'm still enjoying my new Eton E10 anyway. The more I use the E10, the more I like it. It's nice to have a digital portable with a tuning wheel, especially when it will let you scroll through your preset frequencies. Maybe I'll take some time and do a review of this radio.

I looked closely at my E5 battery cover and it seems it was not molded perfectly straight. I bows in slightly at the point where the catch is located. The back of the radio appears perfectly straight. I'm hoping a new battery door will set things right. It may seem like a small matter but I am just very particular about my radios. Having a 7600GR for the past four years has given me very high expectations.

> Why are you so obsessed?

I have Grundig OCD; I hate Grundig the most, because they have the biggest pieces of shit. If you look at the reviews for the 7600GR on eham.net, Amazon, and RadioIntel, almost everyone disagrees with you ! No one has made a decent radio since the DX-440, including the E1. The E1 is assembled in India, under slave wages - I wonder why it has wobbly knobs and an antenna that flops ! You still didn't rebutt most of my points, from above, like your cool IF-shift switch. Eton/Grundig makes just asthetically pleasing radios with useless switches (look at the S350), or switches that are supposed to impress the ignorant, but only make up for weaknesses, as in you E10. Also, I have Grundig/Eton

OCD, just to get a reaction from ,"have to have the latest and greatest", but, "only think with my dick", SW nerds. You could get a Degen 1103 over Ebay, for $45 + $20 S&H.

2300. Re: [OT]? Icom IC-7000 DC Power Plug Connector ... is??

>
> You can see the connector on sale on eBay here:
> http://tinyurl.com/owrnn , but I would like to find it closer to home
> ... thanks.

The connector may be made by Molex (www.molex.com)You might find your
answer by searching their website.

This long link may help.

http://www.molex.com/cgi-bin/bv/molex/jsp/products/search.jsp?BV_SessionID=@@@@0289851125.
1150553075@@@@&BV_EngineID=ccceaddiddgifhecflgcehedffgdfmk.0&channel=Products&superFamOID=
-8810&chanName=superFamily&familyOID=-8812&PN=062&searchType=n&searchMethod=e

AMP also makes/made connectors. They seem to be owned by tyco now.
Try here
http://catalog.tycoelectronics.com/TE/bin/TE.Menu?M=MENU&ID=17584&BML=10576,16358&LG=1&I=1
3

A connector may be called a "molex connector" but that would refer to a very
generic style of connector and not a specific configuration.

You may also be able to find the connector you are looking for at
www.digikey.com

If so, then you can take the manufacturer's part number to a local supplier
and try to get a matching part.

Hope this helps.

That married Irish woman wayyyyy over yonder across the big pond.She
said the Walgreens stores in her area stopped selling her favorite
Maybelline cool effects eye shadow/liner pencils.I had to get up off me
lazy arse yesterday afternoon an go to a local Walgreens store and buy
seven (three flavors) of them thngys for her and stop off at a post
office and snail them to her.
wimmin!

Germantown, MD 20876

6. SPECIFIC RESTRICTIONS ON USE OF THE SERVICE

6.1 PROHIBITED CONDUCT.

You agree not to use the Service as follows: (a) for any unlawful,
improper or criminal purpose or activity; (b) to post or transmit
information or communications that, whether explicitly stated, implied,
or suggested through use of symbols, are libelous, defamatory, invasive
of another person's privacy, obscene, indecent, pornographic,
sadistic, cruel, or racist in content, or of a sexually explicit or
graphic nature; or which espouses, promotes or incites bigotry, hatred
or racism; or which might be legally actionable for any reason; (c)
hurts minors in any way; (d) forge headers or otherwise manipulate
identifiers in order to disguise the origin of any content transmitted
through the Service; (e) intentionally or unintentionally violate any
applicable local, provincial, state, national or international law,
including, but not limited to, rules, orders and regulations having the
force of law; (f) to attempt to access or access the accounts of
others, to spoof or attempt to spoof the URL or DNS address, or to
attempt to penetrate or penetrate our security measures or other
entities' systems ("hacking") whether or not the intrusion results in
corruption or loss of data; (g) to bombard individuals or newsgroups
with uninvited communications, data or information, or other similar
activities, including but not limited to "spamming", "flaming" or
denial or distributed denial of service attacks; (h) to transmit

unsolicited voluminous emails (for example, spamming) or to intercept, interfere with or redirect email intended for third parties using the Service; (i) to introduce viruses, worms, harmful code and/or Trojan horses on the Internet; (j) to post information on newsgroups which is not in the topic area of the newsgroup; (k) to interfere with another person's usage or enjoyment of the Internet or this Service; (l) to post or transmit information or communications that are defamatory, fraudulent, obscene or deceptive, including but not limited to scams such as "make-money-fast" schemes or "pyramid/chain" letters; (m) to damage the name or reputation of HughesNet, DIRECTV, HUGHES, or any of their respective parents, affiliates and subsidiaries, or any third parties; (n) to transmit confidential or proprietary information, except solely at your own risk; (o) to violate our or any third party's copyright, trademark, proprietary or other intellectual property rights, including trade secret rights; (p) to generate excessive amounts (as determined in our sole discretion) of Internet traffic, or to disrupt net user groups or email use by others; (q) to engage in activities designed to or having the effect of degrading or denying Service to HughesNet users or others (including activities that compromise a server, router, circuit or software; (r) to use any name or mark of HughesNet, DIRECTV, HUGHES, or their respective parents, affiliates or subsidiaries, as a hypertext link to any Web site or in any advertising publicity or other commercial manner; (s) to use your HughesNet account for the purpose of operating a server of any type; (t) to use the Service or the Internet in a manner intended to threaten, harass, or intimidate others; (u) to cause the screen to "scroll" faster than other subscribers or users are able to type to it, or any action that has a similar disruptive effect, on or through the Service; (v) to use the Service to disrupt the normal flow of online dialogue, (w) to use the Service to violate any operating rule, policy or guideline of any other online services provider or interactive service; (x) to attempt to subvert or to aid third parties to subvert, the security of any computer facility or system connected to the Internet; (y) to impersonate any person or using a false name while using the Service; (z) to install "auto-responders," "cancel-bots" or similar automated or manual routines which generate excessive amounts of net traffic, or disrupt net user groups or email use by others; (aa) to make false or unverified complaints against any HughesNet subscriber, or otherwise abusing any of our complaint response procedures; (bb) to export software or any information in violation of US export laws; or (cc) to use the Service in contravention of the limitations of the pricing plan you have chosen.

You ask a very perceptive question..."who *are* we fighting?"

...the Iraqi civilians tired of no water, no sanitation, no fuel, no electricity?

...the pissed off Iraqi citizens that are upset and feel that their country was invaded for no good reason and who view themselves as 'Freedom Fighters' trying to rid themselves of the 'occupiers'?

...the -NOT- from Iraq trouble makers that came in *AFTER* the country was invaded and thus de-stabilized?

Who indeed?

Only Congress can declare a legal war. The enemy has to have ground
and a flag.

The War on Terror is pure bullshit to divert your attention while the
Toriess steal back their country.

> investigate better (lower noise) op amps.
>

i love that site.

some of my ideas:

1. 50 hz filter -- something to get rid of harmonics and fundamental

2. antennas -- horizontal loop up in the air, coil-type loop, tophat or
marconi, earth dipole (rods)

3. low noise amp -- rather than using the sound card mic in, i plan to use
line in with an external amp

4. laptop -- this might eliminate some of the trash from the monitor and AC

5. battery or solar power -- for amplifiers

6. audio -- using pro audio gear might work

7. semi-pro card -- something at 192 khz, for DC to 90 khz reception

some of the earthquake guys listen down to 1 Hz. at least one guy has made
a 90,000 turn antenna. i am on a budget, so i hope an earth dipole will
work.

some guys are using untuned coils and mic input. they are actually
detecting an amazing amount of things with that setup. i'm hoping to
achieve better results with homebrewed amps.

If those
> things exist, you can build your very own VLF receiver from a sound

there are several sound cards that sample at 192 khz. i think they will
work with most spectral analysis software for the PC.

> Other than WWVB, I don't think much is still down there. The earth's

it might make more sense to buy an off the shelf solution e.g. Ciaoradio,
RFspace, or Gnu Radio. however it would be cool to homebrew the whole
thing!

most 20 hz to 20 khz guys are using spectral analysis software. i'd like
something that will decode the RTTY signals and provide an audio output to
listen to. something like the Ciaoradio or RFspace would be cool.

i hope that someone writes a really comprehensive program for ELF.

>
> What planet are you from? China's been a significant threat (at least
> potential threat) for over 50 years. Not only do they have nukes, and have
> had them for half a century,

they also have the capability of amassing a
standing army larger than our entire population.

After a Nuclear War between China and the USA.
{ America is always the loser in a War with China. }

China could easily channel 50 Million Workers
in to a Ship Building Program to Lanch a Ship a Day
every Day for 50-Years and have 1000 PLA Troops
aboard each Ship to Invade and Occupy the USA
and keep the Battle going for 50-Years until they
have Won and the USA is America No More [.]
That's 1000 x 365 x 50 = 18+ {First Trip} Million PLA
Invaders on the Ground followed by 400+ Million
taking each and every America City; one-by-one
until America is one big Peoples Republic.
- - - Troop Ships Over - Food Ships Back
an endless line Across the Pacific Ocean.

So the Question is . . .
Is China (PRC) A Real Mititary Threat To The USA ?
- - - My Answer Is Yes [.] ~ RHF

Wrong. The ''News'' is whatever they want you to believe is the news.
They make half that shit up. Fox News presents a glazed rewrite of
the days events, slanted to support their corporate agenda.

Americans are incapable of making intelligent choices. They have been
dumbed down since they were babies and been fed a steady diet of
bullshit to the point where allegedly having ''Freedom of Choice'' is
megacruel irony.

Don'tcha just LOVE these dumbass liberals who like to claim Jesus as one of their own, while simultaneously banning:

1. - Prayer in schools
2. - Christmas displays
3. - 10 Commandment displays
4. - Christian cross displays
5. - Even trying to ban the very mention of God in the Pledge Of Allegiance?

And don'tcha just LOVE these dumbass liberals who like to claim Jesus as one of their own, while simultaneously promoting and supporting:

1. - Homosexuality
2. - Pornography
3. - Pedophilia
4. - Abortion
5. - Communism?

And don'tcha just LOVE these dumbass liberals who like to claim Jesus as one of their own, while simultaneously:

1. - Mocking Jesus
2. - Mocking Christianity
3. - Mocking the traditional family
4. - Mocking traditional morals
5. - Mocking God?

Yep, don'tcha just LOVE these dumbass liberals? To hell with the whole disgusting lot of 'em!

You can pray all you want in school. The ban is against the prayer being a part of the official business of school and against the school promoting religious practices.

Christmas is an insult to Jesus. He was about humility and sacrifice. Xmas is about greed and materialism.

I'm sure Jesus just loves everybody wearing S&M jewelry (aka the crucifix dealy).

You are a complete moron. The idea of Jesus transcends those POLITICAL issues you list. You do not get morality from preachers or elected officials. You get it from your heart (if you have one).

Jesus was poor man who cared more about other people than about himself. There's an inherent beauty in that kind of love that once realized makes all that other bullshit fall into place. Has nothing to do with following orders and living forever. If that's your reason for being a Christian you go the head of the line...straight to HELL!

Communism? Careful...

Authorization for the use of military force is not a delaration of
war.

The founders intent is clear. Despotic leaders tend to use ''being at
war'' as a reason to consolidate their power and as an excuse to
trample on individual rights. To prevent the president from using war
and fear as a weapon agains the People, the Constitution clearly
states that Congress and only Congress can declare war.

The fact that the last few Presidents and Congresses have been
skirting this principle is deplorable. Now that slackness has come
around to bite us in the ass. We have no right to give up principles
others have fought and died for.

Fuck you, asshole. You are worthless.

My point is that to make intelligent choices you must have good
intelligence. Unless people make a very extra special effort to find
out the truth, the ''facts'' upon which they act will be so distorted
as to render the decisions perversely flawed.

You dumb son of a bitch. You are being manipulated like a Tijuana
marionette.

Jesus would disapprove if schools promoted prayer and His teachings?
He'd rather have schools continue to promote homosexuality and all
other sorts of practices that Jesus condemned? LOL, I don't think so!

> Christmas is an insult to Jesus. He was about humility and sacrifice.

Jesus is insulted because millions celibrate His birth and honor Him?
LOL !

> Xmas is about greed and materialism.

That's certainly true about SOME PARTS of the Christmas holiday.
Especially the obscene profits reaped by Jewish businessmen selling
Christmas wares.

> I'm sure Jesus just loves everybody wearing S&M jewelry (aka the
> crucifix dealy).

What's a "dealy"? Leave it to a liberal to have S&M fantasies about the
crucifixion.

>
> You are a complete moron. The idea of Jesus transcends those

> elected officials. You get it from your heart.
>

While your heart decides what kind of morals (or lack thereof) you
practice, peachers and politicians have the power to influence people's
moral choices by the things they say and the types of laws they pass

(like abortion, gay marriage, etc.).

> Jesus was poor man who cared more about other people than about
> himself. There's an inherent beauty in that kind of love that once

> for being a Christian you go the head of the line...straight to HELL!
>

Christianity has everything to do with following orders. For example,
Christ commanded His followers to preach the gospel, obey His
teachings, and fight evil, among other things. He never intended
Christians to be spineless wimps that just bend over when evil raises
it's ugly head ... as it is doing in the USA big time.

Al Queda is not a state. Al Queda is much like the Mafia, a group of organized crime figures. Would we declare war on a state because a Mafia boss had a bunch of people hit? After the St. Valentine's day massacre, did we declare war on Sicily? Admittedly, the number of murders was different, but the number shouldn't matter, as even one life is invaluable.

WHY JOE'S A LIBERAL

Joe gets up at 6:00 AM to prepare his morning coffee. He fills his pot with good, clean drinking water because some liberal fought for minimum water quality standards. He takes his daily medication with his first swallow of coffee. His medications are safe to take because some liberal fought to insure their safety and that they work as advertised.

All but $10.00 of his medications are paid for by his employer's medical plan. Because some liberal union workers fought their employers for paid medical insurance, now Joe gets it too. He prepares his morning breakfast -- bacon and eggs this day. Joe's bacon is safe to eat because some liberal fought for laws to regulate the meat packing industry.

Joe takes his morning shower, reaching for his shampoo. His bottle is properly labeled with every ingredient and the amount that is contains because some liberal fought for his right to know what he was putting on his body and the breakdown of its contents. Joe dresses, walks outside and takes a deep breath. The air he breathes is clean because some tree-hugging liberal fought for laws to stop industries from polluting our air. He walks to the subway station for his government-subsidized ride to work; it saves him considerable money in parking and transportation fees. You see, some liberal fought for affordable public transportation, which gives everyone the opportunity to be a contributor.

Joe begins his work day; he has a good job with excellent pay, medicals benefits, retirement, paid holidays and vacation because some liberal union members fought and died for these working standards. Joe's employer meets these standards because Joe's employer doesn't want his employees to call the union. If Joe is hurt on the job or becomes unemployed he'll get worker's compensation or an unemployment check because some liberal didn't think he should loose his home to temporary misfortune.

It's noon time. Joe needs to make a bank deposit so he can pay some bills. Joe's deposit is federally insured by the FSLIC because some liberal wanted to protect Joe's money from unscrupulous bankers who ruined the banking system before the depression.

Joe has to pay his Fannie Mae underwritten mortgage and his below market federal student loan because some stupid liberal decided that Joe and the government would be better off if he was educated and earned more money over his lifetime.

Joe is home from work. He plans to visit his father this evening at his farm home in the country. He gets in his car for the drive to dads; his car is among the safest in the world because some liberal fought for car safety

standards. He arrives at his boyhood home. He was the third generation to live in the house financed by Farmers Home Administration because bankers didn't want to make rural loans. The house didn't have electric until some big government liberal stuck his nose where it didn't belong and demanded rural electrification (those rural Republican's would still be sitting in the dark).

Joe is happy to see his dad, who is now retired. Joe's dad lives on Social Security and his union pension because some liberal made sure he could take care of himself so Joe wouldn't have to. After his visit with dad, Joe gets back in his car for the ride home. He turns on a radio talk show. The host keeps saying that liberals are bad and conservatives are good. He doesn't tell Joe that his beloved Republicans have fought against every protection and benefit Joe enjoys throughout his day. Joe agrees, "We don't need those big government liberals ruining our lives. After all, I'm a self-made man who believes everyone should take care of themselves, just like I have."

In the years to come, Joe's life will change dramatically. The U.S. dollar will be devalued as a result of our huge deficit, our living standards demolished, our standing with the world diminished and our social security gone...all because some conservative republican made sure he could take care of himself and his buddies.

Isn't it funny that John 'Fraud' Kerry married a woman worth about a billion dollars (Money made by a conservative Republican) so that he could take care of himself?

I LMFAO every time I think about that!

It's statements, such as the one mentioned above, that really show your
true colours and how show how truly pathetic is your version of
"Christianity". History has no shortage of people claiming to be
Christian that blame people of Jewish extraction for the woes in the
so-called Christian society. Try cleaning up your act BEFORE blaming
anyone else.

Anybody can follow orders but it is what is in the heart that counts.
And you need to get back to the basics.

Dr. DaviD RicKets is regurgitating his lies and propaganda posts from last year which has been proven false. He ignores the fact that Impeached Clintoon as well as John Fuckin' Kerry were warned by the FBI of specific threats regarding airports and highjacking planes in the late '90's by al-Qaeda. Nothing was done! Remember, the Bush administration was so hindered by the Left-wing Demon-crates (Gore) after the contesting of the 2000 election that Bush was forced to delay establishing his cabinet. And Impeached Clintoon's "CIA" is well known now to have been compromised with Left-wing liberals which started way back with the Iranian disgraced peaNUT Prez Carter - another Demon-crate. This is all factual history that can be read in several published sources and books. But Dr. David RicKets never read a "book" in his entire life. His information sources are nothing more the propagandic lies from brainwashing Left-wing-Socialist internet sites. Do a search on "rickets@knac.com" in Google Groups and you will find this truth.

In that previous thread which Dr. DaviD RicKets is now so conveniently ignoring it is clear that the "CIA" is no longer what you would expect and current actions by certain "CIA" operatives have moved into the political arena instead of concentrating on intelligence. It is no wonder why President Bush recently appointed a military man to head the CIA and clean up the Demon-crates shit.

Part of that previous thread included the following:

FROM Pellosi Poodle David's own link
http://nationaljournal.com/about/njweekly/stories/2005/1122nj1.htm
...
"One reason that Bush, Cheney, and Rumsfeld made statements that contradicted what they were told in CIA briefings might have been that they were receiving information from another source that purported to have evidence of Al Qaeda-Iraq ties. The information came from a covert intelligence unit set up shortly after the September 11 attacks by then-Undersecretary of Defense for Policy Douglas J. Feith."
...
"The secretive unit was set up because Cheney, Rumsfeld, Wolfowitz, and Libby did not believe the CIA would be able to get to the bottom of the matter of Iraq-Al Qaeda ties. The four men shared a long-standing distrust of the CIA from their earlier positions in government, and felt that the agency had failed massively by not predicting the September 11 attacks."
[Remember - Able Danger]
...
"In January 2002, Maloof and Wurmser were succeeded at the intelligence unit by two Naval Reserve officers."

...
"Internal Pentagon records show not only that the small Pentagon unit had the ear of the highest officials in the government, but also that Rumsfeld and others considered the unit as a virtual alternative to intelligence analyses provided by the CIA."
...
"The Pentagon unit also routinely second-guessed the CIA's highly classified assessments. Regarding one report titled 'Iraq and al-Qaeda: Interpreting a Murky Relationship,' one of the Naval Reserve officers wrote: 'The report provides evidence from numerous intelligence sources over the course of a decade on interactions between Iraq and al-Qaida. In this regard, the report is excellent. Then in its interpretation of this information, CIA attempts to discredit, dismiss, or downgrade much of this reporting, resulting in inconsistent conclusions in many instances. Therefore, the CIA report should be read for content only-and CIA's interpretation ought to be ignored.' [THIS LAST QUOTE IMPLIES THAT INTEL MAY HAVE BEEN SHARED WITH THE CIA!]
...
"The Plame affair was not so much a reflection of any personal animus toward Wilson or Plame... but rather the direct result of long-standing antipathy toward the CIA by Cheney, Libby, and others involved. They viewed Wilson's outspoken criticism of the Bush administration as an indirect attack by the spy agency."
...
http://nationaljournal.com/about/njweekly/stories/2005/1122nj1.htm

Ask yourself why, why why, and keep the words "Able Danger" in the back of your mind.

NOW READ THIS: http://www.brookesnews.com/052609cia_print.html

Then spend the weekend reading the book "Dragon In The Dark" by D.J. McGuire, and think about the Global Strategic importance of Middle East oil between Communist China and the U.S., the Western Free world.

READ
http://china-e-lobby.blogspot.com/2005/09/on-war-on-terror-part-iii-communist_11.html

FYI: Saudi Arabian Royalty is now unstable. If it falls Saudi Arabia will be heavily courted by the Chinese Communists which already has deep ties with Iran and Syria, known terrorist States. Even Richard Clarke from the Impeached Clintoon administration recently said exactly that about Saudi Arabia's instability and China's intense interest on his book tour. In passing I might add.

"When all these facts are taken into consideration, all given their proper weight, then - unless you are either totally credulous or fanatical - you will have to admit that the resources of a certain country take on a particular importance. What country might that be? Iraq."

http://www.truthout.org/cgi-bin/artman/exec/view.cgi/37/11131

It's all very simple really. To which Dear Leader do you wish to be captive?
Saddam Insane? Communist Hu Jintao? Russian KGB Putin? Iran's IYaToldUso?

WHO?!

FACT: The fifth most common language in Blog-O-Sphere propaganda is Farsi.
Any wonder what these unemployed yet well educated Islamo-fascist Irainian
bloggers are doing all day long? Translating anti-U.S., anti-Israel,
conspiracy theories into english.

The Left-wing is either deaf, dumb and blind, and are being manipulated by
conspiracy theories originating from overseas propagandic blogs OR THEY ARE
COMPLICIT OR BOTH. In the latter case they can simply be referred to as
Useful Idiots or Virtual Islamo-fascist suicide bombers.

It's a good speaker. But doesn't the A/B switch control inputs instread of outputs? It does on my Kenwood SP230 speaker.

I think this is incorrect in the auction: "For the DXer it has a modification so that by selecting the A or B positions you can switch from speaker to headset with the push of a button!" Unless some previous owner hacked the circuitry.

> Jake Brodsky
> Amateur Radio Station AB3A

The point of my message was that you cannot make a SW radio out of a laptop alone (the question he asked) but could make a VLF receiver out of a laptop that could be used with a downconverter to tune SW. Many have done so. The downconverter is typically a superhet radio whose last IF is downconverted through an add-on to the audio frequency range.

The audio frequency laptop receiver need not have especially high sampling frequency or sample size when used with a downconverter for SW. A 10 kHz wide passband is adequate for most transmission modes and is readily provided by a 48 kHz sample rate - even 24 kHz could be enough. Because the front end tuner has AGC and can regulate levels into the sound card, the latter's A/D converter having something approaching 16 bit resolution will have more than adequate dynamic range - even 8-bits could be sufficient.

Of course, the state of the art is for higher resolution A/D converters and higher sampling rates for direct conversion for DSP. As discussed elsewhere, great care must be taken in controlling interference from the SDR to itself, via the antenna or other unintended coupling.

Tom

to argument justice?

Justice for america today is seeing that she not be attack or that she
will convince her enemies that attacking us is bad diea

all nation have the moral right and duty of self defense

if they will not do then they cease to be nations
If in our case we can't after a faithfull effort to root out and
thdestory the terroists we would have the moral right to obliterate the
populations that spwn with our WMD's I hope we wil thik long and hard
before adopting that course but in the end that sad duty may be forced
on the USA
> You have zero knowledge of the
> philosophical underpinnings of our experiment in democracy and that's
> a real sad thing.
realy? yo u think I knw knowthing of the constition

I know it says none of the things you claim it does
Our Founding father what not have said we can not fight an enemiy that
threatens our very existance

indeed the notion you advance that our enemey must have a flag is
abusurd many of the founders of the nation felt they were Defending
England and English values anangainst the efforts of the Crown
ministers (and not the crown it self

I repeat what you ignored
you are full of plattitudes that you either can't support or will not
indeed you seem to contend that if the NAZI's did not have a flag we
could have fought a war with them

DaviD - So you want to take away the VOTE
from the Majority of Americans
-IS- This the Daily Talking Point from
the Democrat party of the USA ? ? ?

FWIW - I read a Two Newspapers via the Internet.
+ Listen to both Talk Radio and NPR.
+ Watch TV Programming and 'TV News including PBS.
So DaviD - In your opinion - I should not be allowed to Vote.

WHO Make You "The Decider" -aka- a Liberal Who
Knows Best What The "little {brained} people' need.

I sure that the whole country will be better when only
Liberals can Vote and the average TV Watching Citizen
is relegated to doing as they are told -by their Liberal
{Socialist Communist} Masters.

david - recommend an hour of tv a day to simply
rationalize your brain to average american thinking ~ RHF

Source record: 79439

BAD,

The Congressional Declaration to allow the Use-of-Military-Force
is to allow the Full Use of America's Military Force Against Al Queda.
To Treat this as a War-on-Terrorism using the Full Force of the USA
Government -vice- a Police Matter with 'limited' Civilian Resources.

IMHO - Al Queda clearly has different objectives then the Mafia.
One is a World Wide Terrorist Organization and the other is a
World Wide Criminal Enterprise - They Exist for different reasons.

>threatens our very existance
>
Old Father Whatnot...didn't Pat O'brien play him back in the '40s?

What threatens our existence is overreacting to an annoyance that the rest of the world has been dealing with for decades. Finally, the USA gets attacked by a couple dozen religion crazed college dropouts with box cutters and Windows Flight Simulator, and we panic like little girls. Our reaction to 9-11 is totally out of proportion. We have thrown the baby out with the bath water because wimps like you don't believe in America.

If you were capable of seeing the big picture then you, like I, would not have been the least bit surprised by 9-11. It was bound to happen. We've been insulting proud people(with infinite patience).

Good evening everyone,

For a few week I bought a sony sw55. I noticed a "plopping" sound at the beginning of a strong SSB-signal. It don't occur with weaker stations.

Has anyone a explanation?

Best regards,

Roald

Everyone but I, apparently...

As Americans we are entitled to a vigorous and competent mass media,
questionaing authority and speaking truth to power on behalf of the
little guy. This ain't happening. There is no Freedom of the Press
when the Press and the Government are both run by the same people.

should have a vertical form factor and a display on the end that you can see when the thing is in your shirt pocket. It should have an active antenna on the end of a short cable with a clothespin clip suitable for lapel, epaulet or hat brim. Alternately, the antenna could be built into the headphones circuitry.

By using the imbedded link I get:

This listing (#) has been removed or is no longer available. Please
make sure you entered the right item number.

If the listing was removed by eBay, consider it canceled. Note:
Listings that have ended more than 90 days ago will no longer appear on
eBay.

Try searching for another item now.

> Anyone try out this receiver yet? Pros and cons?

Personally it's my favorite receiver. I've had a couple of Drake R-8s, two NRD-525s, three FRG-100s and others and definitely prefer the R75. Mine does have the DSP unit which provides somewhat better S:N under heavy QRN conditions. I also did the simpler AGC & sync detector mods and the AM sync works quite well now. CONS: well, it's really ugly and almost impossible to work on since most of the components are the tiniest surface mount parts. The audio isn't the best but an external speaker will help this immensly. The power supply delivers way too much voltage which causes the internal regulators in the R75 to run hot, so I put a 3-T regulator on the supply that provides a regulated 13 volts and that cooled things down considerably. I think it normally runs about 16 volts or so (?).

For $500 I'd get an Eton E1XM now. The ICOM ain't a bad radio. I use
mine for bedside AMDX. Leave it in the SSB mode at all times (no
local AM where I live except for a terrible sounding 500 W station
that plays the worst music I've ever heard.

IT'S ....

A "New Bell & Howell AM/FM/SW Receiver. Comes with a nice carring
case, power supply, and earphones. Model # KK-C180"

Very considerate of that case to care so much.

WTF is "DX Spotting"?

And the $64,000 question not answered in the ad: DOES IT WORK?

No problem. Just search on "R75" not "IC-R75."

A number of people that use the news group have this radio and there are
comparisons between this and other radios. There are modifications that
can be done on this radio. Well, you can just imagine the possibilities
with 11,600 posts on R75.

Did you mean 6875? I was hearing them there (actually, it was more like 6876).

Also a nice signal from Radio Australia tonight on 15515.

Steve

If you are thinking of buying - it is probably one of the better bang
for buck out there. Plan on doing the Kiwa mods and an outboard
speaker. Or better yet an outboard audio chain or input the audio into
your pc sound. There is Yahoo group too which may already have been
mentioned in this thread.

2591. Seer van Rensburg's Prohpechies Revealed on "Hello, Africa!"

Newsgroup: rec.radio.shortwave
Date: 2006-06-19 09:58:52 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1150711131.764065.261140@r2g2000cwb.googlegroups.com>
Source record: 79374

Nico Coetzee from Great Brak River (Cape South Coast) continues the discussion of the prophecies of the Boere Seer "Oom Klasie" van Rensburg (1864 -1926) and the incredible way in which these predictions actually came true and are coming true today, even as you are reading this.

Other experts on these prophesies who called in were "Adam from England" who told about the recent bombings in London and other occurrences in Britain happening exactly as predicted, and Julie van Rensburg (no relation of the Seer) from Durban, Natal, who had translated some of Adriaan Snyman's books about the Seer.

Nico relates how Adriaan Snyman was ridiculed for for publishing Oom Klasie's prophesies about Luderitz Harbor and the "Impossible" repair of the sand-dune covered railroad line to Prieska, and how these predictions came true and the ridiculers had to eat their words. Nico provides an eye-witness account of the condition of the rebuilt harbor and railroad line.

Nico, Adam and Julie relate what the Seer's predicted will happen next to the USA, Britain, Germany, the Middle East, and other countries, how the Third World War will start and how the Boerevolk will provide a safe haven for flocks of new white immigrants.

How do these predictions concern you? Listen to find out.

The problem? You had a perfectly good radio modified to do something that it wasn't necessarily designed to do by a fellow who obviously didn't know what the hell he was doing. That's the problem.

Gee, what a pertinent question.

Maybe the answer is that tel-a-mon's *hypocrisy* is communicable...

;-)

Not quite. Testing on rules, regulations and technical knowledge is a bit different than testing on one specific mode of communication. I use CW, but considered the continued archaic CW testing requirement to be silly and outdated. It should have been dropped 30 years ago.

We give driving tests on the ability to drive the car and follow the regulations. We don't test on the proper operation of a buggy whip or care and feeding of horses. While people still enjoy riding horses and driving around in buggies, they do this of their own free will and no one is forcing it on them through a testing process to get a driver's license. The horse as a general means of transportation is over. We have evolved beyond that, but people still ride horses for fun and enjoyment and the government does have to force it on individuals just in case we ever have to go back to using horses for transportation in an extreme emergency.

> tried transmitting with and without my antenna tuner without success.

One can only guess without seeing the radio & knowing what the guy did.
Usually frequency-expansion mods like this involve reprogramming the
CPU chip by removing/moving/installing diodes.

One possibility is that this modification has unexpected side-effects;
if you were to undo it - put the diodes back to put the radio back to
factory condition - the HF capability would come back.

A few years ago, if you knew how to solder it would be fairly trivial
for you to undo this mod yourself. However, with modern radios the
diodes in question are surface-mount. I have nearly 40 years
"shade-tree" experience working on electronic gear & would not guarantee
my ability to safely undo a surface-mount mod. I certainly would not
recommend that an inexperienced technician try it.

It is conceivable there's a different mod that will allow you to both
keep the marine VHF transmit and the HF transmit. The manufacturer
isn't going to tell you what it is (and I certainly have no idea!) so
you're going to be taking your chances...

The other possibility is that the guy doing the mod made a mistake &
nicked a wire somewhere, or got a tool somewhere he shouldn't have &
shorted a circuit, or dropped a solder blob or wire end in the works
somewhere. There's no way to troubleshoot that over the Internet. A
technician is going to have to examine the radio.

What exactly does it do? Does it *receive* OK on the ham bands? Does
it transmit CW on the ham bands? How about FM transmit? (above 29MHz
only, unless you live in a country that for some reason allows FM
transmission on lower frequencies!) How about transmit on 50MHz?

What does it do when you try to transmit ham SSB? (no output at all?
TX light doesn't light? Error message in the display?)

Are you certain it transmitted on the SSB ham bands *before* it was
modified?

I think you're going to have to take the radio to a qualified Icom
technician.

Were those 525's using external speakers? I'd figure that
improving the audio on the 525 would give it a big
boost in comparison with the R75.

As for the R-8 vs. the R75, that's been hashed over so
many times I'm not going there.

TORTURE IN USA: Secret Aerosol Rooms

Look at this!!

US Scientist needs legal help dealing with the secret aerosols rooms (SARs) operated illegally in Philadelphia area, Newark (DE), Hampton and Williamsburg (VA) and other places. Highly volatile aerosols with and without bacterial content cause dry cough, airways a...

Full text at:
http://buyit.philly.com/findit/search/results.jsp?catId=krd_philenqda...

This is a new on-line ad placed in Philadelphia Inquirer and Philadelphia Daily News on www.philly.com (see full text below) about the secret aerosols rooms in US. You can find it by searching "secret", say, in the ad section of philly.com.

Democracy can not function effectively without the informed public. As a former NASA Langley scientist working in the area of nanotechnology and nanoscale particles, I have been recently exposed to the establishment of secret gas-aerosol rooms inside of United States, at least in the Mid-Atlantic region (from Philadelphia to Virginia). First, the highly irritant aerosols have surfaced at the NASA Langley Research Center in several safety accidents. Investigations were blocked, probably, because of lack of Congressional approval for such financially-lucrative research at NASA. Later, these aerosols had been encountered outside of NASA in Virginia, Delaware and Pennsylvania. This points out to yet another proliferation of originally-sensitive technologies into domestic American life to hurt and harass people without a proper oversight and much control. This amounts to torture, extra-judicial prosecution and authoritarian intimidation tactics.

The use of such irritants and the operations of the secret gas-aerosol rooms are gross violations of human and constitutional rights of American citizens and various domestic and international laws.

----------Full text of an ad on philly.com----------
TORTURE IN USA: Secret Aerosols Rooms

US Scientist needs legal help dealing with the secret aerosols rooms (SARs) operated illegally in Philadelphia area, Newark (DE), Hampton and Williamsburg (VA). Highly volatile aerosols with and without bacterial content cause dry cough, airways and eyes irritation, chest pain and inflammation. FBI and Homeland Security associates are likely operators of SARs, while collaborators may be hotel staff and landlords, who get financial/material or other incentives. US citizens

and kids are victims.

Dear Mr President:

The FCC has been dumbing down ham radio for several years now. This has hurt the integrity of the service and is bad for America. They are planning to dumb it down again really soon now and their plan will make ham radio like CB and it will be bad for America. We already have one CB service on HF, we don't need two. Please pressure the FCC to endorse the following items for the good of the service and America. I wish you could run again for a third term, I would vote for you. I'm glad Al Gore wasn't able to steal the election, and John Kerry would have been a disaster, he'd be kissing terrorist butts and brown nosing them. Thanks for the fine job you're doing protecting and leading America.

Signed
(Your name & callsign)

No more automatic renewals. Individuals must retest and pass all elements required for their license class.

The passing score for written exams needs to be raised to 85%.

Code elements should be 13 wpm for General, and 20 wpm for Extra.

Make the no-code license one year non-renewable.

Well, cuhulin, looks like you've got the last laugh.
Chuck Harder is still alive ... and for proof of that, go to his Web site (you know where it is) and click on "Tour the UpLink" near the top of the page.
But know this, cuhulin. I still hate you; I still hate Chuck Harder, because I believe you are both anti-Semites. You still think Jews are responsible for all the ills of the world.
Well I say, GO TO HELL!

Excellent results so far. I highly recommend the E1 for DX. I've been able
to pull in many tough sigs with a longwire. The sync det works extremely
well and the PBT is as good as other radios I've used.

TV doesn't make you stupid unless you believe everything you see and hear
like some people around here. My favorite channels are as follows:

History channel
Military Channel
Discovery
AMC
HBO for their series. I love Deadwood!!!! Curb Your Enthusiasm is good too.
Sundance
IFC
BBC Gotta get my Benny Hill and Monty Python fix now and then.

Plus there's countless other good programming if your smart enough to look!

I'm sure this very erudite letter, full of specific facts and the
results of many studies to prove it's point will immediately cause
the President to put aside all petty concerns (like the Middle East,
energy problems, changes in Medicare, investigations of members
of his party and staff, Iran's nuclear program, North Korea's ICBM
test, etc.) and order the FCC to get rid of all no code Hams.

2617. For Sale: Sony ICF-PRO80

Newsgroup: rec.radio.shortwave
Date: 2006-06-19 17:44:18 UTC
From: sp600historian@cableone.net
Message-ID: <1150739058.332083.269710@p79g2000cwp.googlegroups.com>
Source record: 79450

Completely rebuilt with new capacitors and all of the Kiwa
modifications and upgrades. All documentation is provided.

Look here: http://www.kiwa.com/PRO80.html

It has ALL the accessories that came with it when new, except the Sony
wall wart. It has a Radio Shack replacement, original box, manual
carrying case, carrying strap, FRQ-80 frequency converter, spare
battery pack, tnc to bnc adapter and earphone.

Alignment is on the money and coverage with those not familar with it
is 150 khz to 30 mhz. With the FRQ-80 adapter attached, it covers
115.150 mhz to 223.00 mhz.

Works perfectly, looks excellent, well taken care of and not abused.

$250 shipped/insured Continental U. S.

Completely rebuilt by the R-1051 shop less than one year ago. Complete with a set of U.S. Navy speakers with volume controls and audio cables with proper audio connectors. Mil-Spec power connector and cord. N coax adapter. This receiver was a complete rebuil;d, including the high failure frequency standard temperature components with new parts. Works perfectly, front panel is a 9+, top of case has the normal scratches, rear panel is dent free, (a rarity).

$300, pick-up only in Gulfport, Ms.

I wonder how many companies made wind up phonographs? I own three of them,one of them is a small wooden cabinet table model,some of the parts are missing,but it was like that when I paid fifty cents for it at a Goodwill store down town,a bunch of years ago and a retired Fireman guy here in Jackson wants to buy it and fix it up.I know where and how to find parts like that on the internet too.The second one is a childs kind of a cheap (I wonder if Bose ''borrowed'' the cardboard design ''speaker'' from it?) wind up (Goodwiil store) phonograph.The third one was made by Bogalusa Furniture MFG Co.Bogalusa,Louisiana.It is all complete except for a pad that I think is suppose to be on the turntable,I think.I guess it dates back to the 1940's or 1950's,whatever.It stands about between waist and chest high,the wooden cabinet is in good condition.I am not going to bother about getting my tape measure out and measuring the old Bogalusa.

How's the antenna situation on the DE-1105? I have a SW100s and Grundig 100PE and using headphones is not a good enough antenna. The headphones do act as an antenna -- but they don't work well enough. I need to open the rod antenna and hand-hold the radio at the proper angle to get good reception with either radio. If I'm hand-holding the radio already, I could get a slightly bigger receiver and have a better price/performance ratio.

I've been debating about the DE-1105 for a while... as the SW100s is too precious to bring around everywhere and anywhere... That is why I bought the 100PE as a stop-gap measure. The belt clip is nice -- but as I said, for shortwave, I can't really use the belt clip!

(If the Kchibo KK-9510HF ever becomes available in the US, I may buy that. It should be inexpensive, so I wont worry about carrying it about (it's an analog tuning radio from Kchibo), but it is dual conversion AND has Syncronous Detection. But, it's nowhere close to as small... but if I'm carrying the radio in my hand anyway, who cares if it's not tiny...)

Theres some great Marine band radios on the used market for very reasonable
prices. It makes me wonder why you went to this trouble? You'll have to find
someone willing to reverse engineer this guys FU and it probably wont be
cheap or easy.

Try the Grundig Mini PE 300; excellent receiver, shirt pocket size, not too
expensive, PLL, reminiscent of the old transistor radios, darn good DXer!

well john, i would buy that radio. i have been using a grundig mini 300 while doing construction work. unfortunately it broke recently. those grundigs just dont hold up. i would add shock absorbing rubber armor to the design and then the radio would be perfect.

I just got mine today. A definite improvement over the Grundig/Eton S-350/BCL2000/3000 series of radios.
PLL tuner. (NO DRIFT)
50 memories
455 khz I.F. output for DRM (Why they made it a PAL connector, I'll never know)
Separate bass and treble with an RF gain that actually works throughout it's travel (unlike the S350)
Not only does the display light up, so does the buttons...
4 "D" cells or 4 "AA"'s

BIG TURN-OFF (It seems ALL radios have at least ONE)
NO NUMERIC KEYPAD!
Luckily the fast setting gets you through 10 MHz fairly quickly. There are 3 10 MHz segments...

How good is it? I dunno, I just now got it.

Anyone else get one? What do you think of it?

Well, SW is no equivalent to TV but it can be entertaining and
educational, in different ways. If you post a message requesting advice
on selecting a radio, you'll get lots! For not a lot of money, I would
suggest the Degen DE1103/Kaito KA1103 or the more attractive Eton E5,
all from the same factory with much in common, and in ascending order
of price.

Good luck!

Tom

You have to input the coordinates so Google Earth can understand them. Like N 40d 51.138m E 129d 40.788m The end numbers are not seconds of arc. They are 1000ths of a minute of arc.

Also, I kinda doubt that the launch pad they are going to use for this test is the one shown in Google Earth. Supposedly it's a brand new pad, just for this test.. and most of the Google Earth images are several years old.

Yes and 15240, 15160, and 13670. They have a running battle on 13670
with what I think is a domestic Chinese station. I also heard Australia
on 21725 last night very weak on that frequency.

A little earlier they are on a couple of 17 MHz band frequencies that
have been coming in well.

I'll just have to add David to the list of words in the subject header
to kill file so the 4 current flame threads get dumped.

David posted on topic for a while so I started reading him again back a
few weeks ago but then he went off the reservation so back into the kill
file with him.

Barnard and Carter just like to argue and post nothing of value
information wise and M II is just a little too weird for me.

You and others give to much attention to the Trolls in this news group.
Trolling idiots have nothing of substance to relate so just flaming BS
threads so this is all they know how to post and so here we are again.

What a waste of time to post threads of this nature. You might find
poking sticks at the Trolls amusing but I don't.

All you are really doing is using the PC for the demod, which is
technically not a software defined radio. Mind you it can be done, but
it is really just an analog radio with some DSP.

Technically, it is a VLF SDR with an analog downconverter. By itself,
it can receive wireless energy, tunes over a spectrum of less than 1/2
the sample rate, has variable IF bandwidth, can demodulate many modes,
does noise reduction, all through software. How is that not a software
defined radio? Practical SDR's are going to have analog elements in
them, if the modulation is to be interpreted by one's hearing.

Tom

2691. Why is South Korea unconcerned about North Korea missile launch?

Newsgroup: rec.radio.shortwave
Date: 2006-06-20 03:52:00 UTC
From: running dogg <run@ning.dog>
Message-ID: <UuSdnUb5iNx_7QrZnZ2dnUVZ_qWdnZ2d@comcast.com>
Source record: 79524

I listened to KBS World Radio English tx at 0200 and there was scant mention of North Korea's threat to launch an ICBM. It "led" the news, but the "news" on it was mostly regurgitated AP wire news. Then the #2 story was the election of a new Prime Minister. The commentary that followed, as well as the "Seoul Calling" current events program, was concerned with the South Korean national soccer team's latest win in the World Cup tournament.

Why is South Korea so unconcerned about the North's latest provocation? Has the US cried wolf a little too often for the South to care? I guess Seoul doesn't notice that Kim Jong Il is ever so g r a d u a l l y pushing towards all out war. Kim wants a confrontation, so he can drop nukes on the South and "reunify" Korea by force-under HIS rule. I don't think that the South really believes that Kim would start a nuclear war. But Kim is not rational.

His dad, Kim Il Sung, had at least some sense of the outside world, and operated on some rational basis. He believed that he could quickly overwhelm the South in 1950 before the US could react, and he almost did. But he never tried it again, and he settled for an uneasy truce.

Kim Jong Il however is the hermit king, totally disconnected from reality, eating steak every night while his people starve. He wants to reunify Korea, and he's betting that if he can directly threaten the US with nukes that the US won't come to the South's aid once he marches in. South Korea is very small, a five minute nuclear bombardment would wipe it off the map before the US could react. Seoul is only 40 miles from the border.

Kim is betting that if the US nuked him that China would step in and start a world war thus defeating the imperialist menace for the greater glory of communism, which I suspect is Kim's ultimate goal. He's a win at all costs guy, he doesn't care if the world is left as a blackened cinder as long as capitalism is defeated.

2695. Question about Grundig Compact Reel Antenna

Newsgroup: rec.radio.shortwave
Date: 2006-06-20 04:19:06 UTC
From: Jose Sifontes <jrsifontes@hotmail.com>
Message-ID: <C0BCC54A.2940%jrsifontes@hotmail.com>
Source record: 79528

I have one of these Grundig wire-reel antennae that came as a kit with the classic YB400 radio. I just bought an Eton E100 - a very nice radio for the price - keeps me tuned in when I am away from the Icom R75. I would like to use this reel antenna with it, but the Eton does not have an antenna input jack. What is the proper wiring of this two-pole headphone-plug-like antenna connector to an alligator clip that I can attach to the whip? Is the center pole the connection to the wire? What is the other pole for (probably dead, just using the connector as a conveniently available part???)

(or maybe I should just get a good 'ol length of wire and solder the alligator clip to that?)

Thank ya 'all in advance for responses to this admittedly trivial question.

2696. WTB: Fine Tuning's Proceeding's 1994-95 edition

Message-ID: <C0BCC7E9.2949%jrsifontes@hotmail.com>
Source record: 79530

I have a Dx-440 that stopped receiving AM suddenly, then gave up on FM. It lights up in all the right places, speaker seems to be connected to amp circuits (can hear hiss at full volume). The radio is cosmetically in fine shape. If someone is interested in it as a parts unit (or maybe you gave the kills to troubleshoot it - I do not), please email me. Jose.

Chances are the single wire is connected to the tip of the plug. This
is easily tested by holding the tip to the whip and doing the same
thing with the barrel part of the plug. When the connection to the wire
is made the reception should improve and the other connection won't
make a difference.

I am not a HAM but my brother is. The main reason they came up with the idea of
the no code license was to spark interest in Amateur Radio. The hobbie is
getting to be near extinct in the 21st century compared to the interest of the
1950's to 2000.

The old call signs, like WBZ, WTIC, WEAF, WJZ, WCAU, KDKA, WGY, WGN, WOO, KYW, KOA, KFI didn't mean anything. The three and four letter call signs were shared with coastal stations, point-to-point stations and ships. Broadcasters got what was left. WLIT, Lit Brothers Department Store in Philadelphia was the first station I remember that had a call sign that meant anything.

WTBS, Tech Broadcasting Station from the mass. instutite of TECHnology,
(MIT) later sold to Turner.

WIBG (I believe in G-D) a relegious radio station in Philly, latter a
Rock and Roll station in the 1960's.

KYW (doesn't mean anything, was K for the U.S. Y for experimental, W for
Westinghouse), I assume at one time they had a KXW, there were four stations.

Geoff.

Pretty creative use of four letters one of which has to begin with W or
K. Thanks for posting it.

WBIZ (business radio) and WEZY (easy listening) and WWDC (Washington,
DC), WAMU (American University) are a few that come to mind.

In the strict sense, the SDRs are ADCs and massive DSP. You wouldn't
have analog IFs because that restricts the BW of the signal. That is,
nothing can be wider than the IF.

A true SDR could demod multiple signals at one time.

You have to be kidding. As long as Kim gets pre-teen pussy, he is
satisfied. Oh, and steak. and lobster...and the same for his friends.
He is quite happy to be king of his little fiefdom, and won't do
anything to threaten that.

It is like Saddam threatening the US. Oh, he made a threat or two, but
in no way would he attack the US since he knew he would no longer be in
power. That is why he cooperated with the weapons inspectors.

RD - Four little letters 'icbm' ~ RHF

First - North Korea has had Missiles that
could hit all of South Korea for many years.

This newest North Korean Missile is designed
to Hit the West Coast of the USA {Canada} and
would have a tuff time zooming straight-up and
right back down again to hit South Korea.

Note - This same Missile in the hands of Iran
would mean that all of Europe would be in the
Iranian Nuclear Target Zone.

FWIW - When the North Koreans have a Missile
that will Hit Miami, FL then they will also be able
to Hit All of Europe too.

ETP,

Did you ever think that there are more CB'ers
then Amateur Radio Operators {Hams} and
that just may be more CB'ers voted for Bush
then the Hams . . .

so that your request may have just the oposite
reaction in the Whitehouse then you might
expect - something to think about ~ RHF
.
.
. .

JS,

IIRC - The "TIP" of the 1/8" Mono-Plug is the Antenna Wire.

First - Collapse the Radio's Whip Antenna and then
Clip the Reel {Roll-Up} Shortwave Antenna to the Radio's
Whip Antenna if there is no 1/8" Jack for an External Antenna
http://www.kaitousa.com/Antenna.htm
http://www.21st-century-goods.com/page/21st/PROD/AVRADIO/KAantenna
http://www.universal-radio.com/catalog/sw_ant/3184.html

This radio is in near perfect shape. It was one of "impulse
buys" that I did a few years ago. It plays excellent! It looks just as good
as new. This will come with the instruction book, ac adapter, and headphones
that were shipped with it. I can send pics via e-mail if you wish.
For any other info(and price on a refurbished), go to
http://www.universal-radio.com/catalog/portable/0800.html
I am asking $300.00 firm. This price will include my personal delivery of
the radio to your location within
a 50 mile radius of Philadelphia, Pa. If you wish it to be delivered, we can
work something out. I am a member of eBay(glenhollow), if you would like to
see my feedback.
I can also list it with a "buy it now"feature if you want to do it that way.
I'm looking to sell it fast, as I need the money to start a new hobby (metal
detecting?). Thanks for reading!

John

>
> Chuck Harder is a Loon & Crack-pot.
>

Amen ... which is what every radio station owner, network mogul, pundit, ad executive, etc. concluded. That's why you don't hear him on AM or FM anymore.
Heard Chuck Harder yesterday endorse ... are you ready for this? ... Ray Nagin!
No, I'm not making that up.
Look, I know I'm supposed to feel sorry for Chuck Harder, what with all his health problems ... caused by his obesity, no doubt ... but I just can't summon up that sympathy. Chuck Harder has lost all contact with reality; he talks like it's 1991, right down to the catch-phrases ("Fix America first"; "our cities must shine like alabaster before we go off and help the rest of the world"; "up and down the radio trail"; and so on).
Logically, it would make sense for a radio talk show host - any media personality - to have at least a couple of toes on the ground, as it were. You need at least a modicum of credibility. Chuck Harder has absolutely none. And that is the core issue here.
Now he's trying to gin up his digital satellite TV network again; I wish him all the luck, and wish he'd devote all his energy to something like that rather than his looney-tunes "populism." Hey, I've known dozens of electrical design engineers with really goofy political ideas - but they did have the common sense to keep quiet and stick to their professions.
I sometimes wonder if Chuck Harder suffered some sort of catastrophic accident or illness sometime back in the mid-to-late 1980's, because I've known folks from the Tampa, FL area who remember him from that time period and they told me that Chuck Harder was a mainstream consumer advocate on local radio and TV - sort of like an early version of Clark Howard. I have no reason to doubt that, but if true, what in the world made him lose all his marbles? And do it so suddenly?
By 1991 - the first time I heard him - he was certifiable, and sounded exactly like he does today.
In the end, if Chuck Harder is clinically insane, then he doesn't really understand what he's doing/saying on the radio, and we should all take him with a huge grain of salt (more like a couple tons). And perhaps we (myself included) should just ignore him.

Dear Jim,

Is this radio dual-conversion?

I thought that, for proper DRM reception, the output had to be 12 kHz.
Am I incorrect? What would you need to receive DRM with this receiver?

Best,

Joe

Received my DW World Cup 2006 Special QSL card today, June 20, 2006,
11 days after submitting an e-mail reception report. It came in a Luftpost Airmail envelope.

The card shows a colorful "soccer ball" like Earth, and says
Fu&#65533;ball WM 2006 in Deutschland.
(not sure that odd character will show up, 3rd letter in Fu_ball)

Signed by Horst Scholz verying Kigali transmitter.

>
> A true SDR could demod multiple signals at one time.

>From Wikipedia and what looks like an authoritatively written article:

"A software-defined radio (SDR) system is a radio communication system which uses software for the modulation and demodulation of radio signals."

>From the ARRL Technology Task Force Report 2001 http://www.arrl.org/announce/reports-01/tt.html:

"Most software receivers have an analog front end consisting of band-pass filtering, a low-noise RF amplifier to set a low system noise level, a local oscillator and mixer to heterodyne the signal to an intermediate frequency (IF) where analog-to-digital (A/D) conversion, digital filtering and demodulation takes place. Recently, however, there are some software receivers that perform A/D conversion immediately after the antenna."

Your "strict sense" and "true SDR" interpretations are much too narrow and illogical. that's like saying a radio is not a radio unless it can receive the highest possible frequency. A crystal radio is still a radio; a VLF software defined radio is very much a software defined radio whether it demodulates one or many signals. Neither needs to use state of the art technology to continue to be so defined. A notebook computer capable of demodulating via software a VLF radio signal coupled to its sound card input is therefore a radio receiver defined by software.

Putting a downconverter in front of either the crystal radio or the software defined radio simply adds the adjective "superheterodyne" to their descriptors. These descriptors define the sub-classes of radios to which a particular implementation belongs; the sub-class of radios called software defined radios has many sub-classes of its own, including both purpose built hardware/software systems and general purpose hardware such as a personal computer running SDR software.

The 455 kHz IF output is a plus, not just for DRM but for any software defined radio IF/demod. With software, you can demodulate AM/SSB/CW/FM and digital modes, have incredible variable bandwidth, shiftable IF filtering, noise reduction, improved AGC, spectrum display, etc.

You need a 12 kHz or so IF to do the above via a conventional computer sound system and, consequently, a down converter between the 455kHz output and the computer. I guess that would make it a triple-conversion supehet receiver (if you don't count the A/D and D/A converters in the computer sound system!).

So you're saying CB'ers have more pull because there are more of them? Hmmm.
You might be right, but we're dealing with President Bush here. He don't
listen to Lazy Stupid people. If listened to what Lazy stupid people wanted,
we'd be cutting and running from Iraq like the Democrats want and he ain't
cutting and running.

There's still hope. Send that email. Save amateur radio and shortwave.

Earl

So what is your point? Is it that CBers are stupid? Or is it that CBers vote
democrat?
If Bush didn't listen to "Lazy Stupid" people, we would not even be in Iraq.
Maybe you missed it when they never found any WMDs in Iraq, which is why we
went to begin with. He obviously listens to "Lazy Stupid" people, like
Russian intelligence. I'm sure if you try hard enough, he will even listen
to you.
Before you label me a liberal, I voted for Bush

No it isn't.

Some things in life require you do a little work to enjoy their benefits.
You don't want to learn CW, you shouldn't be allowed on ham radio.

And Five words per minute ain't a code test. I can fart five words per
minute. Anyone that can't learn 5 wpm is either lazy or a tard and should
stick to CB, FRS, and cell phones.

We gave those Techs the no code license because some said they weren't
interested in HF and wanted the freedom experiment with new modes, but
that's not what happened. All we got was a bunch of appliance operators
plugging up repeaters. Maybe only two or three percent are doing digital,
new modes, satellites, scatter, aurora, DX, etc. everyone else is gabbing
on a microphone like CB'ers waiting for the FCC's R & O to come out.

yEA CUHUlin, I think the "crowd pleasing" is right on the mark. Them good old days are gone for good. The lynchings, and the burning the witches at the stake and all that other fun stuff are just pleasent memories in the history of the good old USA. I'm not even sure there's any electric chairs left. I think it's all injection nowadays, and you can be sure it's not gonna take place on the town green of anyoldville, USA.

I remember in the mid 60s seeing a traveling bus that also had an electric chair. I think it might have been an FBI sponsored dealy to brainwash the little tykes like me. Maybe it had some pictures of 10 most wanted and maybe even some pics of dead criminals. I don't recall the exact theme, just knew it was a bitter-wagon. I remember getting a little anxious and never wanting to 'go to the chair'. Of course all the daddys prolly thought the FBI psyc-ops were good for us little kids.

Now I just want to build an antique electric chair and sell it on ebay. Maybe stick an old seal of the Lone Star State on it and make up a long tale.

regards,
NEO

I got mine today too. Im very impressed with this radio! I listen to
alot of am/mw and this radio is very hot on the am band. Seems like a
nicely built solid radio and the sound is awesome on it too..

a few other quickies:

no drifting on mine either..
light stays on for around ten seconds OR theres a push button on top to
keep light on indefinitely..
10 presets for am, 10 for fm , 10 for sw1, 10 for sw2, 10 for sw3..
very smooth tuning , no wooble

I'm very impressed!!

SL

ps...the lack of a keypad didnt bother me at all since I knew this
radio didnt have a keypad when I made my purchase :-)

RHF wrote:
> JA - If Frequency 455 kHz with an IF Band Width of 12 kHz
>
> DRM needs a 12 kHz IF Band Width Signal for processing.

That is misleading. DRM has a few modes requiring different bandwidths. The most common mode uses 10 kHz bandwidth but there are wider and narrower modes with different tradeoffs among quality, reliability, extra services. The 10 kHz mode ideally would benefit from a 10 kHz wide 'brick wall' filter; however, filters with narrower -6dB b.w. have been used successfully and some would say advantageously over wider filters.
>
> IIRC - The IF Frequency can be anything that the
> DRM Processor is set to woork with.

Correct. The highest frequency of the desired spectrum from the IF must be less than 1/2 the sampling frequency of the A/D converter by about 10% or so to avoid roll-off and phase distortion of the anti-alias filter. A common experimental software defined receiver uses a computer sound card as the A/D and the computer runs Dream or DRMRX software for DRM decoding, or Dream or SDRadio software for other modes. 48 kHz sample rate is typically the lowest recommended so the upper limit for energy delivered to the A/D should be 48/2 = 24 kHz less 10-20% to avoid the filter shoulder and aliasing, i.e., about 20 kHz. A 10 kHz wide DRM spectrum should be placed no higher than between 10 and 20 kHz and no lower than 0-10 kHz. Thus, the centre frequency of the 455 kHz IF needs to be shifted down to between 5 and 15 kHz. 12 kHz is the commonly used centre frequency with 48 kHz sampling because of the integer ratio relationship and the ability to squeak the 20 kHz wide DRM mode through the A/D; DRMRX software requires the 12 kHz sample rate - the other software apps tolerate a wider range, subject to the required bandwidth.

What will be interesting to find out is what bandwidth the RP2100 has at the IF jack, i.e., is it tapped from the 455 kHz IF chain before the filter or after. If before, the spectrum could be considerably wider than 10 kHz as it will be set primarily by the 1st IF roofing filter. If after the filter, it could be a bit narrow causing the DRM rectangular spectrum to have droopy shoulders.

What may be more important for highly successful DRM reception and certainly for growl-free synch-AM is the phase stability of the radio's converters with varying signal strength.

Tom

not to Kuwaits mind for the house of Saud, like bitng at folks WE can
afford to allow to get bit
>Too bad we couldn't have waited till after we
> found Bin Laden before taking on that task.
prehaps you are right

OTOH I personaly don'y know I realy want UBL caputred given the way the
media and people seems to think they might say well the war on terror
is over, we won, and thereby get an even bigger shock when AlQueda next
hits us.

Indeed I wonder if some of the boys at Langley are thinking and acting
on the same thought

> Did the 7A come standard with the NB and AM filter?

No. But a NB is easy to install! The R7A also came with the 500 Hz CW filter and a 'quasi' AM filter. The 'AM' filter that was originally in the R7A was not a filter at all but merely a jumper across one of the positions on the filter board which yielded I think about 9 kHz of selectivity.

There is no difference between an R7 and an R7A other than the badge and the NB, 500 Hz filter and the 'AM' filter being installed as 'standard' equipment.

The "boys at Langley" don't wield power to think and act anymore. Your VP has seen to it that his own boys in the Pentagon have taken over that business. Kill the messenger. Langley had it correct when they said Iraq didn't have WMD. That's what go Wilson in trouble, remember?

Shill bidder alert! Shill bidder alert!

The most SCARY thing aboot this auction however
was the fact that this radio was NOT sitting atop
the dreaded "red velvet quilting material"

Looks like the e-screw sickness is spreading...

Right Wing myths die hard.

Jimmy Carter had been out of office for over 20 years when 9-11
happened.

Reagan trained Bin Ladin and left him twisting in the wind after
Afghanistan.

It is ironic that many of the people who speak like this die a violent death. When the moment arrives and they realize they are facing death they call out to God to save them. "Oh God, Please save me", or some other drival. I think it might be better for David to call out to God now and ask his forgiveness. If you walk with Jesus you will not fear dying.

David, since you are not afraid of anything perhaps you could entertain us all with your bravery. Maybe you could videotape a confrontation between yourselves and the Local Hell's Angels Chapter. Go wipe crap on a few of their bikes maybe. Or since you hate all religions so much maybe you could videotape yourself defileing a Koran and post the video to one of those sites with your home address. You could go to some Muslim sites and post pointers to your video just to make your point.

regards,
NEO

The auction looks on the up and up to me. Nothing unusual about the bidding and the seller has over five thousand all positive feedbacks. The most I could say about this auction is that several bidders were interested in a Drake HF radio and the high bidder won. I'm fairly certain buyer and seller are happy and clearly the competitive auction process worked pretty darned well.

It matters not. When management lacks the same talent, engineers will
be chosen for economic rather than practical reasons. Outsourcing to
India and H1B visas are proof. The fact that India has yet to produce
a single Intel or Microsoft or H-P or Sony is lost on those whose who
fawn over those rote trained hordes.

Source record: 79557

I have speny my entire adult life overseas, in and out of the military.....and not in military housing either....my home is overseas now...and I have been working in the Miffle East since 1998....in truth the leeftest President, Bill Clinton, was responsibile for: reserve orientated military; letting Osama on the loose; NAFTA; the CLinton navigation computer system now on Chinese ICBMs (prior they only had INS, inertial navigation systems),.....well enough as I could fill up pages.....

This Islamic war started back then...and I know and live this Isalmic religion every day at work and at home.......while they preached hate for the west and the USA, we did nothing....when Ollie North had the fish on the intell hook, Gore and Kerry let him off....twice Bill had him free and clear courtesy of the locals, and he failed to take action (rmemebr the fiasco in the Balkan penninsula),.....and even now, like Rome, we are hated and envied and despised due to truth or lies; it makes no difference. Western civilization has grown liberal and soft...there is no baby boom as over here, so no gun fodder means good bye to our way of life as we know it...if the leftist believe that leaving the problem alone over here is the answer, then I say prepare for more homeland attacks....and the volunteer military has failed...not because of spirit or professionalism or patriotism...it has failed because most Americans, like in the Nam days, could care less about their citizenship other than in mere words...if you breathe the mere American air, then you are an American...I think not....

We should bring back the draft now....you should earn the right to vote (how many voted last election as opposed to Iraq, or even Italy???)

More importantly, this clown professing his hate of Republicans fails to remember how we got in Korea, Nam, ...and who got us out.......his I'm a Democrat and I'm okay is the crux of the real problem...where is their platform (Hillary's communist manafesto, "It Takes A Village"???)...no plan, no vision...no solutions...no leadership.....just we are not Republicans...and yes, I a Republican since tricky Dick days......they suck too....so why are we voting the same old people back into office every time???? No social security...no medical...no respectable paying jobs...no retirement...and massive debt even before this "police action"....if we could have a real third party...or better yet, everyone vote the incumbant out and send both the DNC and RNC a message...YOU WORK FOR US CLOWNS...NOT CEOs OR STOCKHOLDERS OR PRINCES AND KINGS AFAR....

McCain's plan for 2 term limitation is on target...no time to build empires...after all, it is the professional government civil servants

who do the bulk of the work, and not the Congressmen and women....

But alas, the masses fall for the same old scheme of things...as Hitler said, tell them a big white lie and they'll believe you..tell them the truth, and they'll not....we are not as smart nor responsible as we think...so watch your brainless WWF...and stupid little comedy shows....and soap operas...the rest of the third world wants what we had or have....and since they can not make it, they will take it...the CEOs would like nothing better than all of us working in a service economy....more control of a society that is allowed to arm rebel under its most sacred of laws....if we don't start acting like real Americans, we will face a greater horror than one could imagine...submission under Islam..there is no individuality folks in or out of the Koran.....no hope...just the powerful few, and the mooing herd of humanity.

Complain about Gitmo...have you seen the insdie of a normal Middle Eastern prison (to include Israel??)...and we are brutal...that is the rule and not the exception long before we came over here...there are intelligent people here, well educated and tolerant, but they are not in charge...the ones who broker power and policy that conflicts with ours use religion and tribalism to maintain control.......and our leaders take gifts and solice from them...and you have voted them in repeatedly since we first supported the Arab nations and opposed Israel......until 1967.

It is not about Republicans...or energy...it is about what Ruyard Kipling referred to as the incompatibility of east and the west......there can be only one...I work to live...not to die for a better life in the hereafter....my wife and children are not cattle.....and my friendship and work ethic knows no social rules but personal integrity....and courage to do something when things are wrong.......call it John Wayne, but that was the America that the world respected along with its might and will to use it. THose soldiers are dying so you traitorous liberals can sleep at night with a clear moral compass and "we are the world" viewpoint...it does not exist over here!!!
The UN is led by third world liberals, Islamic or not....daily thousands die because no one has the guts or moral convictions or will to stop it...all is politically correct, but millions have died to keep your conscience pure and clear. This was not the orignal UN charter...not what made America feared but respected and valued as a friend...we lead nothing today....we are loved by few...feared by none...perfect targets...everyone can join our lifestyle and have our values and wants our sense of freedom....they are decent human beings.....WRONG WRONG WRONG.

Democrat or Republican, we have failed to preserve what other Americans had fought and died to save form another age of radicial, barbaric radicals who also thought that most men needed leading in all facets of their life......we did not ask for the fight...but we have it...and if

we cannot plant a firm seed of human decency and democracy into the more advanced and progressive mins of Iraq, then we will fail else where......

We spared a village that butchered, brutally dismembered and tortured our two young soldiers...did we flatten the village, and exterminate the entire population as the rule goes here....NO...so that earns their respect....NO.....either fight to win, or get out...either you go along with the congressional cronies' sons and daughters or get out...either you get "McNamara II" out of the DoD, or get out....either you crush the holdouts and warlords, or get out...either you find the terrorists families, and threaten and take their lives as they do others, or get out...play by their rules and value system, or get out...

And now North Korea and Iran can strike at will...Iran needs a little fision matieral as a trigger for an available H-bomb...easier to build, and less maeterial required...and their EMP, Black Bomb, ever reaches our east coast, then your economy, communications, medical services, all transportation,....comes to a permanent stop....everything burned out, but the military gear , we hope.....smart play for a careless, arrogant nation of America.

I hate no Democrat...or fellow Republican...but I do despise those who complain, find fault, but do nothing but mouth off...risk nothing, but dare others to fight in their place.....perhaps as in Rome, those few brave souls need to take a hold of this country and shake it up, as our founding fathers saw fit long ago....being a real American is not about talking...it is about doing and sacrificing something of personal value beyond mere money...try one's life...
Then you can earn the right to criticize the current leadership...they may not always be right, but they are elected until the public recalls them, throws them out, or elects someone new...all the power is in your hands with a single vote, and you cannot even find the time or dignity or patriotism to do that....

Perhaps we deserve to stand aside for a more ambitious, more lean and hungry culture or religion...we have grown fat and lazy with doing nothing for our country and way-of-life....and that is not American. "A man who gives up but one freedom deserves no freedom at all)...and that was said my a real American long ago......but then we do not lead with the metric system, and prefer to roll over with Hispanic sugns, a dead language for science and business, while the rest of Europe and the world speak English as the primary language...Chinese speak Aemrican english better than I, and so do the Arabs.....but we and the bleeding hearted liberals think otherwise....our student are second rate...no discipline in school...none at home because the parents are slaving away in an economy that could not support but one working soul, but we need two...and the kids have no one at home for direction nor discipline....domestic violence has been distorted into corporal punishment...but we abused, disciplined, worldly and scientifically educated types went to the moon, mars, venus, depths of the

oceans...fought wars to win...and then....liberalism and the brotherhood of man took over the USA mindset.

Well trash out this country, and good luck in keeping it safe....at least I was raised where I can go, do, and live worldwide with real skills and not service orientated only resumes that the Indians, Chinese and Arabs have already....soon we will empty their trash, sweep their streets, build their buildings. service their households.....they view the world with a deliberate and hungry eye towards a one-religion world (that dovetails nicely with our American CEOs plans). And you have allowed this to happen by simply not voting, not fighting for your social and domestic rights, and not making little Johnny or Sally toe the line in school....and at home...busy with careers that go no where in the end.....what ever happened to the American family????

Good luck in your perceived world of peace and love and equality.....IT DOES NOT EXIST BUT IN THE USA PEOPLE !!!! They ban our religion, ban our books, all in the social vein...but embrace our weapons and science and business plans and materials.....and they pray 5 times a day that we go away.....infidels is a reality here.....my brother against brother, my brother and I against the stranger.......reality, not CNN propaganda. No one gave America anything...we took, made or created......so now you want to share it, or think the ocean makes us safe and isolated from the coming storm......think again as the distance and time has grown to hours from the past months.....

I prefer LIVE FREE, OR DIE.....there is no other choice for a real American...unless you like sitting on the sidelines, and letting someone else do your work for you a wee bit longer....here, there are no liberals....in the USA the conservatives tolerate the liberals, but no here.....enough said, as I have to rush to the store in between the calls for prayer this evening.......I live the reality of a world ypu would not like, dear leftist......unless sheep interest you.......sheep for the daily slaughter in the name of God.....

Pray for our soldiers in the field for they deserve far better a citizen than you or I are.....I did my time, but feel an urge to stand by these quiet heroes in a far off land...fighting not for your ridiculous ideals...but for the man on their left...the man on their right...and when American empire fades, the flag falls away, and the last bugle call is sounded, at least I can share with them those precious moments when I stood side-by-side with a real American. The names of those unknown villages and hamlets will never be remembered but by those who fought and died there...and in those quiet moments my friend, when you call this war insane, I ask that real Americans remember these gentle fallen heroes who can never realize their dreams or individual potential as you can or have......I feel ashamed...what about you??? I did my part, but know more is needed and the numbers are too few...but what about you???? Remember them the next time you vote.....the next time you go to school...the next time you do your job...the next time they play the Star Spangled Banner....the next time

you glance up at the flag.....they never will again, but you can.

$400,000,000,000 and counting. Do you honestly feel safer? Not only do we have to deal with Iraq, but now we have to deal with N. Korea and Iran, situations that were exacerbated by lumping them into the "Axis of Evil", whatever that is.

He'll sell out just like all the other politicians. If the energy companies want to run roughshod over our HF with BPL, or if cell phone companies want to buy our higher frequency bands, they will. The Golden Rule: He who has the gold rules.

Alan

2828. AUSTRALIA. RA programming continues to be all screwed up

Newsgroup: rec.radio.shortwave
Date: 2006-06-21 19:05:28 UTC
From: "http://www.lookaboutusa.com/" <nswamfm@yahoo.com>

Source record: 79561

** AUSTRALIA. RA programming continues to be all screwed up. When I was updating MONITORING REMINDERS CALENDAR, I found that the times were one hour off as displayed in their too-smart system of local time for places such as Washington DC. And would London be GMT or BST?? Schedules not available in simple, straightforward UT. Even Melbourne time was questionable due to prolonged DST there.

Now on Monday, April 10 before and after 1430 UT I am hearing a music-appreciation show about various forms of dance music thru the ages, from waltzes to rags, tangos, best on 9590, // 9625, 7240, 5995. Is there anything remotely similar on their posted schedule? Of course not! Pretending I am in Hawaii, where there is no DST confusion (unless RA thinks there is), at 4:30 am, Big Ideas is supposed to be on RA. Could it be something else taken directly from the Radio National schedule? No, Monday after midnight (really Tuesday) AET, it`s supposed to be Life Matters.

Why is it so difficult for a major SW broadcaster just to present its own program schedule accurately and unequivocally?

Then on Thursday April 13 I was listening to Rear Vision at 1330 UT on 9580 --- interviewing a number of American academics about the Sunni/Shiite split, not in very great depth; page about this and ondemand: http://www.abc.net.au/rn/rearvision/stories/2006/1609773.htm

Ended at 1355, and into a commentary on the renewable energy market in China and Australian involvement in it, on a show called ``Perspective`` which does not appear on RA`s online program schedule! To add injury to insult, it was cut off after 3 minutes as 1358 was the mandatory time for the 9580 transmitter to close and change frequency to somewhere else.

Fortunately, I knew I could keep listening by immediately retuning to the weaker 9590 which stayed on the air, and the commentary lasted right up till 1400, but why put listeners thru this? Not all of them will know what to do; and why insult your program providers by 1) not even mentioning them on the schedule, and 2) cutting them off halfway thru? (Glenn Hauser, OK, DX LISTENING DIGEST)

Yes, the RA sched is quite bad; last year I emailed RA and they sent me a pdf on the full week programming schedule in UTC, but they made their site even better so now I really hate going anywhere near http://www.abc.net.au/ra because as you say Glenn, their system is too smart and as the saying goes, you feed rubbish in, you get rubbish out. Perhaps us listners should petition the site? (Robb Wise, HRi Radio, Tasmania, DX LISTENING DIGEST)

2829. More evidence of Communist Chinese military aid to Iran

Newsgroup: rec.radio.shortwave
Date: 2006-06-21 19:22:55 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129j7ca4n44s9cb@corp.supernews.com>
Source record: 79562

Communist Chinese military aid to Iran

Several government-owned Chinese companies are "proliferators of weapons of mass destruction" (WMD) according to the Bush administration, and the administration has taken legal actions against these companies. They are accused of selling advanced missile and WMD technology to Iran.

The Department of the Treasury has frozen the assets of the three top Chinese military firms.

"The companies targeted today have supplied Iran's military and Iranian proliferators with missile-related and dual-use components," said Stuart Levey, Under Secretary for Terrorism and Financial Intelligence (TFI).

The Chinese companies are Beijing Alite Technologies Company, Ltd. (ALCO), LIMMT Economic and Trade Company, Ltd., China Great Wall Industry Corporation (CGWIC), and China National Precision Machinery Import/Export Corporation (CPMIEC).

The U.S. representative office of CGWIC is G.W. Aerospace, Inc., which is located in Torrance, Calif. "The Chinese firms have provided, or attempted to provide, financial, material, technological, or other support for, or goods or services in support of, the Aerospace Industries Organization (AIO), the Shahid Bakeri Industrial Group (SBIG) and/or the Shahid Hemmat Industrial Group (SHIG)," states the official press release from the Treasury Department.

AIO, a subsidiary of the Iranian Ministry of Defense and Armed Forces Logistics, runs Iran's missile program. SBIG, an affiliate of AIO, is also involved in Iran's missile programs.

SBIG produces the Fateh-110 missile and the Fajr rocket systems. The Fajr missiles are a series of North Korean-designed weapons produced under license by SBIG. Both systems are capable of being armed with chemical warheads.

SHIG is responsible for Iran's liquid-fuelled ballistic missile programs, including the Shahab-3 medium range ballistic missile, which is based on the North-Korean-designed No Dong missile. The Shahab-3 has a range of at least 900 miles. It is also capable of carrying conventional, chemical, and nuclear warheads - thanks in part to a newly designed third-stage provided by the Chinese.

The U.S. Government has taken action against the four Chinese companies in the past. In 2004, all four of the companies landed in hot water with the State Department for transferring equipment and technology to Iran. Since 2003, CPMIEC has also been subject to an import ban for exporting missile

technology to Iran.

Over the past year, LIMMT has continued to supply or attempt to supply Iran's military and missile organizations with controlled items, and ALCO has continued efforts to provide Iranian missile organizations with missile-related and dual-use components.

China Great Wall has also continued to provide goods to Iran's missile program. In addition, CPMIEC has sold the Shahid Bakeri Industrial Group goods, which are controlled under the Missile Technology Control Regime.

Two of the firms, China Great Wall and CPMIEC, are directly owned and operated by the Chinese government. Both firms have repeatedly been the subjects of reprimands since the early 1990s. Exports to China Great Wall were suspended in 1992 because of its transfer of nuclear tipped M-11 ballistic missiles to Pakistan.

However, the Clinton administration allowed the company to purchase advanced U.S. technology such as computer, satellite launch systems, and space electronics. Great Wall was implicated in illegal exports during the 1990s and included in charges filed against Hughes for the illegal export of advanced missile technology such as nose cone designs.

The Clinton administration was very aware that Great Wall was part of the Chinese military. According to a Commerce Department document on Chinese military defense industries, the People's Liberation Army strategy is to wage and win a war against America.

"[Chinese] Civilian resources should be transferable to military industries for weapons production," states the document, titled "Swords Into Market Shares," which was forced from the Clinton administration by a Freedom of Information lawsuit.

"This is not only to prepare for war, but also to use trading firms such as NORINCO (China North Industries Corporation) and China Great Wall Industry Corporation to acquire foreign technologies, such as electronics, for military as well as economic modernization."

The Bush administration is also cracking down on U.S. companies involved in illegal exports. For example, State Metal Industries, based in South Camden New Jersey, sold 192 parts of a radar-guided missile system to a Chinese company partly owned by the Chinese government.

According to the Camden Inquirer, company executive Michael S. Dorfman, pleaded guilty Tuesday in a Newark, N.J. federal court for making false statements to the Defense Department. The company, represented by co-owner Yale Dorfman, admitted violating U.S. export laws. State Metal Industries faces three years of corporate probation. However, Michael Dorfman could serve five years in prison.

State Metal Industries had a contract to smelt military surplus items, including AIM-7 Sparrow missile parts. The AIM-7 Sparrow is an air-to-air missile manufactured for fighter aircraft and warships. The missile also is

sold to U.S. allies, including Taiwan.

According to the Inquirer, the missile parts were concealed under scrap metal and packed in a shipping container destine for to China. Customs inspectors opened the container and found the missile parts.

Assistant U.S. Attorney Judy Germano said the name of the Chinese company and the amount paid for the parts had not been made public in court. However, she did state that the missile parts had "intelligence value."

Yet, State Metal is not the only recent case of involving Chinese theft of U.S. military secrets. A New Jersey Federal Court ordered Universal Technologies Inc. to cease operations and sentenced its president, Terry Teng Fang Li, to one year of probation for exporting technology used in weapons systems to China.

According to the Camden Inquirer, Dean Boyd, press secretary for U.S. Immigration and Customs Enforcement, said the two cases showed that of all the countries seeking to acquire U.S. military technology illegally, "China is far and away the most active."

It is not difficult to draw the conclusion that the Chinese government is orchestrating a global effort to sell WMDs. The Chinese government is also working to steal as much U.S. weapons technology as it can. Simple actions against individual Chinese companies are and will always be ineffective. It is time that we direct sanctions against those who issue the orders and approve the plans at the highest levels in the PRC.

Last July when I was working on the front of my house,a democrat across the street was talking to me in my front yard.I told him I believe the U.S.Military Draft is coming back.He walked off in a huff and he said,Larry,I can't talk to you anymore!

He wouldn't give me a minute to tell him democrat Hollingsworth of South Carolina and democrat Rangel in D.C.have already drawn up the bill for the U.S.Military Draft and all it needs is to handed over to the prez and no doubt the prez would sign it.

That democrat across the street has two democrat sons (the kind that would run to Canada,if you get me driff) who NEED to be Drafted.There are some more democrats in my neighborhood and on this street I live on whom very much NEED to be Drafted.
I want the U.S.Military Draft to come back.
Know the difference between U S and R A? I was R A 14808903

I have been predicting to myself that the Japanese would soon try and
buy up old boatanchors on a large scale. I wonder if my prediction
will come true.

A HEMICUDA recently went for somewhere around 2,500,000 on Barrett
Jackson.

regards,
NEO

Dear Jim,

ARE you hearing images on this radio?

How many IF bandwidths does it have?

How does the tuning knob "feel?" (The one on the Grundig S350 is
hopeless.) Any "backlash?"

What kind of external antenna connector is on the radio?

Finally, did you buy yours from Lipyn's eBay shop? If not, how much did
you pay, if you don't mind my asking?

Would you tell me, having owned the set for several days, your
impressions of its construction quality?

I presume this set has no synchronous detection circuit. Am I correct?

I also presume that, with its large speaker, it has quite good audio
quality on FM as well as MW. Correct? (Can you compare its FM audio
quality to the GE Superadio, the S350 or Satellit 800?)

Sorry for all the questions, but I do appreciate your replies. The
radio looks interesting.

Best,

Joe

In March 2004, Richard Clarke, the former counter-terrorism official in the Clinton administration, testified before the September 11 Commission investigating the events and security lapses that led to the al Qaeda attacks. Clarke and other former Clinton officials claimed that they had repeatedly warned their Bush administration counterparts in late 2000 that Al Qaeda posed the worst security threat facing the nation - and that the new administration was slow to act.

In truth, however, the Clinton administration was in power for eight years while al Qaeda grew, prospered, and repeatedly attacked American interests:

*1993: Shot down US helicopters and killed US servicemen in Somalia
*1994: Plotted to assassinate Pope John Paul II during his visit to Manila
*1995: Plotted to kill President Clinton during a visit to the Philippines
*1995: Plot to bomb simultaneously, in midair, a dozen US trans-Pacific flights was discovered and thwarted at the last moment
*1998: Conducted the bombings of the US Embassies in Nairobi, Kenya, and Dar es Salaam, Tanzania, that killed at least 301 individuals and injured more than 5,000 others
*1999: Attempt to carry out terrorist operations against US and Israeli tourists visiting Jordan for millennial celebrations was discovered just in time by Jordanian authorities
*1999: In another millenium plot, bomber was caught en route to Los Angeles International Airport
*2000: Bombed the USS Cole in the port of Aden, Yemen, killing 17 US Navy members, and injuring another 39

Throughout all the aforementioned events, the Clinton administration's most effective action was to bomb what turned out to be an aspirin factory in Sudan. They had the opportunity to kill Osama bin Laden, but decided not to do it because they were not sure their lawyers would approve.

Of all the Clintonite critics to speak out on the subject of 9/11, the most important was probably Richard Clarke, who wrote a book called Against All Enemies that appeared just in time for the 2004 election campaign. Clarke's charges against the Bush administration were widely published. Like his former boss Sandy Berger, he decried the Bush administration's failure to heed his "warnings" while Clarke and his fellow Clintonites were still in power. He claimed that Bush ignored terrorism "for months," though he said nothing of the fact that, as demonstrated by the list of pre-9/11 al Qaeda

attacks cited above, President Clinton had ignored it for years.

But most of the attention flowing Clarke's way around the 9/11 Commission hearings centered on his claims about what happened when he was working inside the Bush administration after January 2001. Clarke was President Clinton's counter-terrorism coordinator; he was demoted by the Bush administration to director of cyber-security. But before that demotion, he says that Bush's foreign policy advisers paid too much attention to Iraq. Then, after September 11, Clarke says that President Bush asked him to try to find out whether Iraq had been involved in the attack:

Now he never said, "Make it up." But the entire conversation left me in absolutely no doubt that George Bush wanted me to come back with a report that said, "Iraq did this.'' He came back at me and said, "Iraq! Saddam! Find out if there's a connection," and in a very intimidating way.

Clarke seems to view this request as a manifestation of a weird obsession. But Clarke must know that Iraq was involved in the Islamofascists' 1993 attempt to destroy the World Trade Center. Thus it was hardly unreasonable for President Bush to want to know whether Saddam was behind the successful effort in 2001 as well. Stephen Hadley, Condoleezza Rice's deputy, says, "We cannot find evidence that this conversation between Mr. Clarke and the president ever occurred."

More generally, Clarke accused the administration of spoiling for a fight with Iraq and claimed that Donald Rumsfeld, in particular, was talking about Iraq immediately after the September 11 attacks. The most basic problem with this claim is that while the administration endorsed the act of Congress that made regime change in Iraq the policy of the United States, it didn't attack Iraq for a year and a half after September 11, and then only after Saddam had definitively thumbed his nose at a series of U.N. resolutions.

Before September 11, Clarke was professionally committed to the idea that al Qaeda represented a new form of "stateless terrorism" that could never cooperate with a country like Iraq:

Prior to 9/11, the dominant view within the IC was that al Qaida represented a new form of stateless terrorism. That was also the view promoted by the Clinton White House, above all terrorism czar, Richard Clarke. To acknowledge that Iraqi intelligence worked with al Qaida is tantamount to acknowledging that all these people made a tremendous blunder--and they are just not going to do it.

We now know that this dogma was false, and Iraq did in fact support and collaborate with al Qaeda and other terrorist groups. Second, we know that Richard Clarke was very willing to justify pre-emptive attack, on the basis of imperfect intelligence, when the attacker was Bill Clinton:

I would like to speak about a specific case that has been the object of some controversy in the last month -- the U.S. bombing of the chemical plant in Khartoum, Sudan. National Security Adviser Sandy Berger wrote an article for the op-ed page of the Washington Times about that bombing, providing the clearest rationale to date for what the United States did. He asks the

following questions: What if you were the president of the United States and you were told four facts based on reliable intelligence. The facts were: Usama bin Ladin had attacked the United States and blown up two of its embassies; he was seeking chemical weapons; he had invested in Sudan's military-industrial complex [as is Communist China]; and Sudan's military-industrial complex was making VX nerve gas at a chemical plant called al-Shifa? Sandy Berger asks: What would you have done? What would Congress and the American people have said to the president if the United States had not blown up the factory, knowing those four facts?

Is it really a crazy idea that terrorists could get chemical or biological weapons?

Yet Clarke seems to have developed a very different attitude toward that possibility once a Republican became President.

Third, we know that Clarke bought into the now-discredited "law enforcement" approach to counter-terrorism, which advises that if people are making war on us, we should arrest them:

Long before our embassies in Africa were attacked on August 7, 1998, the United States began implementing this presidential directive. Since the embassies were attacked, we have disrupted bin Ladin terrorist groups, or cells. Where possible and appropriate, the United States will bring the terrorists back to this country and put them on trial. That statement is not an empty promise.

It was not an empty promise. Clinton's promise of due process for terrorists explains why bin Laden is alive today, along with many of his confederates.

Thus it is not difficult to see why Richard Clarke, a discredited and demoted bureaucrat, would be bitter toward President Bush and the members of his administration who have carried out a successful anti-terrorism campaign, far different from the one endorsed by Clarke and the Clinton administration.

But is Clarke only a bitter ex-bureaucrat, or is there more to his attack on President Bush? Let us consider both Clarke's personal history and his current employment. Clarke now teaches at Harvard's Kennedy School of Government; here is his Kennedy School bio, which notes that the capstone of his career in the State Department was his service as Assistant Secretary of State for Political-Military Affairs.

Another professor at the Kennedy School is Rand Beers, who is evidently an old friend and colleague of Clarke's, as Beers' Kennedy School bio says that "[d]uring most of his career he served in the State Department's Bureau of Politico-Military Affairs."

So Clarke and Beers, old friends and colleagues, have continued their association at the Kennedy School. Indeed, they even teach a course together. And, by the most astonishing coincidence, their course relates directly to the subject matter of Clarke's attack on the Bush administration: "Post-Cold War Security: Terrorism, Security, and Failed

States" is the name of the course. Here is its syllabus:

Between them, Rand Beers and Richard Clarke spent over 20 years in the White House on the National Security Council and over 60 years in national security departments and agencies. They helped to shape the transition from Cold War security issues to the challenges of terrorism, international crime, and failed states...Case studies will include Somalia, Haiti, Bosnia, Iraq, Colombia, and Afghanistan. Challenges of counter-terrorism and homeland security will also be addressed.

Why is this particularly significant? Because Rand Beers' bio says:

He resigned [his State Department position] in March 2003 and retired in April. He began work on John Kerry's Presidential campaign in May 2003 as National Security/Homeland Security Issue Coordinator.

In summation, Richard Clarke is a bitter, discredited bureaucrat who was an integral part of the Clinton administration's failed approach to terrorism, was demoted by President Bush, and is now an adjunct to John Kerry's presidential campaign.

Well.....

> DAMN IT JIM WE WANT ANSWERS !!!
> This ain't Radio Shack
>
> ARE you hearing images on this radio?

Only when it's turned on. Actually, It has many images just like the S-350, BUT if you turn down th RF gain, they will go away. Don't forget I live less than a mile from a 50 Kw blowtorch...

> How does the tuning knob "feel?" (The one on the Grundig S350 is hopeless.) Any "backlash?"

It is tighter then I like and if you spin it too fast, it stutters. (It is easy to turn it too fast) Maybe it will loosen up with usage. No backlash. When turning the knob, the radio makes the same "chirping" noise that the 1103 makes. Do you have an 1103?

> What kind of external antenna connector is on the radio?

Well, it has a high impedience connector and a ground like on the S-350 and a PAL connector also like the S-350. The PAL connector says it's for FM and S.W. I find that the other connector, which says M.W. ant, works better than the PAL for S.W. Go figure...

> Finally, did you buy yours from Lipyn's eBay shop? If not, how much did you pay, if you don't mind my asking?

No, I didn't buy it from Lipyn. It was a "gift" from another seller. I only paid shipping. $40. Only $40?

> I presume this set has no synchronous detection circuit. Am I correct?

You would be correct. But it DOES have a HANDLE and a ferrite antenna ;)

that, with its large speaker, it has quite good audio quality on FM as well as MW. Correct? (Can you compare its FM audio quality to the GE Superadio, S350 or Satellit 800?)

Yes. Audio quality is good. Better than S-350, not as good as SRI, II, or III, Sat-800, Panasonic RF-5000, Zenith R7000, Sony ICF-5100.
So, what IS it better than? Better than any <500 portable radio (that I own). Amplifier runs out of steam early and speaker crackled when any volume above low is selected. To be fair, the batteries I am using or close to being junk but they work fine in my RF-5000....

> Sorry for all the questions, but I do appreciate your replies. The radio

- BULLETIN -
Senator Santorum: Military has found 500 chemical munitions shells in Iraq

The shells allegedly contained mustard or sarin gas. They believe there are other shells inside the country that haven't been found yet.

In the days leading up to the war in Iraq, the two most critical reasons cited for toppling Saddam's regime were the existence of weapons of mass destruction (WMD's) and then-Iraqi president Saddam Hussein's connection to the international terrorist organization, Al Qaeda. The Bush Administration confidently cited these as factual and clear justifications for the attack against the terrorist-sponsoring, Baathist government. At the time, a Gallup poll indicated that 67% of the American public supported the war against Saddam because of his non-compliance with weapons inspectors and his ties to Islamic terrorists.

In June 2004, the 9-11 Commission's report cast doubt on the existence of WMD's and denied a "collaborative relationship" between Iraq and Al Qaeda. Almost immediately, the Administration proceeded to dismiss its initial claims of WMD's and an Al Qaeda connection, blaming faulty intelligence. By April 2006, according to a CBS poll, only 44% of the public agreed with the decision to invade Iraq.

Since the invasion of Iraq, a great deal of evidence has accumulated about Saddam's possession of WMD's and his close ties to Al Qaeda. Many such reports have not been covered by the mainstream media and have been available primarily from talk radio, conservative publications and online sources. The evidence is substantive and warrants careful study and wide exposure.

Supporting the contention of the existence of WMD's in Iraq, General Al-Tikriti, a former commander for Saddam, confirmed in an interview with author Ryan Mauro in May 2006, that arrangements were made between Baghdad and Damascus for Iraqi WMD's to be stored in Syria under Russian oversight prior to the invasion by Coalition forces. Al-Tikriti, who defected prior to the Gulf War, continued to maintain contact with weapons scientists in Iraq. In addition, statements by former Under Secretary of Defense John Shaw corroborate, through British and Ukrainian sources, the involvement of Russian special forces in Iraq in moving WMD's to Syria. Further confirmation has been obtained from retired Iraqi General Georges Sada, as well as from former chief of Romanian intelligence, Ion Pacepa; Israeli intelligence; Chinese communications to Germany and the reports of a Syrian journalist who defected to France.

During the 2003 invasion of Iraq, Dave Gaubatz, a former special investigator for the Pentagon, unsuccessfully attempted to obtain permission to examine four, sealed underground bunkers in Iraq, which he believed contained WMD stockpiles. Gaubatz has since battled three years of resistance from politicians in Washington and requests to shut down his website for his continued efforts to examine the bunkers. Gaubatz is scheduled to meet with representatives from the U.S. government on June 15 to pursue authorization for a through investigation of the sites. These obstacles to Gaubatz' efforts are especially troubling considering the March 2004 admission by Charles Duelfer, Director of Central Intelligence Special Advisor for Strategy regarding Iraqi Weapons of Mass Destruction (WMD) Programs, that ISG inspected only a small percentage of suspected WMD sites in Iraq.

In light of the preponderance of information from corroborating sources about the existence of WMD's in Iraq, it is baffling why no statement has been forthcoming from an Administration whose much maligned "rush to war" would be exonerated by these findings. It is difficult to understand why this important data is being kept from the American public when support for U.S. military actions in the region is at an all time low. Astoundingly, early this week, U.S. Representative Curt Weldon (R-PA) was asked to acknowledge, for the sake of "honoring the service and sacrifice" of those who served in Iraq, that no Iraqi weapons of mass destruction existed. He was pressured in the interests of "moving forward with the facts, not spin." However, recent findings support the idea that reporting on the existence of substantial evidence of WMD's would indeed bring us closer to the facts and away from the spin. The press, which is hardly a champion of President George W. Bush and has consistently accused him of misleading the country, has ignored the new developments. Instead, it has conveniently turned to criticisms of war conduct and treatment of incarcerated terrorists. In the current media climate, it is inconceivable that the American public will be properly apprised of these new, WMD findings.

On the issue of Saddam's ties to Al Qaeda, newly released documents captured in Iraq and Afghanistan corroborate a strong connection between Iraq, Al Qaeda and the Taliban, the Sunni Islamic nationalist movement that formerly ruled Afghanistan. These documents include a recently translated notebook kept by an Iraqi intelligence officer and a four-page, typed letter from Afghanistan, dated July 26, 2002, apparently written by Al Qaeda or Taliban operatives and used by the U.S. Army in a report about Al Qaeda. The letter has subsequently been posted by the West Point Combating Terrorism Center. The notebook contains minutes from meetings among Taha Yassin Ramadan, former vice president of Iraq, and other high-level Iraqi officials with Al Qaeda and Taliban supporters. (Interestingly, a 2002 BBC report claimed that Ramadan hosted in Baghdad in 1998 Ayman al-Zawahri, a deputy to Al Qaeda leader, Osama bin Laden.).

Further, the notebook mentions Maulana Fazlur Rahman, often described as the godfather of the Taliban, and his connection to Al Qaeda through a friend, Mullah Omar. Rahman is believed to have organized the Taliban under Omar and to have sheltered bin Laden in Pakistan following the Coalition's invasion

of Afghanistan. The notebook contains a statement by Rahman that he met with Omar, requested a meeting with Saddam and invited Iraqi officials to Afghanistan. It indicates that Rahman welcomed the establishment of relations with Iraq and hoped that Saddam could be instrumental in garnering Russian support for the Taliban.

The four-page, July 2002 letter examined by the U.S. Army corroborates the link between Rahman and Saddam's regime. It also implies a connection and the coordination of activities among Pakistan, Libya, Iraq and the Taliban.

These two, newly released private documents located in different countries lend credibility to the existence of a well-established. cooperative relationship between Iraq and Al Qaeda. Yet, no response to this new, startling information has come from the media or the politicians who censured Bush for "overplaying" the Al Qaeda-Saddam alliance to justify the Iraq war. The Administration has also remained silent about these new developments.

Instead, what continues to prevail is an attitude expressed in an August 2003 speech by former Vice President Al Gore who said, "The evidence now shows clearly that Saddam did not want to work with Osama bin Laden at all, much less give him weapons of mass destruction."

Administration critics including U.S. senators John Kerry (D-MA), Carl Levin (D-MI), Diane Feinstein (D-CA) and Jay Rockefeller (D-WV), as well as U.S. Rep. Jane Harmon (D-Venice, CA), have decried any meaningful connection between Saddam and Al Qaeda. Further, the CIA has maintained, with the exception of former director George Tenet, that the secular regime of Saddam Hussein would never cooperate with Islamic fundamentalists like bin Laden.

But the new documents appear to counter these assertions and support Tenet, who said in October 2002: "We have solid reporting of senior level contacts between Iraq and Al Qaeda going back a decade."

"Credible information indicates that Iraq and Al Qaeda have discussed safe haven and reciprocal non-aggression," Tenet added, further stating, "We have credible reporting that al Qaeda leaders sought contacts in Iraq who could help them acquire WMD capabilities."

Information from detainees held in the military prison camp at Guantanamo Bay, Cuba, further confirmed the Al Qaeda-Saddam connection, specifically reports of meetings between Al Qaeda leaders, including al-Zawahiri, in Baghdad since the early 1990's and a visit by one of bin Laden's WMD specialists to Iraq for WMD training.

As the translations continue of documents captured during the war in Iraq, more information will become available to support Bush's initial justification for the invasion. Will the Administration, its detractors and the press fulfill their responsibility to inform the American public or will Americans remain in the dark about these critical, new discoveries?

UN releases report on Iraq's chemical weapons programme
>>> June 1, 2006 <<<- LOL!!!

Iraq's chemical weapon programme produced approximately 3,850 tons of the chemical warfare agents mustard, tabun, sarin and VX, the report states.

Of the total of some 3,850 tons of chemical warfare agents produced, approximately 3,300 tons of agents were weaponized in different types of aerial bombs, artillery munitions and missile warheads.

Iraq weaponized some 130,000 chemical munitions in total. Of these, over 101,000 munitions were used in combat, according to Iraq, in the period from 1981 to 1988.

Iraq declared that some 28,500 chemical munitions remained unused as of January 1991; about 5,500 filled munitions were destroyed by coalition forces during the war in 1991, while another 500 filled munitions were declared destroyed unilaterally by Iraq.

The bulk of the destruction of some 22,000 filled munitions occurred under the supervision of the UN inspectors in accordance with Security Council resolution 687 (1991) – the "ceasefire resolution" which ended the war – in the period from 1991 to 1994.

During the collection of chemical weapons for destruction after the 1991 war, Iraq stated that it was not able to locate some 500 chemical munitions.

Document Details WMD Recovered In Iraq

June 21, 2006
(CNSNews.com) - Sen. Rick Santorum (R-Pa.) and Rep. Peter Hoekstra (R-Mich.) announced Wednesday the finding of over 500 munitions or weapons of mass destruction, specifically "sarin- and mustard-filled projectiles," in Iraq.

Reading from unclassified portions of a document developed by the U.S. intelligence community, Santorum said, "Since 2003, coalition forces have recovered approximately 500 weapons munitions which contain degraded mustard or sarin nerve agent. Despite many efforts to locate and destroy Iraq's pre-Gulf War chemical munitions, filled and unfilled pre-Gulf War chemical munitions are assessed to still exist."

According to Santorum, "That means in addition to the 500, there are filled and unfilled munitions still believed to exist within the country."

Reading from the document, Santorum added, "Pre-Gulf War Iraqi chemical weapons could be sold on the Black Market. Use of these weapons by terrorist or insurgent groups would have implications for coalition forces in Iraq. The possibility of use outside of Iraq cannot be ruled out. The most likely munitions remaining are sarin- and mustard-filled projectiles. And I underscore filled."

Santorum said the "purity of the agents inside the munitions depends on many factors, including the manufacturing process, potential additives and environmental storage conditions."

While acknowledging that the agents "degrade over time," the document said that the chemicals "remain hazardous and potentially lethal."

The media has reported that "insurgents and Iraqi groups" want to "acquire and use chemical weapons," Santorum noted.

The Pennsylvania senator called the finding "incredibly" significant.

"The idea that, as my colleagues have repeatedly said in this debate on the other side of the aisle, that there are no weapons of mass destruction is in fact false," Santorum said. "We have found over 500 weapons of mass destruction and in fact have found that there are additional chemical weapons still in the country."

As Cybercast News Service reported on Oct. 6, 2004, the CIA's chief inspector in Iraq provides details that corroborate information contained in 42 pages of Iraqi intelligence documents obtained by CNSNews.com.

The so-called Duelfer report, named for its author, Charles Duelfer, is widely recognized for declaring that no stockpiles of weapons of mass

destruction have been found in Iraq. Other details of the report, however, provide a glimpse of what some Iraq experts say is Saddam's attempt to continue to wage war against the U.S. after the first Gulf War ended.

Inspector's Report Bolsters Credibility of Iraqi Intelligence Documents

October 13, 2004
(CNSNews.com) - A report issued on Oct. 6 by the CIA's chief inspector in Iraq provides details that corroborate information contained in 42 pages of Iraqi intelligence documents obtained by CNSNews.com.

The so-called Duelfer report, named for its author, Charles Duelfer, is widely recognized for declaring that no stockpiles of weapons of mass destruction have been found in Iraq. Other details of the report, however, provide a glimpse of what some Iraq experts say is Saddam's attempt to continue to wage war against the U.S. after the first Gulf War ended.

"M14 ... was responsible for training and conducting special operations missions. It trained Iraqis, Palestinians, Syrians, Yemeni, Lebanese, Egyptian, and Sudanese operatives in counterterrorism, explosives, marksmanship, and foreign operations at its facilities at Salman Pak," the Duelfer report states.

Salman Pak is a suspected Iraqi terrorist training camp located 15 miles southeast of Baghdad.

M14 is a reference to Iraqi intelligence directorate of special operations. The Iraqi documents obtained by CNSNews.com show a list of 92 individuals of various national origins who were described in the documents as having "finished the course at M14."

The documents also refer to some individuals on the list as having been trained "inside the martyrs act camp that belonged to our directorate."

Laurie Mylroie, an expert on Iraq, said that sections of the Duelfer report help to explain Iraq's intent for the programs discussed in the 42 pages of Iraqi intelligence documents obtained by CNSNews.com.

"At the time of the 2003 Gulf War, this is what the Iraqis were doing," Mylroie told CNSNews.com. "That section of the [Duelfer] report dealing with the Iraqi intelligence service, including M14, very much corroborate the legitimacy and significance" of the 42 pages of Iraqi documents, Mylroie added.

On Oct. 4, CNSNews.com reported that it had obtained 42 pages of Iraqi intelligence documents that showed Saddam had been a state sponsor of terrorism against the U.S., had several ties to al Qaeda that had not been previously reported, and possessed anthrax and mustard gas.

Saddam Possessed WMD, Had Extensive Terror Ties

October 04, 2004

(CNSNews.com) - Iraqi intelligence documents, confiscated by U.S. forces and obtained by CNSNews.com, show numerous efforts by Saddam Hussein's regime to work with some of the world's most notorious terror organizations, including al Qaeda, to target Americans. They demonstrate that Saddam's government possessed mustard gas and anthrax, both considered weapons of mass destruction, in the summer of 2000, during the period in which United Nations weapons inspectors were not present in Iraq. And the papers show that Iraq trained dozens of terrorists inside its borders.

One of the Iraqi memos contains an order from Saddam for his intelligence service to support terrorist attacks against Americans in Somalia. The memo was written nine months before U.S. Army Rangers were ambushed in Mogadishu by forces loyal to a warlord with alleged ties to al Qaeda.

Other memos provide a list of terrorist groups with whom Iraq had relationships and considered available for terror operations against the United States.

Among the organizations mentioned are those affiliated with Abu Musab al-Zarqawi and Ayman al-Zawahiri, two of the world's most wanted terrorists. Zarqawi is believed responsible for the kidnapping and beheading of several American civilians in Iraq and claimed responsibility for a series of deadly bombings in Iraq Sept. 30. Al-Zawahiri is the top lieutenant of al Qaeda chief Osama bin Laden, allegedly helped plan the Sept. 11, 2001 terrorist strikes on the U.S., and is believed to be the voice on an audio tape broadcast by Al-Jazeera television Oct. 1, calling for attacks on U.S. and British interests everywhere.

The source of the documents

A senior government official who is not a political appointee provided CNSNews.com with copies of the 42 pages of Iraqi Intelligence Service documents. The originals, some of which were hand-written and others typed, are in Arabic. CNSNews.com had the papers translated into English by two individuals separately and independent of each other.

There are no hand-writing samples to which the documents can be compared for forensic analysis and authentication. However, three other experts - a former weapons inspector with the United Nations Special Commission (UNSCOM), a retired CIA counter-terrorism official with vast experience dealing with Iraq, and a former advisor to then-presidential candidate Bill Clinton on Iraq - were asked to analyze the documents. All said they comport with the format, style and content of other Iraqi documents from that era known to be genuine.

Laurie Mylroie, who authored the book, "Study of Revenge: Saddam Hussein's Unfinished War against America," and advised Clinton on Iraq during the 1992

presidential campaign, told CNSNews.com that the papers represent "the most complete set of documents relating Iraq to terrorism, including Islamic terrorism" against the U.S.

Mylroie has long maintained that Iraq was a state sponsor of terrorism against the United States. The documents obtained by CNSNews.com , she said, include "correspondence back and forth between Saddam's office and Iraqi Mukhabarat (intelligence agency). They make sense. This is what one would think Saddam was doing at the time."

Bruce Tefft, a retired CIA official who specialized in counter-terrorism and had extensive experience dealing with Iraq, said that "based on available, unclassified and open source information, the details in these documents are accurate ..."

The former UNSCOM inspector zeroed in on the signatures on the documents and "the names of some of the people who sign off on these things.

"This is fairly typical of that time era. [The Iraqis] were meticulous record keepers," added the former U.N. official, who spoke with CNSNews.com on the condition of anonymity.

The senior government official, who furnished the documents to CNSNews.com, said the papers answer "whether or not Iraq was a state sponsor of Islamic terrorism against the United States. It also answers whether or not Iraq had an ongoing biological warfare project continuing through the period when the UNSCOM inspections ended."

Presidential campaign focused on Iraq

The presidential campaign is currently dominated by debate over whether Saddam procured weapons of mass destruction and/or whether his government sponsored terrorism aimed at Americans before the U.S. invaded Iraq last year. Democratic nominee Sen. John Kerry has repeatedly rejected that possibility and criticized President Bush for needlessly invading Iraq.

"[Bush's] two main rationales - weapons of mass destruction and the al Qaeda/September 11 (2001) connection - have been proved false ... by the president's own weapons inspectors ... and by the 9/11 Commission," Kerry told an audience at New York University on Sept. 20.

The Senate Intelligence Committee's probe of the 9/11 intelligence failures also could not produce any definitive links between Saddam's government and 9/11. And United Nations as well as U.S. weapons inspectors in Iraq have been unable to find the biological and chemical weapons Saddam was suspected of possessing.

But the documents obtained by CNSNews.com shed new light on the controversy.

They detail the Iraqi regime's purchase of five kilograms of mustard gas on Aug. 21, 2000 and three vials of malignant pustule, another term for anthrax, on Sept. 6, 2000. The purchase order for the mustard gas includes gas masks, filters and rubber gloves. The order for the anthrax includes sterilization and decontamination equipment. (See Saddam's Possession of

Mustard Gas)

The documents show that Iraqi intelligence received the mustard gas and anthrax from "Saddam's company," which Tefft said was probably a reference to Saddam General Establishment, "a complex of factories involved with, amongst other things, precision optics, missile, and artillery fabrication."

"Sa'ad's general company" is listed on the Iraqi documents as the supplier of the sterilization and decontamination equipment that accompanied the anthrax vials. Tefft believes this is a reference to the Salah Al-Din State Establishment, also involved in missile construction. (See Saddam's Possession of Anthrax)

The Jaber Ibn Hayan General Company is listed as the supplier of the safety equipment that accompanied the mustard gas order. Tefft described the company as "a 'turn-key' project built by Romania, designed to produce protective CW (conventional warfare) and BW (biological warfare) equipment (gas masks and protective clothing)."

"Iraq had an ongoing biological warfare project continuing through the period when the UNSCOM inspections ended," the senior government official and source of the documents said. "This should cause us to redouble our efforts to find the Iraqi weapons of mass destruction programs."

'Hunt the Americans'

The first of the 42 pages of Iraqi documents is dated Jan. 18, 1993, approximately two years after American troops defeated Saddam's army in the first Persian Gulf War. The memo includes Saddam's directive that "the party should move to hunt the Americans who are on Arabian land, especially in Somalia, by using Arabian elements ..."

On Oct. 3, 1993, less than nine months after that Iraqi memo was written, American soldiers were ambushed in Mogadishu, Somalia by forces loyal to Somali warlord Mohammed Farah Aidid, an alleged associate of Osama bin Laden. Eighteen Americans were killed and 84 wounded during a 17-hour firefight that followed the ambush in which Aidid's followers used civilians as decoys. (See Saddam's Connections to al Qaeda)

An 11-page Iraqi memo, dated Jan. 25, 1993, lists Palestinian, Sudanese and Asian terrorist organizations and the relationships Iraq had with each of them. Of particular importance, Tefft said, are the relationships Iraq had already developed or was in the process of developing with groups and individuals affiliated with al Qaeda, such as Abu Musab al-Zarqawi and Ayman al-Zawahiri. The U.S. currently is offering rewards of up to $25 million for each man's capture.

The documents describe Al-Jehad wa'l Tajdeed as "a secret Palestinian organization" founded after the first Persian Gulf War that "believes in armed struggle against U.S. and western interests." The leaders of the group, according to the Iraqi memo, were stationed in Jordan in 1993, and when one of those leaders visited Iraq in November 1992, he "showed the readiness of his organization to execute operations against U.S. interests

at any time." (See More Saddam Connections to al Qaeda)

Tefft believes the Tajdeed group likely included al-Zarqawi, whom Teft described as "our current terrorist nemesis" in Iraq, "a Palestinian on a Jordanian passport who was with al Qaeda and bin Laden in Afghanistan prior to this period (1993)."

Tajdeed, which means Islamic Renewal, currently "has a website that posts Zarqawi's speeches, messages, claims of assassinations and beheading videos," Tefft told CNSNews.com. "The apparent linkages are too close to be accidental" and might "be one of the first operational contacts between an al Qaeda group and Iraq," he added.

Tefft said the documents, all of which the Iraqi Intelligence Service labeled "Top secret, personal and urgent" show several links between Saddam's government and terror groups dedicated not only to targeting America but also U.S. allies like Egypt and Israel.

The same 11-page memo refers to the "re-opening of the relationship" with Al-Jehad al-Islamy, which is described as "the most violent in Egypt," responsible for the 1981 assassination of Egyptian President Anwar Sadat. The documents go on to describe a Dec. 14, 1990 meeting between Iraqi intelligence officials and a representative of Al-Jehad al-Islamy, that ended in an agreement "to move against [the] Egyptian regime by doing martyr operations on conditions that we should secure the finance, training and equipments." (See More Saddam Connections to al Qaeda)

Al-Zawahiri was one of the leaders of Jehad al-Islamy, which is also known as the Egyptian Islamic Group, and participated in the assassination of Sadat, Tefft said. "Iraq's contact with the Egyptian Islamic Group is another operational contact between Iraq and al Qaeda," he added.

One of the Asian groups listed on the Iraqi intelligence memo is J.U.I., also known as the Islamic Clerks Society. The group is currently led by Mawlana Fadhel al-Rahman, whom Tefft said is "an al Qaeda member and co-signed Osama bin Laden's 1998 fatwa (religious ruling) to kill Americans." The Iraqi memo from 1993 states that J.U.I.'s secretary general "has a good relationship with our system since 1981 and he is ready for any mission." Tefft said the memo shows "another direct Iraq link to an al Qaeda group."

Iraq had also maintained a relationship with the Afghani Islamist party since 1989, according to the memo. The "relationship was improved and became directly between the leader, Hekmatyar and Iraq," it states, referring to Gulbuddin Hekmatyar, an Afghani warlord who fought against the Soviet Union and current al Qaeda ally, according to Tefft.

Last year, American authorities in Afghanistan ranked Hekmatyar third on their most wanted list, behind only bin Laden and former Taliban leader Mullah Omar. Hekmatyar represents "another Iraqi link to an al Qaeda group," Tefft said. (See More Saddam Connections to al Qaeda)

The Iraqi intelligence documents also refer to terrorist groups previously believed to have had links with Saddam Hussein. They include the Palestine Liberation Front, a group dedicated to attacking Israel, and according to the Iraqi memo, one with "an office in Baghdad."

The Abu Nidal group, suspected by the CIA of having acted as surrogates for Iraqi terrorist attacks, is also mentioned.

"The movement believes in political violence and assassinations," the 1993 Iraqi memo states in reference to the Abu Nidal organization. "We have relationships with them since 1973. Currently, they have a representative in the country. Monthly helps are given to them -- 20 thousand dinars - in addition to other supports," the memo explains. (See Saddam's Connections to Palestinian Terror Groups)

Iraq not only built and maintained relationships with terrorist groups, the documents show it appears to have trained terrorists as well. Ninety-two individuals from various Middle Eastern countries are listed on the papers.

Many are described as having "finished the course at M14," a reference to an Iraqi intelligence agency, and to having "participated in Umm El-Ma'arek," the Iraqi response to the U.S. invasion in 1991. The author of the list notes that approximately half of the individuals "all got trained inside the 'martyr act camp' that belonged to our directorate."

The former UNSCOM weapons inspector who was asked to analyze the documents believes it's clear that the Iraqis "were training people there in assassination and suicide bombing techniques ... including non-Iraqis."

Bush administration likely unaware of documents' existence

The senior government official and source of the Iraqi intelligence memos, explained that the reason the documents have not been made public before now is that the government has "thousands and thousands of documents waiting to be translated.

"It is unlikely they even know this exists," the source added.

The government official also explained that the motivation for leaking the documents, "is strictly national security and helping with the war on terrorism by focusing this country's attention on facts and away from political posturing.

"This is too important to let it get caught up in the political process," the source told CNSNews.com.

To protect against the Iraqi intelligence documents being altered or misrepresented elsewhere on the Internet, CNSNews.com has decided to publish only the first of the 42 pages in Arabic, along with the English translation. Portions of some of the other memos in translated form are also being published to accompany this report. Credentialed journalists and counter-terrorism experts seeking to view the 42 pages of Arabic documents or to challenge their authenticity may make arrangements to do so at CNSNews.com headquarters in Alexandria, Va.

I don't know if there's a Heaven or not but I would like to qualify for it
in the event that I may be wrong. The problem with guys like Dave is, they
think there thinking is cutting edge and needs no further development and
they've locked the door and thrown away the key and anyone who disagrees
with them is a fool that just doesn't understand their insight and if we
would all just listen to them, all our problems would be gone.

2864. Re: Redsun RP-2100

Newsgroup: rec.radio.shortwave
Date: 2006-06-21 23:36:41 UTC
From: Jim Hackett <h-a-c-k-m-a-n@pcpeople.com>
Message-ID: <dKkmg.26580$VE1.9847@newssvr14.news.prodigy.com>
Source record: 79597

A few more things I can mention are:
The radio is VERY sensitive off the whip.
It is a bout a half inch larger than the S350 in every direction.
It has L/R line level outputs
Plugging 3 different sets of stereo headphones into the 1/8" headphone jack netted the same results. Sound out of one ear only unless plug was pulled out part way. (this does NOT give stereo) Oddly enough, plugging in my mono headphones gave me NO SOUND at all unless plug was pulled out part way. HMMM Defective? (According to the manual I was given this jack is supposed to be stereo)
Radio runs off of 4 "D" cells or 4 "AA" cells and has a switch on the side to set it accordingly.
There is a switch that is SUPPOSE to make the light stay on for 8 seconds when the light switch is pressed. In ACTUALITY, what it does is, if the switch is ON, the buttons on the front come on with the display. If it's off, ONLY the display lights up. Either way, 8 seconds is what you get...
There is a local/distance switch in addition to the RF gain knob.
There is also a switch that is SUPPOSE to disconnect the ferrite antenna so you can use the external connector. Selecting EXTERNAL does NOT make the M.W. signal any different. Maybe all it really does is enable the use of the external connector.
Radio has 2 different alarms utilizing the radio or the Humane Wake System which gradually increases the volume of the beeping till you turn it off.
Seems to have 2 very well selected filters (compared to the S-350). By tuning off frequency till signal goes away, I would say they are around 3.5 and 7 for narrow and wide.
Has nice sturdy LONG antenna.
50 memories. 10 for each band.
Fast/slow/off tuning knob selector. Fast increments 5 khz, slow, moves it 1 khz. Ironically, the up/down BUTTONS are NOT affected by the fast/slow switch. They ALWAYS increment radio by 5 khz regardless of setting.
No SSB.
Local/World clocks.
I keep trying to think of where this radio fits in to the scheme of things. I guess I would have to say that my preliminary thoughts are that if you like the S-350 but think it's lacking in several respects, this is the radio for you. It is EVERYTHING the S-35o should/could have been.
I will spend a little more time on the M.W. band tonight and see how it does there.

Hope this answers some questions for those of you that re interested. If you're not, oh well...

You left out a key word, Hon: ''degraded''.

The fact that your heroes have to drag this old story about the 500
artillery shells out of moth balls one more time speaks volumes about
their desperation.

They've already admitted that WMD was just a convenient excuse,
Santorum is undermining y'all's credibility by rehashing this story
and opening a closed wound.

The U.S. Defense Departmentï¿½s ï¿½Militarily Critical Technologies Listï¿½
(MCTL) is ï¿½a detailed compendium of technologies" that the department
advocates as ï¿½critical to maintaining superior US military
capabilities. It applies to all mission areas, especially
counter-proliferation.ï¿½ Written in 1998, it was recently re-published
with updates for 2002.

So what is the MCTLï¿½s opinion of Iraq's chemical weapons program? In
making its chemical nerve agents, ï¿½The Iraqis . . . produce[d] a . . .
mixture which was inherently unstable,ï¿½ says the report. ï¿½When the
Iraqis produced chemical munitions they appeared to adhere to a ï¿½make
and useï¿½ regimen. Judging by the information Iraq gave the United
Nations, later verified by on-site inspections, Iraq had poor product
quality for their nerve agents. This low quality was likely due to a
lack of purification. They had to get the agent to the front promptly
or have it degrade in the munition.ï¿½

Furthermore, says this Defense Department report, ï¿½The chemical
munitions found in Iraq after the [first] Gulf War contained badly
deteriorated agents and a significant proportion were visibly
leaking.ï¿½ The shelf life of these poorly made agents were said to be a
few weeks at best -- hardly the stuff of vast chemical weapons stores.

There was some talk shortly before the first Gulf War that the Iraqis had been creating binary chemical weapons, in which the relatively non-toxic ingredients of the agent remain unmixed until just before the weapon is used; this allows the user to bypass any worry about shelf life or toxicity. But according to the MCTL, ï¿½The Iraqis had a small number of bastardized binary munitions in which some unfortunate individual was to pour one ingredient into the other from a Jerry can prior to useï¿½ -- an action few soldiers were willing to perform.

Iraq did produce mustard gas that was somewhat more stable than the nerve agents. It may have a longer shelf life; perhaps potent forms of this agent could still be found. But one must wonder how worried we should be about Iraqï¿½s poorly-made agents, several years after their production.

Metal Detecting,eh? I own a couple of metal detectors.One of them is a small hand held one (I am not talking about a stud finder either,of which I do own one,a Sears Craftsman electronic stud finder.Actually,a good way to find studs is tap around on the wall with a hammer) and a larger one.

I once saw a guy at Daytona Beach with a home made rig.He had a lawn mower frame and a 12 volt battery and one or two 12 windshield wiper motors all rigged up to swing two metal detectors back and forth.Last year when the Bell South woman next door was installing plastic water pipes in her house,she was digging around in her front yard.She found some very old coins and a couple of items which date back to around the Civil War era.

Democrats say the war on terror is something Bush made up. There is no threat, it's all about oil. Then in the next breath, they whine that New York is not getting as money as it needs to fight the war on terror, and New York will be less safe. Talk about being two faced.

One of these days you'd think they get tired of smelling the stink from all the shit they throw on the wall. If Osama bin laden could vote, I'm sure he'd vote for a democrat. Democrats want to make things easier for him.

That's probably bad news for DRM and sync-AM aspirants via software DSP
because the DE1103/KA1103 has lousy phase stability and the chirping
suggests a common design for the PLL 1st conversion.

Jim, do you have a 455kHz-12kHz converter and a >1GHz PC to try out
Dream and SDR?

Very poor engineering practice. L.O. leakage from one receiver can get into
the other receiver.
Most CATV splitters have decent isolation and insertion loss down to at
least 3-4 MHz- many well below that.
By using an appropriate splitter, you are guaranteed:
1. Equal splitting loss
2. Good port-port isolation (this keeps the L.O. from each RX from being
heard by the other, and splitting loss is no longer a function of what freq
each RX is tuned to).
3. Reasonable Z match

Even if you inductively couple them? I don't generally like to make direct
connections to my portables and typically coil the wire around the antenna.

What you really want is a multicoupler.
http://www.macom.com/sigint/PDF/410.pdf
This would do nicely. ;-)

I think if you have an amplified antenna (wellbrook for instance), a simple passive splitter is passable for much of what you monitor. Of course, if the signal is weak, the splitter will add noise. For instance, I couldn't see using one for say AFN.

I would also add that you must be able to prove that you can trace your ancestry back to 1776 or earlier in order to hold an Amateur Radio License as only decedents, of real Americans around at the time of the Revolutionary War, should be allowed to possess a license.

Also, that you not be allowed to operate any tube gear. It sucks too much electricity and is helping to destroy the environment.

You must build your own equipment. Ban all manufacturers of amateur gear, unless of course, it is made in America in which case a 200% tariff should be added to help fund the FCC with all this additional testing that you would now require.

All amateur operators must also pass a spelling and grammar test. They must not be overweight and have perfect hygiene and never smell at any hamfests - especially Dayton.

Once you start riding an electric cart at Dayton or any other hamfest, your Amateur Radio license is immediately revoked.

There are probably some other items that need to be added to the list of requirements, but I will submit those to these groups later.

I live forty five East across the Mississippi River Bridge from Louisiana.A few hours ago,I measured my old Bogalusa wind up floor model Phonograph.20 5/8'' by 22'' by 39'' tall.The hinged top measures 21 1/4'' by 22 3/8''.There are two doors on the front of the cabinet which open outward for the speaker sound.Judging from the style of the cabinet and the two little metal pull handles on the doors,I am beginning to think it was made before World War Two,possibly back in the 1930's.It might be a rare old Bogalusa Phonograph for all I know.I do know it isn't going to Japan or anywhere else as long as I live.

What a wanker. I wonder if that mental midget author ever thought that the enemy understands "and eye for an eye" oh so well, and given the events of Gitmo, Abu Graib, and renditition, the enemy is just returning the favor. This is why decent countries do not torture. However, the Nazi in Chief has issued a signing statement that the US will not obey the congressional restriction on torture that John McCain championed.

You can't cut and run from moral behavior.

2895. One Antenna and Two Radios = One Antenna Switch ?

Newsgroup: rec.radio.shortwave
Date: 2006-06-22 01:40:02 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1150940402.834892.82990@u72g2000cwu.googlegroups.com>
Source record: 79678

LS,

One Antenna and Two Radios = One Antenna Switch ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/10245

I perfer the Alpha-Delta to the Daiwa and MFJ
Two Position Antenna Switches --for- connecting
Two Radios to One Antenna.
http://www.universal-radio.com/catalog/switch.html

-IMHO- DESK-TOP POSITION OFFERS BEST UTILITY
FOR "RECEIVE ONLY" USE SHORTWAVE RADIO
LISTENING (SWL) :
The 'design' {lay-out} of the Alpha-Delta Antenna Switch :
Having all the SO-239 Jacks on the same {Rear} Side
works better; when the Switch is laid on a Deck-Top
{Table Bench Top} with the rest of the Radio Gear;
and this Desk-Top position makes changing the Switch
very easy.
http://www.universal-radio.com/catalog/switch/2415.html

ON-THE-WALL - If the Switch is going to be mounted
on a Wall; and not switched frequently then the Daiwa
and MFJ will work well too.
http://www.universal-radio.com/catalog/switch/1864.html
http://www.universal-radio.com/catalog/switch/2811.html

NOTE - If this Antenna Switch were going to be used
for Transmitting then Being-on-the-Wall would be the
better {Safer} Mounting Location.

WHY - Physically having to Sand-Up and Reach-Over
to "Change" the Antenna Switch while not touching
anything else is a better operations lay-out then being
able to have One-Hand on the Key or Mic and the
Other-Hand on the Antenna Switch.

TIP - Consider a Shortwave Receiver Antenna Tuner /
Pre-Amplifier that has a built-in Antenna Switch for
use with Two Radios and Two Antennas. The MFJ-959
Pre-Amplifier and Antenna Tuner comes to mind.
http://www.universal-radio.com/catalog/preamps/2574.html

hope this helps - iane ~ RHF

Thirty years ago, that would qualify as a SDR. Look at the block
diagram of what it takes today to be a SDR:
http://www.monteriallc.com/downloads/Aquila.pdf
Bandlimiting on the front end, then high resolution ADC, followed by
DSP. This is not just DSP demod.

Dear Neighbor:
I flew a small airplane around the FCC site some years back when it was still in operation. I do not remember seeing anything like a circular array. Do you know when that array was taken down?

For most HF DF purposes, arrays of loop antennas coupled to computers for processing seem to be the norm. The utility of a well design circular array is its use for monitoring with several receivers in several specific directions simultaneously.

Thanks for the information.

I doubt it, there are simply collectors there much as there are anywhere else.
As I recall, they were big into buying Collins gear a number of years ago.

I did ship 4 or 5 Drake 1-A's over there to Japan back in the 80's along with
other Drake items of interest to them.

Another positive side of the proposal is that we could eliminate a lot
of tickets. Think how quiet the bands would be for a little
while....MUCH LESS QRM! Of course that would change when the FCC
reassigned (auctioned) those now unused freqs to the commercial users.
Heck, you could do BPL through out the old ham spectrum. There wouldn't
be enough Ham clout left to stop it. Who would even notice! Cheap
Internet! GO FOR IT ! .... IMs instead of QSOs.......Great idea.
Keep those wheels turning. You might luck into another winner of an
idea! George

I looked around and nobody seems to make one. You might want to look at
the Ham stuff even though you don't have to have one that can take
transmit power levels.

Easier to make one than to buy one.

HOUSE APPROPRIATORS REVERSE CUTS

DATELINE: Washington, 06/21/06. The United States House
of Representatives
Appropriations Committee reversed the request of the
Broadcasting Board of
Governors decision to cut the Voice of America radio
broadcasts in Albanian,
Bosnian, English, Hindi, Macedonian, and Russian. The
House Appropriators also
reversed the total elimination of broadcasts in Croatian,
Georgian, Greek,
Turkish, and Thai (AFGE Local 1812, via DXLD, Glenn Hauser)

Every day I go to work and look at WMD's...Hell they got about 150,000 chemical munitions right here in Richmond Kentucky at the bluegrass army depot.Those fucking things leak all the time. We are always bagging and moving those leaky cocksuckers around trying to mop up fucking leaks....I'm so fucking sick of wearing an NBC suit to work every day in 80 to 95 degree temps...The Army tried to build an incinerator here for em but figured out it would kill thousands of Americans.......they wanted to move em elsewhere but local and state laws keep em off the highways....so here they sit.....leaking like a motherfucker and STUCK!

SO ?

Why aint bush getting his ass kicked?...those things are illegal....but then again I guess we are the only country allowed to have WMD's

google,U.S.Army Incinerator Alabama

About three years ago,U.S.Army did burn a lot of chemical weapons at an incinerator in Anniston,Alabama.There are some underground vents from Nuclear testing back in the 1950''s/1960's in the Nevada desert that are still venting radio active stuff into the Atmosphere.Many,many people in Iraq (including Americans too) are sick and dieing from Depleted Uranium and when the Americans come back to America from Iraq,the Depleted Uranium gets passed on to their family and friends.Our Very Worst Enemy Is U.S.federal government.

I didn't see any inexpensive ones made for HF. Plenty of them at higher
frequencies or amplified units so who makes a simple unit for HF that is
a transformer or resistive coupled that has PL-259 connectors?

<snip>

Because North Korea isn't interested in *using* these missles. (Except as bargaining chips against the west.)

They are very interested in *selling* them, however. (Pakistan and Iran are already customers.)

Do you have a room temperature IQ? Name the Democrat that said Bush
made up the war on terror.

Now the war in Iraq is not about terror as must as it is about oil and
feeding no-bid contracts to Republicans. Having paid my quarterlies
last week, I am well aware how the Bush crime family is ripping me off.

RF systems SP-1 looks like it but it's $99.95. I guess that's not
unreasonable but seems a little high.

I could build one for $20. Mini circuits have small transformers and you
would need to buy a metal box and three PL-259 connectors.

2928. Wake-Up America - Silence on Barbaric Torture and Brutal Murder of American Soldiers

Newsgroup: rec.radio.shortwave
Date: 2006-06-22 08:56:29 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1150966589.588198.60570@r2g2000cwb.googlegroups.com>
Source record: 79761

Miso,

WAKE-UP AMERICA !

Typical Liberal Democrat Party of the USA Reply :
So you are happy to see that our two young Soldiers
were Tortured, Brutalized and Murdered - because a
fter all it is all "The Evil" George Bush's Fault
- Blame Bush !
- Hate American !
- Vote Democrat
- Killing Our Troops is OK if It gets rid of Bush
- Bush Is Pure Evil cause he is a Republican.

Miso - It would have been better had you simply
said nothing out of respect for the two young
Soldiers and their Families, Friends and Loved Ones.

-Or- Maybe offered a Pray for the Souls of the two
young Soldiers -and- a wish that God would comfort
their Families, Friends and Loved Ones.

But No - Your reply shows the Sickness of Liberalism and
your commitment to all things anti-american, anti-bush
and anti-war.

Slanted Media Coverage :
The Liberal Media is out promoting the HeadLines
American Soldier's as Murderers and Terrorist -and-
The Left-Wing Newsmakers have made the Tortured,
Brutalized and Murdered bodies of our two young
Soldiers a non-story.

The Two Young Soldiers Had Names :
KRISTIAN MENCHACA and THOMAS TUCKER

* U.S. Supports Murdered Soldiers, Democrats Push Withdrawal
http://www.cbn.com/CBNnews/politics/060621a.aspx

* Two Abducted GIs Dead - Soldiers were Mutilated
and their Bodies Booby Trapped
http://www.chicagotribune.com/news/nationworld/chi-0606210160jun21,1,6508712.story?coll=ch
i-newsnationworld-hed

* Murdered American GIs Were "Brutally Tortured"
http://www.themoderatevoice.com/posts/1150868689.shtml

* Barbaric Acts Against GIs Have No Equivalent
http://www.azcentral.com/arizonarepublic/opinions/articles/0622thur1-22.html

* Human Rights Groups Silent On Death Of Americans
http://www.townhall.com/opinion/columns/JeffEmanuel/2006/06/21/202047.html

America Prays for Our Young Dead Soldiers :
The Silence of each American for our two young dead
Soldier should be the Silence-of-Pray for their Souls
and that God will comfort their Families, Friends and
Loved Ones.

God Bless the Souls of Our Two Young Dead Soldiers
and God's Blessing be with Their Families, Friends and
Loved Ones -and- We All Say amen, Amen. and AMEN !

and may god bless you too miso - amen ~ RHF

I think you may be predicting the past. If you look at Japanese
websites you will see some impressive collections of radios and lots of
other boys toys.

Of all the groups of guys that buy and sell radios I'm wondering why
the Japanese are worthy of your special attention and concern. Maybe
you would care so share your thoughts.

And some guy paid close to $3million for a GM concept car from the
1950's. So what...it's supply and demand at work.

What would building a collection of radios have to do with an unlikely
event like an electro-magnetic pulse.

That WAS "Big Ideas", a 6 parter on music. A rerun, but one of
their better programs. Now they're in the middle of a run of
interviews by Terry Lane, the former "National Interest" host.
Sounds like he's just as busy after retirement. This week, it's
with a virologist on bird flu and HIV and stuff like that.

I am new to Shortwave and I am trying to understand the technical stuff. I have been lurking for several months and have some basic questions that I hope to get answered or at least directed to an on line reference. I have googled and tried searches but I just don't have the background to understand what I am searching for. I am a graphic artist looking at retirement in 6 months and I don't have a real strong technical background.

Sherwood engineering has a chart that rates receivers.
http://www.sherweng.com/table.html

I think that I understand some of the tests but am at a loss for others.

Noise Floor (dBm) is very clear. This is the weakest signal the radio can receive for some minimum signal to produce some unspecified signal to noise ratio. Is there an industry standard SNR?

AGC Threshold (dB) The signal level at which the AGC starts to reduce the gain?

100KHz blocking dB, the level in dB of a signal 100KHz from where the receiver is tuned to produce a 1dB reduction in gain. More dB is better.

Sensitivity (uV) ????? does this go with "100KHz blocking dB"?

LO Noise Spacing (dBc) ???????
KHz ???? I guess these two numbers are paired and the higher the dBc and the smaller the KHz the better.
I found this at wiki
http://en.wikipedia.org/wiki/DBc
but I don't have a clue what they are saying.

Front End Selectivity: The type of front end a a general; rating as to it's effectiveness.

Filter Ultimate (dB): The maximum attenuation produced by a filter. A ham friend thinks this shows leakage across the filter. A higher number means less leakage and greater out of band attenuation.

Dynamic Range Wide Spaced at some KHz: The range, in dB, between the weakest
signal and the strongest signal that are separated by some, most commonly 20, KHz.
Higher dB means better. 20KHZ is better then 100KHz.

Dynamic Range Narrow Spaced at some KHz: The range, in dB, between the weakest
signal and the strongest signal that are separated by some, most commonly 2, KHz.
Higher dB means better. 2KHZ is better then 2KHz is better then 3, 4 or 5KHz.

I am currently using a DX398 that I bought at a flea market. I understand that this is a
basic radio and I am thinking about moving up to a better receiver. Before I commit any
real money for a modern radio I am trying to understand what the numbers mean and
not be taken. Since I am getting ready to retire, money is an issue and I may have to consider a used radio. At this point I am not trying to get suggestions for a specific radio, I am just trying to gain a modest understanding of what numbers are important. I enjoy the "official" broadcasts from other countries and I am beginning to understand utility reception. Is is interesting to listen to airplanes over the oceans, and some of the maritime conversations are salty to say the least. I am using a 30' wire that goes out the window to a tree, and I have bought the coax to errect a better antenna. The computer tech at work is also a ham so he is teaching me some simple things like how to solder. He wound a 9:1
transformer and helped me mount it in a weather proof box and made me an adaptor cable
from very thin flexible cable, rg174 I think, to go from thicker coax that comes from the grounding block to my DX398. He warned me that thicker cable might drag the light weight radio off the desk. Another friend helped me drive a 8' ground rod and we mounted the ground block and used #8 solid wire to hook it to the rod. I bought a couple of SW antenna kits from a Lexington Radio Shack store that is going out of busines and this week end I will put up the antenna. The ham at work advised me to also buy a 75 ohm adjustable atenauator in case my DX398 is overloaded with the real antenna. At 70% off this stuff was almost a steal.
The ham at work gave me an older scanner so I am trying to learn about Vhf as well.

So while I am pretty green, I am learning. I have learned you can have a lot of fun even if
your don't really know what you are doing.

Airplanes will be around a lot longer than international broadcasters.
For good quiet SSB you need a radio with adjustable AGC (i.e. Fast,
Slow, Off) and an RF Gain control. Sherwood's list is pretty much in
order of preference. Anything in the top half is totally servicable
for your needs.

The FCC doesn't provide funding. The CPB provides matching funds.
The NTIA provides grants to improve facilities.

The stations can sell underwriting credits, which, while similar to
commercials, cannot directly solicit sales of a product of service.

Because all of the appliances in your house (and houses up and down
your street as well)that use microprocessors were quiet. So that you
heard lots more stations and had a very pleasant time.

Am I warm?

The noise floor should be the "signal" that is present with just a 50
ohm resistor attached at the input of the radio.

Generally sensitivity is the signal level required to read a specific
signal to noise ratio.

Some filter designs roll off for ever (until the noise of the radio
dominates). Others reach a plateau of maximum rejections. Generally
sharper filters have this plataeu. You more or less have this
interpretted correctly.

Ditto on Dave's comments regarding the AGC. OFF is good for beacons, fast is for SSB communications and digital modes, and slow is for shortwave broadcast.

The Sherwood list is useful, but you will be listening to shortwave broadcast with a wide filter. So you might want to look at the list with that kind of stacking.

If you get a 7030+NB, you have bought your last shortwave radio (unless you want to listen to more than one station at a time). Unfortunately, the Bush weak dollar is going to kill you. The Drake R8B, though not in the same league, is a better buy. It's a real bugger if you plan on programming it with a PC and homebrew code. The 7030 is more straightforward in that respect.

Many radios are designed with "holes" for extra filters. Thus you can take an OK radio and plug in a sharp crystal filter if you really want to chase DX in the presence of strong signals. These filters are quite reasonable on the used market. People buy them but have problems doing the installation, and just dump them. Or they want a different shape.

Buying used gear takes time. You need to search ebay, Craisg's, whatever periodically. I do this from time to time, but you need to consider what your free time is worth.

If you are going to use a splitter, you might as well go active. In
either case (active or passive), you are going to get a bit more noise,
but the active design should have better isolation.

Since I am of Native American ancestry, the airwaves belong to my people.
Therefore all non Native Americans must immediately surrender their license.
We will allow you to monitor transmissions as we plan to use the airwaves to
advertise our casinos.

This is obviously a joke so don't flame me.

No, I see a newsgroup clown that can't accept the fact that this man learned to succeed despite his dyslexia. Instead of offering ideas that could help him learn code you decide to insult him. You sit and whine about how ham radio is going to shit because they allow no code tech licensing and possibly doing away with code altogether. But you missed the biggest point with ham radio it was to help people. Did you help this man by offering alternative options to learn code? No, you insult him instead. It is you and your kind that will be the downfall of ham radio. Blame yourself.

Why do you find the need to boost your (lack of) self-confidence by
insulting this person by comparing him to Mark? Mark chooses to sit on his
ass sucking the entitlement system dry and contributing nothing to society,
while this person decided to make the best of his what God gave him and he
contributes to the same entitlement system that Mark chooses to deplete.

Earl you are not the Pearl of wisdom, you are the faux Pearl that trolls to
enhance your (lack of) self-esteem.

Something I just thought of at the spur of the moment (not to mention keeps me on topic), some disabled person should sue to remove ALL code requirements, or offer an exclusion to those with disabilities to not have to take ANY code test under the Americans with Disability Act. I'm sure that person could even get a free ACLU lawyer to handle it.

India is not a country we rely on to build super companies (for lack of a better term). Take a look at what we send to India. Toxic chemical factories that would be choked to death by special interest groups and politicians. We also outsource technical support, which is a waste of time and money, good thing companies don't pay them much, but it's a cheap way of saying "we have tech support" without truly having it. Look at the shoe mfg. industry, all moved to third world slave labor countries. Good for the shoe industry as they no longer have to deal with unions and we keep management and development in countries that have the talent and resources to maintain state of the art products. Look at how the auto industry has changed. They sent 1000s of jobs overseas to cut down on union labor (with management and R&D in the US), and the Japs are opening plants in the US (with management and R&D in Japan) that will never deal with the UAW. I could go on forever with this post (and talk about NAFTA), but will end my rave at this point. BTW, changed subject header as it didn't seem to fit. I would have trimmed a few NGs but am unsure what groups you are subscribed to.

- In either case (active or passive), you are going to get a bit
- more noise, but the active design should have better isolation.

For a "Combo" Antenna Splitter and {Active} Pre-Amplifier
when you want to use One Antenna with Two Receivers :
Then consider a Shortwave Receiver Antenna Tuner /
Pre-Amplifier that has a built-in Antenna Switch for
use with Two Radios and Two Antennas. The MFJ-959
Pre-Amplifier and Antenna Tuner comes to mind.

Well since they don't make them any longer and you don't like Ebay, you'll
have to use Google or another search engine. Type in Panasonic RF B65 with
swap or for sale etc..

< Snip >

More money, more complicated but the amplification can mitigate loss of
signal and provide more isolation between outputs.

Well when someone says "Splitter" I think of a simple transformer or
resistive unit. The stridsberg are powered, amplified units. Amplified
units are better then the simple splitters unless you have signal power
to spare.

For each of the three misperceptions, the study found enormous
differences between the viewers of Fox, who held the most
misperceptions, and NPR/PBS, who held the fewest by far. Eighty
percent of Fox viewers were found to hold at least one misperception,
compared to 23 percent of NPR/PBS consumers. All the other media fell
in between.

You can put three resistors 16.7 ohms each together in a metal box with
three connectors or you could use a mini circuits transformer instead of
the resistors. In dBm the transformer would have the outputs about -3.5
dBm and the resistor version would be -6 dBm.

Each company makes both active and passive models. They're listed on
the same page each.

In fact, the Stridsberg passives actually use something similar to
the Mini Circuits transformers, if not the Mini Circuits transformers

themselves.

For a two port installation, passive will usually get you there. More than that, and you're talking about a significant loss in level.

For as many receivers as I have, I use the actives. And I have units from both companies.

Practically, there is little difference between them beyond the roll off points.

Occasionally, you still find NOS units for sale from a dealer. I bought mine from Full Compass Systems in Middleton, Wisconsin. They'd had it for some years, sitting on a shelf, along with an RF-B45.

Scrounge around, you may find one.

>
> So,.... what kind-a car did you build to drive around in?

Funny you should mention that. I, myself have built two Mercedes from the pavement up. One a 190SL which I still have at my place in Texas, the other is an S-Class 280, which I sold some years ago. Besides those two, I've also built two of my three Studebakers, and a BMW 2002.

You may find that a number of members of this group are as adept with a wrench.

But the point intended above is not that one must build one's radio in order to be a fine ham, but that one must be a good technician, familiar with, and posessed of a working knowledge of, the circuitry of the operator's rig of choice, in this case a Yeasu FT100-D. Which would have obviated the original question as posted here.

In other words, If you're going to key up on the bands, know enough about the radio to know 1) that it's working correctly and within the standards of good amateur practice, and 2) how to at least begin an undertaking like correcting a mod that produces undesired performance.

There's nothing wrong with buying a commercially produced radio. But if you're going to assume the mantle of responsibility that goes with keying the mic, know something about the damned thing.

Well maybe a little more.

Mini circuits

This has package leads PSCJ-2-1 1 to 200 MHz for $25.95

This is surface mount but you can solder wires to it like the one above
SBTCJ-1W 1 to 750 MHz for $10.95

Radio Shack

SO-239 $3.29
Aluminum box 270-238 $2.99

So $23.81 with the surface mount unit.

Yes, winding your own toroid would be cheaper than buying a mini
circuits transformer.

He said the Japanese were buying tube units not solid state and the tube
units withstand EMP better.

Try:<http://www.dxing.info/equipment/rolling_your_own_bryant.dx>

He links to tests he made of three commercial units.
I use the Mini Circuits ZFSC-2-1, they use BNC connectors which is what

all of my SW radios use. Adaptors can be found at your local Radio
Shack.

I have built 2 of the units he discribes for friends and they work very
well.

You may, or may not, be interested in digging through pasts posts by me

where I gave the real world results of using passive or non-amplifed
"splitters".

The slightly over 3dB of loss is trivial for most locations. I tried
many A/B tests,
with several different SW receivers, [R2000, R390, R392, R5000 DX398
and a
AOR7030] in several locations [at home, in the woods, by Cumberland
lake
and on top of a "mountain" flatened by strip mining]. The quiter the
location the
more difference ~3dB made, but I never found anywhere where it was the
deciding factor and could not find a signal that was "hearable" direct
and gone
through the splitter.

Many years ago, 1950s, there was a very active 10 meter ham in Danvers, Massachusetts, during the period of Class A, B and C licenses. He was an arthritic quadriplegic. He was wheel chair bound, lived alone, and required visiting help to get into and out of bed and have his meals prepared and served.

He had a Class C [Conditional] license. He learned to copy 'read' CW in his head although he did not have the ability to send. I don't think he would consider a lawsuit appropriate.

Some of the OTs on this list may have worked him. W1JFS, Les MacCrakin. God Rest His Soul.

Having hired many engineers in my lifetime I can state that good engineers meet several criteria:

o meet the technical requirements established by your customer,

o meet the schedule established by your customer,

o meet the costs established by your customer.

Economics is only 1/3 of good engineering talent.

hobbyists build audio tube amps all the time.

didn't the Soviets have tubes in their fighters? the US switched to solid
state (EMP shielded?).

get some core memory like the Shuttle used to use.

Well I described a number of alternatives to learning and he persists in saying he cannot learn code. Now I have not insulted him that I know of (although it's difficult to predict what one might take as an insult). However, if someone truly is incapable of learning code, then they are unable to learn to understand the spoken word and to speak. The fact that he can speak and understand the spoken word means he can learn code at the basic level of 5wpm. He is his own biggest enemy.

NPR is very good news. i always thought it had a liberal leaning, but that
doesn't bother me.

the NPR shows have good guests. trying to remember some names, Dixie
Chicks, Chuck Palahniuk. you won't find that on most American TV or radio.

i think Jackson Pollack is bad art, but a show on that is better than the
inanity on CBS/NBC/ABC.

A completely deaf person can speak and read lips but he/she
still cannot even hear Morse code. What you need to understand
is that something that seems normal to you is missing in some
people. If an amateur radio license required dunking a basket-
ball, could you do it? As one who can dunk a basketball, I can
tell you all you need is enough will and effort and you can do it.

Dear Bill,

Welcome to a great hobby. I have been a shortwave listener for almost
fifty years.

For the answers to ALL your technical questions, go here:

< https://www.comcat.com/~mwk/pages/orderform.htm#Anchor-RADIO-3800 >

and order the "White Paper" < How to Interpret Receiver Lab Tests and
Measurements (Edition 3.01) >

It will cost you all of $6.95 postpaid and you will find it invaluable.

The "White Paper" < Popular Outdoor Antennas, including installation
(Edition 5.0) > is also of great interest should you want to learn more
(and remember, as I'm sure your friend has already told you, the
antenna is more important than the receiver).

On this page (I suggest you "bookmark" it) you will also see for sale
the 2006 edition of PASSPORT TO WORLD BAND RADIO. I recommend that you
do NOT buy this book just now - the new 2007 edition will be published
in October and I recommend that, at this time of the year, you wait for
it. I DO recommend you order it at that time. (You can even get the
book less expoensively on Amazon.com.)

You should obtain a great deal of pleasure and knowledge from your
DX-398 and I hope this has been of some help to you.

Best,

Joe

May word begin to look for the accololypse I agree with every word in a
post from Dr Death

aloouth the use of this story doess illustrate what is called in some
circle "cripple casts" where the more visible handicaps claim if they
greater entitlement to accomodation

and as I have said it has been disucussed aclu is not interested and a
few people I know are looking for an antonry to take it on, however few

are willing as long as the FCC contiues to dangle the likehood they
would act in less than the 5 or years prusuing that would take

Dear Jim,

No, I don't own a Degen DE-1103. Currently the only active portable shortwave radios I am using are my Sony ICF-SW7600GRs and my Sony ICF-SW35s. (I don't count the Satellit 800 as a portable.) (My old Hitachi KH-1108S is used almost exclusively for MW.) The rest of them are packed away in my crawl-space!

Even though the '7600 has no tuning knob, when you hold down the inner buttons [labeled + -> or <- -] at the lower right, the radio tunes quite fast and with no chugging (just make sure you have the sync turned off when you do this!).

Thanks for all your input about the Redsun radio. Frankly, from your description, I have lost interest somewhat. It sounds like quality control is somewhat lacking with this radio, at least in early-production units. I'll wait and see if they improve.

Thanks again.

Best,

Joe

With deaf people use can use a light or a subwoofer for them to copy code. I don't want to stereotype deaf people, but I have found many of them to be hooked on entitlements and expect unreasonable accommodations. I have a relative that refuses to wear a hearing aid, and then gets angry when there are communication problems. This person is physically able to work; yet sits around on my tax dollars playing the feel sorry for me card.

Broadcasters could get the calls originally assigned to ships for their
radio stations.

"The Tribune obtains the call letters WGN (World's Greatest Newspaper) from
Great Lakes skipper Carl D. Bradley."

> Westinghouse), I assume at one time they had a KXW, there were four stations.

As Gerard said, most older calls didn't mean anything. Most of the three-letter calls, and four-letter calls with A or B as the second letter, especially. I'm pretty sure WIBG is one of these assigned in order by the government calls.

It was not unusual for a station to choose a slogan *after* receiving its assigned call letters from the government. For example, that's where WSM's "We Shield Millions" came from: the government chose WSM first, then WSM chose a slogan to match. They could just as well have ended up assigned "WSI" - "We Sell Insurance". Some stations held contests, asking the public to come up with a slogan. (I believe I've read that's where WSB's "Welcome South, Brother" came from)

Let's see, the four original Westinghouse stations?:
KYW, Chicago (yes, Chicago - it moved to Philly later)
KDKA, East Pittsburgh
WBZ, Boston
WBZA, Springfield

Y was actually for educational institution stations, like W9YT (University of Wisconsin), W0YC (Univ. of Minnesota), W9YH (U. of Illinois), etc.. And only with the "ham-format" number-letter calls. Experimental stations were X, and still are - at the time, calls like W9XM. (also operated by the U. of Wisconsin) Today experimental stations get something like KC2XIM. X & Y in all-letter calls like KYW had no special significance.

KYW is somewhat of a mystery, not falling into any of the known categories of how a Eastern station got a K call. Them and KQV, Pittsburgh.

Well, here's one smart cookie, who knows better ! Of course it has
quality control issues, as smack'in of the S350 !

If I don my knee braces, I still can. Can you?

The point is that some things are possible for each
individual and other things are impossible. Anybody
who can't dunk a basketball or pass a MENSA exam should
know how a person feels when they can't learn Morse code.
I personally think it would improve the ARS to only allow
MENSA engineers to be a member. How does that make you feel?

One of the brightest engineers I know, who has a commercial
FCC license and was the engineer at an AM broadcast station,
couldn't get past 5wpm so he was condemned to Tech class for
30 years. He knows more about radio than any ten other hams.

Not a correct analogy. For starters, completely deaf people have learned the Morse code. Flashing lights and pulse pads have served their needs. Just as they have learned to speak and read lips, they can learn alternative methods of using code.

The 5wpm level is more equivalent to dunking a basketball in a basket that is just above head height rather than regulation professional height. Under those conditions, anyone can dunk a basketball.

The biggest reasons people "cannot" learn code are very simple.

1. They don't really want to and so subconsciously resist.
2. They have been subjected to poor training methods.
3. No one's ever taught them correct practice methods.
4. They have developed unrealistic expectations of the level of effort required.
5. Due to bad experiences resulting from the above items, they've convinced themselves they can't learn and so create a self-fulfilling prophecy.

Every problem that Sal has described has afflicted almost every student of Morse code (except perhaps for the very rare code geniuses). Forgetting letters right after learning them? Been there, done that. Confusing letters? Been there, done that. I've had to bow out of QSOs because my brain freezes up and refuses to keep copying.

It took me 3 months of daily practice of an hour or more every day to get to 5wpm. That's over 90 hours. The average person only needs about 30 hours. I experienced every problem that "Sal" has mentioned. I eventually went on to master the 20wpm. That took 9 months of the same intensive daily practice, over 270 hours. Fortunately I wasn't hobbled by the expectation of learning it in a few weeks. Luckily no one had ever told me I could learn it in a few days or weeks. So I just kept at it for however long it took.

True enough but that accommodation has been accepted for a very long time.
The regulations also said that they must be by hand. A sending test hasn't
been used in decades except as an accommodation for people with hearing
problems, etc. The FCC itself had stopped administering a sending test
before they turned the testing over to the amateur community.

But the letter of the law says they must receive Morse code
by ear. Anything else is a violation of that law. It's
like qualifying to be a life guard by doing a broad jump.

Well the accommodation has been used and accepted for a very long time. The regs also say send by hand but no one has administered a sending test in decades except as an accommodation to individuals with difficulty in receiving.

Your life guard analogy doesn't hold up either. Instead it would be like allowing the life guard to use a row boat instead of swimming out to the victim.

You have just admitted that the Morse code test has been
irreversibly compromised already. A deaf person holding an
HF ham license cannot hear an SOS so the entire purpose of
forcing him to learn Morse code is bogus. He is going to
be using a digital mode, not sitting there with his hand
on the speaker waiting to feel an SOS from a sinking ship
that doesn't even have CW capability anymore.

Believe me, this guy shed tears when he couldn't get past
10 wpm. He has a physical mental tick every few seconds, akin
to epilepsy, that causes him to lose time. He cannot speak
one minute of continuous speech much less receive one minute
of continuous Morse code. When he speaks, some of the time
is silence while his brain is out to lunch. But when he
does speak it is worth ten times the average person's
utterances. He is an engineering genius.

My main familiarity was in using one to feed a single audio tape to 16
different radio stations, simultaneously, over the phone lines. One
input, 16 outputs; they're made in all sorts of configurations. If you
Google "distribution amplifier" you might find something that would
work for feeding two radios; then again, I don't really know... :-)

The mfj-4706 coax patch panel also looks interesting, tho' I don't
know if you can receive to both radios at the same time.

That's what they are replacing the CW test with, the slam dunk. Now all
those hams with their Hover Rounds will have to give up their tickets.

A radio is a radio, whether it is a crystal radio, a regenerative one, a superhet, single, double, triple conversion. A software defined radio is a software defined radio whether it receives VLF only or operates into the microwave region. Your example is a "HF Wideband SDR" and the way you talk, pretty soon it, too, will not "qualify as a SDR". How can it qualify one year and not another? Its block diagram is functionally similar to that of the PC running SDRadio software: bandlimited front end (anti-alias filter), ADC (16 bits to 24 bits depending on sound card, therefore greater dynamic range than your 14 bit example), followed by DSP software. So what if it's a general purpose CPU running DSP software or a DSP IC - it's still DSP, just different levels of performance.

Now if you were to substitute "state-of-the-art SDR" wherever you said "SDR" in your last message, I'd agree with you, except SDRadio and Dream are not "just DSP demod" - they also filter before demod and do noise reduction and AVC. [30]

Tom

I have one of them here.It is in very good to excellent physical and cosmetic condition.It takes six D cell batteries and there are two screws on the back for an antenna hook up.It is a large portable radio with a tan color cabinet with a chrome front grill and a little push button for a dial light.I bought it at a Goodwill store over ten years ago.Is it suppose to be a good collectible AM radio or only a so so radio?

You have obviously not been on 20 Meters in some time.
14.275 is THE NEW toilet bowl of ham radio.

Some say it may even come close to soon taking the place
of the INFAMOUS 14.313 mHz of years ago.

Just park your dial there and you'll hear a whole cast
of rejects, both old and new, some of em from the old
14.313 freq history also and parts of 75 Meters.

CB'ers take note also - these are all USB freqs.

As the guy in Florida (I think his name was "Bagel Bernie")
used to say: "ENJOY - Ya've earned it!"

Note: I have not yet heard the infamous "Bathroom Man"
of Year's past on there (He was in Az by the way) but
hopefully he will be joining the fray soon too!

Yes, but they jury is still out. That is, does Fox News make you
stupid, or do stupid people watch Fox News?

The ARRL decided to call DSP demod being all that is required to have a
SDR. The military, which pioneered the concept, at least had digital
filters in the IF for their SDRs.

RF patch bays show up once in a while at flea markets. This assumes all
you want is a switch and not a multicoupler. If you buy one, get the
jumpers at the same time as they are all a little different. In fact,
you should ohm out the path, i.e. jumper and patch bay.

Another item you see once in a while at the flea market is the hp59307.
About $20. I never measure the response of the switch, but I can't
belive it wouldn't work well for HF.

Very good radio, I own two of them. Brenda Ann in here has had a few of those over the years I'm sure. Very selective radio and built like a tank. Here's a link. I'd keep it if I were you. Excellent audio BTW,

I don't think you insulted me -- it was whoever said I don't deserve a
license.

However, I do think it's a bit of a stretch to say that I can learn code
just because I can speak and understand words. You should see what my raw
typing looks like before I go back and fix it prior to hitting send (or
should I say "sned," which was what I typed the first time -- typically four
or five of those per line.) It's pretty bad.

I'm thinking of trying to learn the dits and dahs as strings of written dots
and dashes on paper. According to everything I've been told or exposed to,
that is not recommended. All the training says the goal is to perceive each
letter as a consolidated unit of sounds without any intermediate translation
steps. Well, since I'm positive that isn't working, particularly for
characters of four or more elements ... maybe a graphical alternative is in
order.

Telamon - true, True. TRUE ! :o) ~ RHF

However - Some Shortwave Listeners (SWL's) like to
have that Extra Box with All-the-Knobs on it to play with
so that 'they' can "Feel" that 'they' are in CONTROL !

Then Again - Other Shortwave Listeners (SWL's) are
very Happy with a 9:1 Matching Transformer at the
Antenna and a Coax Cable feed-in-line : For the very
fact that 'they' can Install-It-and-Forget-It - Happy to
simply Enjoy Listening to Their-Radios without the
need for any "Extra Knobs" to Play-With.
{ Please Don't Make It Complicated ! }

Since - I am down in Oakland, CA for the Night - I told
a look around sub-basement # 3 and found an old
Grove TUN-4 that is very much like the MFJ-959 unit.

You have extracted something from my post that was never there. No one has ever said that the purpose of hams knowing code was to hear a ship sending an SOS.

In addition, he might have a light rigged for cw, which he could see as he moved about the room.

Digital modes fail on a regular basis due to static, auroras, etc. It's a good idea to have a non-voice, non-computer alternative.

Since the late 80's, he could have gotten a medical waiver for the speeds higher than 5wpm. His case proves my point though. i.e. He did learn the spoken language despite his problem. He did learn the 5wpm despite his problem. His problem manifests itself in dealing fluently with the spoken language and also manifests itself in dealing with higher code speeds.

A problem that would affect the ability to learn code affects the ability to deal with the aural/spoken language.

The highest level of interest for learning the code is among the young.

> What's the gist of it, Dee?

1. Incorrect training methods. These abound. There are more bad ones than good ones around.
2. Incorrect practice methods. Many teachers and students don't really know how it should be practiced. They just muddle along. Among other things, that means daily practice not just getting together with a teacher once a week. It also means breaking the daily practice session into 15 minute increments so the brain doesn't fatigue.
3. Unrealistic expectations is quite possibly the biggest one. People think they should be able to learn it in a few days or a couple of weeks. It takes the average person 30 hours to get to 5wpm. At an hour per day, that's one month. A more comfortable pace is 1/2 hour per day for two months. (It took me closer to 90 hours.)
4. Disapppointment created by the above issues causing a person to believe they can't do it thus creating a self-fulfilling prophecy.
5. Not wanting to do it so they end up fighting themselves subconsciously.
6. Negative reinforcement by those who tell them that code testing should be eliminated because it is "useless". Anyone who's seen HF trashed by static or aurora should know better.

It was part of a rebuttal to someone who said that requiring 5wpm code was
as reasonable as having to be able to dunk a basketball.

Typing and reading are visually based. So it makes sense that those are a problem. But do you have difficulty saying words or hearing them? Just because the typing is a problem, doesn't mean that the aural/spoken is a problem. Reading/writing is a different activity than hearing/speaking and uses different parts of the brain. While I can't imagine a graphical method working for a dyslexic since it's visual, who can say for sure.

By the way, I still have problems with longer characters now and then or combinations of certain characters. I had an awful time trying to copy a call sign in a contest that began with SH5 (3 dots, 4 dots, 5 dots).

Recently I can across a "music" track that is about 5 minutes long that
teaches Morse by the sound of the characters.

If you would find this helpful I may be able to get a copy of it and
place it on an ftp server for you.

Regards

David

Outsourcing started way back in the 70's. It has only been in the last
decade that anyone in the media and public paid any attention to it.
When layoffs became common place after the dotcom bust then the public
finally realized that the barn door was open and nearly half the cows
are gone. A bit to late.

The one other thing I would mention, why not a "T" coax connector,
with high quality jumpers going to each receiver? I doubt you'd lose
much signal, if any, with that setup.

You probably don't listen to NPR, but there is great programming,
including a lot of non-political stories, that you won't get anywhere
else. The political coverage is thoughtful and non-inflamatory,
including some very fine conservative commentary lacking the hatred and
venom like that spewed by Hannity, Laura Ingraham, et al. It's just one
more source for information but it stands out In my opinion.

On the contrary, when I got my ham license in 1952, that
was the major reason given for the code requirement.

Sure John,

And yes, I am an expert at predicting the past :-)

The Japanese have little land left to purchase so that they have a large cash surplus to buy toys (when times are good). It seems to me that they have a fondness for most things produced in Europe and the USA. Antiques, automobiles, motorcycles, stereo gear and radios too. I expect that they would be collectors of boatanchors. It would not surprise me if there are buyers here in USA that might ship radios to Japan for resale. Maybe a Radiomart exists in Japan. I would think it impossible to determine how many BAs are being or have been exported. I don't particularly care who owns, and would rather see the radios in the hands of those who appreciate them. I expect the American love affair with boatanchors is waning and will be on death's doorstep within a generation or so.

The HemiCuda thing was just a FYI in response to cuhulin's note about the one million dollar Duesenberg. I am basically a gearhead with a fondness for radios. Present project here is a 71 vette 350 4 speed. No HemiCudas in the collection :-(

Regards,
Bob

Ahh. great American...

February 24, 2006, 2:51 p.m.
It Didnï¿½t Work

"I can tell you the main reason behind all our woes ï¿½ it is America."
The New York Times reporter is quoting the complaint of a clothing
merchant in a Sunni stronghold in Iraq. "Everything that is going on
between Sunni and Shiites, the troublemaker in the middle is America."

One can't doubt that the American objective in Iraq has failed. The
same edition of the paper quotes a fellow of the American Enterprise
Institute. Mr. Reuel Marc Gerecht backed the American intervention. He
now speaks of the bombing of the especially sacred Shiite mosque in
Samara and what that has precipitated in the way of revenge. He
concludes that ï¿½The bombing has completely demolishedï¿½ what was being
attempted ï¿½ to bring Sunnis into the defense and interior ministries.

Our mission has failed because Iraqi animosities have proved
uncontainable by an invading army of 130,000 Americans. The great
human reserves that call for civil life haven't proved strong enough.
No doubt they are latently there, but they have not been able to
contend against the ice men who move about in the shadows with bombs
and grenades and pistols.

The Iraqis we hear about are first indignant, and then infuriated,
that Americans aren't on the scene to protect them and to punish the
aggressors. And so they join the clothing merchant who says that
everything is the fault of the Americans.

The Iranian president, Mahmoud Ahmadinejad, elucidates on the
complaint against Americans. It is not only that the invaders are
American, it is that they are "Zionists." It would not be surprising
to learn from an anonymously cited American soldier that he can
understand why Saddam Hussein was needed to keep the Sunnis and the

Shiites from each others' throats.

A problem for American policymakers ï¿½ for President Bush, ultimately ï¿½ is to cope with the postulates and decide how to proceed.

One of these postulates, from the beginning, was that the Iraqi people, whatever their tribal differences, would suspend internal divisions in order to get on with life in a political structure that guaranteed them religious freedom.

The accompanying postulate was that the invading American army would succeed in training Iraqi soldiers and policymkers to cope with insurgents bent on violence.

This last did not happen. And the administration has, now, to cope with failure. It can defend itself historically, standing by the inherent reasonableness of the postulates. After all, they govern our policies in Latin America, in Africa, and in much of Asia. The failure in Iraq does not force us to generalize that violence and antidemocratic movements always prevail. It does call on us to adjust to the question, What do we do when we see that the postulates do not prevail ï¿½ in the absence of interventionist measures (we used these against Hirohito and Hitler) which we simply are not prepared to take? It is healthier for the disillusioned American to concede that in one theater in the Mideast, the postulates didn't work. The alternative would be to abandon the postulates. To do that would be to register a kind of philosophical despair. The killer insurgents are not entitled to blow up the shrine of American idealism.

Mr. Bush has a very difficult internal problem here because to make the kind of concession that is strategically appropriate requires a mitigation of policies he has several times affirmed in high-flown pronouncements. His challenge is to persuade himself that he can submit to a historical reality without forswearing basic commitments in foreign policy.

He will certainly face the current development as military leaders are expected to do: They are called upon to acknowledge a tactical setback, but to insist on the survival of strategic policies.

Yes, but within their own counsels, different plans have to be made. And the kernel here is the acknowledgment of defeat.

"hungry" and "homeless" people are there by their own choice or by choices they have made in their past. The welfare system doesn't work, otherwise there wouldn't be 5 1/2 MILLION people dependant on it.

Yes..... I have a problem with the system when 28% of my *net* profits get paid to the feds to support lazy dead beats, and another 4% goes to the state for the same.

I am retired Military, I served my country for 22 years, My father was born in this country by the grace of god, and couldn't speek the language until he was in grade school. When I retired from the miltary, I started my company and have worked my ass off for 10 years to get to where I am now, finally starting to make a comfortable living.

There are too many jobs out there for folks to be unemployed, homeless, or hungry. Those that are unemployable are those who by their own choice, can't seem to show up to work, let alone on time...those who can't seem to show up for work sober and not hung over, and those who can't seem to be able to pass a drug screening. If I could find somebody that *COULD* meet those minimum standards and had a little common sense and a desire to learn, I would hire them in a heartbeat, and they will earn good money.

They have made their choices.... I for one am damned tired of having to foot the bill for their irresponsibility, lazyness, and feigned ignorance(you can't be ignorant and be able to sponge off the system)

Hi, Lisa,

I, too, have a Radio Shack Amplified Antenna (Model 20-280). I bought it back in the '90s for my Yacht Boy, which died. I now use it with my Sangean ATS-909. I notice very little improvement in reception with the unit's whip antenna. However, attached to a simple 40-foot wire antenna, it works well enough.

Ten-Tec says its active antenna kit (http://radio.tentec.com/kits/Receiver) is for those "curious about what an "active" receiving antenna can or cannot do." Generally, it seems any such circuit can do a little to improve reception but not a lot.

There does not seem to be a substitute for the best antenna that you can construct. Everything else provides improvement in relatively small increments.

All best,

Ed

they do

How many times, say during Katrina did this occour

or for that matter name an insitance where digital mode failed , in an
emergency and Cw encoded morse got through and saved the day

>It's a
> good idea to have a non-voice, non-computer alternative.
why?

a clear alternive is to increase the over all number of stations to
decrease the chance that progation will fail to devlier the message
some where

and How does CW testing produce a working CW listening station

not clear who you are addresing

but this method get tried on most dyslexics and rarely works

why> gald I asked becuase most dyslexcs ebd up doing the easier for us
task on meoris 5 minutes of letter (learn though correcting our efforts
at the end) rather managing to sort of the tone

In Dyslexia, ones is up against one own brain and the methods one has
learned to work around the misfiring nurons most dyslexic learn very
effectve methods of dealing with, and the btter the devolped method is
the harder it is to defeat. Code testing tries to channel one down a
path of limited choices

(Reagan's Welfare Queen was a myth, you know.)

When a company moves offshore they do not reduce prices to the end
users. They increase their profits. Most big companies don't even
pay income taxes because they are legally running out of a drawer in
some Carribean island.

Eventually the middle class will be gone due to outsourcing. That
will be the end of the USA.

In my case, I have a very good dipole antenna, but the receiver is absolutely deaf on it, and the 20-280 really improves things a LOT! In fact, it now equals my DX-394 & DX-302 in side by side comparisons, and has even pulled out some DX that the tabletops missed! I'm much happier now, altho' to echo others' opinions on this NG, it's almost certain that the receiver (Sangean ATS-803A) must have some bad circuitry, despite the fact that it's been to RS for repair. I'm interested in anyone that knows what they're doing that doesn't charge an arm & a leg that would properly diagnose & repair it, as I *really* want it to be my primary "portable" (camping, long road trips, etc), even tho' my Grundig Mini 300PE serves quite well in that regard . . .

you are probably correct. linguistics is mainly concerned with spoken language, not written. in some languages like English, you'll note that people kind of speak the words out in their brain. other languages like Mandarin seem to be converted directly from characters into ideas.

ok, what burns me up is people claiming they can't learn code. there are languages that are tonal, configurational, have bizarre sounds, that put the object before the subject, that have thousands of characters. 99% of the planet learns their native language!

code is NOT that different than a language. if you must, you can interpret it as tones, and simply write out the tones on a piece of paper and decode them.

same here!

i have trouble with high speed B, 6, 1, J. however, you can create a
practice regimen that focuses on these.

a trick for contests might be using a spectrograph or MFJ viewer. good
luck.

good practice is beacons e.g. 10 meters. they are terse text, contain
slashes, and 5s since i hear Texas ones.

you sort of have to "decode" what the beacon is talking about.

NYC's Most Dangerous Callers to Talk Radio take to the airwaves themselves tonight, 10pm EST over shortwave WWCR 3.215 Mhz and the Internet at www.therightperspective.com.

On this week's show, host Frank from Queens will discuss the NY Times' continuing attack on the great anti-Communist leader, Gen. Pino-CHET! The vendetta out for him that the Leftist Media has and the hypocricy of them not criticising Fidel Castro!

Also on the agenda is the brutal and savage mutilation of our soldiers in Iraq by
Mohammadanist murderers, and the collapsing Christian Church in the West, both Catholic and Protestant. Frank's prediction of the U.S. and Vietnam will form an alliance against China seeming to come true! Also, co-host John's biting commentary on current events!

On "Hello Afrika!", a special edition with Boeres from all over the World discussing the Farm murders and ethnic cleansing quietly taking place in South Africa!

The Right Perspective - heard every Friday 10pm EST over shortwave WWCR 3.215 Mhz and the Internet at www.therightperspective.com.

uh, if you are deserted on an island with a few buckets of electronics junk,
your best bet is CW.

if you a prisoner of war, CW could be invaluable in getting a message out.
there are many other cases where CW can be used in channels that don't
support audio.

i am a superior creature because i know CW! ;-)

i hate to play devil's advocate, but i can read CW with spectral analysis
software. several of us on the very low bands are doing that.

yes, the chances of some deaf guy "hearing" an SOS is pretty slim.

it's sad that people get alienated from hobbies. it's also a fact of life. i downloaded some composition software, and it turned out i SUCK at making digital music.

i can play the second movement of Moonlight Sonata, but that's about it.

i remember this girl in chemistry class. she studied 5 hours for a test. i studied 10 minutes. my score was 30 points higher than hers. i wasn't necessarily smarter than her, i just knew how to study, and same thing with CW.

In an earlier thread, someone suggsted that the jFET in the RF amplifier stage has been blown. Since this is a common problem, it has a high probability of being the right answer for you. You do not need to get an exact replacement. People have reported that the commonly-available 2N3819 and the MPF102 have worked well. If you have this done, don't forget to install the antiparallel 1N914/1N4148 diodes across the input to protect your new jFET. You might even be able to get all of these parts from your local RadioShack.

i learned Morse Code at age 15. i got up to 25 WPM, perfect copy. i made QSOs, did a few contests, and quit for 9 years.

i now copy at 18 WPM, which makes me think i learned it like it was a language.

some suggestions. use Farnsworth, copying characters at 18 WPM is less annoying.

make QSOs! would you learn a language by using audio CDs, or would you talk to native speakers?

I suppose (a) the 803A could have problems (b) we can disagree on the meaning of "a lot." I'm glad the 20-280 works for you. Of course, reception is pretty good generally at this time of year. That's a issue I'm grappling with now as I evaluate a new antenna. I'll not be able to know how good it really is until I hear what it pulls in this Winter.

All best,

Ed

find out what the format of the test QSO is!

i didn't study much for my novice code test. i had no decent tapes, and i had to borrow my dad's computer to use software. computers back then were $2000 and no kid had one.

so anyway, i use Supermorse as recommended by my club. i get to the test, realize my code sucks, and luck out because they do a Supermorse QSO.

it's easy in today's world: free practice MP3s and $50 computers.

if you are contesting or DXing, CW rules.

HF phone contests will drive you insane, esp if you want to win an award.
even 10 meter phone was wall to wall stations from 28.300 to 29.000. i had
phased Yagis, and had to go way high, or end up stomping on someone.

if you want to run DX, good luck with 100 watts on SSB.

That may be what someone told you, but it was not the reason. The reason was that it was part of an overall "radio education" and it was one of the fundamentals of radio even in the 1950s.

I don't see the correlation between real estate purchases in Japan and buying radios and other collectibles. Any more than you can draw a cause and effect relationship for similar collecting manias in the U.S. More advanced countries as a group have excess cash to put into investments and fun things but that's about it.

> It seems to me
> that they have a fondness for most things produced in Europe and the

Actually there are several extensive collections owned by Japanese of Japanese only shortwave radios and a wide variety of other Japanese products.

> I expect that they would be collectors of boatanchors.

As are americans and europeans collectors of ba's. And there are plenty of americans and europeans that collect european radios. And there are plenty of Japanese that collect Japanese watches, just as there are Americans that collect american watches. And there are collectors of binoculars, beanie babies, jewelery, etc., etc. The world of collecting isn't easily drawn simply by country borders.

> It would not
> surprise me if there are buyers here in USA that might ship radios to

I'm know there are several very successful dealers of things Japanese in Japan.

> I would think it
> impossible to determine how many BAs are being or have been exported.

Nor would it be of any more interest than knowing how many american railroad watches were held by Japanese collectors.

> I don't particularly care who owns, and would rather see the radios in

Yup, agree 100%

> I expect the American love
> affair with boatanchors is waning and will be on death's doorstep

I think that is true. As the number of guys that once used tube radios continues to decline so will the interest in such technology. At some point they will become artifiacts like spark transmitters to be seen in the Smithsonian.

>
> The HemiCuda thing was just a FYI in response to cuhulin's note about

> No HemiCudas in the collection :-(

I guess Barrett Jackson is a real reflection of supply and demand. The really old cars, 1920's and 1930's seem to not attract near the investor/collector dollars as the big engine sometimes unusual muscle cars of the 1960's and early 1970's. Fascinating show to watch...my wife finds it totally boring....

Long,long ago,there were companies in America which manufactured some little cast iron penny bank toys.Some of those banks were Alligator (or Crocodile bank toys) penny bank toys.Lay a penny on there and press a little lever and the Alligator snaps that penny up.(there are nowdays a lot of fake antiques on the market) Over ten years ago,I read in Antique Trader www.antiquetrader.com that one of those Alligator penny banks sold for about sixteen thousand dollars.I have a similar very old cast iron penny bank toy,it is in the shape of an Elephant.Some toy collectors are very serious about collecting old collectible toys.Just look in the book stores for books about collecting antique toys.I own a lot of very old toys,some of them are not quite old enough yet to officially be called antiques.For something to officially be antique,it must me at least one hundred years old,or older.My 1914 Ford T Model car will be one hundred years old in 2014,eight more years from now..

I've never handled one, but it is merely an R7/R7A with an RV-75 VFO built in. The RV-75 gives a bit more stability from
initial turn on. Of course, the R4245 is designed as a rack mount receiver.

They are scarce, so I wouldn't be surprised if it fetches more than the $2247 the R7A recently hit.

http://www.dproducts.be/DRAKE_MUSEUM/r-4245_receiver.htm

The RV-75 VFO:

http://www.dproducts.be/DRAKE_MUSEUM/rv-75rem.htm

Now here is an R4245 that is even more rare:

http://www.dproducts.be/DRAKE_MUSEUM/r-4245-sm_rx.htm

Some of my old Popular Science and Popular Mechanics and Scence and Mechanics and Mechanix Illustrated magazines have some ads in them about big U shaped magnets and tubes that let you see underwater while sitting in a boat and grappling hooks.Tie a rope on the magnet and use the tube to look around underwater for outboard engines that have dropped off of boats and other treasures in Davy Jones Locker.

Back when I was young and interested I lost my desire to learn code when I
started monitoring the ham bands. It all seemed too formal, and then like it
is now, you have a large segment that think you are trash if you don't have
the highest obtainable license. Even this thread proves it. You have a large
contingent hell bent on having CW testing with any class, even though I
never plan to use CW. I could get my Tech ticket, but then all I'm going to
hear is that I'm a no-code tech. I rather be a CBer as we have no cast
system.

Oh no, I listen to NPR crap here most every night on WVGR 104.1 before they carry BBC World Service overnight.

And I'm listening to WLS 890 out of Chicago right now.

WVGR 104.1 was off for some reason when I got up this morning and there was some hip-hop rap crap on... I was curious as to what station it might be and by golly it was WZEE out of Madison, WI (A hotbed of dumbass Liberal thought by-the-way) about 125 miles from here.

We get some interesting VHF ducting effects going on over Lake Michigan during the summer.

Yes.. Agree

Power failures Do have a silver lining. they truly enhance SW reception

had a HUGE blackout here 2 years back; we sat around in Candle light,
eating perishables,
drinking Wine & listening to Shortwave.. From All Over
on portables of different vintages..

Virtually no RF.

Amazing reception..

Well, sort of... the cat's whisker is really half of a "point-contact" transistor. :-)

(and for those not familiar with early transistor construction, the very first transistors in the lab (and maybe even the venerable CK722)were nothing more than a slab of germanium with the equivalent of two cat's whiskers, hence the name "point contact" transistor).

An 86 year old guy who lives down the street from me was in the U.S.Army in the 149th Signal Company in Europe in World War Two.The Army wanted him to be a Radio Operator.He told them to put him anywhere but not in Radio.He would up in Motor Pool working on Army vehicles.After he was in the Army,he went to General Motors and Chrysler school.A few years ago,he had to have quartriple heart bypass surgery.He still keeps his hand in working on peoples cars at his home.

Another guy I know whom is about the same age was in the U.S.Navy in Asia in World War Two.He is a Ham Radio Operator.I doubt there isn't much about Ham Radio and Shortwave Radio he doesn't know.

You're a tough guy.

During a more civilised time a company went into business to provide
jobs and make profits and to be part of a community. Nowadays
corporations are extranational, have no local ties and just milk
markets dry and move on.

Corporations pay way less than half th cost of running governments,
even though they are the major beneficieries of what governments
provide. This is because we let them write their own rules.

I'm sure I could find all the replacement parts, however (& I've said this MANY times); I do not have the skills/feel comfortable/want to learn how to do the repairs. I'd MUCH rather have someone capable of diagnosing/repairing it that doesn't charge and arm & leg.

Interesting article in today's Wall Street Journal about how many of the big companies are complaining about their legacy retirement costs for the workers, reducing the pension benefits for the average Joe while increasing the executive retirement benefits.

They used AT&T as an interesting example:

55% of the retirement fund goes to support *189,000* workers.

45% of the retirement fund goes to support...are you ready?...1000 (that's a mere one thousand) execs!

As Cuhulin would say, "Look it up". WSJ, 6/23/06

So if you can't afford that new radio when you retire...

Looks like a good unit. It has an amplifier that you can bypass with a switch, has an antenna selector switch and a tuner to peak a signal.

They had a nice signal in here for a while today but they are fading now
maybe they will get better before sign-off at 22:00 UTC.

First not every homeless and hungry person is there by their own
choice. There are those that the system chrushes and grinds into
pieces just for beign at the wrong place at the wrong time. The
welfare system does work. Yes decision and actions in all our past
make differences. Yes some want to live the way they do. Somewhat out
on the fringe of society.

You mentioned interaction between the radios because there is no
isolation with a "T" connector. There would also be a 2:1 mismatch.

Corporations do pay taxes. The expense of taxes is often passed on
where feasable. Often these are in higher selling prices. Often taxes
do intrude on profits. When they do, there are steps taken to regain
that profit. Outsourcing is a means of regaining profit. Cutting
benefits and maintaining salaries is another. There are other means
also.

Yes, using a small active loop antenna is most likely your best bet. You
could also make a large passive loop if you have a good place to put it
like an attic. Some condos have attics. If you don't have that then use
an outside wall as long as you do not have aluminum siding or stucco.

Never did get better. 21:00 to 21:30 UTC was best and weak signal from
then on.

Australia fair fading to weak on an off so far today on 17785. Usually
they are much better on this frequency.

The Wellbrook has two primary virtues, so far as I'm concerned. First, it doesn't pick up a lot of noise, and the lower noise floor helps to render weak and messy signals intelligible. Second, you can rotate it to null local noise sources. Earlier this evening the guy behind me was letting his car idle and I was hearing it all over the place. After rotating the Wellbrook I could no longer hear even a trace of the noise.

That said, I'm constantly itching to try out new antennas and put them head to head with the Wellbrook. I'd like to pitch the Wellbrook against the Par End-Fedz wire antenna and the RF Systems MTA passive vertical, just to name a couple. It seems to me the Wellbrook with its loop design should win on principle, but experience occasionally throws you an interesting surprise.

Correct. In addition, the actual signal delivered to one receiver could well
depend on what freq the otehr receiver is tuned to. The degree would depend
on how each receiver's front end is tuned If it is a tracing band pass
filter, the results could be very very odd.
If one receiver is a regen...well, that's a nightmare.

One of the major problems with them was that the police departments were bolting their electronic equipment down in the trunk with bolts that were longer than they needed to be, and the ends of the bolts were really good at ripping open the gas tanks. Probably not a good thing to bolt your Icom R-9000 to the trunk floor of your Crown Vic... ;^)

Well known design flaw. Happens all the time.

This is why limits on lawsuits are bad. A company figures whether it
costs more to settle litigations or to fix dangerous products. If the
lawsuit damages are limited the companies will just keep killing
people.

click short pause clack = dit
click long pause clack = dah

i think it would be hard to decode vs listening to a modern receiver.

i believe spark gap would be useless in a rescue situation.

Hello.

Nice pictures - thanks for the link.

It makes sense for this antenna to be popular in Japan - their homes (and lots) are relatively small and close together. Plus, with the Japanese' love for electronic equipment, I should expect that there is lots of local electrical noise present in many locations. These Wellbrook antennas are ideal for such situations and their performance at the very least rivals, and in many cases, especially during the summer, exceeds that of longwires.

Back in 2005, Andy Ikin had so many orders from Japan (as well as from Ibiquity - for use with AM IBOC [HD] radio) that there was a very long wait for orders to be filled.

Though the pictures show the ALA 1530, which is designed primarily for optimum MW reception with SW reception being somewhat secondary, the ALA 330S, designed for optimum SW reception, especially on the higher frequencies, looks just like it. (I own two of them.)

In my opinion, for "real-world" SW listening, there is none better.

Best,

Joe

If those are metal masts going through the loop area that is not a good idea. I understand the desire to provide the support for the loop mechanically but the metal mast will screw up the loop performance. A non-conductive mast should be used.

I noted Wellbrook added a higher bandwidth version of the 1530, going
right up to the FM broadcast band. I know someone who ordered one, so
I'm waiting for some feedback.

If you have the ALA-100, which allows for more "wire" than their loops,
I seriously doubt there is ever a time when a long wire is better. My
radio switches in an attenuator for some local AM BCB with my ALA-100
that has about 60ft of wire.

Usually comes in better. Peaking at S6 but still very noisy. The upper bands (21 MHz, 17 MHz) are not doing very well for me today since around 21:30 UTC. They were good before that time today.

Currently around 04:30 UTC the 15 MHz band on down is very good.

NZ on 15720 is 10 dB over S9 and Australia is around S9 on 15515, 15240, and 13670.

The biggest problem with the Wellbrook is nobody is ripping off their design, so the price is high, especially with the Bush weak dollar policy.

All of those loops do not look like Wellbrook antennas.

I have problems with most characters of four or more elements length.
Exceptions are <period> and <Q>, for some reason. As I have said here,
after hearing dit-dah-dah-dit identified, whatever it is, I cannot
subsequently hear it and know what it is. I think my own first name
initial, <J> is some combination of three-and-one or one-and-three, but I
can't remember it. Oh yeah -- I know <V> because the dit-dit-dit-dah sounds
like the 1812 overture.

I dial a telephone with two fingers -- one pushing the buttons and one
holding my place in the phone book, since I have to go back and look at the
number repeatedly. Yes, I do memorize phone numbers, but I may invert the
digits when I try to dial them. This is a royal pain in the ass.

When I joined the Navy in 1962, one of our tests was for clerical skill,
which involved inspecting columns of numbers and calling the entries on each
line either ALIKE or DIFFERENT. I scored a 35, lower than anybody I ever
met. I wanted to be a Yeoman (clerical duties). Instead, they sent me to
ET school and I've never looked back.

I'll read any responses, but I think I'm pretty well talked out on this one.

No I heard it on Hardball and several other talking heads shows before
the invasion -- a lot of people were wondering why the Gallup and
other polls where showing over half the people in the country thinking
Sadham had attacked us on 9/11; Fox viewers were by far the most
gullible...

Why would see no one ripping off the Wellbrook design as a "problem."

I see it as a good thing.

Hi, I also have a unit from Redsun, it's working well except the sliding scale indicating the frequency range is slightly out of range. It' s comparable to the Degen 1107 except clock and light. I don't have the Tecsun R-9700DX, but from the blogspot, it is looking almost the same.

By the way, do you have the Redsun RP-2100, it is a BCL with PLL circuit dual conversion set, very powerful in FM, strong in MW and good in shortwave reception.

Regards

AMK

3249. [ot] Republicans support the troops NOT!

Senator Bill Nelson (D-Florida) sponsored a bill amendment that objected to the Iraq government granting amnesty to those who killed US soldiers. It was a slam-dunk win, 79-yea, 19-nay, 2-not voting. The shocker is the 19 votes against this amendment were all Republicans, including well known Senators John McCain and Trent Lott.

So much for the GOP supporting the troops.

<http://www.senate.gov/legislative/LIS/roll_call_lists/roll_call_vote_cfm.cfm?congress=109&session=2&vote=00178>

Question: On the Amendment (Nelson (FL) Amdt. No. 4265)

Statement of Purpose:

To express the sense of Congress that the Government of Iraq should not grant amnesty to persons known to have attacked, killed, or wounded members of the Armed Forces of the United States.

3251. FS: Zenith Transoceanic 3000-1 w/ all Manuals

Newsgroup: rec.radio.shortwave
Date: 2006-06-24 06:56:42 UTC
From: Cartrivision1 <doidy1@juno.com>
Message-ID: <1151132202.738320.163540@r2g2000cwb.googlegroups.com>
Source record: 80084
Cross-posted to: rec.antiques.radio+phono,rec.radio.swap,rec.radio.shortwave

FS: Zenith Transoceanic multiband radio model 3000-1. Comes with original user manual, service manual, and wave guide. Dates from early 1960's I believe. In full working order and in good cosmetic condition. Radio is fully intact but is missing the external DC Power supply. I powered it up with a 12v DC adapter and it works fine after a bit of warmup period (a couple minutes).

Here is a short blurb I pulled from the web about the 3000-1. Please disregard any grammatical errors as this is a translated version of the page:

Zenith Transoceanic mod. Royal 3000-1 - USA 1964. With this model the portable receivers Transoceanic like with the range FM (88 - 108 MHz) inserted, naturally remains Long-waves (200 to 400 KHz like in the model "1000-D"), Medium-wave (540 - 1600 kHz) and 7 ranges of Short waves (2 - 18,5 MHz), but in order to make space to the Modulated Frequency is eliminated to range of Short Waves (20,7 - 22,5 MHz) that existed instead in the "1000". This Radio was constructed and commercialized in USA from 1964 to 1971 when came replaced from model 7000. Inside the houses to there is not more the detachable Wavemagnet antenna, but remains that one on the top of the houses, arranged under the handle that contains always the rod antenna. The circuit comprise 12 transistors (the list is to here), the intermediate frequencies to are 10,7 455 MHz for the FM and KHz for AM. The radio can be fed by batteries (9 x 1,5 V type D or LR20) or with an external source of voltage (12 V d.c.) through appropriated jack place on the left side. On the frontal panel to there to are the usual control knobs: tuning, on-off-volume and tone, switch for dial lamps and another for the Automatic Frequency Control in FM. The houses is always metallic with extended chromium plated parts, but the finishes is in feint black skin. Regarding the previous models the aspect is diversified also for the thickening of the back cover, in order to contain the greater quantity of circuits two to the FM. Always "special" the sound that like from the small 4" loudspeaker, with 500 mW output power on 3,2 Ohm. The dimensions to are 32 x 26 x 14 and the weight is approximately 6,2 Kg with batteries.

Asking $100 obo plus shipping costs within the US. There is a little bit of corrosion in the battery compartment but nothing that could not be cleaned up very easily. Please contact me with any offers or questions.

thanks,
CTV

3258. The WellBrook Active Loop Antenna ALA 100

Newsgroup: rec.radio.shortwave
Date: 2006-06-24 08:14:31 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151136871.229986.151450@u72g2000cwu.googlegroups.com>
Source record: 80091

Miso,

With the larger WellBrook ALA 100 Loop Antenna you are
generally limited to a Fixed Position and therefore can not
use it to Null-Out the Local Noise.

The WellBrook Active Loop Antenna ALA 100 is a Large
Aperture Antenna designed to provide improved performance
compared to traditional Active and Passive Antennas.
http://www.wellbrook.uk.com/ALA100b.html
http://www.wellbrook.uk.com/products.html#ALA100
-Note- At Sixty Feet (60') of Wire a Loop Antenna is a
relatively Long Wire Antenna in the Shape of a Loop. :o)

HORIZONTAL OR VERTICAL :
Will the WellBrook Active Loop Antenna ALA 100 work
as well Flat {Horizontal} as well Upright {Vertical} ? ? ?

TWIN LOOP ANTENNA ELEMENT :
I have consider the possibility of using a WellBrook ALA100
that would be suspended up 25 Feet from a Tree Limb.
The Loop would be a Diamond Shape with a Ten Foot (10')
pieceof PVC Pipe as a Cross-Arm using Two continous
30 Foot Wire Loops spaced at about 18 Inches apart. This
would allow the Loop to be Manually Positioned to Null-Out
any Local Noise or to Point the Loop in the general direction
of a Target Signal Area.

I sometimes wonder whether the greater signal capture area of the ALA 100 would ultimately be a greater advantage than the nulling capability of the smaller ALA330S or 1530. This would no doubt depend on your location but, as usual, the only way to know would be to try both...not an easy thing to arrange.

Steve

They're Wellbrooks, however, these were offered with different mounting hardware, assuming that is what was throwing you off.

Did you see who stared in that FrontLine propaganda piece?
It could have been directed by Michael Moore and you wouldn't be able to
tell the difference.
Pay attention Dr. DaviD. Your ignorance is astounding.
Step away from the internet, put down the TV remote, and read a book.
It does wonders for depression, ADD, memory recall and mental stimulation.

3278. [ot] WHO Says Bird Flu Virus Mutated

Newsgroup: rec.radio.shortwave
Date: 2006-06-24 15:31:19 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129qmu5bg2uig4d@corp.supernews.com>
Source record: 80211

...
WHO and others continue to investigate a report that a Beijing man originally thought to have SARS actually died of bird flu in November 2003 _ two years before the Chinese reported any human H5N1 flu infections from the mainland.

Eight Beijing scientists detailed the case in Thursday's New England Journal of Medicine. At the last minute, the lead author without explanation asked to have the report withdrawn, but that was not possible because it was already printed. The journal has been unable to reach the scientists to see whether they want to retract the report.

WHO had been unaware of the case.

"We have asked the Ministry of Health via a formal letter (our usual protocol) to clarify the report," said Roy Wadia, a spokesman in WHO's China office. "The ministry says they are investigating this report, and will get back to us soon."

Efforts to reach the scientists for comment have been unsuccessful.

http://www.breitbart.com/news/2006/06/23/D8IE16DG0.html
_____

There are rumors that the Bird Flu was genetically engineered by the Chinese Military.
_____

New England Journal of Medicine - original article

Editor's note: We earlier reported that the Journal had received e-mail requests to withdraw the letter "Fatal Infection with Influenza A (H5N1) Virus in China." The corresponding author, Wu-Chun Cao, M.D., Ph.D., has informed us by telephone and facsimile that those e-mails were not sent by him. He has not requested withdrawal of the letter, and so it stands as published in the issue of June 22, 2006.

Fatal Infection with Influenza A (H5N1) Virus in China
...
The genomic sequence of the virus (A/Beijing/01/2003) was determined, and its eight segments were genetically related most closely to corresponding sequences of influenza A (H5N1) viruses that had been isolated from chickens in various regions of China in 2004. The segments of the polymerase basic protein 1 gene (PB) and the nonstructural gene (NS) were most closely related to those from Guangdong Province (in southeastern China), with 99 percent identity. The segments of the polymerase basic protein 2 gene (PB2) and HA gene were closest to those from Jilin Province (in northeastern

China), with 99 percent and 97 percent identity, respectively. The segments of the neuraminidase gene (NA), nucleoprotein gene (NP), and M gene were closest to those from Hubei Province (in mideastern China), with 98 percent, 98 percent, and 99 percent identity, respectively, and the polymerase acidic protein gene (PA) segment was closest to that from Japan, with 99 percent identity.

These findings suggest that influenza A/Beijing/01/2003 may be a mixed virus. Phylogenetic analyses of the HA and NA genes of the representative influenza A (H5N1) strains have revealed that the viruses isolated from patients in Thailand and Vietnam in 2004 and 2005 belong to the same clade
...
Phylogenetic analyses of the HA or NA gene indicated that the influenza A/Beijing/01/2003 strain was genetically distant from viruses previously isolated from humans, although it appears to have originated from a lineage similar to the influenza A/goose/Guangdong/1/96 (Gs/GD) lineage.

[Click all links to understand the complex web of Demon-cratic lies and deceit.]

http://www.washingtontimes.com/functions/print.php?StoryID=20060623-120347-7268r

Ronald N. Montaperto is an author of many Pro-Chinese propaganda papers, essays and books.

http://www.amazon.com/exec/obidos/search-handle-url/index=books&field-author-exact=Ronald%20N.%20Montaperto&rank=-relevance%2C%2Bavailability%2C-daterank/104-3144038-0835939

http://www.google.com/search?hl=en&q=Ronald+N.+Montaperto&btnG=Google+Search

Who is Ronald N. Montaperto?

Ask the "Democratic Leadership Council" & "PROGRESSIVE Policy Institute":

http://www.ppionline.org/ndol/ndol_ci.cfm?kaid=450004&subid=900021&contentid=1293

"THE NEW DEMOCRAT CREDO:
In keeping with our party's grand tradition, we reaffirm Jefferson's belief in individual liberty and capacity for self-government. We endorse Jackson's credo of equal opportunity for all, special privileges for none. We embrace Roosevelt's thirst for innovation and Kennedy's summons to civic duty. And we intend to carry on Clinton's insistence upon new means to achieve progressive ideals.... "

Chair of the Democratic Leadership Council's American Dream Initiative: U.S. Senator Hillary Rodham Clinton
http://www.dlc.org/ndol_ci.cfm?kaid=86&subid=85&contentid=893

Its founder and still-president is Will Marshall III, co-founder and first Policy Director of the Democratic Leadership Council. A longtime friend of Clinton and a supporter of Al Gore...

During the collapse of the Soviet Empire, Mikhail Gorbachev promoted the so-called "Third Way" as an alternative to free markets. This new way of governing would be neither capitalist nor communist, but something in between. In a similar vein, President Clinton said in his 1998 State of the Union address, "We have moved past the sterile debate between those who say government is the enemy and those who say government is the answer. My fellow Americans, we have found a Third Way." This Third Way calls for business and government to join hands as "partners." As Clinton told the Economic Club of Detroit in February 2002, "We are working with business to use technology, research and market incentives to meet national goals. Some

have called this political philosophy the Third Way." In short, Big Business would own the economy (as under capitalism), while Big Government would run it (as under socialism). Corporations would be persuaded to comply with government directives through subsidies, tax breaks, customized legislation, and other special privileges.

http://www.discoverthenetwork.com/groupProfile.asp?grpid=6901

3288. [ot] The REAL Jack Murtha

Newsgroup: rec.radio.shortwave
Date: 2006-06-24 17:22:59 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129qtfurlo8sa5a@corp.supernews.com>
Source record: 80221

The REAL Jack Murtha
...
Last June, the Los Angeles Times reported how the ranking member on the defense appropriations subcommittee has a brother, Robert Murtha, whose lobbying firm represents 10 companies that received more than $20 million from last year's defense spending bill. "Clients of the lobbying firm KSA Consulting -- whose top officials also include former congressional aide Carmen V. Scialabba, who worked for Rep. Murtha as a congressional aide for 27 years -- received a total of $20.8 million from the bill," the L.A. Times reported.

In early 2004, according to Roll Call, Mr. Murtha "reportedly leaned on U.S. Navy officials to sign a contract to transfer the Hunters Point Shipyard to the city of San Francisco." Laurence Pelosi, nephew of House Minority Leader Nancy Pelosi, at the time was an executive of the company which owned the rights to the land. The same article also reported how Mr. Murtha has been behind millions of dollars worth of earmarks in defense appropriations bills that went to companies owned by the children of fellow Pennsylvania Democrat, Rep. Paul Kanjorski. Meanwhile, the Center for Responsive Politics, a nonpartisan campaign-finance watchdog group, lists Mr. Murtha as the top recipient of defense industry dollars in the current 2006 election cycle.

As Rep. Joe Wilson, South Carolina Republican, has said, "If there is a potential pattern where Congressman Murtha has helped other Democrats secure appropriations that also benefited relatives of those members, I believe this would be something that merits further review by the ethics committee."

It's odd that the media, which has been fairly unbiased in going after corrupt politicians recently, has gone silent on Mr. Murtha's questionable actions. Or maybe it isn't. Since December, Mr. Murtha has become the darling of the antiwar crowd, and, as we've seen with other such darlings, scrutinizing their behavior is considered disrespectful. But as we're on the subject, few might recall that after the massive 1980 Abscam scandal, Mr. Murtha was named by the FBI as an "unindicted co-conspirator." [The House Ethics Committee exonerated Murtha of misconduct charges by a largely party-line vote, after which the committee's special counsel resigned in protest.]

Maybe the next time the new Jack Murtha thinks up another big idea someone can ask him about the old Jack Murtha.

I need to take a shower and shave and put on my cleanest dirty clothes (that is literally the truth about my cleanest dirty clothes) and present myself to those Oh So Pretty gals at the Discount Tobacco Market store on Clinton Blvd in Clinton,Mississippi (about five miles due West of me and buy four round cardboard cans of TOP and or Zigzag (if they have four cans over there) cigarette tobacco and then I will present myself at the Wal Mart store and buy my usual two sixpacks of beer and grub and then I will present myself to the Goodwill store to see what knd of junk I dont need.(Larry,you dont need any more junk!,that married Irish woman wayyyyy over yonder across the big pond sometimes tells me)

I phoned A1 tree service last Tuesday morning about cutting down two pecan trees in my yard that are leaning too close to my house,one is in my front yard,the other one is in my back yard.The A1 guy said he would stop by here that afternoon and give me an estimate,he never showed up.Yesterday morning I looked in the Clarion Ledger classifieds.I phoned a phone number,but it was an answering machine.(I HATE answering machines) So I hung up and I phoned another number.A guy at Advanced Contracting Tree Service & Demolition answered the phone.He came over at about 3:00 PM yesterday.He said four hundred dollars each tree.I told him,Go for it! Monday morning next week,those two trees are coming down.I dont want stormy weather to blow those two seventy feet tall tress over on my house.Advanced Contracting has a toll free number too. 1-866-640-6600 if y'all ever need some trees cut down and removed.

I have mine set up as a triple loop, so it can be rotated and thus
produce a null. The trick is you need a large spacing between the wires
else the bandwidth is reduced. About 8 to 10 inches between turns is
enough spacing to keep the roll-off out of the HF band.

3291. Re: The WellBrook Active Loop Antenna ALA 100

Thanks for the wide spacing tip on multiple turns with a ALA 100, Miso. I am currently building up a rotatable, multi-turn loop for my ALA 100. The loop is about 6-foot per side, and I was planning to use two turns with a spacing of 1.5 inches between the turns. This would be primarily for mediumwave use up to 5 MHz.

I wonder if the inter-turn capacitance problem needs more spacing at lower frequencies, or less? I had no idea you'd need 8 to 10 inches such as you are using. I may stick to a single turn if the spacing of multiple turns is a problem.

Is the CCP anything like the CCCP?

By the way, the Bushies flew Usama's family out of the country post
9/11. But hey, the Bushies and bin Ladden's have been friends for
years.
http://tvnewslies.com/html/bin_laden_ties.html
Note that when Michael Moore mentioned the bin Laden secret flights in
Farenheit 911, the Bushies said it wasn't true. It wasn't until FOIA
documents from the FAA proved these flights did happen.

Usama wanted the USAF base Prince Sultan shut down. Bush complied.
http://www.globalsecurity.org/military/facility/prince-sultan.htm
Usama wins again.

Presumably so that with competition with similar
designs the price would go down. I'm not so sure
that there's enough money to be made in the
small active loop field for someone else to try
to come along and undercut the Wellbrook,
however. It's not like Wal-Mart is going to start
stocking Wellbrook clones anytime soon.

I figure that if someone wants to try to outdo
the Wellbrook, they have ample opportunity
to do so. Until then, let Andy run his business
the way he wants to.

...
On his trip to the United States this April, China's President Hu did not get a state dinner at the White House. He did, however, have two lavish dinners held in his honor by the business community, first in Seattle before the summit, and then in Washington DC after the summit. The Chinese Foreign Ministry referred to the Washington dinner as an event hosted by "12 friendly organizations" led by the Chamber of Commerce and the U.S.-China Business Council (USCBC). As USCBC President John Frisbie remarked afterwards, "The high turnout for the dinner demonstrates the strength of support for advancing U.S.-China relations through engagement".

Strategist Sun Tzu might see this situation and the opportunities it presented differently. As he advised, when making plans against an opponent, "if his men are harmonious, split them."

Weapons of Mass Destruction - WMD:
The definition in the U.S. Code, Title 50, "War and National Defense,"
includes radiological weapons. It defines WMD as "any weapon or device that
is intended, or has the capability, to cause death or serious bodily injury
to a significant number of people through the release, dissemination, or
impact of - (A) toxic or poisonous chemicals or their precursors; (B) a
disease organism; or (C) radiation or radioactivity."
http://www4.law.cornell.edu/uscode/50/2302.html

I repeat yet again for your drug addled mind: Saddam's WMD HAVE BEEN FOUND
IN IRAQ.
What part of "have been found" does your drug-addled brain not understand,
Dr. DaviD?

Thank you Dr. David! Now I will delicately pick you apart, chew you up, and spit you out like a bad peace of sushi!

Who is Media Matters? - a Web-based, not-for-profit, 501(c)(3) "PROGRESSIVE" research and information center http://mediamatters.org/about_us/

Established in May 2004, Media Matters for America is a "web-based, not-for-profit . progressive research and information center" seeking to "systematically monitor a cross-section of print, broadcast, cable, radio, and Internet media outlets for conservative misinformation." But in addition to "news or commentary that is not accurate, reliable, or credible," the organization's concept of "misinformation" includes anything that "forwards the conservative agenda." Thus political differences of opinion are often portrayed by Media Matters as lies or worse.

Media Matters' founder and CEO is David Brock.
ADMITTED LIAR and conservative journalist turned left-wing activist

Brock is now working as a research assistant for Sidney Blumenthal, http://www.discoverthenetwork.org/individualProfile.asp?indid=954 the political operative who, as a former top advisor and confidante to President Clinton, had set about defaming the women whom Clinton had wronged. In his sympathetic book about the scandals that had embroiled the Clinton administration, The Clinton Wars, Blumenthal revealed that Brock had helped him construct a partisan narrative that painted Clinton's critics as agents of a well-organized ideological onslaught laying siege to the office of the presidency.

Brock (in the aftermath of his biography of Hillary Clinton that brought disastrous reviews) engaged in a public self-denunciation, characterizing all his past writings critical of liberal figures as a confection of lies and slanders. In Brock's present judgment, the mainstream media have fallen under the sway of conservative ideology. He believes that conservatives have moved the mainstream media "to the right and therefore they've moved American politics to the right. . I wanted to create an institution [Media Matters] to combat what they're doing."

Standing behind Brock was John Podesta, a former chief of staff in the Clinton administration and the head of the "progressive" Washington, DC think tank, the Center for American Progress. In 2004 Podesta provided Brock with office space for his fledgling enterprise. Soon after, Media Matters received over $2 million in seed donations from a roster of affluent donors including Leo Hindery Jr., a former cable magnate; Susie Tompkins Buell, a co-founder of the fashion company Esprit and a close ally of Senator Hillary Clinton; James Hormel, a San Francisco philanthropist who nearly served as ambassador to Luxembourg during the Clinton administration; Bren Simon, a Democratic activist and the wife of shopping-mall developer Mel Simon; and New York psychologist and philanthropist Gail Furman. Media Matters, which can accept tax-deductible contributions under section 501(c)(3) of the tax code, has also benefited from the patronage of Peter Lewis, chairman of PROGRESSIVE Corporation and a longtime consort of leftist financier [and hard core Socialist] George SOROS.

Media Matters has not always been forthcoming about its high-profile backers. In particular, the group has long labored to obscure any financial ties to [Socialist] George SOROS. But in March 2003, the Cybercast News Service (CNS)
http://www.cnsnews.com/ViewSpecialReports.asp?Page=%5CSpecialReports%5Carchive%5C200503%5CSPE20050303a.html
detailed the copious links between Media Matters and several Soros "affiliates"-among them [Communist] MoveOn.org,
http://www.discoverthenetwork.org/groupProfile.asp?grpid=6201
the [Socialist] Center for American Progress, and Peter Lewis. Confronted with this story, a spokesman for the organization explained that "Media Matters for America has never received funding directly from George Soros" (emphasis added), a transparent evasion.

Nor were groups cited by CNS the only connection between Media Matters and Soros. As investigative journalist Byron York has noted,
http://www.nationalreview.com/york/york200405281333.asp%20
another Soros affiliate that bankrolled Media Matters was the [PROGRESSIVE] New Democratic Network. In addition, Soros is reported
http://www.washingtonpost.com/wp-dyn/content/article/2005/08/06/AR2005080600848_pf.html to be involved in the newly formed [Socialist] Democracy Alliance,
http://www.discoverthenetwork.org/groupProfile.asp?grpid=7151
a partnership of some 80 affluent financiers who each have vowed to contribute $1 million or more in order to build up an ideological infrastructure of leftist thinks tanks and advocacy groups. News reports
http://www.hillnews.com/thehill/export/TheHill/News/Frontpage/042005/soros.html%20 list Media Matters as a main beneficiary of the Alliance's funding. By August of 2004, Media Matters' operating budget had already doubled to $4 million.

Prior to founding Media Matters, David Brock met with a number of leading Democratic Party figures, including Senator Hillary Clinton, former Senator Tom Daschle of South Dakota, and former Vice President Al Gore. Today, more than a few of the organization's roughly 30 staff members are Democratic operatives. Among these are Media Matters' chief communications strategist Dennis Yedwab, who is also the Director of Strategic Resources at Democratic Congressional Campaign Committee. Brock's personal assistant, Mandy Vlasz, is a Democratic pollster and a veteran consultant to Democratic campaigns, including the 2000 Gore/Lieberman campaign. Katie Barge, the Director of Research at Media Matters, formerly presided over opposition research for Senator John Edwards' unsuccessful 2004 presidential campaign.

In 2004 Media Matters reported that its website had elicited some 150,000 comments in its discussion forums and that over 22,000 subscribers had registered to receive its e-mail alerts. Brock has also become a regular feature on leftist radio stations like Air America.

Media Matters receives financial support from the Tides Foundation,
http://www.discoverthenetwork.org/funderProfile.asp?fndid=5184
the Arca Foundation,
http://www.discoverthenetwork.com/funderprofile.asp?fndid=5282&category=79

the Peninsula Community Foundation, and the San Francisco Foundation.

http://www.discoverthenetwork.com/groupProfile.asp?grpid=7150

Now we will throw away the rhetoric and discuss the facts.
Quotes from Dr. DaviD's original Socialist Democratic propaganda link.

[BTW - Mr. Duelfer, for his own safety, had to leave Iraq before he could investigate reports about the transfer of WMD's to Syria.]
...
"Sarin agent decays, you know, at a certain rate, as does mustard agent. What we found, both as U.N. and later when I was with the Iraq Survey Group, is that some of these rounds would have highly degraded agent, but IT IS STILL DANGEROUS. You know, it can be a local hazard [a "local hazard"? - LOL]. If an insurgent got it and wanted to create a local hazard, it could be exploded [or transported anywhere in the world]. When I was running the ISG -- the Iraq Survey Group [See links below] -- we had a couple of them that had been turned in to these IEDs, the improvised explosive devices."
...
"We have found 500, and WE NEED TO GET A HOLD OF ALL THE OTHER ONES that we think may still be in Iraq, because they do pose a threat to our front-line troops."
...
"We knew Saddam had weapons of mass destruction at one time, because he used them and killed thousands of his own people and thousands of Iranians. The Duelfer, the -- Duelfer report from the Iraqi Survey Group, they said that there were obviously weapons programs in development, including anthrax in dual-use facilities that could start producing chemical weapons within six months after sanctions were lifted. This is just one more piece in a very complicated puzzle of a very, very notorious and evil regime."
...
"I think the secretary of defense said it very, very well. These weapons continue to pose a threat to our troops. They continue to pose a threat to the people in Iraq. And perhaps, if these weapons were ever transported somewhere else, THEY COULD POSE A THREAT TO CITIZENS OF OTHER COUNTRIES. THESE MATERIALS ARE STILL VERY, VERY DEADLY. IT DOESN'T MATTER WHEN THEY WERE MANUFACTURED, if they were manufactured in '88 or whether they were manufactured in '98 or 2002. THEY WERE STILL IN IRAQ, and they still have the capability today of killing people."
...
"The Duelfer report came out, and they said, "Wow, see, there were no weapons of mass destruction." And now that we have found quantities -- but I think the other thing that is implied here, John, is that Secretary Rumsfeld has also said there are many, many more WMD in Iraq. We don't know how many more there are. IT IS NOT A WMD-FREE ZONE."

Have you considered taking a high school remedial reading comprehension course Dr. DaviD?

Continuing

...
Somehow, when reporting that the Duelfer Report "proved" that the "case for war" was bogus, the mainstream media missed the part about the "senior researchers" telling ISG that their "secret lab" had just been looted of all their good smallpox.

But it's not just Duelfer's own evidence that flies in the face of his conclusions. He ignores completely a major but unreported find, first revealed on Cybercast News Service last year. American soldiers literally found some of Saddam's purchase orders for mustard gas and "malignant pustule," a known code-phrase for anthrax (according to UNSCOM) in a government building. What is interesting are the amounts of the WMD and the dates: five kilograms of mustard gas on August 21, 2000, and three ampules of anthrax on September 6th, 2000. The orders came with protective equipment.

I spoke at length with the reporter who broke the story, Scott Wheeler. I asked him about his authentication efforts with known Iraq experts. "I can't find anyone who won't authenticate them," he said, with an air of regret. Retired CIA official Bruce Tefft described the documents to Wheeler as "accurate." I personally asked former Clinton campaign advisor and Iraq expert Dr. Laurie Mylroie what her confidence level in the (related) terrorist-ties documents was. She emailed back "One hundred percent." Dr. Walid Phares, a renowned Lebanese-American expert on the Middle East, told Wheeler that the documents were a "watershed" and "big" in their implications. Scott Wheeler got a high-level former UNSCOM inspector to authenticate the documents, too. The UNSCOM veteran told Wheeler that he had "zeroed in on the signatures on the documents and 'the names of some of the people who sign off on these things..[The Iraqis] were meticulous record keepers.'"
...
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=18497
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=21489
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=15467

Now, what was your point Dr. DaviD?

If Saddam's friends had prevailed, the inspections would have played into his hands. Having mothballed his WMD program, he would have received the U.N.'s clean bill of health and the sanctions would have been lifted.

In short order, he would have restarted his chemical, biological and nuclear programs, with plenty of oil money to buy materials and produce quick results. His contacts with al-Qaida might then have firmed up into an operational alliance. And the U.S. would be begging fruitlessly for global action, as it now does with Iran.

The situation in Iraq today, as President Bush likes to say, is "tough." But it's not the strategic nightmare that it would have been if Saddam had been allowed to stay.

Sen. John Warner asked Duelfer if he thought the world is better off with Saddam out of power.

"I'm an analyst, and I realize I'm in a political world right now," Duelfer began.

But Warner pressed him further, and Duelfer went on: "But I have to agree. Analytically, the world is better off."

His report, in its scrupulously impartial way, makes just that point.

You seem to be wrapped up a lot in character assassination and not so
much in facts.

The degraded artillery shells containing admittedly toxic residues are
not the fabled WMD, which the government has already admitted do not
exist and which were just an excuse that they thought you scredy cats
would fall for anyway.

You really should reevaluate your position.

3326. SX-25: Have I missed some trick on this one?

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 03:05:20 UTC
From: Brenda Ann <brendad@shinbiro.com>
Message-ID: <e7kue1sca1@news2.kornet.net>
Source record: 80106

I have finished recapping, retubing and re-resistoring my SX-25. It's hot as a firecracker on bands 1, 2, 3, 3a, but deaf as a post on band 4 (18-42MHz). I've done a standard alignment on it. It does receive strong stations at the bottom end of band 4, but has almost no noise floor. It does have a noice floor around 38-40MHz, then drops off again above 40.

Anyone out there with any critiques/suggestions on what I might do to bring this band up with the rest of them? It should by all rights be as good as new.

TIA

Brenda Ann

WOW!!! This is a classic piece of propaganda work. This story presents "misperception" as if their position and only their position is fact. Sound familiar? How about the Koran, the Bible, Mao's little Red book..
If you don't believe or know of "their" propaganda then you hold a "misperception".
There is only one correct perception and that is the belief in Left-wing propaganda as fact - Whoa.
No matter if the facts are unknown, unclear or unavailable. Their "facts" are all that matters.

History is being rewritten before your very eyes, folks - Wake up and pay attention!

Who is AlterNet?

77 Federal Street
San Francisco, CA 94107

Just another tax evading "Progressive" Socialist entity.

from http://www.alternet.org/about/

"The Challenge We Address"

"The right-wing media machine: Virtually everyone who has a stake in our political future agrees that when compared to the radical conservatives and the religious fundamentalists, the "PROGRESSIVE" sector lacks media capacity. The scope of conservative media is vast, including Fox News, Sinclair, major right-wing talk radio market penetration, many newspapers, a fast-growing religious broadcasting system, and sophisticated use of the Internet and new technologies. The ability of the right-wing media apparatus

to dominate public discourse is at the expense of liberal and progressive values and represents a fundamental transformation in American politics. This is what we are fighting against."

"The negative impact of right-wing media: Over the past two decades conservative media has had a huge impact, and the results are disconcerting. First, most conservative media uses an ideological propaganda model that results in a more ignorant audience. One recent study showed that 80% of Fox viewers got the facts all wrong about the war in Iraq. Not only did they believe that Saddam Hussein had a chemical arsenal, they thought U.S. troops had actually discovered it and they believed the 9/11 Commission had beyond a doubt linked Hussein with al-Qaeda. Only 23% of the NPR/PBS audience held these misconceptions, and the percentage was even lower among those who get their news from the Internet."

"Building the "PROGRESSIVE" echo chamber:...""

More like a propaganda brainwashing chamber - bwaHAHAHA!

Profiles of a few AlterNet columnists http://www.alternet.org/columnists/

Norman Solomon:

Co-authored a 1961 book defending Fidel Castro's Communist revolution in Cuba.
Was given the diaries of Che Guevara to publish by the Cuban dictatorship itself.
Scheer and Tom Hayden co-founded Berkeley's Red Family - a commune of urban guerrillas, which trained its members in the use of explosives and firearms and called for the creation of "liberated zones" in the United States - a liberation to be accomplished by force of arms. Dedicated to Maoist principles, Red Family leaders adorned the walls of their headquarters with portraits of such Communist heroes as Ho Chi Minh and North Korean dictator Kim Il Sung, and Black Panther thug Huey Newton.
Chief defender of accused atomic spy Wen Ho Lee
Defended President Clinton's attacks on Iraq, but attributes George Bush's 2003 war on Iraq to "imperialist greed" . . . "Hussein is not the aggressor - we [Americans] are."

Much more -
http://www.discoverthenetwork.com/individualProfile.asp?indid=938

Arianna Huffington:

Her mother Elli was active in the Communist-led Greek resistance movement during World War II. Her journalist father Constantine edited the resistance newspaper.
One of her college tutors was the Maoist economist Joan Robinson.

In 2000 Arianna Huffington was deeply involved in staging the "Shadow Conventions" designed as media propaganda shows to undermine Republicans and nudge Democrats farther to the left. These mock "conventions" were funded by the "Shadow Government" organizations funded by George Soros and other

wealthy leftists.

Must read http://www.discoverthenetwork.com/individualProfile.asp?indid=2010

Just more pieces of the Left-wing/Liberal/"Progressive"/Socialist/Communist propaganda network.

I own one of these little Roelof mini-whips
A nice little performer and highly portable.
As the article states, it must be mounted HIGH outside and well away from
any noise source.
It's a bit prone to noise pickup compared to my DX 1 Pro though.

I think it's a bit more sophisticated than the Tiny-Tenna

Very likely it is. My Halli's have all been soft on the upper end.
This set was made in the early 40's. Not likely to have a lot of
performance on the high band, as there wasn't a lot of activity up
there, so there hadn't been as much development on consumer grade
general coverage receivers by that time.

Even FM receivers of the 48 Mhz era weren't stellar performers.

Look at the tubes used on this set. None were exactly wideband
performers. And considering that lead lengths under the panel were
longerer with respect to wavelength than they are on dedicated VHF
receivers, and there's a lot of distributed capacitance under the
chassis, losses on the higher frequencies could be huge, regardless of
component quality and alignment precision.

Source record: 80138

GA,

You may wish to consider the Size and Spacing parameters
of a T2FD Antenna as a guide in determining whether as the
"Design" Frequency effects the Spacing between the Turns
as the Frequency gets Higher or Lower

* The Formulas for Calculating T2FD Dimensions are as follows.
http://www.hard-core-dx.com/nordicdx/antenna/wire/t2design.html

Generally the Distance between the Turns {Spacing} will
get Wider as the Frequency gets lower. - But you already
knew that :o)

T2FD -- The Forgotten Antenna -by- Guy Atkins
http://www.hard-core-dx.com/nordicdx/antenna/wire/t2fd.html

I would think that starting with the Sixty Feet Single Turn
WellBrook ALA100 Loop Antenna that the progression form
One to Two Turns to Three Turns . . . would require increased
spacing for each added turn to maintain a certain band width.

One-Turn with Sixty Feet Perimeter with 15 Feet
per Side of a Square/Diamond.
- - - Resulting in a Very Thin Loop Antenna that is
about 22-Feet Top-to-Bottom and Side-to-Side.

Two-Turns about Four Inch Spacing with Thirty Feet Perimeter
with 7.5 Feet per Side of a Square/Diamond.
- - - Resulting in a Three Inch Thick Loop Antenna that is
about 11-Feet Top-to-Bottom and Side-to-Side.

Three-Turns about Six Inch Spacing with Twenty Feet
Perimeter with 5 Feet per Side of a Square/Diamond.
- - - Resulting in an 12-Inch Thick Loop Antenna that is
about Seven Feet Top-to-Bottom and Side-to-Side.

Four-Turns about Eight Inch Spacing with Fifteen Feet
Perimeter with 3.75 Feet per Side of a Square/Diamond.
- - - Resulting in an 24-Inch Thick Loop Antenna that is
about 6 Feet Top-to-Bottom and Side-to-Side.

The smaller more maneuverable Loop Antenna becomes
increasingly Thinker in order to maintain the same
Band-Width for the Loop.

at least that is the way i envision them -iane ~ RHF

3356. PA0RDT-Mini-Whip {Active} Antenna - Inch-per-Inch - It Works !

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 08:34:01 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151224441.619637.38110@c74g2000cwc.googlegroups.com>
Source record: 80139

JP,

I too own one of the PA0RDT-Mini-Whip {Active} Antennas
and have used one of the Tiny-Tenna {Active} Antennas
in the past with a Drake SW1 Radio.

The PA0RDT is simply a better Antenna inch-per-inch
then the Tiny-Tenna and as good as a few other Larger
and Higher Priced "Active" Whip Antennas on the Market.
http://www.beaconworld.org.uk/beaconrx.htm

For an Apartment Deweller or Condo Owner the
PA0RDT-Mini-Whip {Active} Antenna may be the
Answer to the Question - OK ? What can I use for
a Shortwave Antenna ? - That no one will see and
will allow me to hear something . . .

As you point out the trick with the PA0RDT-Mini-Whip
{Active} Antenna is to get it out-an-away form the House
and up-and-in-the-air away from sources of Noise.

Grounding is via the Coax Cable and good Grounding is
important in Antenna performance and Noise Reduction.
A Gound Block in the Coax Cable feed-in-line may be
required at the base of the Antenna {Vertical-Up-Leg}
to get the most out of this Mini-Whip Antenna.

I first read about the PA0RDT-Mini-Whip {Active} Antenna
in Guy Atkins -Grayland DXpedition Loggings - April 9-10,
& Antenna Report
http://groups.google.com/group/rec.radio.shortwave/msg/ac009fec44d499c8
Guy wrote - "I used two newly-acquired antennas which
complement each other well--the Wellbrook ALA 100
and the tiny PA0RDT "Mini-Whip" (about the height of
a pencil). The antenna is powered through the coax
(like the ALA 100) using a small interface box mounted
near the receiver. The antenna and the well-built interface
box are sold by Dutch NDB enthusiast Roelof Bakker,
PA0RDT, for just 43 Euros (shipping to USA included).
I think Roelof may have tweaked the antenna element
to produce better results above longwave, based on
some other information I've heard. By the way, this
antenna uses an overload-resistant amplifier designed
with some advice from well-known Oregon NDB'er
Steve Ratzlaff."

RHF
You have a very good point about it's use for condo dweller's as a "stealth" antenna.
I have a friend who lives in a condo and they absolutely refused to allow him any type of antenna, but he has sneaked up a PA0RDT-Mini-Whip mounted on a very thin fishing rod - nobody seems to have noticed and nobody has complained...!!
He is a LF NDB DXer and gets the most amazing results from his Roelof mini-whip.
At $43 it's a snip - compared with my DX 1 Pro which costs 15 times more, it's quite impressive.

The head part of the antenna that contains the amplifier looks different
on some of the antennas. Some some look like the Wellbrook and some
don't.

I was listening to Radio New Zealand this morning on 7145, at 1058 they indicated that transmission was closing on 7145 and to retune to 9870.

They never did switch to 9870 and transmission continued on 7145 with news at 1100.

I was checking 7145 yesterday for Laos, but it was of course blocked by RNZI. Anyone know if Laos is indeed still using 7145? If so, RNZI must be causing them a bit of a problem.

This was posted to the Eaton yahoo list by Ron Ingram.

BH

Having justed attended Europes biggest Ham Fest in Friedrichshafen, one of my main obectives while there was to visit the stand of the German distributor for Eton / Lextronics - "Laauser & Vohl".

the E1 is now available in Europe and is now shipping, could be boght at the fair.

Two pieces of news:

1. There is an European (non-USA) version of the E1, in that it does not gave the XM Antenne socket on the right hand side and does not have any XM circuitary inside. Why does the European version have less inside but cots 50% more???

2. Taling with the German distributor rep, he confirmed that Eton are in the process of developing a DRM module that will fit into the right hand of the radio (space vacated by XM). No price or delivery dates are available.

I will post a photo of the European E1 (from German Catalogue) in the photo section of this group.

Ron

I'll have to go back and read Guy's post. I think I was traveling with limited access to email when it appeared.

Here's another interesting account of a DXpedition featuring this tiny whip:

http://wireless.org.uk/loopy.htm

He doesn't discuss the whip in much detail. I provide the link above primarily because it's an interesting read. But get this. The author sets up a 350 ft. circumference loop and and a 120 ft. long inverted L at a height of 65 ft. Big antennas by most people's standards. Then, toward the end, he remarks:

"I also took the PA0RDT mini-whip with me and on a 20ft pole it was easily as sensitive as the big aerials, slightly less noisy than the Marconi but not as quiet as the loop."

All I can say is, there must be some special amplifier in this thing because there's very little there to gather signal.

Got him here too Steve. Still some static around here from the storms. DX
was very good last night with solar levels down.

Yea I think a lot of factors play a roll in those receivers having bad
performance on the higher bands. On the coil thing I was talking several
years ago with a few guys including Chuck D and it was brought up that the
coils over time could absorb moisture under the wax coating and deminish
there performance. I always wounderd if this was true? We all agreed this
might be possible but I would like to someday pull out the old Q meter and
do a test.

I listened between 0300-0310 maybe and checked back at 0315 and they were
gone. @0300 the D.Who show was anounced but maybe MAC was playing a DrWho
show?

Nothing wrong with band 4; this lack of performance is typical for
receivers of that era at that frequency.

The typical "fix" is an external Ameco (or modern day equivalent)
pre-amplifier.

Well, if *you* say so, Buckwheat...

However, I've not seen anything about this in the conservative Detroit News nor the ultra-conservative Wall Street Journal. I haven't seen any government press conferences saying "We told you so".

With 71% of the population not being happy with the war in Iraq, one would think the government *would* call a press conference and jump at an opportunity to "prove" their justification for the war. So far, the -official- government position *still* is that there are no WMDs. The government's silence on your "find" is deafening.

When do you think they might change that position and share this startling news flash with the rest of us????

Impeached Clintoon's Khobar Towers Shame

From April 1995 through the time of the Khobar Towers bombing in June 1996, the analytic community [CIA] published more than 100 products on the topic of terrorism on the Arabian peninsula," the report stated, including specific intelligence warnings that the Khobar Towers complex was under surveillance by Iranian intelligence agents and local surrogates.

The intelligence reports contained specific warnings of ongoing Iranian and radical Islamic fundamentalist groups' attempts to target American servicemen in the Eastern province of Saudi Arabia for terrorist acts
...
In April 1996, Schwalier met with the CIA station chief in Riyadh...

The CIA man said the U.S. suspected the explosives were being transferred to Saudi Arabia, or were passing through Saudi Arabia, and that a Saudi dissident financier named Osama Bin Laden was likely involved. But he made no mention of Iran or of any potential threat to Dhahran.
...
Contrary to what the intelligence community may have suggested, I was never advised of a specific terrorist threat to Khobar Towers

Date: 2006-06-25 16:36:02 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129tf3in8j14a0@corp.supernews.com>
Source record: 80192

"One way or the other, we are determined to deny Iraq the capacity to develop weapons of mass destruction and the missiles to deliver them. That is our bottom line." - President Clinton, Feb. 4, 1998

"If Saddam rejects peace and we have to use force, our purpose is clear. We want to seriously diminish the threat posed by Iraq's weapons of mass destruction program." - President Bill Clinton, Feb. 17, 1998

"We must stop Saddam from ever again jeopardizing the stability and security of his neighbors with weapons of mass destruction." - Madeline Albright, Feb 1, 1998

"He will use those weapons of mass destruction again, as he has ten times since 1983."
- Sandy Berger, Clinton National Security Adviser, Feb, 18, 1998

"[W]e urge you, after consulting with Congress, and consistent with the U.S. Constitution and laws, to take necessary actions (including, if appropriate, air and missile strikes on suspect Iraqi sites) to respond effectively to the threat posed by Iraq's refusal to end its weapons of mass destruction programs."
Letter to President Clinton. - (D) Senators Carl Levin, Tom Daschle, John Kerry, others, Oct. 9, 1998

"Saddam Hussein has been engaged in the development of weapons of mass destruction technology which is a threat to countries in the region and he has made a mockery of the weapons inspection process."
- Rep. Nancy Pelosi (D, CA) , Dec. 16, 1998

"Hussein has chosen to spend his money on building weapons of mass destruction and palaces for his cronies."
- Madeline Albright, Clinton Secretary of State, Nov. 10, 1999

"We begin with the common belief that Saddam Hussein is a tyrant and a threat to the peace and stability of the region. He has ignored the mandate of the United Nations and is building weapons of mass destruction and the means of delivering them."
- Sen. Carl Levin (D, MI) , Sept. 19, 2002

"We know that he has stored secret supplies of biological and chemical weapons throughout his country."
- Al Gore, Sept. 23, 2002

"Iraq's search for weapons of mass destruction has proven impossible to deter and we should assume that it will continue for as long as Saddam is in power." - Al Gore, Sept. 23, 2002

"We have known for many years that Saddam Hussein is seeking and developing weapons of mass destruction."
- Sen. Ted Kennedy (D, MA) , Sept. 27, 2002

"The last UN weapons inspectors left Iraq in October of 1998. We are confident that Saddam Hussein retains some stockpiles of chemical and biological weapons, and that he has since embarked on a crash course to build up his chemical and biological warfare capabilities. Intelligence reports indicate that he is seeking nuclear weapons."
- Sen. Robert Byrd (D, WV) , Oct. 3, 2002

"I will be voting to give the President of the United States the authority to use force - if necessary - to disarm Saddam Hussein because I believe that a deadly arsenal of weapons of mass destruction in his hands is a real and grave threat to our security." - Sen. John F. Kerry (D, MA) , Oct. 9, 2002

"There is unmistakable evidence that Saddam Hussein is working aggressively to develop nuclear weapons and will likely have nuclear weapons within the next five years . We also should remember we have always underestimated the progress Saddam has made in development of weapons of mass destruction." - Sen. Jay Rockefeller (D, WV) , Oct 10, 2002

"In the four years since the inspectors left, intelligence reports show that Saddam Hussein has worked to rebuild his chemical and biological weapons stock, his missile delivery capability, and his nuclear program. He has also given aid, comfort, and sanctuary to terrorists, including al Qaeda members . It is clear, however, that if left unchecked, Saddam Hussein will continue to increase his capacity to wage biological and chemical warfare, and will keep trying to develop nuclear weapons."
- Sen. Hillary Clinton (D, NY) , Oct 10, 2002

"We are in possession of what I think to be compelling evidence that Saddam Hussein has, and has had for a number of years, a developing capacity for the production and storage of weapons of mass destruction."
- Sen. Bob Graham (D, FL) , Dec. 8, 2002

"Without question, we need to disarm Saddam Hussein. He is a brutal, murderous dictator, leading an oppressive regime . He presents a particularly grievous threat because he is so consistently prone to miscalculation . And now he is miscalculating America's response to his continued deceit and his consistent grasp for weapons of mass destruction . So the threat of Saddam Hussein with weapons of mass destruction is real."
- Sen. John F. Kerry (D, MA) , Jan. 23. 2003

3410. [ot] The Cold War: It's back. - Dr. DaviD's Lies!

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 16:39:41 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129tfa9qcgavo1c@corp.supernews.com>
Source record: 80194

The Cold War: It's back.

Putin's Russia is making trouble on Iran, obstructing U.S. efforts to get the Mullahs to stop their nuclear ambitions. And it is no surprise, seeing that not only did Russia obstruct U.S. efforts in Iraq, but evidence indicates that the Russian ambassador to Iraq passed on U.S. war plans to Saddam in the early days of the American invasion. More troublesome still, it appears that Russian mischief is behind the missing Iraqi WMDs.
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=22645
...
...communism has not been eradicated from the face of the Earth. Its remains persist in several major forms:

- as power structures propped up or created by the Soviet Union in its extended empire in places such as Palestine, Iraq, Angola, etc.;

- as the world terrorist network created mainly by the KGB in its fight against democracy;

- and finally, as an ideology not completely disavowed which still spoils cultural academic and political life in our country and the entire Western world.
...
The KGB successor, rechristened FSB, still has the right to electronically monitor the population, control political groups, search homes and businesses, infiltrate the federal government, create its own front enterprises, investigate cases, and run its own prison system. The Soviet Union had one KGB officer for every 428 citizens. Putin's Russia has one FSB-ist for every 297 citizens.
...
much more http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=23038

Meanwhile, in the shadows, Beijing to strengthen energy ties with Tehran

...Iranian President Mahmoud Ahmadinejad's three-day visit to China was a "turning point" in the expansion of Iran's relations with China...

http://intelligence-summit.blogspot.com/2006/06/beijing-to-strengthen-energy-ties-with.html

3411. Iraq, WMDs and Troubling Revelations - Dr. DaviD's Lies!

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 16:42:31 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <129tffkiph1u073@corp.supernews.com>
Source record: 80195

Saddam Hussein's former southern regional commander, Gen. Al-Tikriti, gave the first videotaped testimony confirming that Iraq had WMDs up to the American invasion in 2003 and that Russia helped remove them prior to the war. His testimony confirms numerous other sources that have pointed to Russia's secret alliance with Iraq and the co-ordinated moving of WMDs before the American liberation.
...
...numerous UK and Ukranian sources track Russian Spetznatz units down into Iraq. It was these Russian special forces who moved the WMD to Syria.

All the pieces fit, the Russians threw sand in our eyes. They moved the WMD across the border while we went digging holes in the desert.
...
There is little doubt Saddam had WMDs and that the Russians were involved in hiding them and possibly also removing them.
...
These revelations destroy the Left's main arguments and vindicate the Bush administration.
...
http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=22645
also http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=21489

A couple of years ago Russia test-launched a missile system that allegedly could manoeuvre in mid-flight, allowing it to dodge defenses. "The test carried out yesterday confirmed that we can build weapons which will render any anti-missile system defenseless," Putin announced. Now he is using these facilities to arm Islamic terrorists"through the government of Iran"with nuclear power and the Shahab-4 missile.

I have natural big boobs,natural big boobs.I did some searches last week for,Natural Bra.I saw that they aren't being sold anymore.(I used to see them Natural Bra commercials on tv) I want to buy an A Cup and put the A Cup on top of a B Cup and put a B Cup on top of a C Cup and slap that mess on top of my naturl big ''Cups" and go out in public like that.Since I got ''short changed'' on one ''end''.I want to make up for it on the ''other end''.Yesterday,at the Goodwill store,I was trying to put on a womans velvet dress on myself.They all know I was only joking around.

...opponents of the war have "embraced arguments or 'facts' that frequently
do not stand up to scrutiny." Given this, it is not surprising that the
mainstream media and its anti-war cohorts in the government have thus far
attempted to ignore the NGIC's findings. If forced to confront the report,
moreover, expect that crowd to simply "move the goalposts" by claiming these
are not the weapons the United States went to war to eliminate.

You're a hypocrite. You merely want to preserve the status quo on
behalf of the assholes who got us here and you do yeoman's work towing
their line, which is every bit as insidious as your mythical
Communists.

Our Revolution was against people like Bush and Cheney, an elite
ruling class who think they're better than us common folk. Tyrants
and despots have been with us for 10,000 years. This delicate
experiment is barely 220 years old and in bad need of fresh blood.

I fired off a message to Andy Ikin asking him whether the ALA 100 would have a real edge over the 330S on SW, given its larger aperture. He replied that he has an ALA 100 attached to a 25m wire Delta loop. This antenna at HF gives approx. 17-20dB higher gain than the ALA330S and the ALA1530. That's pretty impressive.

3432. number stations/pirate stations heard near Binghamton NY

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 17:50:48 UTC
From: "davidl5100@hotmail.com" <davidl5100@hotmail.com>

Source record: 80264

Hi,

I just started short-wave listening and I have a couple of beginner questions.

I live near Binghamton NY, and I'd like to listen to numbers stations and pirate stations.

My questions are:

1. Are there websites with up-to-date schedules for numbers stations and/or pirate stations?
2. Are there any stations that can be heard from the Binghamton NY area?

I know both numbers and pirate stations are a little secretive, so it seems unlikely that either of these would have known schedules.

I found quite a few web pages with broken links to pirate radio station pages, and I found a few that were still (apparently) operative, but they were broadcasting from California on frequencies that seem likely to be overpowered by closer stations.

I appreciate any help you can give me.

Thanks.

David

I have several pirates I've gotten to know over the years that send me
schedules or times they will TX. The best place for pirate stuff is
http://www.frn.net/ A lot of N american pirates hang out there and anything
heard is constantly being posted there. Theres lots of good sites for
Numbers info. Just google.

Here's a schedule of a popular numbers station in the UK called
Lincolnshire Poacher, after the tune played at the beginning of each
broadcast: I have often picked it up at my W. Central Fla. location
prior to 1200 UTC:

http://www.simonmason.karoo.net/page14.html

Also, there is a recent report on this newsgroup about a pirate station
on 6950 a.m. from 3:00 to 3:15 UTC this morning. 6925 and 6875 are also
popular freq's for pirate stations.

Happy monitoring,

Greg

i think restricting to your search to clandestine communications might work.
there are whole books written on "secret" things.

> > 2. Are there any stations that can be heard from the Binghamton NY
> > area?

certainly. i've heard numbers stations in Tennessee and Japan.

> > I know both numbers and pirate stations are a little secretive, so it
> > seems unlikely that either of these would have known schedules.

they operate in certain bands. theoretically you could record a big chunk
of each band, run it through spectral analysis software, and find stations.
the numbers stations are doing stuff like "1 2 3 4", which is highly
repetitive.

> > I found quite a few web pages with broken links to pirate radio station

superstation yacht pirates are mostly gone? there should be some landbased
stations.

Spookish Gravity

you'd be surprised, as pirates want an audience, and numbers signals need to be found by agents. these are easy to find compared to covert channels e.g. spread spectrum.

Dear Cuhulin,

No, I don't believe you could. So far, NO ONE has been able to even
match the performance of the Wellbrook loops.

Have you tried? If you do, and you actually succeed, please post a
parts list and directions for an antenna which would cost all of us
"next to nothing." I should appreciate seeing them.

Best,

Joe

A loop the size of Ikin's would almost certainly have to be mounted outdoors. However, some folks have wire loops in the attic...probably not as large as Andy Ikin's loop, but certainly larger than the 1 meter diameter loop you get with the 1530/330S. The ALA 100 might be just the ticket for some of these folks, especially since it is, I've heard several people say, even more resistant to noise pickup than the 1530/330S. So IF the space is available, I can see how, at least for some, the greater aperture of the ALA 100 would prove a greater advantage than the nulling capabilities of the smaller loops. The ALA 100 is also significantly less expensive than its smaller brethren.

I also like the fact that the ALA offers you the freedom to experment with different loop sizes and configurations. This sort of "elbow room" always appeals to me. It's fun to experiment.

Steve,

The latest design of the PA0RDT-Mini-Whip {Active} Antenna
uses a 2"x1" PC Board that has Half etched for the Active
Antenna Ciricuit and the other Half is un-etched Copper
Sheet (1"x1") which is the Antenna Element.

The PC Board is enclosed in short section of PVC Pipe
and Capped. One of the End-Caps has a BNC Connector
to connect the Coax Cable feed-in-line.

Inch-per-Inch it is an Awesome 'little' Antenna that
produces Big Results for it's relative size - IMHO

FYI - PA0RDT-Mini-Whip {Active} Antenna

[quoted text skipped]

They are a bunch of pathetic creeps that are all over the rec.radio
groups. Several are from the old Deja groups and post on other flame
type boards.

I'll never post anything on these groups using my name or normal e-mail
address again.

Harold..........maybe I am, maybe I'm not.
--(end quote two)--

Notice that "Harold" above is in the same Long Beach, MS net block,
and that "Harold" says he'll never use his real name (Les Locklear) or
address again. Someone had been impersonating Les, and "Harold"
immediately showed up to say he wouldn't post as himself again.

There are other problems with "Harold's" denial: "Harold" and Les
have the same identical news reader, right down to the minor version
numbers (and by the way, that version of Firefox has a security hole
in it, Les).

BOTTOM LINE:

Same news reader, same net block for both "Harold" and Locklear,
coupled with the fact that Google's records show that "Harold" never
appeared on the net before May 23rd.

If it walks like a duck, has feathers like a duck and quacks like a
duck, why then it must be Les Locklear!

My detective kit seems to be in perfect working order, Les.

Just remember, Les: A TimeLORD always wins in the end. ALWAYS!

Old Yeller!

You couldn't get something simple as the WMD non-issue right! What makes
you think that you can get anything else correct????

A little something for you about Thomas Paine:
http://www.ushistory.org/paine/

If Paine were alive today he'd butting heads against many numbskull Repugs.

You and many Repugs are going to be doing some serious skulking in the shadows after the mid-term elections.

Time to put down the rabid mutt!

Guys like that are great at making predictions of earthquakes to come,
but won't or can't pin it down to a date or a range of dates. Even I
can make a prediction like that. Lacking a date the information is as
useful as a prediction that says New Orleans will suffer a category 5
hurricane hit but doesn't pin down the date.

SeeingEyeDogg wrote:

> How about you do your own research or send me a check?

Well, I did my own research and I'm still waiting for the government
press conference telling us they were right after all and I'm still
waiting for the bold 100 point headlines saying "War Justified". Haven't
seen either one yet.

And send you a check? This is the second or third time you've asked me
to send you money. Are you destitute? If so, maybe we could pass the hat
here on the NG...

Hey, wait a minute...maybe we could get the government to send you the
money, you could prove the government's case for them and we could
finally get that press conference and those headlines.

RHF, have you ever use one of the LF Engineering H800 active whips? If
so, how would you say the H800 compares to the PA0RDT-Mini-Whip?

Dale [W4OP],

-Q- And this differs from a standard fan dipole
and 1:1 balun because.....
-R- It Does Not.

The post was generated because of the term "Symmetric
{Symmertic} Transformer" vice 1:1 Matching Transformer
and this is most likely due to the fact that the eBay Seller
is listed as being in the Ukraine.

>From the Pictures of the "Symmetric Transformer" and
the Diagram of the Dipole Antenna using the "Symmetric
Transformer" - I could not tell if this was a 1:1 or more
likely a 4:1 Matching Transformer.

It uses Three Wires Wrapped together around the
Ferrite Core and could be Two {Paired} as One
Double Winding and One used as a single Winding.
which would make it a 4:1 Matching Transformer.

However now upon reexamination, {a second look} the
way that this Symmetric Transformer is wound in series
the Center Winding is common to both End Wings and
thus all things being equal between the Winds would
make it a 1:1 Matching Transformer.

symmetrically speaking that is . . . iane ~ RHF

Stridsberg Engineering MC102 receiver multicoupler

The advantage over splitting the cable is that one receiver doesn't see
the other one.

They have an amplified version as well.

BNC connectors, one input and two outputs. Or, if you want, in this
unpowered version, one output and two inputs.

Steve,

Yes - I have used {still have one} the LF Engineering H-800
Skymatch Active Antenna {more of a 26" PVC Tube then
a Whip} -but- that was long ago.
http://www.grove-ent.com/ANT15.html

I will try an bring the H800 from Oakland up to Twain Harte
and do a side-by-side of the two out of the deck to really
get an idea of just how they perform.

I also have a few other Active {Whip} Antennas
to try out now that the weather is better :
Dressler ARA60 (Used)
http://www.universal-radio.com/catalog/sw_ant/4061.html
LF Enginnerring H800 (Used)
http://www.grove-ent.com/ANT15.html
Sony AN-1 (Used)
http://www.universal-radio.com/catalog/sw_ant/2206.html
NASA ??? (Used)
http://www.yachtbits.com/nasa/ssb_active_antenna.php
RF Systems DX-10 Professional
http://www.universal-radio.com/catalog/sw_ant/2868.html

Just need to put up two pieces of 21-Foot Top-Rail
about 20 Feet apart out about 40 Feet off the deck
and sit down to enjoy some Radio Listening.
Probably need to run a simple 50 Foot Low Noise
Random Wire Antenna to use as a practical
benchmark for relative Radio Signal Readings.
Most likely use a Grundig Satellit 800 Radio
for the tests.

so little time and so many antennas :o) ~ RHF

3496. The Black Hole Antenna - A Unique Broad-Band ULF-ELF-Magnetic Antenna

Newsgroup: rec.radio.shortwave
Date: 2006-06-25 23:45:30 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151279130.659574.27070@m73g2000cwd.googlegroups.com>
Source record: 80379

The Black Hole Antenna
http://www.unusualresearch.com/Sutton/sutton.htm
"A Broadband Active Antenna for ELF Magnetic Fields"
-by- John F. Sutton and G. Craig Spaniol"
in Physics Essays March 1993, Vol 6, #1, 1993.
http://www.unusualresearch.com/Sutton/sutton.htm
Abstract: "A unique broadband ULF-ELF-magnetic antenna is described.
Active circuitry is employed to introduce a negative impedance that
combines with the wire resistance, the distributed winding capacitance,
and the inductance of a physically small search coil to produce an
antenna with a very small impedance. The result is increased search
coil current and a enhanced dipole-plane wave field interaction, which
greatly increases the effective area of the antenna, independent of
frequency - a 'black hole' antenna."

Please, someone share with the group why a shielded loop is less prone to noise p/u than other antennas- other than the fact that if done properly, it should have 2 deep nulls and thus be able to be rotated to place a single noise source in one of the nulls.

I have a homebrew 7' shielded loop- with a broadband amp just like the Wellbrook. It is no less noisy than my classic L-C loop other than the fact that the 2 nulls appear to be a tad deeper.

To dispell the black magic:

Of all the techie things I could relate to, here's something I never thought would come up: I WAS a janitor at NSA. I was stationed there 1970-1972 as a Sailor and during my last 8 months, I worked as a janitor after hours to make enough money for the down payment on my first house. All the janitors needed to be cleared, which made us military folks shoo-ins for these jobs.

The pay was OK for your average part time job. Nothing special, but I was happy for the $1800 I banked in less than a year. (5% of 33,000 used to get a family into a house. Not today.)

My first wife still has that house and it's worth $700,000.

Most modern receivers (e.g., Degen 1103, Sony 7600GR) would have the
same capability - remember from RadioIntel.com:

Conclusions
Many enthusiasts are waiting to hear whether or not The E1 "blows away"
the Satellit 800, or vice versa, or if it diminishes the "legend"
status of the Sony 2010. Some early owners have already made such
claims. The reality is a bit more mundane than that. The fact is that
these are all excellent radios, so the possibility that one could "blow
the other one away" is unlikely. Indeed, modern radios have so far
pushed the envelope of what is possible that only incremental
improvements are likely. Such is the case here. So if you're looking
for me to say the E1 trashes all the competition you are going to be
disappointed.

Ya Hooooo !!! Sucker !!! Your E1 doesn't even receive/process IBOC, or
DRM !!! So,
what did you get for $500 - a plain vanilla receiver !!! Ya Hooooo !!!

Just like RHF - remember to, "think positive about your Eaton Shit E1" !

I'm prepared to believe that it's not the loop design per se that
explains the quietness of the Wellbrooks. I imagine the amplifiers
employed are very quiet, so maybe that's the key? I don't know and I
won't pretend to have the answer.

Interestingly, earlier today I read that the designer of the
PA0RDT-Mini-Whip designed it PRECISELY because he was not able to make
an active magnetic loop antenna that was QUIET enough for NDB hunting
in urban areas. When I read this I was struck by the fact that it
contradicts conventional wisdom.

Dale [W4OP],

For AM/MW Radio Reception rotating the Loop
would be great for :
* Peaking the Signal over the Background Noise
-or-
* Nulling a Noise Source to Hear a Signal.
Then repeating the Process up-and-down the
AM/MW Radio Band as you Band Scan.

However - Above 5 MHz the directivity of most Loop
Antennas is diminished and the Process for me has
been to first Null the Noise Source(s) with the Loop
Antenna {Fixing the Loop in one position} and then
Band Scanning from 5 MHz to 30 MHz.

Note - This works well when the Loop Antenna is
located out-side the House 15-30-45 Feet away.

-If- Your Loop Antenna is in-doors then you may
find that different Point Noise Sources are coming
from different locations {Directions} within the House.
So now when you Band Scan from 5 MHz to 30 MHz :
You find that you have to re-position the Loop to Null
a Noise Source that is a problem on that frequency.

Don't have a WellBrook Loop Antenna so I can not
say if it is that much better then any other Loop.
- - - But one of these days . . . who knows ;-)

just my two cents worth ~ RHF
.
.
. .

Try offering two outfielders and a pitcher to be named later :-)

Seriously, other than her half of the house (her current hubby got on the deed a few years ago for a re-fi), almost nothing. I divorced her in 1981 and traded away my half of the equity for no claim by her on my future earnings (meaning no spousal support and no splitting of my Navy retirement). She took a second to buy a business, which supported her, although she did not run it well and she took a loss when she sold it.

I doubt she ever saved a penny. She draws a Social Security disability pension for several ailments, real or imagined.

I fared better ;-)

Noise floor at LF-->HF is limited by atmospheric noise not the noise
figure
of the receiver front end. You will always hear an increase in noise
when
you connect your antenna- so quiet amps offer no benefits.
- - - Dale W4OP

*

Dale [W4OP],

All things being relative many Amplifiers in consumer
grade Active Antenna for Shortwave are Noiser then the
Atmospheric Noise and the Receivers own front end.

I have often wondered why Active Antenna designs
did not incorporate a smaller Noise "Sense" Antenna

that would be intergrated into the Signal processing
path at the Antenna Element to cancel out most of
the Local Noise.

Lets say a One Meter (314cm) Loop Antenna terminating
at a Box at the bottom with the Broad-Band Amplifier in it.

Add a small thin 31cm Vertical Whip "Sense" Antenna
coming out of the Top of the Box. This "Sense" Antenna
would be 1/10th the Size of the One Meter Loop.

* The larger Main Loop Antenna would be a
Directional distant Signal Seeker.

* The smaller "Sense" Antenna would be
Omni-Directional local Noise Collector.

* * Maybe allow the user to vary the Mixing of
the larger Main Loop Antenna and the smaller
"Sense" Antenna in the Radio Shack.

Sort of like the Timewave ANC-4 Noise Canceller
and MFJ-1026 Noise Cancelling Signal Enhancer
-but- their "Sense" Antennas are in the Radio Shack
along with the other Radio Gear; and this "Sense"
Antenna would be at the Main Loop Antenna itself.

Source record: 80474

Frank and John explore the foiled terrorist attack and how it really is an anti-White "Hate" Crime. Any person who understands Islam, as it relates to the African-American "community," will understand that by using the thinly-veiled code word "devils" while planning their attack, the terrorists meant White people, not "Americans."

Frank and John also explain why the Ministry of Lies, aka the MainStream Media, continues to ignore and excuse that fact.

Frank then explains about the cultural and historical symbolism involved with the murder and mutilation of our troops in Iraq.

Frank then bashes the NY Slimes, for publishing a story about the US Government investigating financial records, and makes excuses for Iran's anti-semitism, while attacking Poland simply because the nation stood up to the Soviet Union.

Also, Vietnam and America uniting against China?... the continuing vendetta by the forces of Bolshevism against Our Beloved General Augusto Pinochet... why the Christian Church, both Protestant and Catholic, is in trouble... Food Leninists... Your phone calls and more at 718-761-9996.

Anyone know how much space either of these programs use on a laptop?

==========

I'm running Digipan V2.0, on an old dell laptop. it's under 2meg on
the hard drive. (1.8 meg). i just use the receive side, but, the whole
program is installed. cool program- i run it with my frog-o-100B. i
had to play with it a bit. wasn't my sound card, i had the radio volume
too high. the 20m band is vary busy. give it a google if you have
trouble,
lot of good info out there. enjoy!

Father Mike.

Just using system setting 28 for NIMH won't let the radio charge them.
The somewhat complicated process for charging the batteries is
described on page 8 of the manual.
Part of the "Getting Started" section.

Is the actual received frequency tracking with the dial? The oscillator frequency is likely under the signal frequency on band 4, rather than above the signal frequency.

I'll assume this radio has a high impedance RF input. A long run of coax lead in will tend to shunt the higher frequencies. High Z inputs are OK with end fed wires, but with certain radio to ground distances, an "end fed wire" will actually be at a RF current peak and will present a gross mismatch to the radio.

But, as other posters have suggested, you shouldn't expect a great performance from these radios at high frequencies. My S-40A is supposed to have a sensitivity of something like 6 microvolts at 40 Mc but it sure is alot more sensitive at 10 Mc. However, the low end of the AM broadcast band is even worse.

I think Hallicrafters extended the range of these radios into low VHF so they could be used for listening to the old experimental Apex broadcast band. The small number of Apex stations were broadcasting High Fidelity AM. This band was soon converted to the early experimental FM band.

> Dale W4OP

All loops, no matter how shoddily constructed, have two perfect nulls, infinitely deep. (All small antennas have the same pattern, another way to say it.)

But there's an electric field null and a magnetic field null.

A loop works mostly on the magnetic field.

But it picks up an electric field, and the null for the electric field is not anywhere near in the same place as for the magnetic field.

As a result, at the magnetic field null you hear not nothing, but the electric field pickup of the station you want to null.

You can't ``correct'' this, because the electric field is at 90 degrees phase to the magnetic one, by simply re-aiming a little bit. The two fields can't be used to cancel each other unless you use phase shifters of some kind.

A loop that's geometrically well laid out will have minimal electric field pickup, and that's how you get deep nulls from a well designed loop. The depth of the null is the strength of the electric field pickup.

I doubt, incidentally, that the size of the loop matters much. The N in the S/N that you're competing with is the internal noise of the receiver. The propagating noise goes up just like the propagating signal and so is the same S/N for any size loop.

Thus a good receiver can't use a really big loop usefully, beyond what it does with a small loop.

I have a couple ALA 1530's in a phased array (combined in an ANC-4); and can report that their S/N isn't as good as a Dymek McKay DA100E active whip, especially at higher frequencies. But the built-in pattern of the loop is incredibly handy.

I'm in a pretty noise-quiet location as well.

ll.

Not sure I follow you here. If I understand you correctly, you're reasoning that you can't hear anything on a large aperture loop that you can't hear on a small loop because they have the same S/N. But it seems like you could run this same line of reasoning on random wire antennas to reach the conclusion that you can't hear anything on a 100ft random wire that you can't hear on a 15ft random wire. Maybe I'm missing something, but this doesn't make much sense to me. Why would loops, unlike other kinds of antennas, fail to benefit from more signal gathering capability?

Steve

Old tube receivers had very optimistic band options.

It was cheaper to print the promise on the dial,
than to put some "guts" in the chassis.

(sort of like the old B&W TV sets with a "color" socket on the back)

The built-in charger is slow as can be, even when working correctly.
I use an outborad charger for mine. Also, that power supply is very
noisy and will reduce performance of the radio considerably.

I don't know what more I can say about it? It's got tons of features that actually work and it's extremely sensitive and it sounds good. Its got a huge memory bank that is very easy to use and I like the scrolling either by country or freq.. I like that the step button is right by the main tuning knob and SSB actually works like it should with a functional AGC that's easily switched from fast/slow/auto and the sync and PBT top notch. It keeps up pretty well with trusty R-5000 or NRD 525. Thats saying a lot! I only wish I could hook it to my laptop but It's possible some smart guy will find a way to tap into it by way of its programming plugs? You guys know I've owned and repaired ton's of radios and my honest opinion is that it is truly an above average radio that performs wonderfully. It is what it is " A portable radio designed to compete with all other portables" and it does that and a little more. I went and barrowed one from my buddy before I bought this one and that's what sold me on it, Not the hype. YMMV?

I heard on BBC today that the multi billionaire American Warren Buffet is donating $37 billion (yes! billion, not million) to the Bill and Melinda Gates Foundation.
This foundation donates money to developing countries such as Africa for work on curing diseases like AIDS, TB tuberculosis, malaria and measles, conditions that are endemic in Africa and kill thousands (yes! thousands) daily.

This is a wonderful gesture from the world's richest who happen to be great Americans.
God bless them and God bless America.

Also, when you vote for a new President in two years time us Africans would like you to vote for Al Gore, a great man and a great friend of Africa. If you don't like him, then my personal fancy is for Hillary Rodham Clinton, I think she would make a great President of the United States of America.

>
> Steve

It's true of random wires as well. Noise that's propagating is picked up
in proportion to Signal that's propagating, so the ratio is the same regardless
how much of it you gather.

What varies is the energy of that relative to the internal noise of the
receiver.

Once you're above the receiver's internal noise, more gathering doesn't help.

Thus better receivers fail to benefit where worse receivers do, from larger
antennas.

This applies to small antennas - ie without forward gain, having the standard
double-null pattern, such as you get from a small loop or whip. If you
have forward gain, you do in fact increase propagating signal relative to
propagating noise, by cutting out noise from at least directions that the
signal doesn't lie in.

What you're saying makes sense, and in another thread people have been talking about the PA0RDT Mini-Whip, which, assuming it does what everyone says, seems to demonstrate that small antennas can be just as effective as much larger ones. Still, I have the sense that something important is being left out. If I'm listening to AFN on 7811 with a modest 20 ft wire and then switch over to a 100 ft wire, it does not seem as though the 100 ft wire allows me to hear exactly what I was hearing on the 20 ft wire, only at higher volume.

I always figured that, because most of the noise that plagues us is local, a longer wire would have a greater "reach"---i.e., it would be able to gather a greater proportion of signal in addition to all of the local noise that you'd hear on a wire of *any* length. Another way to put it: I'd have thought that what you can hear via antennas of different sizes is analogous to what you can see through telescopes of different sizes. Because of atmospheric distortion, there's a limit to what you can resolve using an earthbound telescope, no matter what it's size (that's why we put telescopes into orbit). There's a ratio of light to atmospheric distortion that just can't be overcome...building bigger telescopes won't help. However, this is consistent with the fact that the big reflector on Mt. Palomar can make out much more detail on the moon's surface than the telescope in my backyard. And the only explanation for this is the fact that the big reflector is taking in more light from the moon.

But enough of my armchair speculation. I'll leave it to you experts out there to decide (assuming you're still awake)!

For professional reviewers on RadioIntel.com, you just don't want to admit RadioIntel is correct, and that your $500 receiver is nothing special. You pissed $500 ! What a pathetic receiver that doesn't even receive/process IBOC, or DRM, and with an antenna that flops and knobs that are flimsy, cheap plastic ! Another, "slave wages", receiver !

Just ike RHF - remember to, "think positive about your Eaton Shit E1" !

I really hate it when people make references like "black magic" and "old wives tales" and the like to make a point. It's a real turn off to use rhetorical device in a technical document. Like the page states far field effects are the same between dipoles and loop antennas.

There is no claim of far field noise improvement of a shielded loop antenna over a dipole. The issue is unwanted local noise pickup. A balanced shielded loop is the least sensitive to the inductive fields of local noise sources as a function of distance. Most local noise sources to antenna coupling is from common mode voltage field induction.

The page you reference is not correct in some instances but not grossly incorrect. Shielded loops have lower impedance than unshielded and couple to local noise sources the least of any antennas discussed and this difference depends on the loop size where a larger electrical size will have a larger difference in field impedance. The author makes general statements about loops and then only discusses small loops. Either loop design shielded or otherwise generate smaller currents from local inductive noise sources than a dipole. The dipole will pick up less noise from local noise sources than an unbalanced Marconi type antenna. Balanced shielded loop designs will reject electric fields better and have a lower impedance than unshielded. It's not easy to tell from the chart scale but the right hand side should be ~ 377 ohms for either antenna type.

Keep in mind that there are differences in how a loop antenna functions based on electrical length. Electrically small antennas are the current type and the larger loops are affected by both E and M fields.

Even the crappy little Kchibo receives digital:

Dear our audience, KK-DRM01, the first lot of domestic digital
broadcast receivers duly put into operation has been out into the
market. The KK-DRM01 digital frequency modulation radio maintains the
function as analog radio, for which defects such as interference,
signal decline, poor acoustics and troubles sought by broadcasting
stations, etc frequently occurring in analog broadcast can be
eliminated. In the meantime, it can also provide text information,
automatic frequency switchover or program accompanied text information,
facilitating simple and easy operation of radios. The DRM digital
broadcast system is a non-patented digital system that is the only one
in the world using long, medium and short wave broadcasts. It can use

the existing frequencies and bandwidths around the world, hence the substantial improvement in analog AM broadcasts. Due to the fact that this unit has relatively more functions and better reception effects, the operations are complex accordingly. Before using this unit, please read carefully this Operation Manual and keep it properly for later reference.

Sucker !!!

You need an amplifier for electrically small antennas with a noise floor
below that of atmospheric noise or it will affect weak signals that you
can hear. The amplifier design needs to provide an appropriate level of
amplification at a good enough noise figure to provide for weak signal
performance. At low frequencies atmospheric noise is higher making this
an easier thing to achieve.

Remember, professional reviewers rated the Eaton Shit E1:

Conclusions
Many enthusiasts are waiting to hear whether or not The E1 "blows away"

the Satellit 800, or vice versa, or if it diminishes the "legend"
status of the Sony 2010. Some early owners have already made such
claims. The reality is a bit more mundane than that. The fact is that
these are all excellent radios, so the possibility that one could "blow

the other one away" is unlikely. Indeed, modern radios have so far
pushed the envelope of what is possible that only incremental
improvements are likely. Such is the case here. So if you're looking
for me to say the E1 trashes all the competition you are going to be
disappointed.

No it actually doe's rather well with faint signals when comparing it to my tabletop rigs. I think if I piped the signal into my DSP software I would really have something. It is quite a bit better than my Sat700. I wish I had a 2010 I could compare it with. Maybe I'll get one of those and see?

Thanks for the info, Brian. I was mostly interested in
how it held up against the R-5000 and 525, since I've
got the predecessor (Sat 800). I've always thought that
the Sat 800 could do well with PBT (and a better front
end), and it seems that people in Eton figured out that

PBT was doable. It sounds like the E1 isn't a DX-ing machine, but it does a good job at being a top end portable.

Good follow up post. I would add that smaller loops generally have
better defined deep nulls over a larger loop.

If Brian wants to start and keep the shit going, then so be it ! Yes,
he did - he could have bought, for example, a Sony 7600GR, for $370
less, then waited for the new line of digital receivers to come out
(which Kchibo already has). After major SW broadcasts have gone to
DRM, and AM broadcasters to IBOC, the E1 will be collecting dust !
Also, satellite receivers are dirt cheap, now, and come with antennas !
When Brian starts the shit, then I will point out, what a fool he is
for spending $500 on a plain vanilla portable. Oh Brian, keep you head
in your ass and
keep ignoring those professional reviews !

Most modern receivers (e.g., Degen 1103, Sony 7600GR) have the
same basic capability - remember from RadioIntel.com:

Conclusions
Many enthusiasts are waiting to hear whether or not The E1 "blows away"

the Satellit 800, or vice versa, or if it diminishes the "legend"
status of the Sony 2010. Some early owners have already made such
claims. The reality is a bit more mundane than that. The fact is that
these are all excellent radios, so the possibility that one could "blow

the other one away" is unlikely. Indeed, modern radios have so far
pushed the envelope of what is possible that only incremental
improvements are likely. Such is the case here. So if you're looking
for me to say the E1 trashes all the competition you are going to be
disappointed.

It's just too hard to believe that someone could get so wound up about a radio. Well maybe not? I'm just waiting for the day when one of these psychos goes completely apeshit and makes the front page news. :)

Many coil forms were paper/cardboard that can absorb moisture. The wax
was used to seal (cover) the cardboard I think.

depends on the type of loop. some MW dxers use loops like the small Palomar. you can use tilt and rotation to get nulls that are hard on long wires.

a 15 foot long wire has terrible radiation resistance on 80 meters. an 100 foot long wire will start having lobes on 10 meters.

personally i think a high rotatable dipole would be good.

What makes you think he actually cares about SW radio or actually
listens to one?

It's pretty clear all he cares about is Trolling someone and that he
sticks around because he gets a response.

A Beverage has gain and picks up more signal as its length increases (in the
direction it's running). They DO pick up a lot more signal.

I'm wondering if anyone can point me to a site where I can find old BBC radio broadcasts of the World Cup (1970-1990). I have googled this but don't get any action and the BBC site only lists descriptions of past Cups or news items--no full match commentary. Thanks for any tips.

Beneath the wax is often a fiberboard, paper or cardboard form the
coil is wound on. Moisture can, over time penetrate the wax, and absorb
into the form.

Gay pride parades held across nation By ADAM GOLDMAN, Associated Press Writer
Mon Jun 26, 6:03 AM ET

NEW YORK - Drag queens in knee-high boots, kids with two dads and New York City's first openly gay city council speaker were among hundreds of thousands attending gay pride parades across the nation, weeks after a vicious attack on a popular gay singer and the 25th anniversary of the start of the AIDS epidemic.

Tens of thousands of spectators lined Fifth Avenue on Sunday for the city's annual parade, withstanding intermittent rain and turning the route into a sea of rainbows with colorful floats and lavish costumes.

"Everyone else has a chance to express their affection freely, and for one day in New York, you can be free and not feel ashamed or embarrassed," said 42-year-old Roberto Hermosilla, from Miami, attending his ninth gay pride parade.

On San Francisco's Market street, thousands of festively dressed people looked on as marching bands, dancers and floats bearing corporate logos streamed by. On one float, a bearded man wearing a white lace miniskirt and fishnet stockings sang Madonna's "Like a Virgin." A half-dozen men dressed in underwear and top hats danced behind him.

The parades also had a political message, with parade-goers bearing slogans about gay marriage, AIDS, and discrimination.

"It's to have a good time, but also to remember the issues out there," said Jane Woodman, 26, in San Francisco. "There's still a lot of work to be done," she said, noting the national debate raging over whether gays should have a legal right to marry.

The New York parade marked the very public and triumphant return of singer Kevin Aviance, who rolled down Fifth Avenue atop a fake pachyderm and a circus-themed float just weeks after the drag queen was viciously beaten and suffered a broken jaw. Police have charged four young men with assaulting the artist while yelling anti-gay slurs.

The theme of New York's Lesbian, Gay, Bisexual and Transgender Pride March was "The Fight for Love and Life," but there was plenty of talk about hate following the Aviance attack. The New York Police Department said reports of anti-gay bias crimes totaled 25 through mid-June - compared with 19 over the same period in 2005.

"A few hateful homophobes will not set us back," said City Council Speaker Christine Quinn, who marched in the parade. In January, Quinn became the first woman and first openly gay person to lead the council.

Organizations that marched in San Francisco included Rocket Dog Rescue, a volunteer group that helps abandoned dogs find homes. One marcher with the group walked with a pit bull that was dressed in a rainbow tutu.

In Ohio on Saturday, thousands gathered for the 25th Stonewall Columbus parade. Michael Eblin, marching in his first parade, followed a black Hummer pulling a float of men.

"For the first time, I'm going to be part of a majority," the 18-year-old Eblin said just before the parade began.

Along the route, protesters held large signs reading, "Homo sex is sin" and "God abhors you," while a boy in blue tie-dye held up another: "2 Moms. 2 Dads. Too Cool."

The parades commemorate the Stonewall uprising of 1969, when gay bar patrons resisted a police raid.

Associated Press writer Dan Goodin in San Francisco contributed to this report.

Hello Everybody,

This will be of interest to many of you and especially those who DX on the MW band.

http://www.radiointel.com/review-2loop.htm

And don't bother replying that these antennas "don't do anything" or they "aren't any good" or "I tried it and it didn''t do a thing!" They do INDEED work well WHEN YOU KNOW HOW TO USE THEM which you "naysayers" obviously don't. (I've owned and used a Stelect-A-Tenna for over ten years.)

But the review by Jay Allen really says it all. Check it out.

Best,

Joe

I've got a RS loop, 15-1853 with the connecting cord (if needed) and the instruction sheet $25 + shipping.

Actually, I started out in SW back in the 1960's with a Knight Kit Star Roamer, had
a DX-440, but now AM DX with a regular PLL receiver. Sorry, but Brian keeps starting the shit. Oh, you are that bigot, Telamon. As soon as, someone knocks your precious receivers, you all get personal, insulting, and defensive. Too bad !
I think it is funny that, as soon as, a new receiver comes out, so does the impulse buying. Doesn't matter what professional reviewers say about the modern day cheap plastic receivers !

AMERICA IN DANGER!
Secret Gas-Aerosol Rooms operated in US
(in Philadelphia, Narberth, Lower Merion, PA)
(in Wilmington and Newark, DE)
(in Hampton, Williamsburg and Richmond, VA)
AND ELSEWHERE.... details below...
Bio-aerosols used to hurt and simulate panic attacks!

Say "I care" - call Senate (202) 224-3121
House of Representatives (202) 225-3121

America in danger -
The vice is NOT impeached.
America in danger -
The public trust is breached.

Big Brother spins protection...
And fear is used to clamp.
Democracy needs action!
On which side do you stand?

Which side are you on, boys?
Which side moves you on?
Which side are you on, girls?
Which side moves you on?
(Chorus after F. Reece)

Your church is burned by haters,
The priests to go to jail?
Your dreams are cheynned by traitors,
But hope still shines through veil.

"Dust rooms" came back to gas us
With neo-Naz (or Con) embrace...
New immigrants do make US!
And not the Super-race...

Full text was at:
http://buyit.philly.com/findit/search/results.jsp?catId=krd_philenqda...

This was a new on-line ad placed in Philadelphia Inquirer and
Philadelphia Daily News on www.philly.com (see full text below)
It was about the secret aerosols rooms in US. One could find it by
searching "secret", say, in the ad section of philly.com.

Democracy can not function effectively without the informed public. As
a former NASA Langley scientist working in the area of nanotechnology
and nanoscale particles, I have been recently exposed to the
establishment of secret gas-aerosol rooms inside of United States, at
least in the Mid-Atlantic region (from Philadelphia to Virginia).

First, the highly irritant aerosols have surfaced at the NASA Langley
Research Center in several safety accidents. Investigations were
blocked, probably, because of lack of Congressional approval for such
financially-lucrative research at NASA. Later, these aerosols had been
encountered outside of NASA in Virginia, Delaware and Pennsylvania
.
This points out to yet another proliferation of originally-sensitive
technologies into domestic American life to hurt and harass people
without a proper oversight and much control. This amounts to torture,
extra-judicial prosecution and authoritarian intimidation tactics. The
use of such irritants and the operations of the secret gas-aerosol
rooms are gross violations of human and constitutional rights of
American citizens and various domestic and international laws.

----------Full text of an ad from
philly.com----------
TORTURE IN USA: Secret Aerosol Rooms

US Scientist needs legal help dealing with the secret aerosols rooms
(SARs) operated illegally in Philadelphia area, Newark (DE), Hampton
and Williamsburg (VA). Highly volatile aerosols with and without
bacterial content cause dry cough, airways and eyes irritation, chest
pain and inflammation. FBI and Homeland Security associates are likely
operators of SARs, while collaborators may be hotel staff and
landlords, who get financial/material or other incentives. US citizens
and kids are victims.

Oh, you are so right, Brian ! A senior software engineer in Northern
Virginia with a high-level Intel clearance ! What's the matter - looks
like YOU are getting a bit upset ! A sucker for a pretty, cheap,
plastic face ! What's the matter - your precious Eaton Shit E1 can't
receive/process DRM, or IBOC ! Sucker !!!

You must be reading some of the nut cases that post here instead of kill
filing them. Reasonable and knowledgeable people would not make posts of
this nature.

3665. Re: WMDs: The Real Scandal - Dr. DaviD's Lies!

Newsgroup: rec.radio.shortwave
Date: 2006-06-26 23:56:53 UTC
From: SeeingEyeDogg <look@u.org>
Message-ID: <12a0ta340lrer09@corp.supernews.com>
Source record: 80498

WMDs: The Real Scandal

...these weapons were the kind used to kill 5000 Kurds by Saddam. Saddam only needed 3 of these missiles to accomplish that feat - we've uncovered 500. That's enough nerve agents to kill more than 8.3 million people - or the Island of Manhattan, or the city of Chicago.

The lying leftists who will get all of us killed if we don't remain vigilant were very slow to respond.

The New York Times who has run hundreds of stories in the last two years on the global war on terror and attempted to reiterate on their news and editorial pages that the President lied to the American people - remained completely silent on the issue the day following the discovery. The Boston Globe committed all of two paragraphs. The Washington Post five. Yet combined these newspapers used thousands of paragraphs with huge, large font headlines to say again and again that the President had lied.
...
As I have reported previously we've had first hand knowledge that some of the weapons were removed from Iraq via outfitted 747 Jumbo and 727 jets to Damascus. General Georges Sada testified to as much on my show.
...
The declassified version of the report indicates that there are many more weapons likely to be found even yet in Iraq.

There may be perfectly legitimate reasons for waiting on the announcements of such, and even delaying the announcement weeks to months after the discovery.
...
For a season or two the left has had what they thought was the smoking gun for the President and his party - to say he lied to the American people and weapons of mass destruction was what he lied about. What they would never address is how so many foreign intelligence agencies also concluded the same thing as the U.S. based on the best available evidence at the time.
...
Their callousness to the truth, their unwillingness to correct their positions or to report the facts and their willingness to slander a commander in chief - in the midst of war time are deserving of subscribers canceling their subscriptions in mass numbers. For if one can not depend upon the information they read - then they should get their information from more reliable sources.

As an American, we should stand proud today that even though left ran the spin for a while, the truth is coming out.

And as scripture says, the TRUTH will set you free...

I think some people think the Select-A-Tenna and its kindred don't work
because they initially use them with portable radios that already have
rather large ferrite loop antennas. The benefits of the Select-A-Tenna
are less pronounced then. However, if you put the Select-A-Tenna next
to, say, a Grundig mini-world, the effect is pretty amazing.

There are no elite. In America you're free. Free to get off your ass,
work, and make something of yourself, or you're free to sit on your ass,
whine, complain, collect a welfare check, support the terrorists and be a
good little democrat.

Just DL and hook to your soundcard audio ports. You won't have any space
problems. I use them and a slow scan proggie on a pentium 133 mmx toshiba
notebook.

Don't throw away old computers, put them to work doing ham and shortwave
tasks.

I turned off NPR when they seemed to go out of there way to hire queers for announcers. Like we couldn't tell they were libs already? Sheeesh. The more fag like they could talk the more money they would pay. It probably helps to have a limp wrist if you want to get hired by NPR too. Sissy Fags.

A lot of NPR stations have studios in Universities and colleges, known Havens for anti-America liberalism.

I say cut all tax payer funding for NPR. Let's see who survives, Air America, or NPR. Of course Air America can always steal from boy scouts.

Good for them. The R30 doesn't get the attention it deserves, in my
opinion. Palstar should think about slapping the Grundig name on
there...the units would fly off the shelves.

Nice try; too bad you didn't do some more reading. Remember how the FDA
approved thalidomide for pregnant women? Remember what happened next?
These days thalidomide does have legitimate uses for cancer treatment.

My statement still stands.

grundig radios
Posted by: walt
Saturday, January 28, 2006 8:55 PM

I will never buy another grundig product, they now make junk, they have abandoned the traditional shortwave radio listener with this terrible designed radio e-1. Leave well enough alone and improve what you have before you go onto something else. The 800 was the standard bearor of what a die hard shortwave radio lover wanted, big, bold, and the beautiful. Now all this rap about it wasnt a portable, it was too big, it was too heavy, blagh, blagh, blagh, no kidding what you saw was what you got, big bold , and very beautiful, want something small, well it was out there, go get it, but leave the big girl alone, I loved her and she loved me back. Now we will never see another CLASSIC radio like the 800, because we lett Grundig (eaton) dictate what THEY want us to have, not what we want. I will never buy another Grundig product, they have abandoned me!

Perhaps, more importantly, because they are highly directive, they pick up
less noise assuming the noise is well distributed in the azimuth.

Mike - I used the supply that came with the R75 and added an LM-350
three terminal regulator right on top of the power supply case with a
"claw" type heatsink. The voltage is regulated at 13 Vdc and the R75
is much cooler.

JA, - Thank You for Posting this Message and Link ~ RHF

You are right - If someone takes the time to read Jay Allen's
Review of the Select-A-Tenna (SAT) and Terk AM Advantage
Medium Wave (MW) Loop Antennas :
LOOP => http://www.radiointel.com/review-2loop.htm
They will have a better understanding of How To Use Them
-and- What Reasonable Results to Expect from both with
a variety of AM/MW Radios.

Two Popular AM/MW Loop Antennas :
http://www.radiointel.com/review-2loop.htm
Select-A-Tenna -vice- Terk AM Advantage
-written by- Jay Allen -hosted by- RadioIntel.Com

just my two cents worth - iane ~ RHF

3706. Shortwave Listening (SWL) "Receive-Only" Antennas - Away Is Better - Then Up ! - Or Is It ?

Newsgroup: rec.radio.shortwave
Date: 2006-06-27 02:52:03 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151376723.444896.48180@75g2000cwc.googlegroups.com>
Source record: 80539

Steve,

Shortwave Listening {Receive Only} Antennas
- Away is better then Up ! Or Is It ?

Where you are better off {usually} with a longer
Antenna + Ground + Feed-in-Line System and
Local Noise is :

Very High Signal & Very High Noise Antenna Design :
A 10 Foot Coax Cable feed-in-line up the side of
the House to the Peak of the Roof that is coupled
to a 100 Foot Horizontal Antenna Element and
using the Radio Shack's Ground.
- Why - The First 50 Feet of the Antenna is close
to the House and Noise and the other 50 Feet
is relatively Noise Free.

Very High Signal & High Noise Antenna Design :
A 25 Foot Coax Cable feed-in-line going out away
from the House 15 Feet that is coupled via a
Matching Transformer to a 15V/85H Foot Inverted
"L" Antenna Element and using the Radio Shack's
Ground.
- Why - The First 50 Feet of the Antenna is close
to the House and Noise and the other 50 Feet
is relatively Noise Free.

Moderate Signal & Less Noise Antenna Design :
A 50 Foot Coax Cable feed-in-line going out away
from the House 40 Feet that is coupled via a
Matching Transformer to a 15V/60H Foot Inverted
"L" Antenna Element and using a Matching
Transformer and a remotely located Ground Rod
at the base of the Antenna.
- Why - The First 25 Feet of the Antenna is close
to the House and Noise and the other 50 Feet
is relatively Noise Free.

Moderate Signal & Very Low Noise Antenna Design :
A 110 Foot Coax Cable feed-in-line going out away
from the House with 100 Feet Buried that is coupled
to an a Far-End-Fed 15V/50H Foot Inverted "L" Antenna
Element and using a Matching Transformer and a
remotely located Ground Rod at the base of the Antenna.

- Why - The Entire 65 Feet of the Antenna is away
from the House by 50 Feet and is relatively Noise Free.

The-Bottom-Line - Use the Available Space to position
the Wire Antenna Element away from Sources of Noise
and let the Signal Levels take care of themselves when
the Length of the Wire Antenna Element is beyond
35 Feet.

at least that is the way i see it - iane ~ RHF

AMERICA IN DANGER!
Secret Gas-Aerosol Rooms operated in US
(in Philadelphia, Narberth, Lower Merion, PA)
(in Wilmington and Newark, DE)
(in Hampton, Williamsburg and Richmond, VA)
AND ELSEWHERE.... details below...
Bio-aerosols used to hurt and simulate panic attacks!

Say "I care" - call Senate (202) 224-3121
House of Representatives (202) 225-3121

America in danger -
The vice is NOT impeached.
America in danger -
The public trust is breached.

Big Brother spins protection...
And fear is used to clamp.
Democracy needs action!
On which side do you stand?

Which side are you on, boys?
Which side moves you on?
Which side are you on, girls?
Which side moves you on?
(Chorus after F. Reece)

Your church is burned by haters,
The priests to go to jail?
Your dreams are cheynned by traitors,
But hope still shines through veil.

"Dust rooms" came back to gas us
With neo-Naz (or Con) embrace...
New immigrants do make US!
And not the Super-race...

and Williamsburg (VA) and other places. Highly volatile aerosols with and without bacterial content cause dry cough, airways a...

Full text was at:
http://buyit.philly.com/findit/search/results.jsp?catId=krd_philenqda...

This was a new on-line ad placed in Philadelphia Inquirer and Philadelphia Daily News on www.philly.com (see full text below)
It was about the secret aerosols rooms in US. One could find it by searching "secret", say, in the ad section of philly.com.

Democracy can not function effectively without the informed public. As a former NASA Langley scientist working in the area of nanotechnology and nanoscale particles, I have been recently exposed to the establishment of secret gas-aerosol rooms inside of United States, at least in the Mid-Atlantic region (from Philadelphia to Virginia).

First, the highly irritant aerosols have surfaced at the NASA Langley Research Center in several safety accidents. Investigations were blocked, probably, because of lack of Congressional approval for such financially-lucrative research at NASA. Later, these aerosols had been encountered outside of NASA in Virginia, Delaware and Pennsylvania
.
This points out to yet another proliferation of originally-sensitive technologies into domestic American life to hurt and harass people without a proper oversight and much control. This amounts to torture, extra-judicial prosecution and authoritarian intimidation tactics. The use of such irritants and the operations of the secret gas-aerosol rooms are gross violations of human and constitutional rights of American citizens and various domestic and international laws.

----------Full text of an ad from philly.com----------
TORTURE IN USA: Secret Aerosol Rooms

US Scientist needs legal help dealing with the secret aerosols rooms (SARs) operated illegally in Philadelphia area, Newark (DE), Hampton and Williamsburg (VA). Highly volatile aerosols with and without bacterial content cause dry cough, airways and eyes irritation, chest pain and inflammation. FBI and Homeland Security associates are likely operators of SARs, while collaborators may be hotel staff and landlords, who get financial/material or other incentives. US citizens and kids are victims.

This whole debate is nuts. I have a 150 foot longwire behind my house.
It allows me to hear stations that are nowhere to be found using a 16
foot reel antenna. Period! Any theory that denies this is bunkum.

Hm-m-m. I can hear that in my head. ... thought it was the 1812 Overture.

BT

Playing the selection is mighty convincing: Ol' Ludwig pops off some V's
right at the start. I do not seem to have the 1812 Overture handy, so here
I tread ever-so-lightly ... not being much for knowing good music. I can
run bits of 1812 through my head, too, but not much. (I just get started
and run out of headroom.) I shall seek it out. TKS & 73

This isn't complicated. You just put it next to the radio orientated to
couple to the radios internal loop stick antenna. Then you just adjust
it to the operating frequency to peak the signal. If you have an
interfering station on channel you rotated them together to null it.
Easiest thing to do is use a lazy susan to rotate the tuned loop and
radio together. That's all there is to it.

This message was **not** posted by Mr. Davies. No way Hosay.

Speaking of Mr. Davies - we wonder where he is lately.

He hasn't been here in years.

Maybe he can stop by and give us an update on how his TinyTenna is working.

KK4TL said that.

Northern Virginia is quite a ways from Southern Minnesota.
Southern Minnesota (that brunette woman next door to me,she has to be back in Minneapolis on July 25,2006,court date) is still wayyyyyyy up North,no matter how y'all slice it.Even further North than Britt,Iowa,annual Hobo Convention in August (I think it's August) this year.

Telamon,

"What Reasonable Results to Expect from
both with a variety of AM/MW Radios."

I think what Jay Allen communicates is that which some smaller
Radios with very small Ferrite Rod Antennas the Results form
using an External Loop Antenna can be . . . A W E S O M E !

Then - When other people use the same External Loop Antenna
with some larger Radios with very large Ferrite Rod Antennas
find that the Results are often only 'slight' : But never the less
there is some improvement in Signal and in Reception.

expect the unexpected - iane ~ RHF

< Snip >

You don't Re-Butt a nut case because it is pointless action.
Putting OT in the subject does not make it OK to post off topic.
You disrupt the news group by doing this because it encourages bad
behavior in other people and worse you give the Trolls a reason to hang
around.

3739. Not-the-Same -?- 16-Foot Reel Antenna -vice- 150 Long Wire Antenna ?

Newsgroup: rec.radio.shortwave
Date: 2006-06-27 07:33:30 UTC
From: RHF <rhf-newsgroups@pacbell.net>

Mumbler,

Yes once you get past the first 64 Feet of the 150 Foot
Long Wire the Signals have a lot less Noise from the
last 65-150 Feet : Then the 16 Foot Reel Antenna -
Relative to your House being the primary Source of
Local Noise.

The Better Long Wire Antenna :

You may find that you would get even better Radio
Reception with a 50 Foot Coax Cable out to 50 Feet
and a 100 Foot Wire Antenna Element from 51-150
Feet.

Add - A MatchingTransformer between the Wire
Antenna Element and the Coax Cable.

Install - A remote Ground Rod at the 50 Foot point
where the MatchingTransformer, Wire Antenna
Element and the Coax Cable all come together.

Plus - Get the Wire Antenna Element Up-in-the-Air
about 15-25 Feet - So that it is not a Ground
Tripping Hazard or a ClothesLine type Hazard.

Rig - The Wire Antenna Element as a Short
Vertical-Up-Leg with a Long Horizontal-Out-Arm
- - - Lets call it an Inverted "L" {Shape} Antenna :o)

something to think about - iane ~ RHF

Actually, if I take both antennas into the deep woods, I will still hear stations on the 150 foot wire that are not detectable on the reel antenna. Not as many, but some. And I won't hear any stations on the reel that I couldn't hear better on the longer wire. Haven't you guys ever tried this yourselves?

Palstar R30 is a very high performance receiver.
However,it looks more like a piece of test equipment and that may
explain most of negative remarks. It was intended to be a porta-top
radio. It is ,in
essence, a minimalist SW radio. Its meagre looks are deceiving and any
comparison to Eton products is outrageous.

Ah, yes...the dreaded H1B visa issue.

We import these H1B engineers for two reasons:

a) The sorry state of this country's educational system.

b) Greed--the imported engineers are willing to work for a *lot* less
than the American engineers--and the employers are more than willing to
hire them because of this.

Agree 100% Arthur. In the category with the Lowe HF-150- both are classics,
built far better than the plastic receivers being offered to the masses.

I also have a Palstar R30
(CC Model with the Collins filters.

I'm disabled and use it mostly ouside o my handicap scooter. I wired
the DC cable to the battery and made a mount to hang it on the steering
nabdle. For an antenna I use
the Miracle Whip. It does a very credible job on
BCB and the shortwave broadcasts.

The scoter has plent of battery power and the scooter gets recharged at
home ofter each use.

It'snice to be able to move to quieter and higher locations also.
Also, the Palstar service is excellend. When I waswiring the DC cord to
the scooter I needed a longer lead and wanted to purchase one. The
sevic mgr. send me a 6 ft. cord FREE along with a couple of adapters
and a new copy of the owners
manual.

Charlie

Essex, Maryland

The main difference is in weak signals, regardless of radio. Weak
signals get stronger. Strong ones don't. Still, the main problem with
the unit is finding signals in the clear to amplify. On a crowded
radio dial, that's hard in big metro areas.

I don't know specifically if wax absorbs moisture, but I know the polyethelyne in coax is known to absorb moisture and I suppose wax could be similiar.

If a radio has been exposed to moisture over a long time, I'd worry alot more about corroded coil wires and conductive metallic salts possibly being leached out.

That said, band 4 coils, usually being single layer coils wound with relitively thick wire, would probably be in better shape than the low band coils which have many turns of fine litz wire.

The bandswitch is another place to look for losses. A little bit of series resistance would cause more loss in a low L/C tuned circuit, such as in band 4, than it would with the higher L/C circuits in the lower bands. Band 4 is usually also the most troublesome bandswitch position, as it doesn't benefit from the good wiping action on the contacts of band 2 and 3, and it isn't used as much as band 1.

Frank Dresser

The key is often to switch in some attenuation, assuming you're using a radio that gives you the option. This helps eliminate local noise that's getting directly into your radio's internal circuitry. When you then use the SAT the result is a much cleaner signal. I do this all the time with the SW77 and 7600GR. I'm seriously thinking about upgrading to a Quantum loop, though.

Source record: 80548

I have a HAMMARLUND HX-FIFTY transmitter that I recently went through. New transformer, recap, align... It works very nice, but I broke the tuning slug for one of the 40m coupling transformers. I replaced it with one of the 20m slugs and it aligned ok. I am looking for a slug now to replace the broken one.

So where do I get one? It is about 1/4" diameter and the standard hex head. I wonder if they are still being produced today. I am not even very sure what it is made out of. Maybe powder iron or ferrite???? I prefer not to scrap a radio for just one slug. Somebody told me to go to hamfest, but I don't go to those often.

regards,
Bob

What really galls me is the fact that Chuck Harder is on the air at
all.
Who's keeping him on the radio?
He should have retired long ago, when his affiliate count went way
south, from about 350 stations to a handful.
This whole thing is bizarre. I certainly agree with you that Chuck
Harder is a "loon" - a paranoid schizophrenic as I see it - and he
should NOT be on the air. He should be on a shrink's couch, or in the
psycho ward, taking his meds.
I can't crawl into his head; I can't see what he sees; I can't figure
out what goes on in his bizarre, psycho world. In fact, I have no
desire to. Kinda like Michael Jackson.
But I do know that world is radically different from our world -
perhaps some sort of "Harry Potter"-type alternative universe that
bears absolutely no relation to the real universe we inhabit every
second. I'm reminded of the 1976 Steely Dan ditty "Oregon (Don't Take
Me Alive)" and the line in the song that goes "... the mechanized hum
of another world."
And it's fruitless to try to figure out how that world works. Which
brings to mind another '70's-era classic by Billy Joel ("Movin' Out")
and its signature line, "You should never argue with a crazy mind." How
true.
Oh, speaking of entertainment, how come Chuck Harder never, never,
never criticizes Hollywood? I'm not dumping on Tinseltown, but it's
really weird that someone like Chuck Harder would not take a whack at
it - especially considering the array of anti-Hollywood guests he has
on his show (Rev. David Berman, Nick Begich, William Jasper, etc.).
Oops, there I go again ... arguing with a crazy mind ...

I've been looking for a flat black colored person but have
been unable to find any. I also have not found anyone who
is white as a sheet of white paper. Alas, all I have found
are people who vary in shades of brown earthtones. By looking
at a spectrometer display, it is actually hard to tell one
from another.

I don't have that one but I'm interested to hear how it performs. I got a Tecsun BCL-2000 not so long ago which I use mostly for FM and mediumwave.

Redsun so far only seems to be copying, not innovating.

I suppose pray if you think it will help...

Given the number of times he has been stung I don't see him changing
his behaviour any time soon. It's gonna be one bust after another
until his ratings sag and he's booted off the network.

It is generally not illegal under Florida law for a physician to prescribe medication in a third party's name if all parties are aware and the doctor documents it correctly, said Mike Edmondson, a spokesman for the state attorney in Palm Beach County. He would not discuss specifics in the Limbaugh case Tuesday.

Yet another non-issue conjured up by the foaming at the mouth left.

> a) The sorry state of this country's educational system.

I've often wondered if the implication that we'd have
more people interested in engineering if our educational
system were better isn't a false one. You can have
better educated people still think that "engineering
and the sciences are for geeks and nerds" just as much as
you have now.

My suspicion is that we'd have a lot more better
educated business majors out there, rather than
a ton more people in the sciences.

> b) Greed--the imported engineers are willing to work for a *lot*
less
> than the American engineers--and the employers are more than willing
to
> hire them because of this.

Until they get their greed card, then they will test the
market and try to make the big bucks. A company I
used to work for made a deal with the Devil and hired
tons of overseas engineers, all the while knowing that
once 5 years was up, those engineers were going to
leave for better pay.

The drug they found was Viagra - and it was prescribed in his doctors name "for privacy purposes".

I don't see a big deal here unless you're interested in questioning his manhood. Ever have a doctor give you samples to get you started on a new medication?

Cuhulin,

(OT) : At The Start Of The Subject Line

- So "IF" You Take The Time To Read It

- That's On You [.]

Hey - I Got To Be Me - The Truth Will Set You Free

I "Choose" to Reply To {Re-Butt / Rebuttal} some
of the Posts that are Originated by Another - Who
I think has Said {Written} something that is
Egregiously Wrong and/or Factually Incorrect.

Note - The Original Post 'often' does not have an
"(OT) :" at the Start of the Subject Line.

First - I place an "(OT) :" at the Start of the Subject Line
as to give Fair Warning to any Reads and at least allow
them the opportunity to "Choose" to NOT READ My Reply.

Yes - It May Be Wrong - But At Least It is Honest [.]

IMHO - To Do Otherwise would be to Yield the Rec-
Radio-Shortwave NewsGroup to those who would
simply make it their personal Propaganda Forum.

> a ton more people in the sciences.

Possibly so...but it all depends on how math & science are presented by the media/government/propaganda (in a good sense). Let me explain...

Don't know how old you are, so if you weren't actually there, set Mr. Peabody's "Way-Back Machine" to 1957.

October...Sputnik had just been launched...everyone from the government to the man in the street was in an uproar because we just took a back seat to the Russkies...technologically, they had just given us a world class wedgie.

All of a sudden, if you listened to the media/government/propaganda, it was no longer "geeky and nerdy" to be interested in math and science. The geeks and nerds were going to be our salvation (and indeed they were-landing us on the moon in 1969).

So, depending on how the government (through the media) decides to "push" (propagandize if you will), that science/math/engineering is a good thing, it will indeed *be* a good thing.

yes, it is true that imports are less likely to have the "entitlement"
problem. many Americans think they deserve something just because they
breathe oxygen.

in fairness to Americans, they may have $80,000 in student loans.

>
> Dale, excuse my ignorance, but what is a simple Z converter?
>
> Greg

Hi Greg,
Because a short antenna has a very hi Z (almost entirely capacitive
reactive) it presents a poor match to 50 Ohm input receivers.
Either a hi turns ratio transformer or simple FET input preamp will do the
job nicely.
The Lowe HF-150 has a "whip preamp" built in- this is a Z transformer- and
other receivers may have the same.
The Lowe 20" whip does an absolutely outstanding job when combined with the
whip preamp.

The combination of the 2 are essentially an active antenna.

73,
Dale W4OP

to "whisper"

people who have high level clearances (TS compartmentalized) don't talk
about it.

in fact there are very few reasons to ever mention to anyone that you worked
for a def contractor, CIA, and so forth. bragging on Usenet about
classified stuff is bullshit!

Message-ID: <C0C6E6BC.1894F%gwkuddles@comcast.net>
Source record: 80615

Hello All:

I've been using Select-A-Tennas since the early '70s. I currently own two (used to own three--yes, they DO work), as well as an RS loop.

One thing I've always wanted to try but never had the time to mess with it, is to "gang" multiple loops. In other words, instead of using one SAT, use all three, plus the RS Loop.

Has anyone tried this? Are there any significant results from doing this?

I also own a KIWA Loop and a McKay-Dymek DA-7 Loop. I've tried situating the SAT near the DA-7, and have noted an increase in signal strength. I've not tried this with the KIWA, as I suspect that it would actually DEGRADE the performance of this phenomenal loop.

Anyone have any comments?

> were-landing us on the moon in 1969).

It also had an interesting little side effect, IIRC: the
banning of evolution from state textbooks got lifted
in the pursuit of science. The popular history is
that the Scope Trial's effect was like that found in
Inherit the Wind, but it's real effect was the opposite.

> So, depending on how the government (through the media) decides to
> "push" (propagandize if you will), that science/math/engineering is
a
> good thing, it will indeed *be* a good thing.

I don't really buy that, since until the Cold War ended,
there was a ton of money for basic science research.
With all that's been going on since the moon shot,
you'd think that science and engineering would have
had a better social standing than it did.

I'll freely admit that I grew up in the 70's and 80's, so
the big "beat the Ruskies" heyday of science and
engineering had passed me by, replaced by the
cynicism of the "military industrial complex."
Most people I knew who took AP science courses in
high school did so because they wanted to become
doctors, not engineers or scientists. As a freshman
in college, the often asked question after "Where are
you from?" was "What's your major?" If there was
a quicker way to turn a girl off than saying "Chemistry"
or "Physics" or "Computer Science" or "Math" or
"Geology", I haven't found it yet.

Considering it in total, I don't think that the Feds
saying that "science is cool" is going to change
a darn thing. Having the media say it isn't going
to change much either. You need to have parents
saying it to their kids when they're young, before
their friends (and pop culture) convince them
otherwise.

Ahh, thanks David. Good link, especially the part about the antique mall. I have one such mall here in town. I see a few old table radios there every time I stop by. I will look for one with a broken case. Hmmm, come to think, I just remember that I have an old wooden silvertone radio/record player - sans the record player. Maybe I will open her up tonight.

Actually, John's pretty much got it right. There will be one accusation after another until the opposition gets their way.

It's one reason why there were never charges brought in the Oxy issue: The prosecutor makes a lot of public accusations, creates a sensation, whips the media into a froth, and then milks it. As long as the matter never gets to court, the accused can never really clear his/her name. And hiring a high power, high profile attorney to defend is often perceived as an admission of guilt.

Limbaugh, by his popularity alone would be a highly desirable target. Add his political position to the mix, and the fact that his residence and broadcast facility is around Palm Beach, and you've got a ready made bull's eye suitable for framing.

In truth, you're right, there is no big deal. But look at the threads already in this forum alone....another incident, another accusation, and you've got tongues wagging, headlines blazing, USENet filled with more insubstantial discussion of the "Limbaugh Drug Problem." Even though, again, he's not been found guilty of a crime. Or even charged. Beat the drum long enough, and you can do enormous harm. If not to Limbaugh's popularity, at least to his credibility, and the credibility of his listeners.

That's why the results of the Grand Jury investigation were leaked to the press. Which, by the way, is a felony. And one that soundly pollutes the pool of jurors. But if the intent is to NOT file charges, pollution of the jury pool is a non issue in one sense, and an unofficial conviction in another.

It's a very well played strategy. And unless you are looking for the signs, you'll never see the game.

Most consumers of news don't care about details. They don't care about substantiation. In many cases, they don't even care about the facts. All that's of interest is a good story. Especially where there is scandal implied against a person of wealth and influence.

So, the strategy is to play into that: Make a public accusation, and involve law enforcement. Get the prosecutor to hold a press conference, and detail the accusation. Leak the details of an ongoing investigation to the press. Leak the results of any finding to the press, and once the public is fully engaged, release a torrent of leaks about subpoenaes, witness interrogations, and even the proceedings of the Grand Jury itself, and, especially, release any and all private materials uncovered. All the while, the accused can say nothing without as much as admitting guilt. (Most so accused don't have access to the press to rebut even if they were of a mind to.)

Then, agree to drop the matter, by calling it a "settlement."

The accused never has the opportunity to mount a defense. Never has the opportunity to present evidence, or rebut the charges. And the public never hears anything but the accusations, and that the matter was settled out of court.

The same strategy was used against Michael Jackson the first go around. Which opened the door for the big hit, and the trial that followed.

The same strategy was used against Richard Jewell, in the Centennial Park bombing. Everyone knows his name. And what he was accused of. Many know of the damage to his life that resulted from the public and relentless accusations. And yet, he was a bona fide hero.

But, how many know the name of Eric Robert Rudolph?

John's right. There will be more incidents. Accusations, press statements. Even if they're groundless. All that matters now is the implication of impropriety, and the accusation. Eventually, Limbaugh will be unable to recover.

The Liberal Communist
http://www.inthesetimes.com/site/main/article/2574/

George Soros has contributed $10 million
http://www.discoverthenetwork.com/individualProfile.asp?indid=977

On his trip to the United States this April, China's President Hu did not get a state dinner at the White House. He did, however, have two lavish dinners held in his honor by the business community, first in Seattle before the summit, and then in Washington DC after the summit. The Chinese Foreign Ministry referred to the Washington dinner as an event hosted by "12 friendly organizations" led by the Chamber of Commerce and the U.S.-China Business Council (USCBC). As USCBC President John Frisbie remarked afterwards, "The high turnout for the dinner demonstrates the strength of support for advancing U.S.-China relations through engagement".

Strategist Sun Tzu might see this situation and the opportunities it presented differently. As he advised, when making plans against an opponent, "if his men are harmonious, split them."

Scientists OK Gore's movie for accuracy

By SETH BORENSTEIN, AP Science Writer

WASHINGTON - The nation's top climate scientists are giving "An
Inconvenient Truth," Al Gore's documentary on global warming,
five stars for accuracy.

The former vice president's movie ï¿½ replete with the prospect of a
flooded New York City, an inundated Florida, more and nastier
hurricanes, worsening droughts, retreating glaciers and disappearing
ice sheets ï¿½ mostly got the science right, said all 19 climate
scientists who had seen the movie or read the book and answered
questions from The Associated Press.
...

But those who have seen it had the same general impression: Gore
conveyed the science correctly; the world is getting hotter and it is
a manmade catastrophe-in-the-making caused by the burning of fossil
fuels.

I sure do miss those two seventy feet tall pecan trees that I had cut down and ground up and hauled off yesterday.I miss the one that was in my front yard the most.Once in a while,I sit on that tree stump out there in my front yard.The front of my house faces due West.I am going to phone the Garden Mama www.gardenmama.com local Jackson radio talk show this week and ask her about fast growing shade trees.I want my front yard shade back.Those two pecan trees were getting to be too much a threat to my house.I paid $800.00 to have those two trees cut down yesterday.

Bob,
Antique Electronic Supply (http://www.tubesandmore.com/)used to carry
these in a package with several different kinds. I don't know if they
still have them.
I assume you are looking for the type with a hex hole through the slug.
What length?
I may be able to help you.
73,

One example is the Grove Mini-tuner (Tun3). It's pretty useless on HF
with reasonable length random wire, but it makes a OK indoor antenna
with about 10-15 feet of wire. Good during thunderstorm weather.
Or for getting anything at all on longwaves on a 50 foot wire.

Source record: 80665

Thought I had found the answer a week ago why my new E10 was not charging and a group member indicated that I had to press the charge on/off button but it was still not charging after 24+ hours!

I sent an email to Eton support explaining my issue. They replied that they had a batch of bad rechargeable batteries where the + side was incorrect in sizing and would not charge?? The bottom line is they are sending out new batteries no questions asked! That's great service!

If you have a Eton E10 and not tried re-charging your batteries you might want to check it out and be sure they are working correctly.

3900. Re: More on the Wellbrook loops

Newsgroup: rec.radio.shortwave
Date: 2006-06-28 01:47:37 UTC
From: Joe Analssandrini <analssandrinij@yahoo.com>
Message-ID: <1151459256.963510.49310@y41g2000cwy.googlegroups.com>
Source record: 80682

Dear Cuhulin,

No one other than Andy Ikin, the designer and manufacturer, actually knows what is inside the "electronics" portion of the Wellbrook ALA 330S and/or any of the other Wellbrook loop antennas. The electronics are embedded in a substance that destroys the innards if someone attempts to "reverse-engineer" them. I don't blame Andy Ikin for doing this. There is obviously a very small market for such antennas and he put a lot of his time and his effort in designing the antenna and the circuitry so why should he make it "easy" for someone to copy what he did?

Frankly, though his antennas appear relatively costly, they are far less expensive than the radios for which they are intended. Remember that the "best" antenna is really the cheapest - a LONG wire, but this is wholly impractical for most people and, even if one has the physical space to erect one of these, local electrical noise may overwhelm the signals the antenna picks up. Sure a Beverage is a low-noise passive antenna, but, for OPTIMUM results, say, on 49 meters, the antenna should be 49 meters long - 160 feet. While that's not too bad, figure out what it would be for MW! (At least 300 feet!) Most Beverages are even longer (MUCH longer) and, really, few of us have the space on our properties. And Beverages are highly directional; how are you going to rotate one when you want to listen to a particular station and/or null another one? Rotate a 150 - 1000-foot antenna? Forget it! So we're left with passive wire antennas (longwires, dipoles, slopers, etc.) which may prove unsatisfactory due to the "noise" issue, or we buy a Wellbrook!

Wellbrooks are also very low-noise (being loops, they are sensitive to the magnetic portion of the radio signal while being less sensitive to the electrical portion, where the noise is. And they are also highly directional - but it's easy to rotate a 3-foot loop! Just mount it on an inexpensive Radio Shack TV-antenna rotator and turn the knob when necessary.That' what I've done. Also, since the antenna can be mounted low, such as on a fence-post or deck railing, you can even rotate it by hand.

And they have Andy Ikin's proprietary electronics.

Due to the great increase in the population in my town-house community over the years, with computers, fluorescent lights, high-pressure sodium and/or mercury arc-vapor lights, Christmas lights, etc., etc., etc., I would have had to abandon the hobby had I not, being desperate, tried the Wellbrook ALA 330S based on its review in PASSPORT. Let me tell you - they are right on the mark. This antenna is, for me, almost

unbelievable - really a "miracle." I bought it for use with my AOR AR7030 Plus; I tried it also with my Grundig Satellit 800 and it made such a difference with that radio that I bought a SECOND Wellbrook ALA 330S! (You can even use it with a Sony ICF-SW7600GR - I've done it - though buying a Wellbrook specifically for a portable radio is a bit of "overkill," in my estimation.)

I'm certainly not telling you or anyone else how to spend your money. It may be that you don't have the particular problems at your location which the Wellbrook can overcome (limited space, lots of local electrical noise) and even the summertime increase in atmospheric noise may not bother you, depending on your listening habits - these are the conditions in which the Wellbrook(s) excel. Or the antenna may be beyond your financial abilities at the present time. I can only tell you my own experience and I will suggest that, if one has the major problems at his/her location such that I have described, and that person sincerely wants to minimize them so as to be able to hear shortwave broadcasts with a "top" receiver (tube or transistor), then the Wellbrook loop antennas can offer a level of performance unavailable with any other antenna, at least in my personal experience.

Best,

Joe

You make good points Mr. Maus, but, in Limbaugh's case, you could say he
asked for it. He's made a career of making public accusations of the

most vile type against anyone and everyone who doesn't share his particular views.

As far as I am concerned, he's got a right to proffer his opinion, right or wrong, on just about anything he pleases. What made him ask for 'it' was his hypocrisy. His drive to 'lock up all these druggies and throw away the key'.. or words to that effect. When it comes to being in possesion (or possible possession) of drugs that do not belong to him, then he has invited the scrutiny and the comments.

Probally epoxy glue covers certain parts in Wellbrook antennas.I am not interested in trying to reverse engineer them.I wouldn't know what I was doing anyway.I was only wondering what makes them so good.Wouldn't be any trick for me to reverse my non working Tiny Tenna though.All of the parts are right there in plain sight.

There's a couple of items wrong with that posting:
1. no headers
2. the age claimed is way off
3. supposedly posted in 2005. for me to be 31 last year I would have had to
have been born in 1976.

nice try, but no soap. yet another forge attempt by you or your sockpuppets.

>
> Steve

If you have a dialog going with the designer, see if he will tell you
what was changed when they went from positive ground to negative ground
on the amps.

Is there some advantage to a delta loop over a square loop?

I have a loop frame that allows for single turn up to 4 turns on an
8ft diagonal square. This uses the ALA-100 in the middle, so you have
two wires that have to be tilted at they need to reach the center of
the loop.

This is mostly a prototyping system to see how many turns you can use
without losing the top end (i.e. around 30Mhz). If the loop windings
are too close together, you lose gain at high frequencies, probably due
to capacitance between the wires. I haven't settled on a design yet,
but 3 turns spaced out about 8 inches does a good job. With that
antenna, some local BCB AM forces the 7030 to turn on it's attenuator.
It has enough gain to get AFN out of Hi at noon from the left coast. [I
wanted to hear Ed Schultz on AFN, just to see if the DOD really is
providing equal time.]

It is not generally known yet (but making the rounds), is that return flight left from Santiago (DR), a town known for child prostitution. The arriving flight was to Casa de Campo, a nice resort town.

Also kind of interesting was the flight to the DR left from Washington, not Palm Beach. So just who from DC made the trip with Limbaugh on N1EB?

The plane used was N1EB.

Hey assole, I have never said anything cleassified ! And you have no
idea, who I am !

---

sure he does. your some 15 old year, using his Mom's computer, w/ an AOL
dial up connection. but, gee, a senior-software-ee-with a high sec.c.-
would know how to spoof headers. Brian likes to play with teener trolls,
the
rest of use just send you to the bit bucket. (assole)? (cleassified) ?
one would think, a senior-software-ee-with a sec. c.- would know how to
use a spell checker, at least?

Oklahoma Joe.

Makes no difference - you have no idea, who I am,
and those with high-level clearance are certainly not,
"a dime a dozen". You EE nerds, without clearances,
can be outsourced, and ARE a "dime a dozen".

Yes, you are acting upset !

hilarious... shortwave and cats, oh yeah, much better hobby than hiphop... :-)

right, steve??? here kitty kitty kitty... pfffffffffffffft...

From: sdanie...@nyc.rr.com - view profile
Date: Thurs, Jan 5 2006 2:39 pm
Email: sdanie...@nyc.rr.com
Groups: alt.cats

I've decided to put my four cats on a diet of wet food only, as I think
it'll help me control their weight and keep them hydrated. My vet
agrees that wet food is a good idea.

In my hand is a 5.5 oz can of Science Diet turkey and giblets entree.
It says to give a 10 pound cat 1 1/3 to 1 3/4 of a can per day. That
seems like an awful lot of food to me. If the cats only eat twice a
day, they're going to have some big meals. If you put even half of one
of these cans in a dish, it's big pile of food! And some of my cats are
big, weighing far more than 10 pounds. Judging from the feeding
instructions on the can, they'd need at least a couple of cans per day.
I don't mind providing this much food for them, but can they honestly
eat that much food?

I started giving them wet food a couple of days ago and I've been
following the instructions. After each meal time, there's a ton of food
left over. So, again, I have to wonder about the feeding instructions
provided by the folks at Science Diet.

Can someone give me some guidance, please? My cats are big and fairly
senior, with the activity levels of senior cats. Many thanks.

Steve

****

i'll give you some guidance you cat loving freak (what kind of guy has

four fucking cats???), clean up some of that damn cat hair you nasty

mahfaka... :-)

It's almost impossible for me to masturbate anymore or to do anything
that involves use of my hands because I've lost all sensation in them.
You see, because my fingers lack a suitable skin sheath, they've been
rubbing against the surfaces of objects and the inside of gloves for my
entire life. As a result of this, by the time I was 20, I was really
only able to feel very sharp, hot or cold things. Now I'm afraid that
my hands are completely numb.

ahhhhh, i huwt steve's widdle fewings... just so you will know steve,
the laker ng is use to me mindfucking morons like you, many of my
bitches have followed me into the laker ng as if they were giving them
some type of revelation...

so theyve been there and done that... lol...

it is quite funny that you think that is actually going on the offensive...
if you think that doing what i have done to you is going to bother me,
this is really going to be fun... (they will just shitcan you when they get
tired of laughing at you steve)

ladies and gentleman meet my newest bitch...

steve is a gay guy with 4 cats, lives in new york, loves circumsized men,
but cant get a date... he is pretty frustrated, but funny nonetheless...

everybody say hi to steve... :-)

Yeah, right. Hand caught in the cookie jar hyping a BS article, so it must
be Inhofe's fault. Next time, accept AP for what it is and has been shown
to be on numerous occasions.

You get a lot of benefits from the left-wingers that inhabit most of the
print press; accept the detriments when they embarass you on occasion.

> feel better.

are you kidding me steve the cat woman??? in real life i have a family...
where on the other hand you make posts about a cat being your best friend...

youre way to fucking easy... you havent responded to any other hiphop posts since i started responding to you... all you want is some attention from something other than a cat... right now im giving it to you (as they would say in rmhh - NO HOMO :-) and youre as pleased as punch... you are smitten and have fallen in love with me... think not??? no posts by you to anybody other than me since last night steve the cat woman???

i tend to have that affect on morons for some reason or another and then for the rest of their usenet lives they are consumed with me... :-) you know, like you are now... but it gets a bit different when you start to watch me respond to others but not to you...

i just hope you wont hang yourself... it would be funny knowing those four cats will be jumping up off the floor to take bites out of you because they dont have any food to eat... i mean shit, nobody will probably even come to your apartment for months, and then only because you havent paid your rent... well, maybe a bit before then... you will probably start to stink really bad after being dead for a few weeks...

anyway, enjoy...

Bozy, just wait till I tell your father about this! Now come home. I
need the minivan to go grocery shopping.

Bozy's Mom

well you are pretty transparent, im pretty sure everybody could
figure that out about you...

lonely guy with 4 cats and nobody to talk too... lol... its not
brain surgery... the fact that you respond to no one else other
than me now, while i keep on responding to everyone else is probably
even easy for you to figure out...

good luck with that rope... :-)

Yes, but they came in manufacturer's packaging; not with someone
else's name attached to a pill bottle. When you're on probation,
you've got to watch what you carry through customs.

The AP isn't anything other than an agreement between newspapers to
share resources.

The Radical Right has a hard-on for the free exchange of ideas. I'd
rather have lots of viewpoints, and an occasional clam, than a
carefully crafted POLITICALLY CORRECT message.

In other words you're just interested in BS.

Now go take your meds, 'tard boy, and try to get a grip on reality.

Blogger Joe Cannon picked up on this,
http://cannonfire.blogspot.com/2006/06/why-did-rush-limbaugh-visit-epicenter.html
and "Rush's" cryptic comment,"I had a great time in the Dominican
Republic. Wish I could tell you about it.",
http://cbs4.com/topstories/local_story_177194808.html
does nothing to dispel those suspicions.

lol... you must be kidding, apparently me talking about the real steve isnt working so well... again, the real steve is a lonely gay guy who cant get a date, has four cats, and for some strange reason likes discussing circumcission with guys (we can probably figure that one out)...

on top of that, as my new bitch, i have you posting threads with my name in all capital letters, and in this very post youre wearing my handle like a dress... :-)

not very liberal at all if you ask me, right on the money...

well since you keep begging i will do the readers of rec.music.hip-hop,
asbnll, and rec.radio.shortwave a favor and shitcan you in order to put
you out of your misery...

although i know this is probably the most contact youve probably had
with a person since grammar school, i know that even for you getting
dissed was better than not being acknowledged... feel free to change your
name like most morons do in order for me to see their posts afterward,
you wont want too, but you wont be able to help yourself...

good luck and for the love of krishna, PLEASE STOP FUCKING YOUR CATS!!!

adios... :-)

One of these days I might actually break down and buy the ALA 100. The fact that it gives you the freedom to design your own loop is a huge plus in my view. When I bought my ALA 330S, I was so short on space that experimenting with loops was pretty much out of the question. The 330S's small size was a big selling point. Now that my circumstances have changed, the ALA 100 is starting to look good. Of course, I could also try one of those mini-whips discussed recently, if only because the purchase price comes to less than $60.

She is a female dog. www.cattledog.com Has her bluejeans on all
the time.She isn't studying any fire plugs.

Cell Phones Cook An Egg. www.rense.com
Set up an egg in a porcelain cup and two cell phones on either side of
the egg.Phone both cell phones and keep them going.About 25 minutes
later,the egg starts getting hot.

Everywhere I go when I go out shopping and even my neighbors constantly
have those cell phones (egg cookers) glued to their ears.Imagaine what
that is doing to those dummies heads!

Red Fox,,,, ,boy!,now what did I tell you about that cell phone!
I had a cell phone about seven years ago,I almost never used it or took
it anywhere with me.It was only a novelty thingy for me.I am glad I let
my two years cell phone contract with Bell South drop.

You know...I was wondering that myself this morning, as both
domestic, and shortwave news programs were interviewing both Israeli and
Palestinian citizens on the ground...and did I hear this
correctly...that Israel flew a warplane over the residence of the
President of Syria?

That fuse is getting mighty short. And burning awfully hot.

I'm suspecting someone's about to encounter those Iraqi WMD's.

I'm sure you think you are entertaining, but really I'm getting tired
of your nonsense.

For those who are really interested, the older generation Wellbrooks
used a positive ground, while the later generation uses a negative
ground. It may be that the first generation circuitry used jfets, while
the second generation use SiGe.

>>>>>>> new medication?
>>>>>> Actually, John's pretty much got it right. There will be one
>>>>>> accusation after another until the opposition gets their way.
>>>>>>
>>>>>> It's one reason why there were never charges brought in the Oxy
>>>>>> issue: The prosecutor makes a lot of public accusations, creates a
>>>>>> sensation, whips the media into a froth, and then milks it. As long as
>>>>>> the matter never gets to court, the accused can never really clear
>>>>>> his/her name. And hiring a high power, high profile attorney to defend
>>>>>> is often perceived as an admission of guilt.
>>>>>>
>>>>>> Limbaugh, by his popularity alone would be a highly desirable target.
>>>>>> Add his political position to the mix, and the fact that his residence
>>>>>> and broadcast facility is around Palm Beach, and you've got a ready made
>>>>>> bull's eye suitable for framing.
>>>>>>
>>>>>> In truth, you're right, there is no big deal. But look at the threads
>>>>>> already in this forum alone....another incident, another accusation, and
>>>>>> you've got tongues wagging, headlines blazing, USENet filled with more
>>>>>> insubstantial discussion of the "Limbaugh Drug Problem." Even though,
>>>>>> again, he's not been found guilty of a crime. Or even charged. Beat the

>>>>>> drum long enough, and you can do enormous harm. If not to Limbaugh's
>>>>>> popularity, at least to his credibility, and the credibility of his
>>>>>> listeners.
>>>>>>
>>>>>> That's why the results of the Grand Jury investigation were leaked to
>>>>>> the press. Which, by the way, is a felony. And one that soundly
>>>>>> pollutes the pool of jurors. But if the intent is to NOT file charges,
>>>>>> pollution of the jury pool is a non issue in one sense, and an
>>>>>> unofficial conviction in another.
>>>>>>
>>>>>> It's a very well played strategy. And unless you are looking for the
>>>>>> signs, you'll never see the game.
>>>>>>
>>>>>> Most consumers of news don't care about details. They don't care
>>>>>> about substantiation. In many cases, they don't even care about the
>>>>>> facts. All that's of interest is a good story. Especially where there is
>>>>>> scandal implied against a person of wealth and influence.
>>>>>>
>>>>>> So, the strategy is to play into that: Make a public accusation, and
>>>>>> involve law enforcement. Get the prosecutor to hold a press conference,
>>>>>> and detail the accusation. Leak the details of an ongoing investigation
>>>>>> to the press. Leak the results of any finding to the press, and once the
>>>>>> public is fully engaged, release a torrent of leaks about subpoenaes,
>>>>>> witness interrogations, and even the proceedings of the Grand Jury
>>>>>> itself, and, especially, release any and all private materials
>>>>>> uncovered. All the while, the accused can say nothing without as much
>>>>>> as admitting guilt. (Most so accused don't have access to the press to
>>>>>> rebut even if they were of a mind to.)
>>>>>>
>>>>>> Then, agree to drop the matter, by calling it a "settlement."
>>>>>>
>>>>>> The accused never has the opportunity to mount a defense. Never has
>>>>>> the opportunity to present evidence, or rebut the charges. And the
>>>>>> public never hears anything but the accusations, and that the matter was
>>>>>> settled out of court.
>>>>>>
>>>>>> The same strategy was used against Michael Jackson the first go
>>>>>> around. Which opened the door for the big hit, and the trial that followed.
>>>>>>
>>>>>> The same strategy was used against Richard Jewell, in the Centennial
>>>>>> Park bombing. Everyone knows his name. And what he was accused of. Many
>>>>>> know of the damage to his life that resulted from the public and
>>>>>> relentless accusations. And yet, he was a bona fide hero.
>>>>>>
>>>>>> But, how many know the name of Eric Robert Rudolph?
>>>>>>
>>>>>> John's right. There will be more incidents. Accusations, press
>>>>>> statements. Even if they're groundless. All that matters now is the
>>>>>> implication of impropriety, and the accusation. Eventually, Limbaugh
>>>>>> will be unable to recover.

Ghost of Tokyo Rose

Anyone who remembers anything about World War II or has studied anything about World War II will understand and remember that during World War II, the Japanese developed a way to demoralize the American forces. The Japanese psychological warfare experts developed a message they felt would work.

They gave their psychological warfare script to their famous broadcaster "Tokyo Rose" and every day she would broadcast this same message packaged in different ways, hoping it would have a negative impact on American GI's morale.

What was that demoralizing message? It had three main points:

1. Your President is lying to you.
2. This war is illegal.
3. You cannot win the war

From Yamamoto to Al-Zarqawi

The aircraft struck with precision. It was morning and the intended target was caught by surprise. For months, intelligence had gathered data that eventually led the American pilots to their prized target. The man they killed had masterminded several attacks, including one that killed a large number of American military personnel. He had met a violent death, and there was rejoicing among U.S. military personnel and politicians upon confirmation of his demise. The above appears to be an account of the recent airstrike that eliminated Abu Mussab al-Zarqawi. In fact, it is not.
...
Somewhere between Buin and Baqubah, a significant portion of America's elites, i.e., opinion writers, reporters, Democratic Party leaders, entertainers, intellectuals, college professors and their students lost their way. It remains to be seen if a majority of Americans will follow them down the path to ruin.

The National Academy of Sciences' "Surface Temperature Reconstructions for the Last 2000 Years" noted in their summary that there were "relatively warm conditions centered around A.D. 1000 (identified by some as the 'Medieval Warm Period') and a relatively cold period (or 'Little Ice Age') centered around 1700." The hockey stick constructed by Mann and his colleagues purported to show temperatures in the Northern Hemisphere remained relatively stable over 900 years, then spiked upward in the 20th century.

"Today's NAS report reaffirms what I have been saying all along, that Mann's 'hockey stick' is broken."

"This report shows that the planet warmed for about 200 years prior to the industrial age, when we were coming out of the depths of the Little Ice Age where harsh winters froze the Thames and caused untold deaths.

"Trying to prove man-made global warming by comparing the well-known fact that today's temperatures are warmer than during the Little Ice Age is akin to comparing summer to winter to show a catastrophic temperature trend."

Chinese Spies Among Us - Hillary Clinton Removes Chinese Spy Essay From DNC Site

[Click all links to understand the complex web of Democratic Party propaganda lies and deceit.]

Ronald Montaperto, former Defense Intelligence Agency analyst, pleaded guilty to charges of passing secrets to the Communist Chinese People's Liberation Army.
...
Montaperto's works until recently [a few days ago] appeared on a DNC Web site right under the display of Democrat leaders such as Hillary Clinton. The DNC has since removed the essay and all links to Montaperto. However, a copy of the work, taken right from the DNC page, was made available to this reporter...

Much more http://www.newsmax.com/archives/articles/2006/6/27/204007.shtml
also http://www.washingtontimes.com/national/20060623-120347-7268r.htm

Ronald N. Montaperto is an author of many Pro-Communist Chinese propaganda papers, essays and books.

[cut & paste link]
http://www.amazon.com/exec/obidos/search-handle-url/index=books&field-author-exact=Ronald%20N.20Montaperto&rank=-relevance%2C%2Bavailability%2C-daterank/104-3144038-0835939

http://www.google.com/search?hl=en&q=Ronald+N.+Montaperto&btnG=Google+Search

Who is Ronald N. Montaperto?

Ask the "Democratic Leadership Council" & "PROGRESSIVE Policy Institute":

http://www.ppionline.org/ndol/ndol_ci.cfm?kaid=450004&subid=900021&contentid=1293

OOPs! Looks like Hillary Clinton removed Montaperto's Pro-Communist China essay just in the last few days. Ah, but we still have the Google archives! But for how long considering Google's willingness to censor their search engine in Communist China? Have a look while you still can:

Assessing the Chinese Military Threat by Chinese Spy Ronald N. Montaperto for the "Progressive Policy Institute" and "Democratic Leadership Council" lead by no other than Hillary R. Clinton.

[cut & paste link]
http://64.233.167.104/search?q=cache:uFbrlz__Oc0J:www.dlc.org/ppi/ppi_ci.cfm%3FknlgAreaID%3D450004%26subsecID%3D900021%26contentID%3D1293+Ronald+N.+Mont

aperto+Democratic+Leadership+Council&hl=en&gl=us&ct=clnk&cd=6

"THE NEW DEMOCRAT CREDO:
In keeping with our party's grand tradition, we reaffirm Jefferson's belief in individual liberty and capacity for self-government. We endorse Jackson's credo of equal opportunity for all, special privileges for none. We embrace Roosevelt's thirst for innovation and Kennedy's summons to civic duty. And we intend to carry on Clinton's insistence upon new means to achieve progressive ideals.... "

YEAH RIGHT! Just Like Dr. DaviD - uh huh, sure!

Chair of the Democratic Leadership Council's American Dream Initiative: U.S. Senator Hillary Rodham Clinton
http://www.dlc.org/ndol_ci.cfm?kaid=86&subid=85&contentid=893

Its founder and still-president is Will Marshall III, co-founder and first Policy Director of the Democratic Leadership Council. A longtime friend of Clinton and a supporter of Al Gore...

AL GORE - The Global Warming specialist for the Communist Chinese. China is host to the most polluted cities in the world and is the most polluting country in the world when you calculate their CO2 emissions relative to GNP.

During the collapse of the Soviet Empire, Mikhail Gorbachev promoted the so-called "Third Way" as an alternative to free markets. This new way of governing would be neither capitalist nor communist, but something in between. In a similar vein, President Clinton said in his 1998 State of the Union address, "We have moved past the sterile debate between those who say government is the enemy and those who say government is the answer. My fellow Americans, we have found a Third Way." This Third Way calls for business and government to join hands as "partners." As Clinton told the Economic Club of Detroit in February 2002, "We are working with business to use technology, research and market incentives to meet national goals. Some have called this political philosophy the Third Way." In short, Big Business would own the economy (as under capitalism), while Big Government would run it (as under socialism). Corporations would be persuaded to comply with government directives through subsidies, tax breaks, customized legislation, and other special privileges.

http://www.discoverthenetwork.com/groupProfile.asp?grpid=6901

The Democratic Party has been high-jacked by Dr. DaviD and his NEW Left-wing/Liberal/"Progressive"/Socialist/Communist REVOLUTION!

ROTFLMAO!

Has the No-dong-B/Shahab-4 Finally Been Flight Tested in Iran for North Korea?

The North Korean, missile recently reported flight tested in Iran, is the land mobile 12 meter long No-dong-B which is based on the soviet era liquid propellant SS-N-6/SS-NX-13 submarine launched ballistic missile (SLBM) . click here ... It was said to have been launched on January 17, 2006 in Iran click here ... for the benefit of North Korea and Iran . Added to the implications of that alone is that as long expected and predicted by this analyst Iran has apparently now become the nation to do some of the flight testing of the on going North Korean ballistic missile and space booster development programs... Thus the trends seem to indicate there is every reason to believe that Iran has the benefit of the design work and testing done in the DPRK (North Korea) and Pakistan.

http://www.globalsecurity.org/wmd/library/report/2006/cpvick-no-dong-b_2006.htm

---

All of these technologies were transferred initially from China to A. Q. Khan of Pakistan who perfected them for Pakistan who in turn transferred the design secrets of the technology for the production of these weapons to the North Koreans and Iranians years ago. While Pakistan did get the liquid propellant missile technology from North Korea as did also Iran, the Solid Propellant missile technology came in via both China AND SOUTH AFRICA to Pakistan and Iran.

i would say beams and logs are better than long wires. of course, high gain
rhombics are nice.

> Sure a Beverage is a low-noise passive
> antenna, but, for OPTIMUM results, say, on 49 meters, the antenna
> should be 49 meters long - 160 feet.

well, 2 waves is a typical beverage. that's about 1000 feet on 160 meters.
optimally, you would have two spaced Beverages.

> While that's not too bad, figure
> out what it would be for MW! (At least 300 feet!)
>Most Beverages are
> even longer (MUCH longer) and, really, few of us have the space on our

> another one?

most people who use Beverages aim one at Europe and other areas of interest.
you can't rotate them, but sometimes you can steer the null.

> Rotate a 150 - 1000-foot antenna? Forget it! So we're left
> with passive wire antennas (longwires, dipoles, slopers, etc.) which

log periodics are big on 49 meters, but mechanically possible.

Two of the firms, China Great Wall and CPMIEC, are directly owned and operated by the Chinese government. Both firms have repeatedly been the subjects of reprimands since the early 1990s. Exports to China Great Wall were suspended in 1992 because of its transfer of nuclear tipped M-11 ballistic missiles to Pakistan.

However, the Clinton administration allowed the company to purchase advanced U.S. technology such as computer, satellite launch systems, and space electronics. Great Wall was implicated in illegal exports during the 1990s and included in charges filed against Hughes for the illegal export of advanced missile technology such as nose cone designs.

The Clinton administration was very aware that Great Wall was part of the Chinese military. According to a Commerce Department document on Chinese military defense industries, the People's Liberation Army strategy is to wage and win a war against America.

"[Chinese] Civilian resources should be transferable to military industries for weapons production," states the document, titled "Swords Into Market Shares," which was forced from the Clinton administration by a Freedom of Information lawsuit.

"This is not only to prepare for war, but also to use trading firms such as NORINCO (China North Industries Corporation) and China Great Wall Industry Corporation to acquire foreign technologies, such as electronics, for military as well as economic modernization."

TONIGHT on WGN Radio - Murder by the Communist Chinese Party

A Look at the Falun Gong

What is the Falun Gong? Founded in 1992 by Li Hongzi, it is a spiritual movement whose adherents seek renewal through meditation and exercise, but it has gained international attention and controversy because of its persecution by the Chinese government, which has labeled it a dangerous cult. Tonight, we will look inside this religion with some of its practitioners and examine its role in China today. Our guests will be SEN YANG, chairman of the Mid-USA Falun Dafa Association, STEPHEN GREGORY, opinion editor for the Epoch Times, http://www.theepochtimes.com/index0.html and WENYI WANG, a former researcher at Mt. Sinai hospital and Falun Gong practitioner since 1996 who was recently arrested for interrupting a White House appearance by Chinese president Hu Jingtao.

Tonight on WGN Radio AM 720kHz at 9 p.m. CDT [0200 UTC, Thursday]
http://wgnradio.com/shows/ex720/index.html

LISTEN LIVE online here http://wgnradio.com/listen/index.htm

CONFIRMED BY BBC - Israel Overflew Damascus airspace at 2200 UTC:

www.jpost.com

http://english.aljazeera.net/HomePage

Syria condemns Israeli warning flights
Wednesday 28 June 2006 6:09 PM GMT
Israel says it wants to send a message to al-Assad

Israeli warplanes have flown over one of the Syrian
president's palaces to warn Damascus against supporting
Palestinian fighters who abducted an Israeli
soldier, the Israeli army says. An Israeli army spokeswoman
said the planes early on Wednesday flew over
Bashar al-Assad's palace near the city of Latakia,
"because the Syrian leadership supports and harbours
terrorist leaders, among them Hamas, the kidnappers of the soldier".

Syria said its air defences opened fire on Israeli
warplanes that overflew the country, forcing them to flee.

State-run Syrian television said two Israeli planes
flew near Syria's Mediterranean coast but did
not mention Israel's claim that the planes swooped
low over the president's summer residence.
"The overflight by two Israeli planes near the Syrian
shores is an aggressive act and a provocation," the
television news said, quoting an unindentified information ministry
official.
Israeli television reports confirmed the overflights, early on
Wednesday morning, were to have created several sonic booms.
Israeli television reports said four planes were
involved and al-Assad was home at the time.

The flyover was the second time Israel has buzzed
al-Assad's summer palace. In August 2003, warplanes
reportedly flew so low that windows in the palace shattered.

That's not always true. Air America is almost went under a number of
times. Money stolen from boys scouts, and money from Michael moore are all
that's keeping it a float.

4083. OT A look at lawyers

Newsgroup: rec.radio.shortwave
Date: 2006-06-29 04:27:28 UTC
From: m II <none@telus.net>
Message-ID: <QEIog.83449$I61.78535@clgrps13>
Source record: 80916

A very successful lawyer parked his brand new Lexus in front of the office, ready to show it off to his colleagues. As he got out, a truck came along too close to the curb and completely tore off the driver's door.

Fortunately, a cop in a police car was close enough to see the accident and pulled up behind the Lexus, his lights flashing.

But, before the cop had a chance to ask any questions, the lawyer started screaming hysterically about how his Lexus, which he had just picked up the day before, was now completely ruined and would never be the same, no matter how the body shop tried to make it new again.

After the lawyer finally wound down from his rant, the cop shook his head in disgust and disbelief. "I can't believe how materialistic you lawyers are," he said. "You are so focused on your possessions that you neglect the most important things in life."

"How can you say such a thing?" asked the lawyer.

The cop replied, "Don't you even realize that your left arm is missing? It got ripped off when the truck hit you!"

"OH, MY GOD!" screamed the lawyer.

"MY ROLEX!"

(author unknown by me..)

The Wellbrook electrically small shielded loops are only sensitive to
the magnetic field component near or far field.

Far field signals and noise are EM waves where that essentially have the
same energy in the electric and magnetic fields and that's why signal to
noise on the far fields is not improved over electric field sensitive
antennas like dipoles.

Nearby noise sources tend to have their electric induction fields spread
out farther than the magnetic induction fields so generally a small loop
will pick up less local noise than a small dipole.

Tale of 2 Receivers (DE1103'S)

Reading all the good and some bad blurps on the WEB concerning and comparing the DE1103 I could not resist and so I ordered 2 direct from China. I decided my toys including an FRG7 was crowding my bedroom SWL area and wanted a smaller solution without giving up all the performance that I had grown accustomed to with the frog.

Received both units after 10-12 days. Fired up the first unit and was pleasantly surprised that the DE1103 kicked ass. Expecting the same , from receiver 2, I fired it up and immediately realized that I was getting 2 vastly different driving experiences.

The first receiver provided a pleasant highly admirable accounting; clean crisp tuning, good rejection, excellent sensitivity...this was a great receiver.

The second receiver was crap-o-la.

I thought that I had read referrences to chugging, PLL drop out and resultant agc surging while tuning, while I was researching the WEB. Guess what it exists in some of the units...I got one.

This is to post notice that if you are experiencing this characteristic while tuning any of the AM bands its not what the DE1103 can and should deliver. Something is screwed up on my receiver #2... alignment???....PCB trace/pad issues???I don't know yet but wouldlove tofind out if anyone else has explored root cause on this issue. If I had just ordered the one unit and received the good receiver, receiver #1, I would have declared, as many have, the excelence of the DE1103...if I had received receiver #2 I would calledit a below average implementation of dual-conversion receiver design.

What did I write that would indicate the government leakers should not
be gone after? A rational person would assume that I would want them
prosecuted as much as the NYT.

4100. DE1103 Chugging PLL drop-out AGC bumping

Newsgroup: rec.radio.shortwave
Date: 2006-06-29 07:20:22 UTC
From: Gene <GSILVERNAIL@VERIZON.NET>
Message-ID: <1151565622.805795.114380@b68g2000cwa.googlegroups.com>
Source record: 80932

Reading all the good and some bad blurps on the WEB concerning and comparing the DE1103 I could not resist and so I ordered 2 direct from China. I decided my toys including an FRG7 was crowding my bedroom SWL

area and wanted a smaller solution without giving up all the performance that I had grown accustomed to with the frog.

Received both units after 10-12 days. Fired up the first unit and was pleasantly surprised that the DE1103 kicked ass. Expecting the same , from receiver 2, I fired it up and immediately realized that I was getting 2 vastly different driving experiences.

The first receiver provided a pleasant highly admirable accounting; clean crisp tuning, good rejection, excellent sensitivity...this was a great receiver.

The second receiver was crap-o-la.

I thought that I had read referrences to chugging, PLL drop out and resultant agc surging while tuning, while I was researching the WEB. Guess what it exists in some of the units...I got one.

This is to post notice that if you are experiencing this characteristic

while tuning any of the AM bands its not what the DE1103 can and should

deliver. Something is screwed up on my receiver #2... alignment???....PCB trace/pad issues???I don't know yet but wouldlove tofind out if anyone else has explored root cause on this issue. If I had just ordered the one unit and received the good receiver, receiver #1, I would have declared, as many have, the excelence of the DE1103...if I had received receiver #2 I would calledit a below average

implementation of dual-conversion receiver design.

4101. (OT) : Hey - What's That Spy Doing In My Wonton Soup ?

4105. (OT) : Al Gore and Global Warming - An Now You Know The Rest Of The Story :o)

Newsgroup: rec.radio.shortwave
Date: 2006-06-29 08:35:40 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151570140.469782.297660@j72g2000cwa.googlegroups.com>
Source record: 80937

It all started long ago with Al Gore saying something in a rain forest
. . .

Actually Al Gore got his Ideas on Global Warming from
giving a Speech in a Rain Forest {Where It All Began}
Long Long Ago and Far Far Away !

During the Speech a Warm {Almost Hot} Yellow Rain
Showered Down on Al Gore as He Spoke and He noticed
that it had an Acid Taste and Native People were running
for Cover - He Sensed Danger in the Environment and Feared
that the World was coming to the End.

That's how Al Gore had "His Vision" of GLOBAL WARMING !

OBTW - Everyone Else Saw the Troop of Monkeys
in the Trees Except Al Gore.

and now you know the rest of the story :o) ~ RHF {ibid}

4106. (OT) : DaviD - "Al Gore" Is Two Words -and- I Have Only Two Words To Say To You "Hockey Sticks" !

Newsgroup: rec.radio.shortwave
Date: 2006-06-29 08:44:19 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151570659.558542.213500@d56g2000cwd.googlegroups.com>
Source record: 80938

(OT) : DaviD - "Al Gore" Is Two Words -and-
I Have Only Two Words To Say To You "Hockey Sticks" !

For One and All,

World Wide {Global} Climate Change Cycles
Would be a better description of what many Scientist
are observing and trying to draw inferences from . . .

The Idea {Hyperbole} of "Global Warming" and the reality of the current

World Wide {Global} Climate Change is Politically Motivated "SCIENTISM"

and not a proven 'Scientific Fact' [.]
http://groups.google.com/group/rec.radio.shortwave/msg/cbd2dc536f938264

"The `Hockey Stick': A New Low in Climate Science"
- by John L. Daly
HOCKEY STICK => http://www.vision.net.au/~daly/hockey/hockey.htm

Some Scientists with a Political Agenda Call It
[The Evil] "Global Warming" and endeavor to Blame this
Cyclical 'Warming Trend' on Mankind, Industrialization,
Modern Western Civilization and Naturally the USA.

Other Scientist look to the History Records as recorded by Nature
in the Earth, Snow, Ice and Plants and say what we see is a Natural
Cyclical Trend that has very little (if nothing) to do with Mankind,
etc, etc, etc.

The Sun's Cycle and the Earths own Cycles are what we are seeing
and Mankind can only go with the flow (adapt or die).

Note - Recent evidence suggests that Mega-Volcano-Eruptions
from both Continental and Under-Water Volcanoes can bring-on
an Ice Age in as little as Twenty Years (Yes 20 Years).

The Truth is that we have World Wide {Global} Climate Change Cycles
-vice- The Liberal Political People Scaring HeadLine of "Global
Warming"

DaviD - I only have two words to say to 'you'
"hockey sticks, Hockey Sticks. HOCKEY STICKS !"
Waving-My-Arms about in the Air and Bulging-My-Eyes-Out :o)

Hello Everyone - Find and Environmental Wacko and have Great Fun
being able to Scream and Repeating these Two Words at them :o)

4110. Grove TUN3 Mini-Tuner - Good "Short" In-Door Antenna Tuner

Newsgroup: rec.radio.shortwave
Date: 2006-06-29 09:37:48 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151573868.838357.140470@d56g2000cwd.googlegroups.com>
Source record: 80943

MZ,

Yes - The Grove Mini-Tuner "TUN3" does make a good
Antenna Turner for those bad weather days with a
relatively 'short' indoor Antenna.

A Mini-Slinky {Metal Spring Thingee} Dipole Antenna
12-Foot-to-the-side (24 Ft. T2T) that is set-up in the
Corner of a Room works well with the Grove TUN3
Mini-Tuner.

There have always been two versions. I special-ordered a neg ground (the UK version) for the US so that I have only neg ground devices on my radios.

Apparently the wall wart for the US puts out pos ground and so the antenna amp is wired to expect that, unless you say otherwise and use your own 12 source.

Only the power plug is affected. All versions use neg ground on the coax going to the loop.

It would more properly be called positive tip in the power plug, since neither choice is really a ground at that point; it's just a reversal of the wiring of the plug, which I didn't want floating around in the rat's nest of wires I maintain.

The Future Of Radio
Exploring the future of radio and wireless technologies. Edited by
Harry Helms
May 12, 2006

Shortwave Broadcasting Meets Reality

"The era of shortwave radio broadcasting is surely, inexorably drawing to a close. Even that starstruck eleven year old boy inside me-----the one enthralled by shortwave radio almost 43 years ago----can see that."

"With the huge decline in tropical stations, DRM splatter in other areas, religious broadcasters appearing in the 60-90 meter bands, relays...it is just not the same for me anymore. However, I have wonderful memories from those years that will never be forgotten."

"Voice of the Andes' Airs Final English Broadcast on SW".

"About 13 years ago, one of our HighText/LLH employees joined the Peace Corps and was going to be posted to Botswana. My going-away present to her was a Grundig portable shortwave radio with digital tuning. I even pre-programmed it with frequencies for the VOA, BBC, Radio South Africa, etc. In a letter, I asked her how she was enjoying listening to shortwave. Her reply was a sheepish admission that she never listened to shortwave; there was too much fading, interference, and the audio was awful. Instead, she preferred listening to AM and FM, and had good reception of the local VOA and BBC relays as well as South African AM stations, especially in the evenings. I don't think her story is unique, even among the permanent residents of Botswana and other areas that we supposedly need to serve by shortwave."

"The decline even from a decade ago is remarkable, and from two decades ago it is shocking (check through an old copy of World Radio Television Handbook if you doubt this). There was a time when the 4700 to 5000 kHz range would be filled with broadcasters from Central and South America in the evening hours, African broadcasters in late afternoons and after midnight, and with Pacific and Indonesian stations around dawn. Now you hear more background noise and utility stations in that range than regional and national broadcasters. And where have those listeners gone? Mostly to recently-opened stations on AM and (especially) FM."

Remember folks - "keep thinking positively about your Eaton Shit E1s" !

The BBC has closed down many short-wave services in order to afford a new Arabic television service to the mid east. It has reviewed its now-defunct European short-wave services in an interesting program including the pre WWII period, wartime broadcasts, cold war programs, and East European independence. The program includes audio clips and interviews and gives an historical perspective of the rise and fall of short-wave broadcasting that is especially interesting to those of us who lived through the events. The BBC site is <bbc.co.uk> Look for "London Calling" in the index. Requires "Real Player" to listen in streaming audio.

Due to the sensative nature of the operation, the Israeli media was
quiet about it until Wednesday night. While the Jerusalem Post and Haaretz
had some coverage, if I wanted anything close to real time, I had to watch
CNN, Sky or the BBC. Sky, as always, had the best coverage.

As for Syria, Israel did NOT expand the opertation there. BEFORE it started
they "buzzed" Asad's summer home just to remind him that as long as he
supported terrorism, he was not untouchable.

Geoff.

The R4245 is currently at $1026 with about 14 hours to go while the latest R7A is at $1070 (Item # 190001582867) with about 2
days to go.

It will be interesting to see which one fetches the highest amount. My guess would be the R4245, but one never knows how it
will all end up.

Hey, thanks for the link that leads to this phony's resume. I used to live about half a mile away from KKHJ, the radio station that he claims to have managed in Hollyweird ten years ago.

That explains how he knows so much about the area.

The 1990's was when Hollyweird was really decaying and becoming gang-infested and overrun with Mexicans. The station was near a rundown movie theater called "Giant" where I paid a buck to watch three movies once and my feet stuck to the floor, and the Salvation Army, shelters for runaway teens and the L.A. Free Clinic and a tattoo parlor and a Latino nightclub are all right there.

I think there may be some stars of the Hollywood Walk of Fame that far east on Hollyweird Boulevard, but, in general, it's a pretty seedy immigrant neighborhood where there was no reason for normal people to stop.

Does your home have PEX water piping and water fittings? Do you have any idea of how much it cost to get a plumber to repair a leak? The PEX water pipe has a small leak right there at the water faucet in my front yard.(it's my fault,I accidently snagged the pipe with the front wheel of my old van when I was pushing my 1942 Willys Jeep around to my back yard)

Friends,do you like/prefer to do your own home plumbing repairs and save money? (especially with PEX water piping and fittings,if you don't own the proper crimping tool and rings,you can't do it) A National plumbing company quoted me a price of $125.00. (plus Mississippi Rip Off sales taxes) I am fixin to order a combination 3/8,1/2,3/4 crimping tool.(about $42.00) from www.mobilehomerepair.com/Order3.html and repair that □□ □□□÷÷´leak myself.

Only trying to save y'all some money in case you have PEX water piping and fittings. (I son't live in a trailer or mobile home)

And, of course, it's always good to "root against" U.S. initiatives even if it leads to more deaths. After all, patriotism and democratic governments abroad come second to making Bush look bad. Let's keep our prioriites straight, right? I'm sure the women of Afghanistan appreciate your concern.

Casa de Campo is not a resort town... it is a resort with its own airstrip.
There is no town called Casa de Campo.

The commercial airport serving Casa de Campo is La Romana (LRM) which also
serves resorts like Punta Cana.

And departing from Santiago is not unusual, since there is no place in the
DR that is very far from any other part. Casa de Campo is strictly a strip,
with no aviation services. So the plane and pilot may have gone to Santiago,
which is NOT know for child prostitution, so the plane could be in a hangar
or serviced or fueled more securely. It would be more likely that it went to
LRM, though, as that is the commercial airport nearest to Casa de Campo.

Jeeze, every traveler I know puts prescription medications for travel in a pill organizer, smaller bottles or something similar. We do not take the original bottle as that shows the refill information, etc., that we do not want to lose; we also do not want to take 30 days' supply on a 4 day trip.

I have done this for over 45 years of international flying and never ever had medications checked in several million flown miles.

A few years ago,I was driving back home from visiting my old buddy and his folks and there was a Sheriffs deputy writing a ticket to somebody in a car.The deputy had his car parked too close to the edge of the highway and his car door was wide open,blocking the right lane of that section of Highway 49 South.I had to stop my van and wait for an oncoming car to pass on by so I could get in that other lane and go on around.If I haden't been paying attention,I (or anyone else) could have ripped his car door off with my van.That sure was a dumb deputy to park his car like that.Maybe a Lexus came along later and ripped his car door off.

Turn off water supply to pipe.

Get some expanding foam from Lowes, a tin can, a couple hose clamps
and some tin snips. Cut the can to make a sheet metal collar around
the leak, with an inch of overlap and about 3/4'' of clearance all
around the pipe.

Fill the gap between the pipe and the tin with expanding foam, hold
the tin in place until the foam sets.

Do not apply pressure to the pipe for 12 hours.

The state department disagrees with you regarding Santiago:
http://www.state.gov/g/drl/rls/hrrpt/2004/41758.htm

In October, police in Santiago closed down a child pornography ring
that posted explicit photos of young children on the Internet. Police
also closed down bars in Santiago and Montecristi that were being used
for child prostitution.

Plus, we've been hearing about the death of shortwave for soooooo long. I remember people talking about it when I was a kid. Consequently, it's hard for me to take it all too seriously. I've noticed that people now get nostalgic about the cold war days when there was propaganda on every other frequency. However, I remember people *at the time* complaining that all the propaganda stations were *ruining* shortwave. No matter what happens, it seems, "shortwave is dying".

Maybe it's because I listen to a lot of things besides the big broadcasters...I don't know. What I do know is that, on a good night, there's a lot of stuff out there to listen to.

> On the internet, nobody knows you're a jerk.

I measured the potential from the ground at the radio to the hot on the
coax going to the amp, and there is no potential difference. I need to
dig up my 12V positive ground cigarette lighter adapter and check the
amp to the frame. I could have sworn I popped a fuse by having the coax
hit the frame.

The Shortwave Shop in the UK didn't give me an option on the polarity.
I noticed this photo has the positive ground:
http://www.astrosurf.com/lombry/Radio/ala-1530-interface.jpg
Also, the diagrams on the website used to have postive ground, but now
are negative ground.

I guess what I'm leading to is I don't think there was an option, but
rather they changed the design and perhaps gave you a choice in which
version to buy.

Even worse, Washington (where he started his vacation) has about double
the rate of Murder and Rape as NYC.

Seriously, in the ten minutes I happened to catch of the show, he
mentioned touring a cigar company facility. The area around Santiago is
where most of the worlds premium cigars are made.

The old house I lived in,in Carthage had tall vaulted ceilings.Twisted wire with light bulb sockets hanging down from the ceilings.Big fireplace.My grandaddy and his brother built that house back in the 1910's or before.It was the first house in Carthage to have electricity.Had indoor pumbing too with tongue and groove wainscoting on the walls.They don't make them like that anymore.Nowdays the inside walls are junk you can put your hand through if you lean on them too much.

That does not make it a center for child prostitution. In fact, the fact
that the police acted make it quite the opposite.

4162. (OT) Was ? - Rush Limbaugh "Targeted" By The US Custom's Agents ?

DE,

The 'actions' of the US Customs Agents who were involved
in this Incidence are not under Administrative Review.

Inquiries are being made as to whether these Agents "Targeted"
Rush Limbaugh for his Political Beliefs and as such : They may
be subject to administrative action by the US Custom and
Border Protection Agency => http://www.cbp.gov/

Who knows there may even be a US Department of Justice
charge of Violations of Rush Limbaugh's Civil Rights under
the Equal Protection Clause.

Was ? - Rush Limbaugh "Targeted" By The US Custom's Agents ?
- - - Simply Because He Is A Conservative Talk Show Host !

Wake-Up America :
The Seriousness of the Charges Demand an Inquiry !

I'm not a cigar smoker, but from what I've heard, Cuban cigars aren't as
good as they used to be. IIRC it was something to do with not taking
care of the farm land.

- That does not make it a center for child prostitution.
- In fact, the fact that the police acted make it quite
- the opposite.

I had all of my old gunked up iron pipes replaced about ten years ago with plastic PEX.The guys who did the work were all done with it from start to finish in a little over two hours.They said it is the kind of piping that is used in Alaska and it will not freeze.It hardly ever gets cold enough long enough here to freeze any pipes anyway.Now I have to go buy a special crimping tool and crimping rings to repair that leak and any future leaks that might happen.I had checked before with Arender's plumbing store on Highway 80 if they have some sort of repair kit for sale.Old man Arender himself told,You will never get that leak repaired yourself without the proper crimping tool and crimping rings and those crimping tools cost from about $95.00 up to about $150.00.

(OT) : Al Gore and Global Warming
- An Now You Know The Rest Of The Story :o)
- - - Yes It all started long ago . . . with Al Gore
attempting to saying something in a rain forest.

Actually Al Gore got his Ideas on Global Warming from
giving a Speech in a Rain Forest {Where It All Began}
Long Long Ago and Far Far Away !

During the Speech a Warm {Almost Hot} Yellow Rain
Showered Down on Al Gore as He Spoke and He noticed
that it had an Acid Taste and Native People were running
for Cover - He Sensed Danger in the Environment and Feared
that the World was coming to the End.

Flash to Video of Al Gore Doing "The Chicken {Little} Dance"

Source record: 81013

For those of you that may not subscribe, "Electric Radio" magazine for December, 2005, page 25, has an interesting article for making your own version of the scarce and costly Drake FS-4 synthesizer for the Drake 4-line receivers.

It uses an S&S Engineering "DVFO-II",available either as a kit or wired. When completed, this device will provide 1.5-30 MHz coverage for your Drake 4-line receiver.

No connection to Electric Radio or S&S--it just looks like an interesting project that seems quite do-able.

4182. Taliban Moving to Tehran

Message-ID: <12a8llgfcuciu87@corp.supernews.com>
Source record: 81014

Tehran, 29 June (AKI) - Qari Mohammed Yousuf, who was appointed spokesman for the Taliban in October 2005, has told the Tehran-based Fars news agency in an exclusive interview that Afghan militants are preparing a new offensive against the government of Hamid Karzai. "Anarchy reigns in the country and only we can be bring back stability," the spokesman told the news agency, considered close to Iranian president Mahmoud Ahmadinejad.

Mahmoud Ahmadinejad sees Karzai's cabinet as too pro-Western and the US and Western presence is now considered a threat by Tehran, which feels itself surrounded by US troops. This is perhaps why some Taliban leaders have reportedly moved to Iran in the past few weeks.

Az-Zaman quoted Iraqi counter-intelligence sources as saying that fighters were being trained in Lebanon under MOIS supervision and sent via the Iranian border to infiltrate Basra.
...
Among the responsibilities the MOIS has in Iraq is to train and arm extremist militias for attacks on targets designated by Tehran.
...
The report said that Tehran had put aside a billion dollars from state funds for meddling in Iraq.

Iran's Islamic Revolutionary Guards Corps (IRGC) was involved in oil smuggling in Iraq, it said, adding that the IRGC and the MOIS were jointly conducting the operation from a command headquarters in the Iranian border town of Ahwaz.

Iran set to award lucrative gas deal to elite militia

The official said Iranian contractor Ghorb will be awarded a $2.3 billion pact to develop two future phases of Iran's South Pars gas field. Ghorb is an affiliate of the Revolutionary Guards, Iran's elite militia.
...
The Guards, who played a crucial role in the nation's Islamic revolution a quarter-century ago, hold sway over a range of enterprises in Iran, particularly those involving exports and imports.
...
South Pars is believed to be the world's largest gas field.
...
http://intelligence-summit.blogspot.com/2006/06/iran-set-to-award-lucrative-gas-deal.html

Same as the Communist Chinese model - PLA run enterprises.

Never forget the Global Ice Age scare of the 60's-70's.
What tropical island would we all be living on today if we had acted in true
Left-wing/Liberal... haste.

Liberals will bring down America and they seem to be working overtime now to get the job done. The Democrats destroy morality, security, and capitalism. The courts step on and destroy traditional American values.

Listen to Savage and Limbaugh if you want to undo the damage done to you by the liberal main stream media complex.

I got mine long ago, from wellbrook but via the shortwave shop as far as
the credit card went. No wall wart was included (the US wall wart being
the positive ground culprit, and me having no use for the neg gnd UK 220 wall wart),
and I simply used my own existing 12v power supply, which also powers 30 other
devices, with neg ground.

I think the whole thing was driven by the availability to wellbrook of US wall
warts that they considered suitable, there being no other advantage to positive
ground.

And as I say, it isn't really positive ground if you use the wall wart, just
a matter of which way the plug is wired, neither side being ground at all in fact.
You don't want mixed polarity plugs roaming around, though.

As much as I hate to say it, there is a decline in shortwave stations.
I go back to the 60's and 70's when the tropical stations were lots of
fun to log and verify, I have many QSL cards from many low power south
and central American statons and from Africa as well from that era.
But I wont bet that we will see the bands go dead in our lifetime.
At the moment we are at the bottom of a solar cycle and there are days
when certain bands are almost dead, especially on the ham bands and
even so, being a ham myself there is not a day that I get on the air
that I dont make a QSO and when Im not hamming I still have lots of fun
listening on my little R-600 and my listening consists of anything from
SW stations to utilities and hams on SSB, CW or AM so there is plenty
to listen to.

"My only regret with Timothy McVeigh is he did not go to the New York Times Building."

- Ann Coulter

In her most recent Human Events column titled 'This Is Why We Don't Trust Democrats With National Security', Ann Coulter exposes the real truth about 911. The fact is, dimwits like Ann Coulter, who are neither

Democrat nor Republican [they are what you call IDEOLOGUES] have hijacked American foreign policy and they think they can singlehandedly

defeat terrorists.

Osama Bin Laden is winning the game. Pre-911, Ann Coulter's pal, Barbara Olson routinely hogged airtime to talk about Clinton, Lewinsky and Chandra Levy. Their public laundry list did not expose the secret war against terrorism because they wanted to capture all the glory the way they handed it to Reagan when the hostages were released. But their

little, September Surprise went up in smoke -with Barbara Olson. Guess the National Security interests took a back seat to Coulter's obsession,
and that's why we have 911 widows.

I think Ann Coulter and her cohorts ought to be investigated for the strange deaths of JFK Jr., Paul Wellstone and Mel Carnahan, because Ann Coulter said, "liberals are always against America. They are either traitors or idiots, and on the matter of America's self-preservation, the difference is irrelevant." Were all these "traitors" murdered, to preserve America?

Huh???

First and unfortunately, you seem to have committed the age-old
simpleton mistake of "blaming the messenger".

I just gave a simple, *direct* word-for-word quote from the right-wing,
ultra-conservative Wall Street Journal, complete with page and date
reference. Sorry it struck a raw nerve with you, but if the shoe fits,
feel free to wear it.

I will forward your complaint to the WSJ originator of the quote.

Finally, other than slander on your part, what does quoting the WSJ have
to do with making someone a heroin addict? (Gee, by your 'standards',
that must make the original author of the article an addict)...

LOL at the Slow Coward that is too afraid to use his real name and hides
behind his CB handle.

It would seem that your code isn't the only thing that is slow. :-)

By the way, a copy of user manual is available from Redsun website for download. The manual is meant for RP2000 (without preset feature), the export version of the RP2100.

RP2100 is a well-built portatop with FM Stereo/PLL Tuning & AM Dual Conversion. It's by far the best value for money radio from China with good features and loud speaker. For popular usage, it does not come with RDS, DRM, SSB and AM Syn. etc. The preset feature is primitive, a later add-on with 10 stations per bands and it's not dynamic. My FM and SW2 is full but cannot use the remaining from other bands.

For design, very similar BCL3000 with a handle like Sat700, black body with metallic grille for speaker and large LCD display. Friendly design with back lit and sound. Running very well with both AA/D size battery and external DC/AC supply. RP3000 with more advanced features will be out later this year according to co. bulletin board..

Same thing happened to me with a MFJ-1020C from Universal. First they said
they never received my order then it was on backorder from MFJ. After about
a month I cancelled my order and got it from Grove in about a week.

Yeah, this is the one item that needs the special power cord for mobile
use. It's really a pain. What I do is put that cord in a zip lock bag
with the rest of the set-up. However, I had the cord (12V connector)
break in the field and had no spare. Had it been negative ground, I
would have plenty of spares.

Where there is smoke, there is fire. So they stomp on the fire (do a
raid), but the fire is still smoldering. As you can see, the post I
referenced was drom 2004. I found a more recent post that is similar:
----
http://www.state.gov/g/drl/rls/hrrpt/2005/61725.htm
In April DNI dismantled a child prostitution and pornography ring in
Sosua that had posted sexually explicit photos of young children on the
Internet. Police arrested two men. At the request of the attorney
general, police closed down several bars, nightclubs, and "massage
parlors" in Santiago, Santo Domingo, and Boca Chica used for child
prostitution and sexual exploitation of women.

Pretty Good actually
Did I tell you I got a Ten Tec Paragon. It has a general coverage RX.
and all the filters. An excellent ham rig AND a Great swl rx.
Also picked up a Yeasu FT 897 which I am using for PSK31.
Have you ever gotten your ham ticket? If not you ought to. Then we could
bypass all this usenet BS. ;-)
73,
Chuck

All over the third world there are cases like this, and pedophiles are uncovered inside the US and Europe all the time. The Dominican Republic is hardly a focal point of this sort of activity, as you seem to be trying to say. The good thing is that the Dominican Republic acts rapidly when such cases are discovered.

Of course, keep in mind that the clientele that creates the demand is mostly American and European.

- Where there is smoke, there is fire.
- So they stomp on the fire (do a raid), but the fire is still
smoldering.
- As you can see, the post I referenced was drom 2004.
- I found a more recent post that is similar:
------------
- http://www.state.gov/g/drl/rls/hrrpt/2005/61725.htm
- In April DNI dismantled a child prostitution and pornography
- ring in Sosua that had posted sexually explicit photos of
- young children on the Internet. Police arrested two men.
- At the request of the attorney general, police closed down
- several bars, nightclubs, and "massage parlors" in Santiago,
- Santo Domingo, and Boca Chica used for child prostitution
- and sexual exploitation of women.
.
Miso - You Be Up-in-Smoke anbout Child Prostitution and
Child Pornography - For Real Thtat's For Sure Dude ! ~ RHF

Miso - Now your Repeated Comments about the the good
people of the Dominican Republic smack of Racism [.]
Why Don't You Talk {Write} About Real Problems In Your
Own City - County - State ? Just To Easy To Talk About
"Those People" ! You Clearly Got A Thing For Those Nasty
Evil People in the Dominican Republic - Who mostly Speak
French and are predominantly Black.

Hello Miso - The Roots of Child Prostitution and Child Pornography
exists right in your home town - Why arn't you working to put the
```

people who take the Sex Trips in Jail - Instead of trying to put down the Dominican Republic and the good honest people who live in that country.

Miso - Point of Fact - Child Prostitution and Child Pornography knows NO Color Barrier : White, Brown, Yellow or Black - All Races have individuals who Exploit and Abuse Children.

God {Allah} Bless All The Children Of The World - Amen ~ RHF

The Supreme Court {Minus Diana Ross :o} Did Its Job.

President George "W" Bush tried to do his Job as
Commander-in-Chief - Since Congress Failed to Act.

Now the US Congress needs to Act to Define the Rules how
these Terrorist should be processed by a Military Tribunal.

Congress has Failed to Make the Laws Required to Deal
with these Terrorists [.] Congress Needs To Act - Now !
- - - The Democrats should not be allowed to Stall, Delay and
Stop this Urgently Need Legislation from becoming Law.

-IF- Congress Fails to Act within 90 Days - Then President
George "W" Bush should Issue and Order as Commander-
in-Chief to :
* Hold and Interrogate All Terrorists for 72 Hours
* Then either Turn Them Over to Their Home or
Host Country.
* Or Hold a Time-of-War General Court-Martial within
48 Hours and ensure that they are Execute within 48 Hours.

and that's the way i see it ~ RHF

Actually, JFK, JR was not instrument rated. A novice pilot, in a hurry, flying VFR into IFR conditions is as close to suicide as drawing a Peacemaker on a man armed with Winchester.

Let's be honest, the only thing you can repair is some old piece of junk tube rig because the technology is so simple. You could never repair a modern rig, because like most dinos, you have ever evolved into the new technology because out of fear, you cling to what is old and comfortable.

4268. SSB Or AM For Commercial Aero Usage Question ?

Newsgroup: rec.radio.shortwave
Date: 2006-06-30 15:13:14 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <X-KdncoV1NgVojjZnZ2dnUVZ_tydnZ2d@comcast.com>
Source record: 81101

Hello:

Re commercial aero. usage:

Saw this on a link:

"Aeronautical SSB Frequencies
Aircraft crossing the Atlantic still use SSB to communicate with the
National Air Traffic Service (NATS) in Shannon, Ireland and..."

I thought that all commercial aero. stuff was always just plain AM.

Can someone please explain when (and if) SSB is used rather than plain AM
for commercial air communications for
air to ground, and vice versa ?

Or, is this a very out of date link, perhaps ?

Thanks,
Bob

VHF air band is AM. Long distance communication (HF) to aircraft is USB.

Geoff.

- F Y I -

The RF Systems MLBA-MK4 Antenna is a longer 66 foot (20 meters)
version of our improved Longwave and Medium Wave Antenna.
It Covers 0.1-30 MHz. Can be erected Horizontally or Vertically.
However, the Optimum Configuration is shown above (sloping at
about 30°).
http://www.universal-radio.com/catalog/sw_ant/4067.html

The MLBA-MK4 Antenna System includes a Stainless Steel MLB Balun,
Stainless Steel Antenna Wire, End Insulators, Nylon Rope and 49 feet
(15 m) of RG58 Coaxial Cable plus and unattached PL259 Plug.
This Antennas is for Receive Only.

Hi everyone just joined group looking for some help
Can anyone help me out with scancat gold for windows to control my nrd
345?
I contacted scancat gold direct and was advised to purchase a full null
modme cable
to use with my nrd. However no matter which port I select I cannot get
pc and radio to communicate with each other, help anyone plaease. I
only have demo version of scancat
but it is fully functional i think apart from time limitations

thanks in advance

between the Caribbean Sea and the North Atlantic Ocean, West of
the Dominican Republic
Ethnic Groups : Black 95%, Mulatto and White 5%
Languages : French and Creole
Religion : Roman Catholic 80%, Protestant 16%
-Note- Roughly Half of the Population practices Vodou {Voodoo}
http://en.wikipedia.org/wiki/Vodou

Regardless - Miso's repeated comments about the Dominican
Republic {and therefore the Dominican People} still come across
as Racist. - - - As 'if' there were no Child Prostitution and Child
Pornography right here in the USA and most likely right in His
Home Town. With the majority of the Exploiters and Abusers
{Sex Vacationers} being from the USA and Europe. Just like the
majority of Sex Vacationers to the country of Thailand are from
Japan. http://www.cia.gov/cia/publications/factbook/geos/th.html

I'm in agreement with you here. It is more a case of poverty, i.e. a
lack of real alternatives, that keeps such operations in business.

Waste is nothing new, but the Bushies rename everything. There was
nothing wrong with "General Accounting Office", so why change it to
"Government Accountability Office". Same mission, new name.

4289. Redsun RP2100 Radio PDF File {English} Owner's Manual

Newsgroup: rec.radio.shortwave
Date: 2006-06-30 20:08:35 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1151698114.980018.198650@y41g2000cwy.googlegroups.com>
Source record: 81122

JA,

The eBay Seller "Liypn" sent me a PDF File of 'his' "Copy
Righted" Translation of the Redsun RP2100 Owner's Manual.
- - - He Cautions Against Posting It On The Net - - -

Redsun RP2100 => http://tinyurl.com/k8ael

About - "Liypn"
http://cgi3.ebay.com/ws/eBayISAPI.dll?ViewUserPage&userid=liypn
http://stores.ebay.com/V-COM-COLLECTIONS
http://feedback.ebay.com/ws/eBayISAPI.dll?ViewFeedback&userid=liypn&iid=
http://feedback.ebay.com/ws/eBayISAPI.dll?ViewFeedback&userid=liypn
http://search.ebay.com/_W0QQfgtpZ1QQfrppZ25QQsassZliypn

FWIW - Removed the Batteries from the Radio and happen to
notice that the Clock Numbers were still showing and changing
with the time. This lasted for about 90 Minutes.

I will be posting the Ten FAQs for the Redsun RP2100 Radio
'here' on Rec.Radio.Shortwave One-per-Day as I read through
the Manual and Check-Out the Radio.

that's all for now ~ RHF
.
.
. .

Tell that to Letterman, dimwit. Going around with a chip on your
shoulder, are you? Or are you simply trying to hide behind political
correctness?

Either way, you're just another sorry excuse-maker who doesn't take
responsibility for his own difficulties. Wanna hear what Bill Cosby
thinks about your type?

what excuse does he need to receive and use a legal drug in a legal
manner?
> Wanna hear what Bill Cosby
> thinks about your type?
Cosby has nothing about me

you are just a hypocrite you want to probe into my life Rush life and
then decry other for te SAME thing

BTW google stop somebody from geting traped byt you fool games with
headers

God help us if the NYT keeps printing about our covert operations during
time of war.

How does this do on the SW bands? Everything I've read thus far regarding
SW antennas indicate that verticals are not a good idea . . .

LOL, I knew that was coming.
I don't get the old group but I remember the arguement. I miss the old
group. <Burp>

:-)

Cherished...it worked like a charm..so why get rid of it?

I don't believe you can have a decent vertical whip for shortwave
without an amp, as the amp also provides an impedance match.

For SW you are better off spending the $33.50 on a UNUN and horizontal
wire antenna.
